(b) Your most recent net invoice or delivered cost of the product or products. Itemize all components of your net invoice or delivered cost.

(c) The most recent manufacturer's list price, or factory retail price, if any, for the product or products.

(d) Your proposed price determining method and the classes of purchasers to which ceiling prices determined by this method are to apply.

(e) An explanation of the reasons why you cannot determine the ceiling price for the product or products under sections 3, 4 or 5 of this regulation.

After receipt of this report, the Office of Price Stabilization may approve, disapprove or establish a different price determining method by order, or request further information. You may use your proposed price determining method until such time as the Office of Price Stabilization shall notify you that this method has been disapproved.

The price determining method established in the manner set forth above will be applicable to all subsequent sales and deliveries. However, if the Office of Price Stabilization determines that prices determined in accordance with this method are not in line with ceiling prices established by this regulation, it may disapprove this method at any time. This disapproval will not be retroactive as to any deliveries made before the date of such disapproval.

SEC. 7. *Charges that may be included in ceiling prices.* You may include in your ceiling prices determined under this regulation the charges or costs listed in this section only if your base period records or invoices show that you made such charges during the base period. You may not include in your ceiling prices any costs or charges not authorized by this section.

(a) *Transportation charges.* You determine your charges for transportation by one of the following methods:

(i) You may use the same transportation charge which you had in effect just prior to the issuance of this regulation.

(ii) You may determine your transportation charge in the same manner employed by you during your base period. For example, if it was your practice during your base period to make a uniform charge for transportation equal to the cost of rail freight whatever your method of transportation employed, you may continue to do so; if it was your practice during your base period to markup freight charges, you may continue to do so.

(iii) You may charge the same transportation charge made to you by the manufacturer who has prepaid transportation costs.

(b) *Taxes.* (i) The charge for Federal excise tax on the new automobile and on items of optional equipment must not exceed the amount invoiced to you by the manufacturer.

(ii) You may charge to the customer an amount equal to the expense for any State and local taxes imposed on the sale of the new automobile or upon your gross receipts and likewise on the sale of any items of optional equipment supplied with the automobile.

(iii) You may only make these charges if such was your practice during your base period. Thus, if they were included in your delivered cost when you calculate your ceiling price under section 4 you may not again add a charge for taxes.

(c) *Delivery and handling.* You may make the same charge for delivery and handling as you made for the same make, line and series in your base period.

(d) *Other base period charges.* You determine any other charges you made to the purchaser during your base period by using the same charge you had in effect during your base period. If you determined a charge as a percentage of some other charge or cost, you may continue that practice.

(e) *Installation charges.* If you are required to install any item of optional equipment, the number of hours charged for the installation of this equipment must not be greater than the number of hours upon which you customarily based your charges during your base period. You may use labor rates not in excess of those prevailing on March 15, 1951.

SEC. 8. *Charges that cannot be determined under section 7.* This section is applicable if you were not in business during either of the base periods described in section 2, or if you did not perform a particular service of installation during any one of those periods, or if you do not qualify as a transferee under section 9 of this regulation.

(a) *Delivery and handling.* If you are unable to determine your delivery and handling charges in accordance with section 7 (c) of this regulation you must use the delivery and handling charge of the nearest dealer handling the same make of automobile.

(b) *Installation charges.* If you are unable to determine your installation charges in accordance with section 7 (e) of this regulation you must propose a method to the District Office servicing your area in accordance with the following formula:

(1) State the number of hours required to perform those services necessary to install the optional equipment and multiply by your current labor rate.

(2) State the amount of materials and multiply by the current price therefor.

(3) Set forth the sum of the products of 1 and 2.

(4) The result is your proposed installation charge.

Your application must contain your name and address and the name of the item of optional equipment for which you are applying for an installation charge.

(c) *Action on applications.* Charges proposed under this section may be approved, disapproved, or modified by OPS or further information may be required concerning these charges. You may use your proposed charges until such time as you are notified that the charges have been disapproved.

SEC. 9. *Transfers of business or stock in trade.* If the business, assets or stock in trade are sold or otherwise transferred after the issue date of this regulation, and the transferee carries on the business, or continues to deal in the same make of automobiles, in an establishment separate from any other establishment previously owned or operated by him, the ceiling prices of the transferee shall be the same as those to which this transferor would have been subject to if no such transfer had taken place, and his obligation to keep records sufficient to verify such prices shall be the same. The transferor must either preserve and make available, or turn over to the transferee, all records of transactions prior to the transfer which are necessary to enable the transferee to comply with the provisions of this regulation.

SEC. 10. *Notice to be posted.* (a) If you are a retail dealer you must keep posted in a conspicuous place on your premises where new passenger automobiles are offered for sale a notice not less than 18" x 24" in size, legibly stating for each make and body style in each line or series of each new automobile offered for sale, the section of this regulation under which the ceiling prices are determined, your base period, and the following information:

(1) An identification of the make, body style, and line or series.

(2) If you use section 3 of this regulation, your manufacturer's published list price, or factory retail price.

(3) Your ceiling price established under sections 3, 4, or 5 including standard equipment.

(4) The charge for transportation, if any.

(5) The charge for Federal excise tax, if any. Where the manufacturer's invoice combines the charge for transportation and the charge for Federal excise tax, these charges may be combined for posting purposes.

(6) The charge for State or local taxes on sales or delivery, if any;

(7) Charge for delivery and handling, if any.

(8) An itemization of any other charges.

SEC. 11. *Invoices.* Whenever you make any sale after the effective date of this regulation, you must prepare an invoice in duplicate, one copy of which is to be given to the purchaser within 7 days and the other copy is to be retained in your records.

This invoice must set forth the following information unless any item of the following is contained in any other document which is delivered to the purchaser within 7 days from the date of the sale and of which a copy is retained in your files.

(a) Date of sale.

(b) Make of automobile, model, line or series, body style, motor number or serial number.

(c) Selling price including standard equipment, charges included in your selling price such as transportation charge, delivery and handling, Federal excise tax, selling price of each item of optional equipment, including charge for installation, if any, each of which shall be separately stated if you determine your ceiling price under section 3 of this regulation.

(d) State and local taxes.

(e) An itemization of the charges for other services or items of other equipment requested (undercoating, glazing, seat covers, etc.).

(f) Finance charges, name of finance company, method of payment and amount of cash received.

(g) If a used car is traded in as part payment for the new automobile, the invoice must show the following information with respect to the car traded in:

(1) Make of automobile traded in, model, line, series and body style.

(2) Allowance made on the trade in.

(3) Motor number or serial number.

SEC. 12. *Adjustable pricing.* Nothing in this regulation shall be construed to prohibit your making a contract or offer to sell an automobile or item of optional equipment at the ceiling price in effect at the time of delivery. You may not, however, deliver or agree to deliver an automobile at a price to be adjusted upward in accordance with any increase in the ceiling price after delivery.

SEC. 13. *Petition for amendment.* If you wish to have this regulation amended you may file a petition for amendment in accordance with the provisions of Price Procedural Regulation 1, Revision 2.

SEC. 14. *Records.* (a) The provisions of the General Ceiling Price Regulation and Ceiling Price Regulation 83 as issued on October 15, 1951 are hereby continued in effect insofar as they apply to the preparation and preservation of such "current records" as you were required to make covering sales between January 26, 1951, and the effective date of this regulation.

(b) You must preserve for two years the invoices required to be retained in section 11 of this regulation and all other records showing your costs, prices and charges for automobiles and items of optional equipment sold subject to this regulation, and any costs which serve as bases for determining your ceiling price.

SEC. 15. *Prohibition against dealing in new automobiles at prices above ceiling.* (a) After the effective date of this regulation, regardless of any contract or other obligation, no person may sell or deliver any new automobile or item of optional equipment at a price higher than the ceiling price permitted by this regulation.

(b) No person in the course of trade or business may buy or receive a new automobile or item of optional equipment at a price higher than the ceiling price permitted by this regulation.

(c) No person may agree, offer, solicit, or attempt to do any of the acts prohibited in paragraphs (a) and (b) of this section.

SEC. 16. *Evasion.* (a) No person subject to this regulation may charge directly or indirectly a price above the applicable ceiling price in connection with any sale of a new automobile or item of optional equipment. Any device by which you increase your total realization on the sale of a new automobile or item of optional equipment over the ceiling price established by this regulation is an evasion of the regulation.

(b) *Specific practices.* The following practices are specifically but not exclusively, among the practices prohibited by paragraph (a) of this section and are itemized here only to lessen the frequency of interpretative inquiries which experience indicates are likely to be raised under the general evasion provision:

(1) Requiring the purchaser as a condition of sale to make payment over a period of time, or to finance the purchase through any particular lending agency.

(2) Requiring the purchaser to purchase optional equipment, accessories, parts or services or any other commodity in order to receive delivery of a new automobile. However, no authorization is necessary for equipment which is required by State law to be installed on a new automobile before delivery.

(3) Requiring the purchaser or any other person to trade in or otherwise transfer to the seller or his designee an automobile in order to obtain delivery on a new automobile whether as part of the same transaction or as a separate transaction.

(4) Granting less than a reasonable allowance for automobiles received in trade.

(5) Renting or leasing a new automobile under a rental contract with an option to buy at an agreed valuation which, together with the amount paid for the rental, is higher than the applicable ceiling price of the new automobile plus any service charge made during the period of rental or at the time the rental contract is entered into.

(6) Using an increase in finance charges as a mode of increasing the price of an automobile or item of optional equipment.

SEC. 17. *Violations.* (a) Persons violating any provisions of this regulation are subject to the criminal penalties, civil enforcement actions and suits for treble damages provided for by the Defense Production Act of 1950, as amended.

(b) The penalty provisions of CPR 83 as issued October 15, 1951 and the penalty provisions of the General Ceiling Price Regulation insofar as they apply to violations of SR 5 to the GCPR are hereby continued insofar as they apply to violations of SR 5 to the GCPR and CPR 83 during the period those regulations were in effect.

(c) It shall be a violation to make a charge for any item of optional equipment for which the purchaser did not make a request in writing. However, no prior authorization from the purchaser is necessary for equipment which is required by State law to be installed on a new automobile before delivery.

SEC. 18. *Definitions*—(a) *Automobiles.* (1) A "passenger automobile" is an automobile designed primarily for the carriage of passengers, whether intended for private, commercial or other use, including its standard equipment, manufactured in the United States and having a seating capacity of less than 11 persons, and propelled by an internal combustion engine.

(2) "New Automobile" is an automobile, including its standard equipment, that has never been sold at retail or has not been used prior to sale by the manufacturer. However, a demonstrator or a dealer owned executive car is new during the time the model is currently being sold by the manufacturer or until 120 days after the date of the public announcement by the manufacturer of a superseding model, or until the introduction of a superseding line or series and provided that the franchised dealer sells the automobile with a new car guarantee.

(3) "Make" of an automobile indicates the manufacturer thereof, and bears the manufacturer's trade or brand name. A manufacturer may produce more than one "make", in which case different trade names are used to differentiate the several makes.

(4) "Line or series" refers to a subgroup of a make bearing a title, trade name, or other classificatory designation.

(5) "Body style" means one of the various body types used in any line or series of each make of automobile.

(6) "Model" refers to the year in which the automobile was produced or its year designation.

(7) "Counterpart model" or "Counterpart" means a replacement of a body style or line or series in a make of automobile by the manufacturer, not de-

viating substantially from the specifications of the previous model of the automobile. It also refers to a replacement of an item of optional equipment not deviating substantially from the specifications of the previous model of the item.

(b) *Class of purchaser or purchaser of the same class.* These terms refer to the practices adopted by the seller in setting different prices for sales to different purchasers or kinds of purchasers (for example, wholesale distributors, retail dealer, Government agency, fleet owner) or for purchasers located in different areas or for purchasers of different quantities.

(c) *Dealer.* A dealer is any person other than the manufacturer who is generally engaged in the business of selling new automobiles.

(d) *Delivered costs.* This term means the net invoice cost plus any separately stated charges which are paid by you.

(e) *Delivery and handling.* This term, sometimes also referred to as "new-car make ready", means those services commonly performed in connection with the sale of a new car by a franchised dealer.

(f) *Director of Price Stabilization or Director.* This term applies to any official (including officials of regional or district offices) to whom the Director of Price Stabilization by order delegates a function, power or authority referred to in this regulation.

(g) *Distributor.* A distributor or wholesale distributor is any person who is generally engaged in the business of selling new automobiles at wholesale to retail dealers (this includes master dealers).

(h) *Net invoice cost.* This term refers to your invoice cost less any discount you took or could have taken. It does not include separately stated charges, such as freight, taxes, etc., except that the manufacturer's excise taxes may be included.

(i) *Optional equipment.* This term refers to any equipment which is not standard equipment defined in this section and which is sold by the manufacturer. This term also includes extra or special equipment.

(j) *Reasonable allowance.* This term means an allowance for a used automobile which is traded in on a new automobile that is fairly related to the current market value of the used automobile.

(k) *Sales.* (1) A "sale at retail" means any sale to an ultimate user.

(2) A "sale at wholesale" means any sale to a reseller.

(3) "Sale or sell". This term includes sell, supply, dispose, barter, exchange, transfer and deliver, and contracts and offers to do any of the foregoing. The term "buy" and "purchaser" shall be construed accordingly.

(l) *Standard equipment.* This term refers to any equipment listed in Appendix "A" for the several makes and models sold by the manufacturer.

(m) *You.* "You", means the person subject to this regulation. "Your" and "yours" are construed accordingly.

Effective date. This regulation shall become effective August 23, 1952.

NOTE: The record keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

AUGUST 18, 1952.

APPENDIX A

1. Items of standard equipment on 1952 model automobiles manufactured by the General Motors Corporation:

(a) CHEVROLET PASSENGER AUTOMOBILES

Description	Body styles on which included
Arm rest, front doors	All Deluxe.
Ash receiver, front	Do.
Ash receiver, rear	All Deluxe (except Station Wagon).
Cigar lighter, front	All Deluxe.
Carpet insert, front floor mat	Do.
Rubber front floor mat	All Specials.
Clock, spring wind	All Deluxe.
Door locks	All body styles.
Dome light switch, automatic	All Deluxe.
Gravel pads, rear fender, rubber	All Specials.
Gravel pads, rear fender, steel	All Deluxe.
Guards, bumper, front and rear	All body styles.
Horn ring	All Deluxe.
Mirror, rear view, inside	All body styles.
Seat cushion, Foamtex	All Deluxe (front only on Station Wagon).
Solenoid starter, on dash	All body styles.
Wheel shield, rear	All Deluxe.
Windshield wipers, dual	All body styles.
Visor, left hand	Do.
Visor, right hand	All Deluxe.
Jack and jack handle	All body styles.

(b) PONTIAC PASSENGER AUTOMOBILES

Arm rest, front doors	All body styles.
Arm rest, rear doors	Do.
Ash receiver, front compartment	Do.
Ash receiver, rear compartment	Do.
Cigarette lighter, front compartment	Do.
Clock, electric	Deluxe body styles.
Light, courtesy	Convertible and Catalina body styles.
Light, dome automatic	All body styles.
Mouldings, fender	Deluxe body styles.
Mouldings, reveal	All body styles.
Pump, vacuum booster	Do.
Shields, gravel, rear fender, rubber	Standard body styles.
Shields, gravel, rear fender, steel	Deluxe body styles.
Sun visor, right hand, inside	Deluxe body styles.
Switch, starter dash	All body styles.
Tires, 6-ply	Do.
Wheel, steering deluxe	Station Wagon body styles.
Wheel, disc	Deluxe body styles.
Jack and jack handle	Deluxe body styles except Deluxe Station Wagon.
Tool kit (includes screw driver and pliers)	All body styles.
	Do.

(c) OLDSMOBILE PASSENGER AUTOMOBILES

Arm rest, front and/or rear door or rear quarter	All body styles.
Arm rest, rear compartment center	98 4-door Sedan.
Ash receiver, front seat	All body styles.
Ash receiver, rear seat	Do.
Ash receiver, chrome die-cast and package compartment door.	Do.
Bumper and bumper guards	All Holiday Coupes and 98 4-door Sedan.
Carpet front and rear to match interior color combination.	All Super 88 body styles except Holiday Coupe and 98 Convertible Coupe.
Rubber simulated carpet front and rear to match interior color combination.	All Deluxe 88 body styles.
Gray rubber simulated carpet front and rear	All except Convertible Coupes.
Coat hooks	All 98 body styles.
Clock, electric	All body styles.
Compartment, lined luggage	Do.
Compartment, instrument panel package	98 Holiday and 98 Convertible Coupes.
Door, hydraulically operated, rear quarter windows and front seat adjuster.	All body styles.
Glass, safety plate	All except Convertible Coupes.
Headlining, cloth	All body styles.
Horns, dual	Do.
Lighter, cigarette	All except Holiday Coupes and 98 4-door Sedan.
Dome lamp (single)	All Holiday Coupes and 98 4-door Sedan.
Side roof courtesy lamps (two)	

(d) BUICK PASSENGER AUTOMOBILES—continued

Description	Body styles on which included
Automatic transmission	70 series.
Hydraulic control, window and seat	46C–56C–76C–76R.
Two-tone paint, standard combinations	72R–76R–76MR.
Arm rest, front and rear	50–70 series.
Arm rest, front and rear	41D–45R–46C–48D.
Arm rest, rear seat center	51–52–72R.
Ash receivers, front compartment	All body styles.
Ash receivers, rear compartment	Do.
Cigarette lighter, front compartment	Do.
Cigarette lighter, rear compartment	51–52–72R.
Cleaner air, oil bath	All body styles.
Filler, oil	Do.
Light, dash compartment or map	Do.
Light, dome automatic	Do.
Moldings, fender side	Do.
Pump, vacuum booster	Do.
Robe rail or cord	50–70 series (except Estate Wagons).
Robe rail or cord	41D–48D.
Shields, gravel, rear fender, steel	All body styles.
Sun visor, right and left inside	Do.
Tires, oversize	Do.
Directional signals	50–70 series.
Jack and jack handle	All body styles.

(e) CADILLAC PASSENGER AUTOMOBILES

Rear seat center arm rest	All except 61 Coupe and 62 Convertible.
Back-up lights	All body styles.
Cigarette lighter, rear compartment	All except 61 Coupe, 62 Coupe and 62 Convertible.
Electric clock	All body styles.
Foamtex cushion seats	Do.
Trunk light	Do.
Rear-view nonglare mirror	Do.
Two-tone paint	All except 62 Convertible.
Rear wheel cover panels	All body styles.
Directional signals	Do.
Deluxe steering wheel	Do.
Outside rear-view mirror	62 Convertible.
Hydra-Matic	62 and 60 Special.
Automatic window lifts and seat controls	60 Special, Coupe De Ville, Convertible Coupe, and all 75 body styles.
Jack and jack handle	All body styles.

2. Items of standard equipment on 1952 model automobiles manufactured by the Ford Motor Company:

(a) FORD PASSENGER AUTOMOBILES

Arm rests	All Customline, all Crestline.
Ash tray, rear seat	Do.
Cigar lighter	Do.
Clock, stem wind	Do.
Foam rubber seat cushions	All Mainline, all Customline, all Crestline.
Jack, bumper	Do.
Tires, 5 (8.00 x 16, 4-ply)	All Mainline, except Ranch Wagon.
Tires, 5 (7.10 x 15, 4-ply)	Mainline Ranch Wagon.
Tires, 5 (8.70 x 15, 4-ply)	All Customline except Country Sedan and all Crestline except Country Squire.
Tires, 5 (7.10 x 15, 6-ply)	Customline Country Sedan and Crestline Country Squire.
Visor, interior, left hand	All Mainline, all Customline, all Crestline.

(b) BUICK PASSENGER AUTOMOBILES

Windshield washer	70 series.
Nonglare mirror	Do.
Safety group:	
Back-up lights	Do.
Inner bumper grille guards	Do.
Parking brake warning light	Do.
Accessory group:	
Electric clock	50–70 series.
License plate frame	Do.
Wheel covers	70 series.
Luggage compartment light	50–70 series.
Wheel trim rings	50 series.
Deluxe steering wheel	50–70 series.
Foamtex cushion seat	Do.

(c) OLDSMOBILE PASSENGER AUTOMOBILES—continued

Description	Body styles on which included
Lights, dual stop	All body styles.
Lights, parking	Do.
Locks, rear doors adjusted for free-wheeling	All 4-door Sedans.
Mirror, rear view, inside	All body styles.
Mirror, rear view, outside, left-hand	All Convertible Coupes.
Moulding, windshield reveal	All body styles.
Moulding, rear window reveal	All except Convertible Coupes.
Moulding, belt	All body styles.
Moulding, front fender and front door side	Do.
Moulding, rear fender and/or rear door	Do.
Moulding, front and rear door and roof quarter loop-reveal.	98 4-door Sedan.
"Ninety-Eight" Script/or "88" numerals, rear door or fender, stainless steel.	All except Deluxe 88.
Pads, foam rubber seat cushion	Do.
Panels, rear fender	All 98 body styles.
Plates, door sill aluminum	All body styles.
Pump, vacuum booster	Do.
Rings, wheel trim, stainless steel	All 98 body styles.
Roof bows, chrome plated	All Holiday Coupes.
Robe rail, front seat back	All except Deluxe 88.
Sash, rear fender stainless steel above rear door and/or rear fender moulding and deluxe tail lamps.	Do.
Seat, front, adjustable manually	All except 98 Holiday and Convertible Coupe.
Shield, gravel, rubber	Deluxe 88.
Shield, gravel, stainless steel	All except Deluxe 88.
Signal, turn	All 98 body styles.
Starter, key starter	All body styles.
Straps, assist, 2-door models only	Deluxe 88 2-door and Super 88 2-door.
Top, black or tan or green	All Convertible Coupes.
Top, hydraulically operated	Do.
Upholstery, all leather	Do.
Upholstery, combination cloth and leather	All Holiday Coupes.
Upholstery, gray basket weave corded cloth	All Deluxe 88.
Upholstery, two-tone trim, deluxe	All Super 88 except Holiday and Convertible Coupes and 98 4-door Sedan.
Ventipanes, front window	All body styles.
Ventipanes, rear window, 4-door sedans	All 4-door Sedans.
Visors, sun, two interior	All body styles.
Washer, windshield	All 98 body styles.
Wheel, steering deluxe and horn ring	Do.
Wheels, five wheels and five low-pressure tires	All body styles.
Wipers, dual	Do.
Windshield, single-piece, curved	Do.
Jack and jack handle	Do.

(d) BUICK PASSENGER AUTOMOBILES

Windshield washer	70 series.
Nonglare mirror	Do.
Safety group:	
Back-up lights	Do.
Inner bumper grille guards	Do.
Parking brake warning light	Do.
Accessory group:	
Electric clock	50–70 series.
License plate frame	Do.
Wheel covers	70 series.
Luggage compartment light	50–70 series.
Wheel trim rings	50 series.
Deluxe steering wheel	50–70 series.
Foamtex cushion seat	Do.

(A) FORD PASSENGER AUTOMOBILES—continued

Description	Body styles on which included
Visor, interior, right hand	All Customline, all Crestline.
Wheel, spare	All Mainline, all Customline, all Crestline.
Windshield wipers, dual	Do.

(B) MERCURY PASSENGER AUTOMOBILES

Arm rests	All body styles.
Ash tray, rear seat	Do.
Cigar lighter	Do.
Clock, electric	Do.
Fender shields	Special Custom 4-door Monterey Coupe and Convertible.
Foam rubber seat cushions	All body styles.
Jack, bumper	Do.
Rocker panel molding	Special Custom 4-door Monterey Coupe and Convertible.
Tires, 5 (7.10 x 15, 4-ply)	All Mercuries except 6-passenger Station Wagon and 8-passenger Station Wagon.
Tires, 5 (7.60 x 15, 4-ply)	6-passenger Station Wagon and 8-passenger Station Wagon.
Vacuum booster pump	All body styles.
Visor, interior, left hand	Do.
Visor, interior, right hand	Do.
Wheel, spare	Do.
Windshield wipers, dual	Do.

(C) LINCOLN COSMOPOLITAN PASSENGER AUTOMOBILES

Arm rests	All body styles.
Ash tray, rear seat	Do.
Automatic transmission	Do.
Cigar lighter	Do.
Clock, electric	Do.
Directional signals	Do.
Fender shields	Do.
Foam rubber seat cushions	Do.
Jack, bumper	Do.
Oil bath air cleaner	Do.
Oil filter	Do.
Rocker panel molding	Special Custom 4-door Capri Coupe and Convertible.
Tires, 5 (8.00 x 15, 4-ply)	All Lincoln Cosmopolitans except Convertible.
Tires, 5 (8.20 x 15, 4-ply)	Convertible.
Vacuum, booster pump	All body styles.
Visor, interior, left hand	Do.
Visor, interior, right hand	Do.
Wheel cover	Do.
Wheel, spare	Do.
Windshield wipers, dual	Do.

3. Items of standard equipment on 1952 model automobiles manufactured by the Chrysler Corporation:

(A) PLYMOUTH PASSENGER AUTOMOBILES

Air cleaner, oil bath	All.
Ash receiver, instrument panel	Do.
Ash receiver, back of front seat	4-door Sedans, Cranbrook only.
Ash receiver, rear side quarters	Cranbrook Coupes.
Arm rests, front doors	Savoy and Cranbrook.
Bumper, front and rear	All.
Bumper guards front (2)	All except 3-passenger and 2-door.
Bumper jack and wheel wrench	All.

(A) PLYMOUTH PASSENGER AUTOMOBILES—continued

Description	Body styles on which included
Door holding checks, all doors	All.
Door cylinder lock, front doors	Do.
Front sway eliminator	All except 3-passenger and 2-door.
Floor mat, front compartment, rubber	All except Convertible Coupe and Belvedere.
Floor mat, rear compartment, rubber	Concord body styles only.
Floor mat, rear compartment, wale rubber	Cambridge and Cranbrook except Convertible Coupe and Belvedere.
Floor carpet, front and rear	Convertible Coupe and Belvedere.
Floor cover, luggage compartment	All.
Glove box	Do.
Glove box lock	Cranbrook and Savoy.
Horn, single	All Concords except Savoy.
Horns, dual	Cambridge, Cranbrook and Savoy.
Horn blowing ring	Cranbrook and Concord Savoy.
Mirror, inside rear view	All.
Oil filter, by-pass type	Cambridge and Cranbrook only.
Rear leaf springs with covers	Suburban and Savoy.
Rear leaf springs with inner liners	All except Suburban and Savoy.
Shock absorbers, 1 inch	All.
Safety glass throughout	All except Convertible Coupe, rear window.
Sun visor, single inside	3-passenger and 2-door.
Sun visor, dual	All except 3-passenger and 2-door.
Tires, 6.40 x 15, 4-ply black, (5)	3-passenger and 2-door.
Tires, 6.70 x 15, 4-ply black, (5)	All except 3-passenger and 2-door.
Tail lamps, dual	All.
Windshield wipers, dual electric	Do.

(B) DODGE PASSENGER AUTOMOBILES

Air cleaner, oil bath	All.
Ash receiver, front compartment instrument panel	Do.
Ash receiver, rear compartment	All except Wayfarer.
Arm rests, front doors	Do.
Arm rests, rear	All except Wayfarer and Convertible.
Airfoam seat cushion, front	All except Wayfarer.
Airfoam seat cushion, rear	Coronet except Convertible, Diplomat, and Sierra.
Automatic choke	All.
Automatic dome light	All except Wayfarer and Convertible.
Bumpers, front and rear	All.
Bumper jack and wheel wrench	Do.
Coat hooks, pair, rear compartment	Coronet Sedans and Club Coupe only.
Cowl vent, screened	All.
Crankcase floating oil intake filter	Do.
Door cylinder locks, dual, front door, outside	All except Wayfarer.
Fluid coupling	All.
Floor mat, front, rubber	Do.
Floor mat, rear compartment carpet	All except 3-passenger Coupe and Sierra.
Glove box with lock	Coronet only.
Glove box with latch	All except Coronet.
Grab handles, pair, rear compartment	Coronet Sedans only.
Gas tank fuel filter	All.
Horns, dual	All except Wayfarer.
Horn, one	Wayfarer.
Horn blowing ring	All except Wayfarer.
Hub caps (4)	All.
Ignition key operated solenoid starter	Do.
Map light	Diplomat and Convertible only.
Mirror, inside, rear view	All.
Oil filter, engine replaceable cartridge	All except Wayfarer.
Remote control gear shift on outside of steering column	All.

(B) DODGE PASSENGER AUTOMOBILES—continued

Description	Body styles on which included
Rear spring inner liners	Wayfarer only.
Resistor type spark plugs	All.
Shock absorbers, 1-inch	Do.
Sway eliminator, front	Do.
Spring covers, rear	All except Wayfarer.
Safety glass	All except Convertible rear window.
Sun visors, dual	All except Wayfarer.
Splash-proof ignition system	All.
Tires, low-pressure (5) 6.70 x 15 4-ply black	Wayfarer.
Tires, low-pressure (5) 7.10 x 15 4-ply black	All, except Wayfarer, Sierra, and 8-passenger.
Tires, low-pressure (5) 7.60 x 15 4-ply black	Sierra only.
Tires, low-pressure (5) 8.20 x 15 4-ply black	8-passenger only.
Tail lamps, dual	All.
Wheels, 15 x 4.50 (5) safety rim	Do.
Windshield wipers, dual electric	Do.
Clock, electric	Coronet Convertible.
Cigar lighter	Do.

(C) DE SOTO PASSENGER AUTOMOBILES

Ash receiver on instrument panel	All.
Ash receiver in back of front seat	All sedans.
Ash receiver in back of front seat (2)	Suburban.
Ash receiver in rear quarter (2)	De Luxe Club Coupe and Custom 4-door sedan, Club Coupe and Sportsman.
Ash receiver in rear arm rest (2)	8-passenger sedan.
Back-up lights, dual	All.
Bumpers, front and rear	Do.
Bumper guards, front and rear	Do.
Bumper jack, wheel wrench, wheel block, pliers (1), screw driver (1).	Do.

Door cylinder locks, front doors	Sedan.
Door cylinder locks, front and rear doors	Limousine.
Dual back up lights	All.
Electric clock (2)	Do.
Fluid-matic drive transmission	Do.
Fluid torque drive	Do.
Full flow oil filter	Do.
Front and rear seat folding center arm rests	8-passenger Sedan.
Grab handles	All.
Glove box with lock	Do.
Glove box, rear (2)	Do.
Horn blowing ring	Do.
Hydraguide power steering	Do.
Heater	Do.
Inner leaf springs	Do.
Inside sun visors (2)	Do.
Oil bath air cleaner	Do.
Outside rear view mirrors (2)	Do.
Plastic steering wheel, 18-inch	Do.
Radio and antenna	Do.
Rear seat folding center arm rest	Limousine.
Rubber pad in front compartment	Do.

(F) CHRYSLER CROWN IMPERIAL PASSENGER AUTOMOBILES—Continued

Description	Body styles on which included
Resistor type spark plugs	All.
Shock absorbers, 1-inch	Do.
Stainless steel wheel covers (4)	Do.
Safety glass throughout	Do.
Splash proof ignition system	Do.
Safety crash pad	Do.
Tires, 8.90 x 15, 6-ply (5)	Do.
Undercoating	Do.
Wheels, 5, 15 x 6.50 with safety rims	Do.

4. Items of standard equipment on 1952 model automobiles manufactured by the Studebaker Corporation:

(A) STUDEBAKER CHAMPION PASSENGER AUTOMOBILES

Arm rests, front and rear	All DeLuxe and Regal.
Arm rests, rear	Custom 5-passenger Coupe.
Ash receiver, instrument panel	All.
Ash receiver, rear seat (2)	DeLuxe 5-passenger Coupe and all Regal.
Bumpers, front and rear with vertical guards	All.
Cap, 7-pound pressure radiator	Do.
Caps, moisture proof rubber spark plug	Do.
Carpet, front floor	Convertibles.
Carpet, rear floor	All Regal.
Choke, automatic	All.
Deflectors, rubber rear fender gravel	All DeLuxe and Regal except Convertibles.
Deflectors, bright metal rear fender gravel	Convertibles.
Frame, bright metal windshield	Soft top Convertible.
Frame, bright metal window	Convertibles.
Glass, safety throughout	All.
Grille, bright metal radiator	Do.
Grille, bright metal radio	All DeLuxe and Regal.
Hood lock, dash controlled	All.
Horn, one	All Custom.
Horn, two	All DeLuxe and Regal.
Horn ring, bright metal half circle	All Regal.
Instruments, illuminated by black light	All.
Instrument panel, painted	Do.
Knob, plastic, glove compartment door	All Custom.
Knob, bright metal glove compartment door, with lock.	All DeLuxe and Regal.
Latches, rotary door	All.
Light, dome, painted rim	All Custom.
Light, dome, bright metal	All DeLuxe and Regal except soft top convertible.
Light, dome, door operated	All DeLuxe and Regal except soft top convertible.
Light, dome, manually operated	All Custom.
Light, map, on instrument panel, door operated	All DeLuxe and Regal.
Light, parking, painted rims	All Custom.
Light, parking, bright metal rims	All DeLuxe and Regal.
Light, sealed beam head, painted rims	All Custom.
Light, sealed beam head, bright metal rims	All DeLuxe and Regal.
Light, tail, painted rims	All Custom.
Light, tail, bright metal rims	All DeLuxe and Regal.
Locks, right and left hand door	All.
Mat, rubber, front floor	All except Convertibles.
Mat, rubber, rear floor	All Custom and DeLuxe.
Mat, rubber, trunk	All.
Mirror, inside rear view	Do.
Moulding, bright metal drip	Hard top Convertible.
Moulding, bright metal body sill	All Regal.
Moulding, door trim panel	All DeLuxe and Regal.

(A) STUDEBAKER CHAMPION PASSENGER AUTOMOBILES—continued

Description	Body styles on which included
Moulding, bright metal rear window reveal	Regal 2- and 4-door Sedans and hard top Convertible.
Moulding, bright metal trim above windshield	Hard top Convertible.
Moulding, rubber window reveal	All Custom.
Moulding, bright metal window reveal	All DeLuxe and Regal except Convertibles.
Moulding, painted window garnish	All except Convertibles.
Moulding, bright metal window garnish	Convertibles.
Moulding, painted windshield garnish	All.
Moulding, bright metal windshield reveal	All Regal except Convertibles.
Moulding, bright metal body belt	Hard top Convertible.
Ornaments, glove compartment door	All DeLuxe and Regal.
Ornaments, hood	Do.
Pads, leatherette door kick	All Custom and DeLuxe.
Pads, foam rubber seat	All Regal.
Paint, solid colors, standard	All except hard top Convertible.
Paint, two-tone, standard combination	Hard top Convertible.
Panel moulding, bright metal door kick	All Regal.
Parking brake release, push button	All.
Plates, plastic inside door handle escutcheon	All except Convertibles.
Plates, bright metal inside door handle escutcheon	Convertibles.
Shield, frame rear	All DeLuxe and Regal.
Shock absorbers, front and rear	All.
Springs, coil, front	Do.
Springs, leaf, rear	Do.
Stabilizers, front	Do.
Steering wheel, three-spoke	Do.
Straps, assist	DeLuxe and Regal 2-door Sedans and 5-passenger Coupes.
Tires (5), 6.40 x 15, 4-ply, black	All.
Top, electrically operated	Soft top Convertible.
Trim, woolen bedford cord	All Custom.
Trim, pile fabric	All DeLuxe.
Trim, woolen flat cloth	All Regal except Convertibles.
Trim, nylon bedford cord and leatherette combination.	Convertibles.
Vent wings, painted front door	All Custom and DeLuxe.
Vent wings, bright metal front door	All Regal.
Visor, sun, one	All Custom.
Visor, sun, two	All DeLuxe and Regal.
Wheels (5), disc painted	All.
Window, rear, one-piece	All 2- and 4-door Sedans.
Window, rear, divided	All 5-passenger Coupes.
Window, rear, three-piece	Hard top Convertible.
Windshield, one-piece	All.
Windshield wiper, dual vacuum	Do.

(B) STUDEBAKER COMMANDER PASSENGER AUTOMOBILES

Arm rests, front and rear	All.
Arm rest, center rear seat	Land Cruiser.
Ash receiver, rear seat (2)	All except Regal 2-door Sedan and Land Cruiser.
Ash receiver, rear seat (1)	Regal 2-door Sedan and Land Cruiser.
Ash receiver, instrument panel	All.
Bumpers, front and rear with vertical guards	Do.
Cap, 7-pound pressure radiator	Do.
Caps, moisture proof rubber spark plug	Do.
Carpet, front floor	All State.
Carpet, rear floor	Do.
Choke, automatic	All.
Clock	Land Cruiser.
Deflectors, rubber rear fender gravel	All Regal.
Deflectors, bright metal rear fender gravel	All State.

(B) STUDEBAKER COMMANDER PASSENGER AUTOMOBILES—continued

Description	*Body styles on which included*
Filter, oil	Land Cruiser.
Frame, bright metal windshield	Soft top Convertible.
Frame, bright metal window	Convertibles.
Glass, safety throughout	All.
Grille, bright metal radiator	Do.
Grille, bright metal radio	Do.
Hill holder	Do.
Hood lock, dash controlled	Do.
Horn, two	Do.
Horn ring, bright metal half circle	Do.
Instruments, illuminated by black light	Do.
Instrument panel, painted	Do.
Knob, bright metal glove compartment door with lock.	Do.
Latches, rotary door	Do.
Light, dome, bright metal	All except soft top Convertible.
Light, dome, door operated	Do.
Light, map, on instrument panel, door operated	All.

Ornaments, hood	All.
Ornaments, radio grille	Do.
Pads, carpet door kick	All Regal.
Pads, foam rubber seat	All.
Paint, solid colors, standard	All except hard top Convertible.
Paint, two-tone, standard combination	Hard top Convertible.
Panel moulding, bright metal door kick	All State.
Panel, painted front seat back with ash receiver	Land Cruiser.
Parking brake release, push button	All.
Plates, plastic inside door handle escutcheon	All except Convertibles and Land Cruiser.
Plates, bright metal inside door handle escutcheon	Convertibles and Land Cruiser.
Robe cord	Land Cruiser.
Shield, frame rear	All.
Shock absorbers, front and rear	Do.
Springs, coil, front	Do.
Springs, leaf, rear	Do.
Stabilizers, front	Do.
Stabilizers, rear	Land Cruiser.
Steering wheel, three-spoke	All.

(B) STUDEBAKER COMMANDER PASSENGER AUTOMOBILES—continued

Description	*Body styles on which included*
Straps, assist	All except Convertibles.
Tires (5), 7.10 x 15, 4-ply, black	All.
Top, electrically operated	Soft top Convertible.
Trim, nylon bedford cord and leatherette combination.	Convertibles.
Trim, woolen broadcloth	All Regal.
Trim, nylon bedford cord or two-tone broadcloth	Land Cruiser.
Trim, nylon terrace weave	All State except Convertibles.
Vent wings, bright metal front door	All.
Vent wings, bright metal rear door	Land Cruiser.
Visor, sun, two	All.
Wheels (5), disc painted	Do.
Window, rear, one-piece	All 2- and 4-door Sedans.
Window, rear, divided	All 5-passenger Coupes.
Window, rear, three-piece	Hard top Convertible.
Windshield, one-piece	All.
Windshield wiper, dual electric	Do.

5. Items of standard equipment on 1952 model automobiles manufactured by the Hudson Motor Company:

(A) HUDSON PASSENGER AUTOMOBILES

Tires, 5 blackwall, 15 x 7.10	All lines and series, except Commodore Six, Hornet, and Commodore Eight Convertibles.
Tires, 5 blackwall, 15 x 7.60	Commodore Six, Hornet, and Commodore Eight Convertibles.
Sunvisors, two	All lines and series.
Clock, electric	Hornet and Commodore Eight.
Clock, mechanical	Wasp and Commodore Six.
Cigar lighter	Hornet and Commodore Eight.
Foam rubber seats	Do.
Bumpers, front and rear	All lines and series.
Two front bumper guards	Pacemaker and Wasp.
Three front bumper guards	Commodore Six, Hornet, and Commodore Eight.
Two rear bumper guards	Pacemaker.
Three rear bumper guards	All lines and series, except Pacemakers.
Arm rests, right and left front and rear doors	All lines and series.
Arm rests, center rear compartment	Commodore Six, Hornet, and Commodore Eight.
Assist straps	Pacemaker and Hornet.
Metal hand grips	All lines and series, except Pacemaker.
Ash receivers, front, one	Pacemaker and Wasp.
Ash receivers, front (3)	Commodore Six, Hornet, and Commodore Eight.
Ash receivers, rear (2)	Pacemaker and Wasp.
Ash receivers, rear (2)	Commodore Six, Hornet, and Commodore Eight.
18-inch deluxe steering wheel with horn ring	All lines and series, except Pacemaker.
Front fender ornaments	All lines and series, except Pacemaker.
Large hub caps	All lines and series, except Pacemaker and Wasp.
Small hub caps	Pacemaker and Wasp.
Side panel ornamentation	All lines and series, except Pacemaker.
Dual windshield wipers	All lines and series.
Standard tool equipment (jack and wheel hub wrench).	Do.
Standard body colors (choice of five)	Pacemaker.
Standard body colors (choice of seven)	All lines and series, except Pacemaker.

6. Items of standard equipment on 1952 model automobiles manufactured by the Kaiser-Frazer Corporation:

(A) KAISER PASSENGER AUTOMOBILES

Description	*Body styles on which included*
Arm rests, door	All Kaisers.
Ash receiver, front	Do.
Ash receiver, rear	Do.
Bumper guards (bridge)	Do.
Cigarette lighter, front	Do.
Dual windshield wipers	Do.
Fender nameplates	Do.
Foam rubber seat cushions	All Kaisers "Manhattan" and "Virginian Deluxe."
Glove box light	Do.
Glove box lock	Do.
Hood ornament	All Kaisers.
Horn ring, chrome	All Kaisers "Manhattan" and "Virginian Deluxe."
Ignition switch and starter combined (illuminated).	All Kaisers.
Mouldings, belt line (under side windows)	All Kaisers "Manhattan" and "Virginian Deluxe."
Mouldings, instrument panel	Do.
Mouldings, interior door trim	Do.
Mouldings, rear wheel opening cover	Do.
Mouldings, rub rail (along lower part of fenders and doors).	Do.
Mouldings, window reveal	All Kaisers.
Mouldings, windshield and rear window	All Kaisers "Manhattan" and "Virginian Deluxe."
Oil filter	All Kaisers.
One piece windshield	All Kaisers "Deluxe" and "Manhattan."
Padded instrument panel	All Kaisers "Manhattan" and "Virginian Deluxe."
Parking lights (2)	All Kaisers.
Pillar lamps (2)	Do.
Spare wheel	Do.
Springs, rear, semielliptic, full covered	All Kaisers except Traveler models.
Springs, rear, two-stage, variable capacity	All Kaiser Traveler models.
Steering column covers	All Kaiser "Manhattan" and "Virginian Deluxe" except those equipped with hydramatic transmission.
Sun visors (2)	All Kaisers.
Tail lights (2)	Do.
Tires (5), 6.70 x 15 x 4-ply	Do.
Tools (jack and wheel wrench)	Do.

(B) HENRY J PASSENGER AUTOMOBILES

Ash receiver, front	"Corsair Deluxe" and "Deluxe Vagabond."
Dual windshield wipers	All Henry J.
Fender nameplates	Do.
Folding rear seat	Do.
Hood ornament	Do.
Mouldings, exterior, windshield and rear window	"Corsair Deluxe" and "Deluxe Vagabond."
Oil bath air cleaner	All Henry J.
Parking lights (2)	Do.
Spare wheel	Do.
Sun visor, left	Do.
Tail lights (2)	Do.
Tools (jack and wheel wrench)	Do.
Tires (5), 5.90 x 15 x 4 ply	Do.

(C) ALLSTATE PASSENGER AUTOMOBILES

Description	*Body styles on which included*
Ash receiver, front	6 cylinder.
Dual windshield wipers	4 and 6 cylinder.
Folding rear seat	Do.
Hood ornament	Do.
Mouldings, exterior, windshield and rear window	6 cylinder.
Oil bath air cleaner	4 and 6 cylinder.
Parking lights (2)	Do.
Spare wheel	Do.
Sun visor, left	Do.
Tail lights (2)	Do.
Tools (jack and wheel wrench)	Do.
Tires (5), 5.90 x 15 x 4-ply	Do.

7. Items of standard equipment on 1952 model automobiles manufactured by the Nash-Kelvinator Corporation:

(A) NASH RAMBLER AUTOMOBILES

Arm rest, front and rear door or rear quarter	All body styles except Station Wagon.
Ash receiver, front seat	All body styles.
Ash receiver, rear seat (dual)	All body styles except Station Wagon.
Bumper and bumper guards	All body styles.
Rubber simulated carpet front inserts	All Custom models.
Gray rubber simulated carpet rear	All body styles.
Clock, electric	All Custom models.
Compartment, instrument panel package	All body styles.
Glass, safety, plate	Do.
Headlining cloth	Do.
Horns, dual	Do.
Lighter, cigarette	Do.
Dome lamp, single	Do.
Lights, dual stop	Do.
Lights, parking	Do.
Mirror, rear view, inside	Do.
Molding, windshield reveal	Do.
Molding, rear window reveal	Country Club hard top only.
Molding, fenders and door sides	All body styles.
"Rambler" and "Super" or "Custom" or "Country Club" script on front fenders.	All models.
Pads, foam rubber seat cushion	Custom models only.
Pump, vacuum booster	Overdrive equipped cars only.
Radio and antenna	All body styles.
Rings, wheel trim, stainless steel	All Custom models.
Seat, front adjustable manually	All body styles.
Signal, turn	All Custom models.
Starter, clutch	All body styles.
Straps, assist	Hard top and Convertible models only.
Top, black or tan	Convertible only.
Top, electrically operated	Do.
Upholstery, vinyl leather	Suburban model only.
Upholstery, twotone	All Custom models.
Ventilators, front window	All body styles.
Visors, sun (two interior)	Do.
Wheel, steering custom and horn ring	All Custom models.
Wipers, dual	All body styles.
Windshield, single piece curved	Do.
Jack and jack handle	Do.
Wheel, five wheels and low pressure tires, size 5.90 x 15, 4 ply.	Super.
Wheel, five wheels and low pressure tires, size 6.40 x 15, 4 ply.	Custom.

(B) NASH STATESMAN AND AMBASSADOR PASSENGER AUTOMOBILES

Arm rest, front and/or rear door or rear quarter	All body styles.
Arm rest, rear compartment center	All Custom models.
Ash receiver, front seat, dual	All body styles.

(B) NASH STATESMAN AND AMBASSADOR PASSENGER AUTOMOBILES—continued

Description	*Body styles on which included*
Ash receiver, rear seat, dual	All body styles.
Bumper and bumper guards	Do.
Carpet, front and rear	All Custom models.
Carpet inserts front, and full rear carpet	All Super models.
Coat hooks	All body styles.
Clock, electric	All Custom models.
Compartment, lined luggage	All body styles.
Compartment, instrument panel package	Do.
Fender guards	All Ambassador models.
Glass, safety plate	All body styles.
Headlining, cloth	Do.
Horns, dual	Do.
Lighter, cigarette	Do.
Dome lamp (single)	Do.
Lights, dual stop	Do.
Lights, parking	Do.
Locks, front and rear doors	All 4-door Sedans.
Mirrors, rear view, inside	All body styles.

Molding, rear window reveal	Do.
Molding, fenders and door sides	Do.
"Ambassador" or "Statesman" and "Custom" or "Super" script on front fenders.	Do.
Pads, foam rubber seat cushion	All Custom models.
Pump, vacuum booster	All overdrive or hydramatic equipped cars.
Rings, wheel trim	All Custom models.
Robe rail, front seat back	Custom 4-door models.
Seat, front adjustable manually	All body styles.
Signal, turn	All Custom models.
Starter, clutch	All body styles.
Straps, assist	2-door models only.
Upholstery, combination cloth and leather	Hard top models only.
Upholstery, two-tone trim	All Custom models.
Ventilators, front window	All body styles.
Ventilators, rear window	All 4-door Sedans.
Visors, sun (two interior)	All body styles.
Wheel, steering custom and horn ring	All Custom models.
Wipers, dual	All body styles.
Windshield, single piece, curved	Do.
Jack and jack handle	Do.
Wheel, five wheels and low pressure tires, size 6.70 x 15, 4 ply.	Statesman, all body styles.
Wheel, five wheels and low pressure tires, size 7.10 x 15, 4 ply.	Ambassador, all body styles.

8. Items of standard equipment on 1952 model automobiles manufactured by the Willys-Overland Motors, Incorporated:

(A) STATION WAGONS

Air cleaner, oil bath type	4 x 473 Station Wagons.
Arm rest, on front door panel	All Station Wagons.
Arm rest, over wheelhouse	Do.
Ash receivers, rear two	Do.
Ash tray, mounted on instrument panel	Do.
Bumper, front and rear, and license tag bracket, front.	Do.
Cap, spare wheel hub	473, 673 and 685 Station Wagons.
Cleaner, air, dry type	473, 673 and 685 Station Wagons.
Cylinder head, option of 7.4 to 1 or 7.8 to 1	All Station Wagons.
Door, key locks	Do.
Door vent window wings	Do.
Glove box, passenger side	Do.
Horn	Do.

(A) STATION WAGONS—continued

Description	*Body styles on which included*
Lamp, dome, front	All station wagons.
Lamps, tail, license and stop (dual)	All Station Wagons except 685.
Lamps, tail, license and stop (single)	685 Station Wagons.
Mirror, rear view, inside mount	All Station Wagons.
Pump, fuel and vacuum combination	Do.
Rear bumper bar extension	Do.
Seat, driver's, 2-passenger, sliding adjustable	Do.
Seats, for four additional passengers, one front, three rear.	Do.
Spare wheel	Do.
Standard tool kit (jack, combination jack handle and lug wrench, screw driver and pliers).	Do.
Standard transmission and 4.88 axle ratio	473, 673 and 685 Station Wagons.
Standard transmission and 5.38:1 axle ratio	4 x 473 Station Wagons.
Sun visors, driver and passenger side	All Station Wagons.
Tires, (5) black wall, 4-ply, 6.70 x 15	473, 673 and 685 Station Wagons.
Tires, (4) black wall, 4-ply, 7.00 x 15, all service tread.	4 x 473 Station Wagons.
Windshield wipers, dual automatic	All Station Wagons.

(B) PASSENGER AUTOMOBILES

Arm rest, front with chrome trim, two	Super DeLuxe and Custom.
Arm rest, rear with chrome trim, two	Do.
Ash receiver, front	All passenger automobiles.
Ash receiver, rear	Super DeLuxe and Custom.
Assist cords, two	Do.
Bumpers, front and rear	All passenger automobiles.
Cigar lighter	Super DeLuxe and Custom.
Cylinder head option (7.6 to 1 ratio or 8.1 to 1 ratio).	Do.
Dome light	Do.
Dome light switch, automatic	Custom.
Emblem, grille and rear deck	All passenger automobiles.
Floor mats, front and rear carpet with jute pad	Custom.
Floor mats, front and rear, rubber, with jute pad	Super DeLuxe.
Floor mats, rubber, front and rear	DeLuxe.
Glove box and lock	Super DeLuxe and Custom.
Horn, single	DeLuxe.
Horn, double	Super DeLuxe and Custom.
Hub caps, small	All passenger automobiles.
Instrument switch	DeLuxe.
Instrument panel, large plastic discs	Super DeLuxe and Custom.
Lock and key, front door, right and left side	All passenger automobiles.
Mirror, rear view, painted, inside	Super DeLuxe.
Mirror, rear view, chrome plated, inside	Custom.
Moulding, belt, chrome plated	Super DeLuxe and Custom.
Moulding, cover, drip moulding, chrome plated	Custom.
Moulding, chrome finish, outside windshield	Super DeLuxe and Custom.
Moulding, chrome finish, outside rear window	Do.
Moulding, chrome plated reveal, bottom outside window.	Custom.
Moulding, chrome plated, door and quarter, garnish valance.	Do.
Moulding, windshield, painted garnish	DeLuxe.
Name plates "Willys", left and right	All passenger automobiles.
Paint, single color	Do.
Rear window, one piece	DeLuxe and Super DeLuxe.
Rear window, three piece	Custom.
Regulator, quarter windows	Super DeLuxe and Custom.
Rubber scuff plates	DeLuxe.
Runway channels, door and quarter, glass stainless steel edge.	Super DeLuxe and Custom.

Vent, wing frame, stainless steel	DeLuxe.
Vent, wing division bar, stainless steel	Do.
Window frames, door and quarter	Super DeLuxe and Custom.
Window frame covers, stainless steel	Do.
Windshield, two piece	All passenger automobiles.
Windshield wiper, dual, chrome blades	Do.

9. Items of standard equipment on 1952 model automobiles manufactured by the Packard Motor Car Company:

(A) PACKARD PASSENGER AUTOMOBILES

Arm rest, front door	All body styles.
Arm rest, rear door	200 Deluxe, 300–400 series.
Arm rest, rear compartment center	300–400 series.
Ash receiver, front compartment	All body styles.
Ash receiver, rear compartment	200 Deluxe, 250–300–400 series.
Automatic transmission	400 series.
Bumper and bumper guards	All body styles.
Cigarette lighter, front compartment	200 Deluxe, 250–300–400 series.
Cigarette lighter, rear compartment	300–400 series.
Cleaner, air, oil bath	250–300–400 series.
Clock, electric	200 Deluxe, 250–300–400 series.
Covers, disc type hub shell	250–300–400 series.
Cushions, seat, foam rubber, front	200 Deluxe, 250–300–400 series.
Cushions, seat, foam rubber, rear	300–400 series.
Deluxe steering wheel	400 series.
Directional signals	200 Deluxe, 250–300–400 series.
Filter, oil	250–300–400 series.
Horns, dual	All body styles.
Jack and jack handle	Do.
Light, courtesy, front and dome rear	Do.
Light, trunk compartment	250–300–400 series.
Light, glove compartment	200 Deluxe, 250–300–400.
Louvre, fender	250–400 series.
Nonglare mirror	250–300–400 series.
Pad, gravel, rear fender chrome	400 series.
Robe rail, front seat back	200 Deluxe, 250–300–400 series.
Shrouds, fender rear	250–300–400 series.
Tappets, valve hydraulic	Do.
Two-tone paint	250 series.
Visors, sun, right and left inside	All body styles.
Wheel trim rings, chrome	200 Deluxe series.
Vent wings, front window	All body styles.
Vent wings, rear window	200 Deluxe, 250–300–400 series.

[General Ceiling Price Regulation, Supplementary Regulation 100, Rev. 1]

GCPR, SR 100—ADJUSTMENTS FOR IRON AND STEEL PRODUCTS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Revision 1 to Supplementary Regulation 100 of the General Ceiling Price Regulation is hereby issued.

STATEMENT OF CONSIDERATIONS

This revision of Supplementary Regulation 100 to the General Ceiling Price Regulation increases the ceiling prices of producers of carbon, alloy, and stainless steel mill products in accordance with the directive of the Acting Director of the Office of Defense Mobilization of July 24, 1952. Appropriate action will be taken to permit the same increases for those producers who are signers of the voluntary agreement.

The directive which requires this action having been transmitted to the Office of Price Stabilization by the Administrator of the Economic Stabilization Agency deprives the Office of Price Stabilization and the Director thereof of any independent discretion or authority in connection with steel prices and removes from the Office of Price Stabilization and the Director thereof any policy, control, jurisdiction or determination over the said subject matter. The directive reads as follows:

On June 2, 1952, a strike was called among the employees of the steel-producing industry, resulting in substantially complete suspension of the operations of the industry. As a result of collective bargaining, the issues in the steel strike have now been tentatively settled. It is the position of the steel industry, however, that it is unable to absorb the entire amount of the increase involved.

Steel is vital to major military production programs, such as aircraft, guided missiles, ships, tanks, weapons, ammunition and electronics and communication equipment. Steel is also required for defense-supporting production and basic industrial expansion. The Department of Defense and the Defense Production Administration have advised me that the continued shut-down of steel production would paralyze these and other programs essential to our national defense and to the security of our troops in Korea.

In the light of these factors and in order to carry out the purposes of the Defense Production Act to achieve maximum production to support the developments and maintenance of military strength, acting through the Director of Price Stabilization, you are hereby directed to authorize effective upon resumption of steel production, an increase in ceiling prices to basic steel producers for their carbon iron and steel products (with a proportionate increase for alloy and stainless steel) equivalent to $1.66 per ton of carbon steel plus 70¢ per ton of carbon steel to cover the freight increase authorized by the Interstate Commerce Commission effective on May 2, 1952.

This directive is based upon and limited to the facts of the steel industry.

The above increase of $2.36 per ton of carbon steel is in addition to the increase of 2.6 percent, equivalent to an average of $2.84 per ton of carbon steel, authorized pursuant to the Capehart amendment by the Office of Price Stabilization on April 25, 1952, in Supplementary Regulation 100 to the General Ceiling Price Regulation and letters to signers of the voluntary agreement, making a total increase equivalent to an average of $5.20 per ton of carbon steel. The increase of $2.84 per ton represented the increase in the average cost of producing carbon steel between the second quarter of 1950 and the second quarter of 1951, less the amount by which carbon steel prices actually increased during that period.

In accordance with the terms of the directive of the Office of Defense Mobilization of July 24, 1952, the OPS, with the cooperation of the General Steel Products Industry Advisory Committee, has determined dollars and cents increases for carbon steel and certain alloy steel products by applying the $5.20 per ton increase on a basis proportional to the man-hours required in the production of each product. Under this technique a product with a low number of man-hours is given an increase of less than $5.20 per ton and a product with a high number of man-hours is given an increase of more than $5.20 per ton. However, the increase for all carbon steel products on a dollar-and-cents basis will average $5.20 per ton.

In arriving at the above dollar-and-cents figures for carbon steel products and in verification thereof, the product mix for the last quarter of 1951, as published by the American Iron and Steel

Institute, was used. This procedure appears reasonable in the light of known defense needs for the remainder of the year.

Under the terms of the directive, a proportionate increase in ceiling prices is authorized for alloy and stainless steel and certain carbon steel specialties. By relating the increase of $5.20 per ton, to the average realization on carbon steel of $110.38 per ton this proportion was determined to be approximately 4.7 percent. Because of the large number of individual products which are included in the above categories, it has been necessary to permit producers of these products to increase ceiling prices by this percentage. It is contemplated that a further review and modification of some of these prices may be undertaken by the Agency.

In the formulation of this regulation there has been consultation with industry representatives including the Industry Advisory Committee and representatives of trade associations, to the extent practicable, and full consideration has been given to their recommendations.

In the formulation of this regulation, the Office of Price Stabilization has been relegated to the restricted position of serving as an Agency for merely making mathematical and statistical calculations as to the allocation of steel price increases in accordance with the said directive.

REGULATORY PROVISIONS

Sec.
1. What this regulation does.
2. Persons and products covered.
3. Adjustments in ceiling prices for carbon steel products.
4. Adjustments in ceiling prices for high strength, low alloy steel products.
5. Adjustments in ceiling prices for products in SAE, NES, and other structural alloy grades of steel.
6. Adjustments in ceiling prices for carbon tool steels, alloy tool steels, etc.
7. Adjustments in ceiling prices for stainless steel.
8. Definitions.
9. Rounding adjusted ceiling prices.
10. Incorporation of GCPR provisions.

AUTHORITY: Sections 1 to 10 issued under sec. 704, 64 Stat., as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup., 2101–2110, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR 1950 Supp.

SECTION 1. *What this regulation does.* This supplementary regulation permits a producer of any steel mill products for which ceiling prices are established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation to increase the ceiling prices for such steel mill products to the extent herein set forth.

SEC. 2. *Persons and products covered.* This supplementary regulation applies to you if you are a producer of steel mill products and if your ceiling prices for such products are established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this supplementary regulation. As used in this supplementary regulation, the term "steel mill products" includes the following iron and carbon, stainless, or other alloy steel products of both prime and secondary or rejected quality:

(a) Ingots, blooms, billets, slabs, tube rounds, die blanks, skelp, sheet and tin bars, wire rods, and muck bars.

(b) Structural shapes (including bearing piles) and sheet piling and accessories.

(c) Plates (universal mill, sheared, and floor).

(d) Rails and rail accessories.

(e) Hot rolled bars (including forged, galvanized and wrought iron bars and special sections).

(f) Concrete reinforcing bars (unfabricated).

(g) Cold finished bars.

(h) Sheet and strip, hot rolled and cold rolled.

(i) Tin mill black plate, tin plate, and terne plate.

(j) Tubing: welded, seamless, and drawn.

(k) Tool steel, including drill rod.

(l) Wire rope and strand.

(m) Standard and line pipe, water well tubular products, and couplings (including steel and wrought iron pipe).

(n) Oil country casing, tubing, drill pipe and couplings.

(o) Galvanized, coated, or painted sheet and strip; formed roofing and siding (painted, black, galvanized or lead coated); and valley, ridge roll, and flashing.

(p) Nails (cut and wire, but not including tacks), brads, and fence and netting staples.

(q) Wire, drawn.

(r) Wire bale ties.

(s) Hoops and baling bands.

(t) Wire (barbed and twisted) and wire fence (woven or welded).

(u) Wire netting.

(v) Fence posts (other than fabricated).

(w) Welded and woven wire fabric.

SEC. 3. *Adjustments in ceiling prices for carbon steel products.* (a) If you produce any of the following carbon steel mill products, your ceiling price for this product is your ceiling price established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation plus the applicable amount set forth below for such products.

	Per net ton
(1) Ingots	$2.00
(2) Blooms, billets and slabs—forging	4.50
(3) Blooms, billets, and slabs—rerolling	3.00
(4) Blooms and billets—shell	4.50
(5) Seamless pipe and tube blooms and billets	3.00
(6) Skelp	4.00
(7) Tube rounds	5.50
(8) Wire rods	4.50
(9) Structural shapes, including bearing piles	4.00
(10) Sheet piling	4.50
(11) Plates—sheared and UM	4.00
(12) Plates—floor	4.00
(13) Light rails—60 pounds, or under per linear year	$5.00
(14) Standard rails—over 60 pounds per linear yard	3.50
(15) Track spikes	10.00
(16) Joint bars	4.50
(17) Tie plates	5.50
(18) Hot-rolled bars and special bar sections	5.00
(19) Concrete reinforcing bars—unfabricated	5.00
(20) Cold-finished bars	7.50
(21) Tin plate—electric, per base box	.25
(22) Tin plate—hot dip, per base box	.25
(23) Black plate, per base box	.25
(24) Terneplate, per base box	.25
(25) Hot-rolled sheets	3.50
(26) Cold-rolled sheets	4.50
(27) Enameling sheets	5.50
(28) Galvanized sheets, including formed roofing and siding and valley, ridge roll, and flashing	5.50
(29) Sheets—long terne	5.50
(30) Sheets—all other coated	5.50
(31) Electrical sheets—pole grade	3.50
(32) Electrical sheets—field grade	12.00
(33) Hot-rolled strip	4.50
(34) Hoops, baling bands and cotton ties	8.00
(35) Standard and line pipe:	
(i) Buttweld:	
Black P. E. (3¼ pts.)	6.50
Black T & C (3½ pts.)	7.00
Galvanized P. E. (3½ pts.)	7.00
Galvanized T & C (3¾ pts.)	7.50
(ii) Seamless lapweld and electric weld black:	
2"–4" Nom. P. E. (5¼ pts.)	10.50
2"–4" Nom. T & C (5½ pts.)	11.00
5" Nom. and over P. E. (3 pts.)	6.00
5" Nom. and over T & C (3¼ pts.)	6.50
(iii) Seamless lapweld and electric weld galvanized:	
2"–4" Nom. P. E. (5½ pts.)	11.00
2"–4" Nom. T & C (5¾ pts.)	11.50
5" Nom. and over P. E. (3¼ pts.)	6.50
5" Nom. and over T & C (3½ pts.)	7.00
(36) Oil country goods—seamless, electric weld and lapweld:	
(i) Casing F–25	6.50
(ii) Casing H–40	6.50
(iii) Casing J–55	6.50
(iv) Casing N–80 (Carbon)	9.00
(v) Casing Deepwell	9.00
(vi) Tubing N–40	11.00
(vii) Tubing F–25	11.00
(viii) Tubing J–55	11.00
(ix) Drill pipe—grade D	11.00
(x) Drive pipe	6.50
(xi) Miscellaneous tubular—couplings	33.00
(37) Drawn wire—Acme spring, basic and Bessemer, box binding, buckle, con key, chain, check power, clothes pin, coat hanger, scrapless nut, link, split rivet, tubular rivet, tuning pin, wood screw, welding, strand wire, tying wire, wool wire, pear shape, square, nail wire, pump, stapling (bright all other), bale tie cross head wire, bale tie wire, baling wire, merchant quality, galvanized, annealed, premier spring	7.50
(38) Nails—cut and wire	9.00
(39) Staples	8.00
(40) Wire tacks	22.00
(41) Woven fence	9.00
(42) Welded fence	14.00
(43) Wire netting	14.00
(44) Fence posts, commonly produced by steel mills	8.00
(45) Wire bale ties—coil and loop	9.00
(46) Barbed and twisted wire	8.00
(47) Wire reinforcing mesh—welded precast	14.00
(48) All other wire reinforcing mesh	7.50
(49) Chain link fabric	10.00
(50) Ornamental fence and trellis, commonly produced by steel mills	8.00

	Per net ton
(51) Tubular fence posts and fence rails, commonly made by steel mills	$7.00
(52) Wire rope and cord	31.00
(53) Guard rail strand	15.00
(54) Strand (other than guard rail)	16.00
(55) Wire loops	8.00
(56) Clothes line	10.00
(57) Cold rolled strip, low carbon	9.00
(58) Cold rolled strip, high carbon	17.00
(59) Cold rolled strip, specialties—bag tie, band saw steel, bobby hair pin steel, boning steel, box band, butcher blade steel, camera main spring and camera setter steel, cleat steel, carpet blade steel, diaphragm steel, doctor blade steel, door check steel, feeler and clearance gauge steel, fish tape steel, flapper valve, gong bell, heddle and drop steel, knife and scraper blade steel, lock spring steel, pen steel, pendulum spring steel, pile steel, piston ring and piston ring expander steel, reed steel, rule steel for rulers, sash balance steel, scoring rule steel, side link chain steel, sinker steel, snap spring steel, square blade steel, stitching flat, surgical blade steel, tape line steel, type bar steel, umbrella strip, vibrator reed steel, window regulator steel, tempered strip	31.50

(b) If you produce any of the following carbon steel mill products, your ceiling price for this product is your ceiling price established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation plus an amount to be calculated by multiplying your ceiling base price established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation by the applicable percentage set forth below for such product.

	Percent
(1) Seamless and welded mechanical and pressure tubing	5.5

(c) If you produce any of the following carbon steel mill products, your ceiling price for this product is your ceiling price established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation plus an amount to be calculated by multiplying your ceiling base price plus extras and deductions established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation by the applicable percentage set forth below for such product.

	Percent
(1) Drawn wire—all drawn wire other than that listed above in subparagraph (37) of paragraph (a) of this section	4.7
(2) Steel hardware cloth	4.7
(3) Steel screen cloth	4.7
(4) Wrought iron	4.7
(5) All carbon steel products not otherwise listed in this section	4.7

SEC. 4. *Adjustments in ceiling prices for high strength, low alloy steel products.* If you produce any of the following high strength, low alloy steel mill products, your ceiling price for this product is your ceiling price established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation plus the applicable amount set forth below for such product.

	Per net ton
(a) Ingots, blooms, billets, and slabs	$4.50
(b) Hot-rolled bars	7.50
(c) Structural shapes	6.00
(d) Plates	6.00
(e) Hot-rolled strip	7.00
(f) Hot-rolled sheets	5.50
(g) Cold-rolled sheets	7.50
(h) Galvanized sheets	8.50
(i) Cold-rolled strip	15.00

SEC. 5. *Adjustments in ceiling prices for products in SAE, NES or other structural alloy grades of steel.* (a) If you produce any of the following steel mill products in SAE, NES, or other structural alloy grades of steel, your ceiling price for this product is your ceiling price established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation plus the applicable amount set forth below for such product.

	Per net ton
(1) Ingots	$3.00
(2) Blooms, billets, and slabs	6.00
(3) Structural shapes	7.50
(4) Plates	10.00
(5) Hot-rolled bars	7.50
(6) Cold-finished bars	12.00
(7) Hot-rolled sheets	12.00
(8) Cold-rolled sheets	12.00
(9) Electrical sheets—all alloy grade	12.00
(10) Hot-rolled strip	12.00
(11) Cold-rolled strip—other than razor	28.00
(12) Cold-rolled strip—razor	90.00
(13) Wire	12.00
(14) Tubing N-80	14.00
(15) Drill pipe, Grade E	12.37
(16) Casing, N-80 (Alloy)	9.00

(b) If you produce any of the following steel mill products in SAE, NES, or other structural alloy grades of steel, your ceiling price for this product is your ceiling price established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter ordered issued prior to this regulation plus an amount to be calculated by multiplying your ceiling base price established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation by the applicable percentage set forth below for such product.

(1) Mechanical tubing:

	Percent
(i) Schedule J—hot	5.0
(ii) Schedule J—cold	5.0
(iii) Schedule J—bearing—hot	6.0
(iv) Schedule J—bearing—cold	6.0
(v) Schedule K—aircraft—cold	8.0

(2) Pressure tubing:

	Percent
(i) Schedule B-2—hot	4.7
(ii) Schedule B-2—cold	4.7
(iii) Schedule B-3—hot	5.0
(iv) Schedule B-3—cold	5.0

(c) If you produce any other steel mill products in SAE, NES, or other structural alloy grades of steel, your ceiling price for this product is your ceiling price established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation plus an amount to be calculated by multiplying your ceiling base price plus extras and deductions established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation by 4.7 percent.

SEC. 6. *Adjustments in ceiling prices for carbon tool steel products, alloy tool steel products, etc.* If you produce any carbon tool steel mill products, alloy tool steel mill products, or alloy steel mill products (other than alloy steel mill products listed in sections 4 and 5 of this regulation, and stainless steel), your ceiling price for this product is your ceiling price established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation plus an amount to be calculated by multiplying your ceiling base price plus extras and deductions established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation by 4.7 percent.

SEC. 7. *Adjustments in ceiling prices for stainless steel.* If you produce any stainless steel mill product, your ceiling price for this product is your ceiling price established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation plus an amount to be calculated by multiplying your ceiling base price plus extras and deductions established by the General Ceiling Price Regulation or a supplementary regulation to the General Ceiling Price Regulation issued on or before April 24, 1952, or an individual letter order issued prior to this regulation by 4.7 percent.

SEC. 8. *Definitions*—(a) *Extras and deductions.* As used in this supplementary regulation, the term "extras and deductions" means additions to or deductions from the base price to make adjustments for variations in the products, such as variations in size or other physical characteristics, chemical analysis, processing, quality, or quantity. It does not include any outgoing freight costs or other delivery charges.

(b) *Individual letter order.* As used in this supplementary regulation, the term "individual letter order" means any individual letter or letter order issued over the signature of the Director of Price Stabilization, but it does not include any individual letter or letter order issued pursuant to Supplementary Regulation 100 to the General Ceiling Price Regulation.

SEC. 9. *Rounding adjusted ceiling prices.* You may round any adjusted ceiling price for which an increase is determined under this supplementary regulation by using a percentage figure so that it will be expressed in the nearest cent or fraction of a cent you normally employ. If you elect to round any such ceiling prices you must round all such ceiling prices so as to reflect decreases as well as increases.

SEC. 10. *Incorporation of GCPR provisions.* Any person subject to this supplementary regulation is also subject to all provisions of the General Ceiling Price Regulation not inconsistent with the provisions of this regulation.

Effective date. This revision to Supplementary Regulation 100 shall become effective August 19, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 19, 1952.

[F. R. Doc. 52-9270; Filed, Aug. 19, 1952; 12:00 m.]

Chapter IV—Salary and Wage Stabilization, Economic Stabilization Agency

Subchapter A—Salary Stabilization Board

[General Salary Stabilization Regulation 2, Amdt. 1]

GSSR 2—PROFIT-SHARING AND OTHER BONUSES

REPORTING REQUIREMENTS

STATEMENT OF CONSIDERATIONS

Upon a re-examination of existing reporting and filing requirements, the Salary Stabilization Board has determined that the reporting of increases in a bonus fund due to a change in the number of employees eligible to receive bonuses is no longer necessary for the effective administration of General Salary Stabilization Regulation 2. This amendment is designed to eliminate the existing requirement for the submission of such reports.

AMENDATORY PROVISIONS

Section 10 of General Salary Stabilization Regulation 2 is amended to read as follows:

SEC. 10. *Record-keeping required.* Employers shall keep records sufficient to establish compliance with this regulation. Such records shall be maintained for three years following each calendar year in which bonus payments are made for the purpose of such inspection as the Office of Salary Stabilization may hereafter authorize or require.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

NOTE: The record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Adopted by the Salary Stabilization Board on August 1, 1952.

JUSTIN MILLER,
Chairman.

Approved: August 13, 1952.

ROGER L. PUTNAM,
Economic Stabilization Administrator.

[F. R. Doc. 52-9254; Filed, Aug. 19, 1952; 10:44 a. m.]

[General Salary Stabilization Regulation 4, Revised, Amdt. 1]

GSSR 4—STOCK OPTION AND STOCK PURCHASE PLANS

REPORTS AND RECORD KEEPING

STATEMENT OF CONSIDERATIONS

Upon a reexamination of existing reporting and filing requirements, the Salary Stabilization Board has determined that the filing of relevant documents with the Office of Salary Stabilization is no longer necessary for the effective administration of General Salary Stabilization Regulation 4, Revised. It has also been determined that the submission of the report relating to the grant and exercise of stock options or rights to purchase stock under stock purchase plans can appropriately be made semi-annually rather than quarterly. This amendment is designed to eliminate the filing requirements contained in the regulation and to effect appropriate changes in the reporting and record-keeping requirements.

AMENDATORY PROVISIONS

Paragraph (a) of section 7 of General Salary Stabilization Regulation 4, Revised, is amended to read as follows:

SEC. 7. *Reports and record-keeping.* (a) Every corporation which subsequent to January 25, 1951, granted a stock option to any of its employees, or which may hereafter grant such a stock option, shall keep the following documents as part of its records: (1) The plan (if any), (2) the contract pursuant to which the stock option was granted, and (3) the resolution referred to in paragraph (d) and the warranty provided for in paragraph (f) of section 3 of this regulation. Such documents shall be kept accessible for any inspection authorized by the Office of Salary Stabilization or any governmental department or agency concerned therewith. Not later than August 31, 1952, and semiannually thereafter, each such corporation shall file a report with the Office of Salary Stabilization containing such information pertinent to the grant and exercise of the stock option and in such form as the Office of Salary Stabilization may prescribe.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

NOTE: The record-keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Adopted by the Salary Stabilization Board on August 1, 1952.

JUSTIN MILLER,
Chairman.

Approved: August 13, 1952.

ROGER L. PUTNAM,
Economic Stabilization Administrator.

[General Salary Stabilization Regulation 6, Amdt. 1]

GSSR 6—PENSION PLANS AND DEFERRED PROFIT SHARING AND STOCK BONUS PLANS

FILING AND RECORD-KEEPING REQUIREMENTS

STATEMENT OF CONSIDERATIONS

Upon a re-examination of existing reporting and filing requirements, the Salary Stabilization Board has determined that the filing of relevant documents with the Office of Salary Stabilization is no longer necessary for the effective administration of General Salary Stabilization Regulation 6. This amendment is designed to eliminate all filing requirements contained in the regulation and to provide for the incorporation of appropriate record-keeping requirements.

AMENDATORY PROVISIONS

Section 6 of General Salary Stabilization Regulation 6 is amended to read as follows:

SEC. 6. *Record-keeping required.* An employer who establishes, modifies or extends a new trust or plan authorized under this regulation shall keep, as part of his records, the trust or contract and the plan of which the trust or contract forms a part, together with the ruling from the Commissioner of Internal Revenue that the trust or plan is or continues to be qualified as exempt from federal income tax under the provisions of section 165 (a) of the Internal Revenue Code. Such documents shall be kept accessible for any inspection authorized by the Office of Salary Stabilization or any governmental department or agency concerned therewith.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

NOTE: The record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Adopted by the Salary Stabilization Board on August 1, 1952.

JUSTIN MILLER,
Chairman.

Approved: August 13, 1952.

ROGER L. PUTNAM,
Economic Stabilization Administrator.

[General Salary Stabilization Regulation 7, Amdt. 1]

GSSR 7—SALARIES AND OTHER COMPENSATION FOR PROFESSIONAL ATHLETES

REPORTING REQUIREMENTS

STATEMENT OF CONSIDERATIONS

Upon a re-examination of existing reporting and filing requirements, the Salary Stabilization Board has determined that the reporting requirements contained in General Salary Stabilization Regulation 7 are no longer necessary for the effective administration of the regulation. This amendment is designed to eliminate all existing reporting requirements from the regulation.

AMENDATORY PROVISIONS

General Salary Stabilization Regulation 7 is amended by the deletion of section 7.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

NOTE: The record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Adopted by the Salary Stabilization Board on August 1, 1952.

JUSTIN MILLER,
Chairman.

Approved: August 13, 1952.

ROGER L. PUTNAM,
Economic Stabilization Administrator.

Chapter VI—National Production Authority, Department of Commerce

[CMP Regulation No. 1, Direction 19 of August 18, 1952]

CMP REG. 1—BASIC RULES OF THE CONTROLLED MATERIALS PLAN

DIR. 19—EX-ALLOTMENT ACQUISITION AND USE OF CARBON CONVERSION STEEL

This direction under CMP Regulation No. 1 is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this direction, consultation with industry representatives has been rendered impracticable due to the need for immediate action and because the direction affects many different industries.

REGULATORY PROVISIONS

Sec.
1. What this direction does.
2. Definition.
3. Acquisition and use without submitting application.
4. Acquisition and use pursuant to application submitted and approved.
5. Orders for carbon conversion steel.
6. Disposal of carbon conversion steel.
7. Applicability of other regulations and orders.

AUTHORITY: Sections 1 to 7 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR 1950 Supp.; Sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR 1951 Supp.

SECTION 1. *What this direction does.* This direction establishes a procedure by which persons with authorized production schedules for the manufacture of Class A and B products containing steel may obtain quantities of carbon conversion steel without charging allotment authority received under the Controlled Materials Plan. This procedure is designed to limit the use of the additional authority granted herein to situations where such carbon conversion steel will be produced in excess of the supply of carbon steel available for delivery against other orders.

SEC. 2. *Definition.* As used in this direction, "finished carbon conversion steel" means carbon steel in the forms and shapes indicated in Schedule I of CMP Regulation No. 1, which has been obtained by a person in consequence of such person or some other person having furnished, directly or indirectly, to one or more steel producers or converters, semifinished carbon conversion steel (which is carbon steel in a less-finished form such as, but not limited to, ingots, blooms, billets, slabs, rods, skelp, and hot-rolled sheets in coils) for the express purpose of having such semifinished carbon conversion steel processed into another form indicated in Schedule I of CMP Regulation No. 1.

SEC. 3. *Acquisition and use without submitting application.* Any person who has received an authorized production schedule and a related allotment of carbon steel for the fourth calendar quarter of 1952 or the first calendar quarter of 1953 may, by self-authorization, order for delivery in each of such calendar quarters, with respect to each such authorized production schedule, up to 500 tons of finished carbon conversion steel without charging the related allotment; and use such steel to increase such authorized production schedule: *Provided, however,* That no person who has received an authorized production schedule for a Class B product or products which contains a specific limitation on the number of units which may be produced, shall exceed such unit limitation: *And provided further,* That if his requirements for delivery with respect to any such schedule in any such calendar quarter exceed 500 tons of finished carbon conversion steel, he shall submit an application in accordance with the provisions of section 4 of this direction.

SEC. 4. *Acquisition and use pursuant to application submitted and approved.* (a) Any person who has received an authorized production schedule and a related allotment of carbon steel for the fourth calendar quarter of 1952, or the first calendar quarter of 1953, and who desires to acquire and use, without charging the related allotment, more than 500 tons of finished carbon conversion steel in either of such quarters with respect to any such authorized production schedule, shall submit an application to NPA in accordance with the provisions of paragraph (b) of this section: *Provided, however,* That no such person shall request authorization to order for delivery with respect to any such schedule in any such calendar quarter, without charging the related allotment, a quantity of finished carbon conversion steel which exceeds 40 percent of the tonnage of his allotment of carbon steel for such schedule in such calendar quarter. (For example, if the allotment is 2,500 tons of carbon steel, authorization shall not be requested for more than 1,000 tons of finished carbon conversion steel.)

(b) Each application filed pursuant to paragraph (a) of this section shall be submitted by letter in triplicate to the Iron and Steel Division, National Production Authority, Washington 25, D. C., Ref: Direction 19 to CMP Regulation No. 1. Each application shall set forth the following facts:

(1) The name and address of the plant of the supplier of semifinished carbon conversion steel.

(2) For each such plant, a description of the semifinished carbon conversion steel product (ingot, billet, bloom, slab, etc.).

(3) For each such product, the tonnage by months of shipment.

(4) For each such product, the name and address of each plant providing a finishing facility in the conversion process.

(5) For each such plant (finishing facility) a description of the carbon steel product to be produced in the forms and shapes indicated in Schedule I of CMP Regulation No. 1.

(6) For each such carbon steel product, the tonnage by months of shipment.

(c) NPA will issue authorizations to acquire and use carbon conversion steel pursuant to applications submitted in accordance with the provisions of this section. Any person who receives such an authorization may, subject to the terms and conditions of such authorization, acquire finished carbon conversion steel in the quantities indicated without charging his allotment authority and use such steel to increase his authorized production schedule: *Provided, however,* That no person who has received an authorized production schedule for a Class B product or products which contains a specific limitation on the number of units which may be produced, shall exceed such unit limitation. In appropriate cases NPA may, in such authorization, specify restrictions upon the use of the related allotment authority to prevent increases in demand for certain forms and shapes of carbon steel which are in short supply.

SEC. 5. *Orders for carbon conversion steel.* (a) Any person who is authorized to acquire and use finished carbon conversion steel pursuant to section 3 or section 4 of this direction, may place authorized controlled material orders, without charging his allotment, for such finished carbon conversion steel with the finished conversion steel producer, and such producer may accept and fill such orders if they will not interfere with production and other directives which may be issued from time to time to such steel producer by NPA, or with the acceptance and filling of orders which such

steel producer is required to accept pur-

approved by the Bureau of the Budget in

blooms, billets, slabs, rods, skelp, and

product to be produced in the forms and

(b) An authorized controlled material

tions. Since there is no trade association

steel producer is required to accept pursuant to any regulation or order of NPA. The person ordering such steel shall make his own arrangements for obtaining the semifinished carbon conversion steel with the original ingot producer, or the finished conversion steel producer. In arranging to purchase the semifinished carbon conversion steel from an original ingot producer or an intermediate producer, such person shall furnish to such original ingot producer or intermediate producer a certification in the following form:

Certified under Direction 19 to CMP Regulation No. 1

which shall be signed as provided in section 8 of NPA Reg. 2. This certification shall constitute a representation to the original ingot producer or intermediate producer and to NPA that such person is authorized to place such order under the provisions of this direction to obtain the quantity of semifinished conversion steel covered by the delivery order, for conversion into finished conversion steel, and that he will furnish an authorized controlled material order to the finished conversion steel producer. Notwithstanding the provisions of any NPA regulation or order, a producer of semifinished carbon conversion steel may deliver semifinished carbon conversion steel pursuant to such a certification: *Provided, however,* That such delivery shall not interfere with production and other directives which may be issued from time to time to such steel producer by NPA, or with delivery on orders which such steel producer is required to accept pursuant to any regulation or order of NPA.

(b) An authorized controlled material order placed pursuant to the provisions of paragraph (a) of this section shall contain the same allotment symbol which identifies the allotment that accompanies the authorized production schedule in which the finished carbon conversion steel will be used.

SEC. 6. *Disposal of carbon conversion steel.* If it develops after a person has received delivery of finished carbon conversion steel pursuant to the provisions of this direction that he cannot use such steel for a purpose permitted by this direction, he shall not use or dispose of it except as provided in section 17 (d) of CMP Regulation No. 1.

SEC. 7. *Applicability of other regulations and orders.* The provisions of CMP Regulation No. 1, including the directions and amendments thereto, and of any other NPA regulation and order heretofore issued, are superseded to the extent to which they are inconsistent with the provisions of this direction. A user of controlled material may accept delivery of finished carbon conversion steel acquired pursuant to the provisions of this direction without regard to the inventory provisions of CMP Regulation No. 2, and need not include such steel in computing his inventory for purposes of that regulation. In all other respects, the provisions of all NPA regulations and orders heretofore issued shall remain in full force and effect.

NOTE: All reporting and record-keeping requirements of this direction have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This direction shall take effect August 18, 1952.

NATIONAL PRODUCTION AUTHORITY,
By GEORGE W. AUXIER,
Executive Secretary.

[F. R. Doc. 52-9240; Filed, Aug. 18, 1952; 5:01 p. m.]

[Revised CMP Regulation No. 6, Direction 7 of August 18, 1952]

CMP REG. 6—CONSTRUCTION

DIR. 7—EX-ALLOTMENT ACQUISITION AND USE OF CARBON CONVERSION STEEL

This direction under Revised CMP Regulation No. 6 is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this direction, consultation with industry representatives has been rendered impracticable due to the need for immediate action and because the direction affects many different industries.

REGULATORY PROVISIONS

Sec.
1. What this direction does.
2. Definition.
3. Acquisition and use without submitting application.
4. Acquisition and use pursuant to application submitted and approved.
5. Orders for carbon conversion steel.
6. Exemptions.
7. Disposal of carbon conversion steel.
8. Applicability of other regulations and orders.

AUTHORITY: Sections 1 to 8 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR 1951 Supp.

SECTION 1. *What this direction does.* This direction establishes a procedure by which persons with construction schedules authorized pursuant to Revised CMP Regulation No. 6, or NPA Order M-100, may obtain quantities of carbon conversion steel without charging allotment authority received under the Controlled Materials Plan. This procedure is designed to limit the use of the additional authority granted herein to situations where such carbon conversion steel will be produced in excess of the supply of carbon steel available for delivery against other orders.

SEC. 2. *Definition.* As used in this direction, "finished carbon conversion steel" means carbon steel in the forms and shapes indicated in Table II of Revised CMP Regulation No. 6, which has been obtained by a person in consequence of such person or some other person having furnished, directly or indirectly, to one or more steel producers or converters, semifinished carbon conversion steel (which is carbon steel in a less-finished form such as, but not limited to, ingots, blooms, billets, slabs, rods, skelp, and hot-rolled sheets in coils) for the express purpose of having such semifinished carbon conversion steel processed into another form indicated in Table II of Revised CMP Regulation No. 6.

SEC. 3. *Acquisition and use without submitting application.* Except as provided in section 6 of this direction, any person who has received an authorized construction schedule and a related allotment of carbon steel for the fourth calendar quarter of 1952 or the first calendar quarter of 1953 may, by self-authorization, order for delivery in each of such calendar quarters, with respect to each such authorized construction schedule, up to 500 tons of finished carbon conversion steel without charging the related allotment; and use such steel to increase such authorized construction schedule: *Provided, however,* That if his requirements for delivery with respect to any such schedule in any such calendar quarter exceed 500 tons of finished carbon conversion steel, he shall submit an application in accordance with the provisions of section 4 of this direction.

SEC. 4. *Acquisition and use pursuant to application submitted and approved.* (a) Except as provided in section 6 of this direction, any person who has received an authorized construction schedule and a related allotment of carbon steel for the fourth calendar quarter of 1952, or the first calendar quarter of 1953, and who desires to acquire and use, without charging the related allotment, more than 500 tons of finished carbon conversion steel in either of such quarters with respect to any such authorized schedule, shall submit an application to NPA in accordance with the provisions of paragraph (b) of this section: *Provided, however,* That no such person shall request authorization to order for delivery with respect to any such schedule in any such calendar quarter, without charging the related allotment, a quantity of finished carbon conversion steel which exceeds 40 percent of the tonnage of his allotment of carbon steel for such schedule in such calendar quarter. (For example, if the allotment is 2,500 tons of carbon steel, authorization shall not be requested for more than 1,000 tons of finished carbon conversion steel.)

(b) Each application filed pursuant to paragraph (a) of this section shall be submitted by letter in triplicate to the Iron and Steel Division, National Production Authority, Washington 25, D. C., Ref: Direction 7 to Revised CMP Regulation No. 6. Each application shall set forth the following facts:

(1) The name and address of the plant of the supplier of semifinished carbon conversion steel.

(2) For each such plant, a description of the semifinished carbon conversion steel product (ingot, billet, bloom, slab, etc.).

(3) For each such product, the tonnage by months of shipment.

(4) For each such product, the name and address of each plant providing a finishing facility in the conversion process.

(5) For each such plant (finishing facility) a description of the carbon steel product to be produced in the forms and shapes indicated in Table II of Revised CMP Regulation No. 6.

(6) For each such carbon steel product, the tonnage by months of shipment.

(c) NPA will issue authorizations to acquire and use carbon conversion steel pursuant to applications submitted in accordance with the provisions of this section. Any person who receives such an authorization may, subject to the terms and conditions of such authorization, acquire finished carbon conversion steel in the quantities indicated without charging his allotment authority and use such steel to increase his authorized construction schedule. In appropriate cases NPA may, in such authorization, specify restrictions upon the use of the related allotment authority to prevent increases in demand for certain forms and shapes of carbon steel which are in short supply.

SEC. 5. *Orders for carbon conversion steel.* (a) Any person who is authorized to acquire and use finished carbon conversion steel pursuant to section 3 or section 4 of this direction, may place authorized controlled material orders, without charging his allotment, for such finished carbon conversion steel with the finished conversion steel producer, and such producer may accept and fill such orders if they will not interfere with production and other directives which may be issued from time to time to such steel producer by NPA, or with the acceptance and filling of orders which such steel producer is required to accept pursuant to any regulation or order of NPA. The person ordering such steel shall make his own arrangements for obtaining the semifinished carbon conversion steel with the original ingot producer, or the finished conversion steel producer. In arranging to purchase the semifinished carbon conversion steel from an original ingot producer or an intermediate producer, such person shall furnish to such original ingot producer or intermediate producer a certification in the following form:

Certified under Direction 7 to Revised CMP Regulation No. 6

which shall be signed as provided in section 12 of Revised CMP Regulation No. 6. This certification shall constitute a representation to the original ingot producer or intermediate producer and to NPA that such person is authorized to place such order under the provisions of this direction to obtain the quantity of semifinished conversion steel covered by the delivery order, for conversion into finished conversion steel, and that he will furnish an authorized controlled material order to the finished conversion steel producer. Notwithstanding the provisions of any NPA regulation or order, a producer of semifinished carbon conversion steel may deliver semifinished carbon conversion steel pursuant to such a certification: *Provided, however,* That such delivery shall not interfere with production and other directives which may be issued from time to time to such steel producer by NPA, or with delivery on orders which such steel producer is required to accept pursuant to any regulation or order of NPA.

(b) An authorized controlled material order placed pursuant to the provisions of paragraph (a) of this section shall contain the same allotment symbol which identifies the allotment that accompanies the authorized construction schedule in which the finished carbon conversion steel will be used.

SEC. 6. *Exemptions.* This direction is not applicable to any person engaged in the construction of a recreational, entertainment, or amusement construction project (see Table I of Revised CMP Regulation No. 6).

SEC. 7. *Disposal of carbon conversion steel.* If it develops after a person has received delivery of finished carbon conversion steel pursuant to the provisions of this direction that he cannot use such steel for a purpose permitted by this direction, he shall not use or dispose of it except as provided in section 17 (f) of Revised CMP Regulation No. 6.

SEC. 8. *Applicability of other regulations and orders.* The provisions of CMP Regulation No. 1, Revised CMP Regulation No. 6, and NPA Order M-100, including the directions and amendments thereto, and of any other NPA regulation and order heretofore issued, are superseded to the extent to which they are inconsistent with the provisions of this direction. A user of controlled material may accept delivery of finished carbon conversion steel acquired pursuant to the provisions of this direction without regard to the inventory provisions of CMP Regulation No. 2, and need not include such steel in computing his inventory for purposes of that regulation. Further, no person shall obtain or use any form or shape of finished carbon conversion steel pursuant to this direction if the acquisition or use of such type of form or shape is prohibited by Revised CMP Regulation No. 6 or NPA Order M-100. In all other respects, the provisions of all NPA regulations and orders heretofore issued shall remain in full force and effect.

NOTE: All reporting and record-keeping requirements of this direction have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This direction shall take effect August 18, 1952.

NATIONAL PRODUCTION AUTHORITY,
By GEORGE W. AUXIER,
Executive Secretary.

[F. R. Doc. 52-9241; Filed, Aug. 18, 1952; 5:02 p. m.]

[NPA Order M-69 as Amended August 19, 1952]

M-69—SULFUR

This order as amended is found necessary and appropriate to promote the national defense and is issued pursuant to the authority granted by the Defense Production Act of 1950, as amended. In the formulation of this amended order there has been consultation with industry representatives and consideration has been given to their recommendations. Since there is no trade association in this industry, consultation with trade association representatives was not possible.

This amended order revises NPA Order M-69, as amended February 28, 1952, by making the following changes:

1. The quantity of sulfur each user may hold in inventory under section 8 is increased from a 25-day supply to a 60-day supply.

2. Certain obsolete references to reports are deleted from paragraphs (c) and (d) of section 9.

REGULATORY PROVISIONS

Sec.
1. What this order does.
2. Definitions.
3. Restrictions on use.
4. Restrictions on sales and deliveries.
5. Certification.
6. Directives.
7. Exemption.
8. Limitations on inventory.
9. Records and reports.
10. Request for adjustment or exception.
11. Communications.
12. Violations.

AUTHORITY: Sections 1 to 12 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; Secs. 402, 405, E. O. 10281, Aug. 28, 1951; 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this order does.* This order restricts the quantity of sulfur which any person may use to 90 percent of his use during the calendar year 1950. This restriction applies on a company, rather than a plant, basis. If, however, NPA finds that interplant transfers of sulfur by any company have caused severe maldistribution of any material produced from sulfur, NPA will take appropriate remedial action. In addition, this order prohibits suppliers from delivering sulfur to purchasers who do not furnish written certification of compliance with its provisions.

SEC. 2. *Definitions.* As used in this order: (a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons, and includes any agency of the United States Government or of any other government.

(b) "Sulfur" means elemental sulfur (brimstone) which has been mined, recovered, or otherwise produced, of a purity of 97 percent or greater.

(c) "Supplier" means any person who produces or imports sulfur for sale or for his own use.

(d) "Base period" means the year ended December 31, 1950.

(e) "Toll agreement" means any agreement or arrangement by which title to the material remains vested in a person other than the one processing such material.

(f) "NPA" means the National Production Authority.

SEC. 3. *Restrictions on use.* (a) Subject to the provisions of paragraph (b) of this section, no person shall use sulfur for any purpose during the month of January 1952, or during any calendar

month thereafter, in a quantity by weight in excess of 90 percent of his average monthly use of sulfur for such purpose during the base period.

(b) If in any calendar month a person uses less sulfur than he may use in that month under paragraph (a) of this section, he may use an additional amount during the next succeeding 5 months equal to the difference between the amount authorized and the amount actually used.

(c) In addition to the quantity of sulfur which may be used under paragraph (a) of this section, sulfur mined or recovered by means of facilities or equipment installed and in production no earlier than June 24, 1950, may be used for any purpose (including processing under a toll agreement) during any calendar month. Such sulfur may be used in accordance with this paragraph (c) only by the person who mines or recovers it, or who owns the material from which it is recovered.

SEC. 4. *Restrictions on sales and deliveries.* No person shall sell or deliver sulfur to any other person if he knows, or has reason to believe, that such material is to be used in violation of the provisions of this order, and no person shall purchase or accept delivery of sulfur if such material is to be used in violation of the provisions of this order.

SEC. 5. *Certification.* No person shall sell or deliver more than 20 short tons of sulfur to any other person, and no person shall purchase or accept delivery of sulfur, unless the purchaser furnishes to the seller a signed certification as follows:

Certified under NPA Order M-69

This certification constitutes a representation by the purchaser to the seller and to NPA that delivery of such sulfur may be accepted by the purchaser under this order, and will not be used by the purchaser in violation of the order.

SEC. 6. *Directives.* NPA may, from time to time, issue specific directives concerning the delivery and use of sulfur and, unless otherwise provided therein, such directives will prevail over the provisions of this order.

SEC. 7. *Exemption.* The provisions of paragraph (a) of section 3 of this order shall not apply to the use by any person of no more than 20 short tons of sulfur during any calendar month.

SEC. 8. *Limitations on inventory.* (a) In addition to the provisions of NPA Reg. 1, relating to inventory control, it is considered that a more exact requirement applying to users of sulfur is necessary. No person shall receive sulfur at any plant if his inventory at such plant is, or by such receipt would become, in excess of his requirements for the next succeeding 60 calendar days at his currently scheduled rate and method of operation, or in excess of a practicable minimum working inventory (as defined in NPA Reg. 1), whichever is less.

(b) The provisions of paragraph (d) of section 5 of NPA Reg. 1, relating to seasonal deliveries, shall not apply to sulfur, except that any person whose inventory at any plant does not exceed his requirements for the next succeeding 60 calendar days, and who during the base period regularly received sulfur shipped by vessel or barge in quantities in excess of his requirements for the next succeeding 60 calendar days, may receive sulfur shipped by vessel or barge at such plant without regard to the provisions of paragraph (a) of this section: *Provided,* That after receipt of any such shipment he may not receive any additional delivery of sulfur so long as his inventory continues to exceed his requirements for the next succeeding 60 calendar days.

SEC. 9. *Records and reports.* (a) Each person participating in any transaction covered by this order shall make and preserve, for at least 3 years thereafter, accurate and complete records of receipts, deliveries, inventories, production, and use, in sufficient detail to permit the determination, after audit, whether each transaction complies with the provisions of this order. This order does not specify any particular accounting method and does not require alteration of the system of records customarily used, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals by those persons who, at the time such microfilm or other photographic records are made, maintain such copies of records in the regular and usual course of business.

(b) All records required by this order shall be made available for inspection and audit by duly authorized representatives of the National Production Authority, at the usual place of business where maintained.

(c) Every person who uses more than 20 short tons of sulfur during any calendar month shall file with NPA on or before the fifteenth day of the next succeeding month, a report of his use of sulfur on Forms NPAF-157 and NPAF-158, and shall furnish all other information required by those forms, in accordance with the instructions accompanying those forms.

(d) Every supplier shall file with the Bureau of Mines on or before the tenth day of each month, a report of his sales, production, imports, shipments, and stocks of sulfur during the preceding calendar month on Bureau of Mines' Forms 6-1230-M and 6-1238-M, and shall furnish all other information required by those forms, in accordance with the instructions accompanying those forms.

(e) Persons subject to this order shall make such records and submit such reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139-139f).

SEC. 10. *Request for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that his business operation was commenced during or after the base period, that any provision otherwise works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests for adjustment or exception claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing, by letter in triplicate, and shall set forth all pertinent facts, the nature of the relief sought, and the justification therefor.

SEC. 11. *Communications.* All communications concerning this order shall be addressed to the National Production Authority, Washington 25, D. C., Ref: NPA Order M-69.

SEC. 12. *Violations.* Any person who willfully violates any provision of this order, or any other order or regulation of NPA, or who wilfully furnishes false information or conceals any material fact in the course of operation under this order, is guilty of a crime and upon conviction may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order, as amended, shall take effect August 19, 1952.

NATIONAL PRODUCTION AUTHORITY,
By GEORGE W. AUXIER,
Executive Secretary

[F. R. Doc. 52-9261; Filed, Aug. 19, 1952; 11:38 a. m.]

[NPA Order M-95 as Amended August 19, 1952]

M-95—RAILROAD TRANSPORTATION EQUIPMENT

This order as amended is found necessary and appropriate to promote the national defense, and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this amended order, there has been no consultation with industry representatives because the amendment effects no changes in the reporting practice that has been previously followed.

This amended order revises NPA Order M-95 of January 4, 1952, by changing section 3 (a) to require the report to cover the current and succeeding three quarters.

REGULATORY PROVISIONS

Sec.
1. What this order does.
2. Definitions.
3. Reports.
4. NPA directive action.
5. Request for adjustment or exception.
6. Records and reports.
7. Communications.
8. Violations.

AUTHORITY: Sections 1 to 8 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this order does.* This order applies particularly to producers of railroad transportation equipment, and makes provision for obtaining essential information pertaining to the production or delivery of such transportation equipment in order to assure that orders for such equipment will be filled to meet the needs of the national defense program.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons, and includes any agency of the United States or any other government.

(b) "Railroad transportation equipment" means locomotives, railroad freight cars, and industrial cars, of the type set out in Schedule A of this order. Items listed in Schedule A include all of the products contained under a single product code classification number as listed in the NPA Official CMP Class B Product List, except as otherwise expressly indicated in that schedule.

(c) "Producer" means any person engaged in the production of new railroad transportation equipment or who operates a plant for the purpose of rebuilding or redesigning railroad transportation equipment. It does not include persons engaged in normal maintenance or repair operation.

(d) "NPA" means the National Production Authority.

SEC. 3. *Reports.* (a) Not later than the fifteenth day of the first month of each calendar quarter, a producer, unless otherwise directed by NPA, shall file with NPA a report of his proposed production and delivery of railroad transportation equipment for the current and succeeding three quarters in the manner prescribed by Form NPAF-150. The first such quarterly report shall be filed not later than January 15, 1952.

(b) Not later than the fifth day of each calendar month, a producer, unless otherwise directed by NPA, shall file with NPA a report of his actual deliveries for the preceding monthly period in the manner prescribed by Form NPAF-151. The first such monthly report shall be filed not later than February 5, 1952.

SEC. 4. *NPA directive action.* With respect to the production or delivery of railroad transportation equipment, NPA, upon request of a claimant agency, may direct the modification or alteration of a producer's production or delivery schedule to meet the requirements of national defense. Such direction may be made in the discretion of NPA without regard to the provisions of NPA Reg. 2 or to the preferences created by rated orders.

SEC. 5. *Request for adjustment or exception.* Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that such provision works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests for adjustment or exception claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation of labor and resulting unemployment that would impair the defense program. Each request shall be in writing by letter in triplicate, and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor.

SEC. 6. *Records and reports.* (a) Each person participating in any transaction covered by this order shall make and preserve, for at least 3 years thereafter, accurate and complete records of receipts, deliveries, inventories, production, and use, in sufficient detail to permit the determination, after audit, whether each transaction complies with the provisions of this order. This order does not specify any particular accounting method and does not require alteration of the system of records customarily used, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals by those persons who, at the time such microfilm or other photographic records are made, maintain such copies of records in the regular and usual course of business.

(b) All records required by this order shall be made available for inspection and audit by duly authorized representatives of the National Production Authority, at the usual place of business where maintained.

(c) Persons subject to this order shall make such records and submit such reports to the National Production Authority as it shall require, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139-139F).

SEC. 7. *Communications.* All communications concerning this order shall be addressed to the National Production Authority, Washington 25, D. C., Ref: M-95.

SEC. 8. *Violations.* Any person who wilfully violates any provision of this order or any other order or regulation of NPA or who wilfully furnishes false information or conceals a material fact in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

NOTE: All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This order as amended shall take effect August 19, 1952.

NATIONAL PRODUCTION AUTHORITY,
By GEORGE W. AUXIER,
Executive Secretary.

SCHEDULE A OF NPA ORDER M-95

Product Class Code	Product
3741111	Locomotives, steam, railroad road service, except turbine.
3741121	Locomotives, straight-electric railroad road service.
3741130	Locomotives, Diesel-electric A units, railroad road service.
3741140	Locomotives, Diesel-electric B units, railroad road service.
3741151	Locomotives, steam turbine, railroad road service.
3741155	Locomotives, gas turbine, railroad road service.
3741211	Locomotives, steam switching.
3741221	Locomotives, straight-electric switching.
3741230	Locomotives, Diesel-electric switching.
3741311	Locomotives, Diesel-mechanical (except mining).
3741331	Locomotives, electric, industrial (except mining).
3741351	Locomotives, steam, industrial (except mining).
3741371	Locomotives, gasoline-mechanical (except mining).
3742211	Cars, box, freight train.
3742215	Cars, flat, freight train.
3742221	Cars, stock, freight train.
3742225	Cars, gondola, freight train.
3742231	Cars, hopper, freight train.
3742238	Cars, tank, freight train.
3742241	Cars, refrigerator, freight train.
3742245	Cars, caboose, freight train.
3742251	Cars, rail, industrial, not for passenger use (except mining, motor rail-gang, section, inspection-railroad).

Chapter XXI—Office of Rent Stabilization, Economic Stabilization Agency

[Rent Regulation 3, Amdt. 18 to Schedule B]

RR 3—HOTELS

SCHEDULE B—SPECIFIC PROVISIONS RELATING TO INDIVIDUAL DEFENSE-RENTAL AREA OR PORTIONS THEREOF

INDIANA

Effective August 20, 1952, Rent Regulation 3 is amended as set forth below.

(Sec. 204, 61 Stat. 197, as amended; 50 U. S. C. App. Sup. 1894)

Issued this 15th day of August 1952.

WILLIAM G. BARR,
Acting Director of Rent Stabilization.

A new item 18 is added to Schedule B of Rent Regulation 3, reading as follows:

18. *Provisions relating to the Gary-Hammond, Indiana, Defense-Rental Area (Item 102 of Schedule A):*

The application of this regulation is terminated with respect to rooms in any hotel which on August 1, 1952 (a) was commonly known as a hotel in the community where it is located and (b) provided all of the following services: Use and upkeep of furniture, central telephone communication service,

maid service, and the furnishing and laundering of linens.

All provisions of this regulation insofar as they are applicable to the Gary-Hammond, Indiana, Defense-Rental Area, are hereby amended to the extent necessary to carry the provisions of this item 18 of Schedule B into effect.

[F. R. Doc. 52-9192; Filed, Aug. 19, 1952; 8:52 a. m.]

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53076]

PART 6—AIR COMMERCE REGULATIONS

BROWARD COUNTY AIRPORT, FORT LAUDERDALE, FLA.

AUGUST 13, 1952.

The Broward County Airport, Fort Lauderdale, Florida, is hereby designated as an international airport for civil aircraft and merchandise carried thereon arriving from places outside the United States, as defined in section 9 (b) of the Air Commerce Act of 1926 (49 U. S. C. 179 (b)), effective 30 days after publication of this Treasury decision in the FEDERAL REGISTER.

The list of international airports in § 6.12, Customs Regulations of 1943 (19 CFR 6.12), as amended, is hereby further amended to include the location and name of this airport.

Notice of the proposed designation of the Broward County Airport as an international airport was published in the FEDERAL REGISTER of July 4, 1952 (17 F. R. 6048), pursuant to the provisions of the Administrative Procedure Act (5 U. S. C. 1003).

The designation of this airport is based on a determination that a sufficient need exists to justify such designation and the designation is made for the purpose of providing for convenient compliance with customs requirements.

(Sec. 7, 44 Stat. 572, as amended; 49 U. S. C. 177)

[SEAL] JOHN S. GRAHAM,
Acting Secretary of the Treasury.

[F. R. Doc. 52-9201; Filed, Aug. 19, 1952; 8:52 a. m.]

[T. D. 53077]

PART 6—AIR COMMERCE REGULATIONS

SKY HARBOR SEAPLANE BASE, DULUTH, MINN.

The designation of Sky Harbor Seaplane Base, Duluth, Minnesota, as an international airport for civil aircraft and merchandise carried thereon arriving from places outside the United States, as defined in section 9 (b) of the Air Commerce Act of 1926 (49 U. S. C. 179 (b)) is hereby revoked effective 30 days after publication of this Treasury decision in the FEDERAL REGISTER.

The list of international airports in § 6.12, Customs Regulations of 1943 (19 CFR 6.12), as amended, is hereby further amended by deleting therefrom the location and name of said airport.

Notice of the proposed revocation of the designation of Sky Harbor Seaplane Base as an international airport was published in the FEDERAL REGISTER of July 4, 1952 (17 F. R. 6048) pursuant to the provisions of the Administrative Procedure Act (5 U. S. C. 1003). The revocation is made by reason of lack of use of the base.

(Sec. 7, 44 Stat. 572, as amended; 49 U. S. C. 177)

[SEAL] JOHN S. GRAHAM,
Acting Secretary of the Treasury.

[F. R. Doc. 52-9202; Filed, Aug. 19, 1952; 8:53 a. m.]

TITLE 46—SHIPPING

Chapter II—Federal Maritime Board, Maritime Administration, Department of Commerce

Subchapter C—Regulations Affecting Subsidized Vessels and Operators

[General Order 30 Revised]

PART 285—DETERMINATION OF PROFIT IN CONTRACTS AND SUBCONTRACTS FOR CONSTRUCTION, RECONDITIONING, OR RECONSTRUCTION OF SHIPS

Effective on the date of publication of this General Order 30 Revised in the FEDERAL REGISTER, it does hereby supersede and revise General Order 30 as amended by Supplement 1 (§§ 285.1 to 285.99, inclusive), published in the FEDERAL REGISTER (4 F. R. 2421, 5 F. R. 3635), to read as follows:

GENERAL

Sec.
285.1 Application of regulations.
285.2 Intent.
285.3 Disposition of questions.
285.4 Acceptance of statements and certificates.
285.5 Audits.
285.6 Final accounting.
285.7 Grievances.
285.8 Hearings.

DEFINITIONS

285.11 Definitions.

SUBCONTRACTS

285.21 Contract requirement.
285.22 Failure to effect contract requirement.
285.23 Series of subcontracts.
285.24 Replenishment of general stores.
285.25 Designated scientific equipment.
285.26 A. B. S. inspection, intangibles, and professional fees.
285.27 Availability to Administration.

BOOKS AND RECORDS

285.31 Manner of keeping books.
285.32 Submission of accounting data to Administration.
285.33 Basis for reporting profits.
285.34 Improper and inadequate accounting.
285.35 Failure to maintain adequate cost records.

COMPLETION DATES

285.41 Contract completion date.
285.42 Subcontract completion date.

DETERMINATION OF PROFIT

285.51 Profit or loss defined.
285.52 Cost of performing a contract or subcontract.
285.53 Alphabetical list of representative items of cost.

FILING OF REPORTS

285.61 Contractors.
285.62 Subcontractors.
285.63 Transmittal.
285.64 Revision of report forms.

AUTHORITY: §§ 285.1 to 285.64 issued under sec. 204, 49 Stat. 1987, as amended; 46 U. S. C. 1114. Interpret or apply sec. 505, 49 Stat. 1998, as amended; 46 U. S. C. 1155.

§ 285.1 *Application of regulations.* Unless otherwise provided by the contract, profit under the contract and related subcontracts will be determined by the Administration in accordance with the regulations in this part.

§ 285.2 *Intent.* It is the intent that the regulations in this part shall be fairly and equitably applied in each case, and that the determination of financial outcome under a contract or subcontract shall be consistent with applicable laws, the prime contract, the regulations in this part, and, to the extent not controlled by the foregoing, generally accepted accounting practice.

§ 285.3 *Disposition of questions.* (a) Questions arising with respect to statutory authority pursuant to which a contract and subcontracts thereunder are awarded, the grouping of contracts, subcontracts, or both for the purpose of determining financial outcome thereunder for a particular income taxable year, subcontracts not subject to profit-limiting provisions, allowability of costs and accounting methods, or any other matters relating to a determination of profit or loss, should be referred to the Administration for disposition.

(b) In the event provisions of a contract are in conflict with any provisions of the regulations in this part, the provisions of the contract shall prevail.

§ 285.4 *Acceptance of statements and certificates.* Acceptance by the Administration or its agent or representative of any statement or certificate shall not constitute a waiver by the Administration of its right to examine the books, files, and records of the contractor or subcontractor, if it shall deem such examination to be necessary or appropriate to a proper finding with respect to the contractor's or subcontractor's profit.

§ 285.5 *Audits.* (a) The Administration will scrutinize construction costs and overhead expenses to determine that they are fair, just, and not in excess of a reasonable market price for commodities or goods or services purchased or charged.

(b) In the case of contracts with a shipbuilder (i. e., contracts for the construction, reconditioning or reconstruction of a ship or ships) the Administration will ordinarily designate an auditor or auditors to be stationed at the shipyard of the contractor during performance of the contract.

(c) In the case of contracts or subcontracts for materials or commodities of a general commercial character not especially designed or manufactured for the particular purpose of becoming a part of the ship or for materials or commodities with respect to which there is an established or readily ascertainable open market price, the Administration may in its discretion accept, subject to the right of audit, the notarized statement of a responsible officer or independent public accountants in the form prescribed by the Administration setting forth the total contract or subcontract price, the total cost of performance thereof, the total amount of overhead charged to such cost, the net profit and the percentage such net profit bears to the contract or subcontract price, and certifying that the profit so reported is the true profit as reflected by the books of the contractor or subcontractor and was determined in accordance with generally accepted accounting practice and with the principles of profit determination prescribed in this part.

(d) In the case of other contracts and subcontracts (those involving items especially manufactured for the particular purpose of becoming a part of a ship) the Administration will ordinarily either station an auditor or auditors at the contractor's or subcontractor's plant or, in its discretion, provide for periodic visits by its auditors.

(e) All accounts, books, documents, memoranda, minutes, and records of every kind of the contractor or subcontractor involving the cost of performing a contract or subcontract are subject to inspection and audit by the Administration. The authority of the Administration's auditors in this connection shall be respected.

§ 285.6 *Final accounting.* Upon final accounting with respect to profit under any contract or subcontract, the Administration will examine the notarized report of profit of the contractor or subcontractor, together with reports of audit and any other related data. If the Administration's determination of profit shall differ from that reported by the contractor or subcontractor, the Administration will furnish notice of the Administration's proposed findings and the contractor or subcontractor shall be heard with respect thereto, provided it so requests within sixty days after such notice.

§ 285.7 *Grievances.* Any contractor or subcontractor being aggrieved with respect to any matters in connection with the audit of its accounts or the determination of profit under its contract or subcontract shall be entitled to a hearing under such procedure as the Administration shall deem appropriate.

§ 285.8 *Hearings.* Hearings under the regulations in this part shall be before the Administrator, or such person or persons as the Administrator may designate.

DEFINITIONS

§ 285.11 *Definitions.* The following meanings shall be given to the words and terms employed in this part:

(a) *Act.* "Act" means the Merchant Marine Act, 1936 (49 Stat. 1985), as amended.

(b) *Administration.* "Administration" means the Maritime Administration, Department of Commerce, or its duly authorized representative or representatives.

(c) *Board.* "Board" means the Federal Maritime Board or its duly authorized representative or representatives.

(d) *Contract.* "Contract" means any agreement of the Board or Administration the terms of which make the regulations in this part applicable.

(e) *Contractor.* "Contractor" means any party entering into a contract with the Board or Administration.

(f) *Subcontract.* "Subcontract" means an agreement (purchase order, requisition, or other form of agreement) between a contractor and any third party covering construction, reconditioning, or reconstruction of a vessel or portion thereof or for the manufacture or furnishing of any materials, supplies, goods or other personal property or the rendering of any services directly for such construction, reconditioning or reconstruction.

(g) *Subcontractor.* "Subcontractor" means any party entering into a subcontract with a contractor.

SUBCONTRACTS

§ 285.21 *Contract requirement.* A contractor shall obligate subcontractors to the Administration or Board as required by the contract, particularly with respect to the profit-limiting provisions therein.

§ 285.22 *Failure to effect contract requirement.* In the event a contractor fails to obtain agreement of a subcontractor to the profit-limiting provisions as required by the contract, the contractor so failing shall pay to the Administration as damages for its failure, the excess profit under the particular subcontract as determined by the Administration or, in the event the Administration is unable by reason of such failure to determine financial outcome under the subcontract by audit of the subcontractor's books and records, the contractor shall pay to the Administration as liquidated damages for such failure a sum equal to fifteen percent of the total adjusted contract price of the particular subcontract.

§ 285.23. *Series of subcontracts.* Any series of subcontracts let by a contractor to a subcontractor for items of a like general class shall be deemed a single subcontract if related to the same contract, or a group of contracts, any parts of which are performed concurrently: *Provided*, That if it be shown to the satisfaction of the Administration that a bona fide new offer and acceptance based on bids received from two or more suppliers is involved in any subcontract of such series, and that no subdivision or subcontract has been made for the purpose of evading statutory or contractual profit-limiting provisions, such subcontract shall be deemed a separate subcontract.

§ 285.24 *Replenishment of general stores.* Subcontracts which, in the opinion of the Administration, are for the furnishing of replenishments of a contractor's general stores and relating to materials or commodities usable by the contractor for general work in its plant and in practice so used, without being specifically destined for use on a particular contract or group of contracts, are not subject to profit-limiting provisions.

§ 285.25 *Designated scientific equipment.* Subcontracts for equipment designated by the Administration or Board as scientific equipment used for communication and navigation are not subject to profit-limiting provisions. A designation of equipment furnished under a particular contract or subcontract shall not be construed as designation under any other contract or subcontract unless, with respect to designations still in effect, the Administration or Board shall concur in a claim that equipment being furnished under the subsequent contract or subcontract is of the nature, kind and utility entitling said equipment to exemption under a designation previously made by the Administration or Board.

§ 285.26 *A. B. S. inspection, intangibles, and professional fees.* Subcontracts for American Bureau of Shipping inspection, or for such intangibles as insurance, surety and the like, or subcontracts for expert or professional services (including the furnishing of technical information or data) are not subject to profit-limiting provisions.

§ 285.27 *Availability to Administration.* Contractors shall make available to the Administration all subcontracts, purchase orders, or other agreements, and shall furnish copies of such instruments when requested.

BOOKS AND RECORDS

§ 285.31 *Manner of keeping books.* Contractors and subcontractors subject to the provisions of this part should keep their books in a consistent manner conforming to generally accepted accounting practice. In cases where a diversified line of operations, commodities, products or services is carried on or dealt in, the books should clearly distinguish between such several lines.

§ 285.32 *Submission of accounting data to administration.* (a) A contractor upon entering into a contract should submit promptly to the Administration a full statement of current accounting principles and methods unless previously submitted, together with a copy of related forms, manual of accounting procedure, and classification of accounts and any revisions thereof. Approval of a contractor's accounting methods shall not preclude the Administration's action with respect to any steps which may later be found necessary for the proper determination of profit consistent with the principles prescribed in this part.

(b) During the progress of a contract for ship construction, the contractor shall submit copies of such monthly financial and cost statements as are normally prepared for its own use. Ordinarily these will include a Trial Balance, Balance Sheet (including exhibits supporting major items), Profit and Loss Statement, Cost Statement of the vessels by hulls and contracts, and Overhead Statements detailed according to the contractor's classification of accounts. A breakdown should be made of accounts such as taxes, insurance, and the like, which include several types of items under one general designation. In in-

stances where the Administration has assigned a Resident Auditor, statements should be routed to him; otherwise, they should be mailed to Maritime Administration, Department of Commerce, Washington 25, D. C.

(c) Other contractors and all subcontractors shall submit financial statements and supporting data upon request of the Administration.

§ 285.33 *Basis for reporting profits.* A contractor or subcontractor having in effect a system of determining costs conforming to generally accepted accounting practice, fully responsive to the particular conditions prevailing at its shipyard or plant and in its business, consistently followed, and yielding adequate accounting information for the purposes of this part may base its report of profit thereon subject to such adjustments as are necessary to conform to the regulations in this part.

§ 285.34 *Improper and inadequate accounting.* Should it be found that improper or inadequate accounting methods have been or are being followed, the Administration may require the contractor or subcontractor to restate its accounts or otherwise satisfactorily account for the profit under its contract or subcontract so as to accord with generally accepted accounting practice and the regulations in this part.

§ 285.35 *Failure to maintain adequate cost records.* If a contractor or subcontractor shall be found not to have kept its books and records in such manner that a proper determination of profit in accordance with generally accepted accounting practice and the regulations in this part can be made therefrom or shall have failed to retain any books or records essential to compliance with the provisions of the act or of the regulations in this part, the Administration will allow as cost of performance only such charges as are shown by the contractor or subcontractor on evidence satisfactory to the Administration to have been properly incurred in the performance of such contract or subcontract, and the profit shall be deemed to be the difference between the contract price as defined in the applicable contract or subcontract and the total of such charges.

COMPLETION DATES

§ 285.41 *Contract completion date.* The date of completion of a contract for the construction, reconditioning or reconstruction of a vessel or vessels for the purpose of fixing the taxable year for accounting for profit or loss shall be the date of delivery and acceptance of the last vessel thereunder. The date of completion of other contracts for the purpose of fixing the taxable year for accounting for profit or loss shall be the date of delivery of the last material or performance of the last service required under any provision of the contract except the guarantee clause.

§ 285.42 *Subcontract completion date.* The date of completion of a subcontract for the purpose of fixing the taxable year for accounting for profit or loss shall be the date of delivery of the last material or performance of the last service required under any provision of the subcontract except the guarantee clause.

DETERMINATION OF PROFIT

§ 285.51 *Profit or loss defined.* (a) Profit under a particular contract or subcontract is the excess of the adjusted contract price over the total allowed cost of performance.

(b) Loss under a particular contract or subcontract is the excess of the total allowed cost of performance over the adjusted contract price.

§ 285.52 *Cost of performing a contract or subcontract.* (a) Cost of performing a contract or subcontract shall consist, for the purpose of this part (see §§ 285.61 and 285.62 for required forms) of four general classifications as follows: Direct material, direct labor, other direct charges and overhead.

(1) *Direct material.* (i) Direct material shall include the cost of all items purchased, supplied, manufactured or fabricated, which enter directly into the end product or which are used or consumed directly in connection with the manufacturing, fabricating, processing, furnishing or converting of such product. It is suggested that all material intended for vessel construction should if at all possible be charged directly to the vessel construction contracts involved.

(ii) The prices at which materials are charged shall be fair, just, and not in excess of a reasonable market price. Prices paid to any supplier associated or affiliated with the contractor or subcontractor will be scrutinized in this connection. All materials, including fittings, parts, auxiliaries, etc., must be taken into account at prices not in excess of the net cost thereof (as to requirement with respect to accounting for discounts, see § 285.53 (m)), but materials purchased for and drawn from general stores may be priced by any recognized method of pricing stores withdrawals conforming to generally accepted accounting practice and consistently followed. The net effect of any adjustments related to inventory accounts shall be taken into account to the extent that the propriety of such adjustments is established to the satisfaction of the Administration. In determining any question as to the propriety of prices at which materials purchased specifically for the performance of a contract or subcontract are charged as related to a reasonable market price, the market prices prevailing at the time of commitment for purchase shall govern. In any cases where the contractor's or subcontractor's accounts do not cause transportation charges to follow cost of materials, the method of allocating such charges, whether through overhead or otherwise, must be equitable and consistently followed.

(2) *Direct labor.* (i) Direct labor generally covers the wages and other compensation of employees whose time can be definitely and accurately measured as a direct charge to contracts or subcontracts.

(ii) It is preferable that direct labor be taken into account upon the basis of the individual rates actually paid. Where a contractor or subcontractor follows consistently a method of accounting for direct labor on a productive hour basis at average rates or employs other approximations to reduce clerical work, such method may be allowed provided it shall be shown to the satisfaction of the Administration that substantial accuracy is attained thereby. Compensation paid to leading men, quartermen and foremen whose time can be accurately allocated to specific work may, and preferably should be accounted for as direct labor, but an arbitrary allocation of supervisory pay roll or of any part thereof to "direct labor" will be allowed only if and to the extent that it is shown to the satisfaction of the Administration to be conducive to an accurate determination of cost. Overtime, production bonuses, premiums and other labor incentive payments to employees whose time is accounted for as direct labor are preferably to be included as direct labor but if charged in whole or in part to overhead the method of taking such charges into account must be such that no part of such charges incurred by reason of other work is inequitably borne by the contracts or subcontracts.

(3) *Direct charges—other.* (i) Direct charges—other usually include costs of builder's risk insurance, performance and payment bonds, royalties, outside professional services, inspection, drafting and engineering, mold loft patterns, wood staging and shoring, repair and maintenance of metal staging, launching, docking, trials, cleaning, general material handling, temporary lights, freight on direct material, and spoilage and other similar items.

(ii) Costs of builder's risk insurance, performance and payment bonds, royalties, outside professional services, inspection, etc., which are incurred on account of a contract or subcontract may be charged directly thereto: *Provided*, That such method is consistently followed and that no similar charges on account of other work are made through overhead in such manner as to prorate any part thereof inequitably to a contract or subcontract.

(4) *Overhead.* (i) Overhead comprises all indirect construction costs, including administrative and general expenditures, indirect labor and material, depreciation, etc., which are not directly chargeable to contracts or subcontracts.

(ii) The following provisions apply to the distribution of overhead in determining profit under this part:

(*a*) All charges which are not directly allocable to particular contracts or subcontracts, and constituting what is broadly regarded and herein referred to as "overhead", shall be distributed over all operations in such manner as will approximate as closely as practicable an accurate determination of cost. To that end the method of distributing overhead must conform to generally accepted accounting practice, and where more than one class of work is being performed must be such that no class of work is caused bo bear appreciably any part of the indirect expense which should properly be borne by some other class of work.

(*b*) The distribution of the various classes of overhead equally over all or substantially all varieties of production work will not ordinarily be accepted as in accordance with generally accepted accounting practice unless it shall be shown to the satisfaction of the Administration that such method results, under prevailing conditions, in a substantially accurate determination of cost.

(*c*) The practice of determining separate departmental rates for overhead distribution applicable to the corresponding direct labor charges is acceptable.

(*d*) Distribution of various classes of factory overhead otherwise than upon the basis of direct labor may be accepted if it be shown to the satisfaction of the Administration that a substantially equitable distribution is effected.

(*e*) The use of machine-hour rates or of standard or specification manufacturing costs properly determined is acceptable.

(*f*) A differential distribution of overhead to various classes of work, as for example, the use of a variety of fixed percentages suitably determined by periodic cost-engineering survey or by other acceptable means, so that each class of work bears its apropriate overhead rate may be accepted if it be shown to the satisfaction of the Administration that a substantially equitable distribution is thereby effected.

(*g*) In cases where, by the use of predetermined rates (departmental, machine-hour, differential, etc.) or otherwise, the actual total of all indirect charges incurred in or allocable to a particular month or other relatively brief accounting period is not exactly absorbed, the under- or over absorption must be completely distributed currently either ratably or by such other means as will effect an accurate and equitable allocation. The equalizing of seasonal expenses, such as heating, is permissible if a consistent policy is maintained in such connection.

(*h*) In passing upon the general acceptability of the contractors' or subcontractors' principles and methods of accounting, the Administration will inquire particularly into the method of overhead distribution and no change should be made therein during progress of work without prior notice to the Administration.

(b) *Representative items of cost.* Representative items of cost are summarized in this paragraph under three general categories consisting of those ordinarily allowable, those subject to qualification or disallowance, and those unallowable in the determination of recapturable profit. Further clarification is contained in the explanatory text in the paragraphs under § 285.53.

(1) *Items ordinarily allowable.*

	See sections—
Bidding Expenses	285.53 (d)
Bonds	285.53 (e)
Bonuses	285.53 (f)
Castings	285.53 (h)
Direct Charges—Other	285.52 (a) (3)
Direct Labor	285.52 (a) (2)
Direct Material	285.52 (a) (1)
Directors' Fees	285.53 (l)
Dredging	285.53 (o)
Drydocks	285.53 (p)
Excess Material (Credits)	285.53 (s)
Guarantee Period Expenses	285.53 (z)
Inspection Services	285.53 (bb)
Insurance	285.53 (cc)
Material Operations — Departmental	285.53 (jj)
Overhead	285.52 (a) (4)
Pension and Retirement Payments	285.53 (ll)
Scrap (Credits)	285.53 (pp)
Towing	285.53 (ss)
Travel Expenses	285.53 (tt)
Welfare Expense—Employee	285.53 (ww)

(2) *Items subject to qualification or disallowance.*

Advertising Expenses	285.53 (a)
Central Office Expenses	285.53 (i)
Depreciation of Plant Facilities	285.53 (k)
Discounts	285.53 (m)
Donations	285.53 (n)
Dues and Memberships	285.53 (q)
Fees, Legal, Accounting, and Other Professional	285.53 (v)
Fees of Transfer Agents and Registrars	285.53 (w)
Fuel, Lube Oil, and Fresh Water on Board Vessel on Date of Delivery	285.53 (y)
Interest	285.53 (dd)
Intracompany and Intercompany Charges	285.53 (ee)
Launching Expense — Ceremonial	285.53 (ff)
Maintenance and Repair Costs	285.53 (ii)
Reserves	285.53 (mm)
Royalties	285.53 (nn)
Salaries	285.53 (oo)
Selling Expenses	285.53 (qq)
Taxes	285.53 (rr)
Unclaimed Wages	285.53 (uu)

(3) *Unallowable items.*

Amortization of Asset Appreciation	285.53 (b)
Bad Debts	285.53 (c)
Capital Gains and Losses	285.53 (g)
Damages	285.53 (j)
Entertainment Expenses	285.53 (r)
Excess Profits	285.53 (t)
Expense and Income — Non-operating	285.53 (u)
Fines and Penalties	285.53 (x)
Income from Investments	285.53 (aa)
Liquidated Damages	285.53 (gg)
Losses or Profits Under Other Contracts and Subcontracts	285.53 (hh)
Organization and Reorganization Expenses	285.53 (kk)
Unreasonable Charges	285.53 (vv)

§ 285.53 *Alphabetical list of representative items of cost.* In connection with specific items, there are offered the following descriptive and explanatory comments:

(a) *Advertising expenses.* The Administration's general policy in regard to advertising for the purpose of effecting sales, as distinguished from institutional advertising in trade or technical journals, is described as follows:

(1) As a general rule a contractor's cost of advertising is not allowable on the reasoning that advertising is not required in order to do business with the Government. However, certain kinds of advertising of an industrial or institutional character, placed in trade or technical journals, not primarily with the object of selling particular products but essentially for the purpose of offering financial support to such trade or technical journals, because they are of value for the dissemination of trade and technical information for the industry, are not really an advertising expense to effect sales so much as an operating expense incurred as a matter of policy for the benefit of the business and the industry. Thus the reasonable cost of such advertising placed in trade publications as relates to the particular business may be allowed.

(2) The reasonable cost of advertising consistent with the normal and usual practice of a subcontractor may be allowed in determining the cost of performing a subcontract.

(3) The cost of advertising to obtain employees ordinarily is allowable as a part of personnel expense distributable to contracts and subcontracts unless determined to be excessive.

(4) Reasonable expenses of non-elaborate publications issued for the purpose of morale, production, protection, or welfare of a contractor's or subcontractor's employees, which are in the scope of a plant publication are allowable costs.

(b) *Amortization of asset appreciation.* Amortization of asset depreciation shall not be taken into account in determining the cost of performing contracts or subcontracts.

(c) *Bad debts.* (1) Bad debts may be defined as uncollectible or worthless notes or accounts receivable arising from sales of products or other transactions entered into for the purpose of profit. Such items or expenses related thereto are not allowable in contract or subcontract performance costs.

(2) Advances in reasonable amounts made to employees in connection with allowances for traveling expenses which have not been recovered are not regarded as bad debts, but as ordinary business losses allowable in cost directly, if practicable, or through distributable overhead.

(d) *Bidding expenses.* Reasonable preliminary expenses incident to preparation of bids inclusive of other necessary costs such as legal, accounting and other professional fees and traveling expenses, are allowable costs through distributable overhead; such expenditures as a direct charge to a contract or subcontract will be allowed only when approved by the Administration.

(e) *Bonds.* Premiums for performance and payment bonds required by a contract or subcontract are allowable.

(f) *Bonuses.* Payments to employees in pursuance of a regularly established and properly administered incentive bonus system may, subject to the limitations in paragraphs (oo) and (vv) of this section, be allowed in costs provided the aggregate compensation paid to each individual is reasonable and appropriate to services actually rendered in the regular course of business.

(g) *Capital gains and losses.* Capital gains and losses except as provided under the heading "Depreciation of Plant Facilities" in § 285.53 (k) of this part shall not be taken into account in determining recapturable profit.

(h) *Castings.* Castings made in the contractor's or subcontractor's own foundry may be charged upon fixed price per pound or other arbitrary basis provided that the scale of prices takes account, when appropriate, of differences in size and kind of castings, and that proper adjustments on such charges are made for the actual cost of castings as determined by reasonably frequent inventories

of foundry materials or by other adequate foundry cost methods. The method of pricing foundry raw materials, particularly such higher cost materials as copper, spelter, aluminum, etc., must be consistent with the principles prescribed herein for the pricing of materials generally.

(i) *Central office expenses.* Whenever a contractor or subcontractor operates through a central or home office, expense of administration thereof shall be referred to the Administration for determination as to allowability in contract or subcontract performance costs.

(j) *Damages.* Damages payable by a contractor to the Board or the Administration, whether such payment be effected directly or by deduction from sums otherwise payable by the Board or Administration to the contractor, shall not be allowed.

(k) *Depreciation of plant facilities.* (1) Depreciation of buildings, machinery, equipment, and other plant facilities will be allowed as a cost in the determination of profit in general upon the basis of the schedule of rates of depreciation in current use by the contractor or subcontractor and taking into consideration the rates used by the Treasury Department for income tax purposes, including reasonable amortization of emergency facilities if covered by certificates of necessity, subject, however, to the approval of the Administration.

(2) In the case of buildings, machinery, equipment and other plant facilities subject to depreciation which are used in and are necessary for performance of a contract or subcontract and which during the performance or upon the completion of the contract or subcontract are demolished, dismantled, sold as used machinery or equipment or as scrap or, in the absence of a market therefor, are abandoned, in such manner and under such circumstances as shall establish the fact to the satisfaction of the Administration that such demolition, dismantlement, sale or abandonment is in good faith and not with a view to continued use in the contractor's or subcontractor's business, the depreciation chargeable against operations on account thereof may be redetermined upon the basis of the facts as to useful life and residual value as thus established, and the proportion of such depreciation as so redetermined applicable to contracts or subcontracts with respect to which a final determination of profit shall not theretofore have been made shall be allowed in determining the profit thereunder.

(l) *Directors' fees.* Fees and traveling expenses in connection with authorized meetings of Boards of Directors are allowable as distributable overhead: *Provided*, That such fees and expenses are reasonable, and are in accordance with contractors' or subcontractors' usual procedure, subject to the limitation provided in paragraph (oo) of this section.

(m) *Discounts.* Earned discounts of all kinds, including trade discounts, cash discounts, special allowances, etc., must be taken into account in such manner that, in the determination of profit, effect is given to the net prices actually paid. Discounts taken on material bills may be deducted from the purchase price in charging to inventory or to the contract or subcontract, or the discounts may be accounted for by distributing discounts earned as a credit item in the overhead, or by a separate computation of net material cost or by such other means as may accord with the contractor's or subcontractor's accounting practice and this requirement of accounting for discounts. If a contractor fails to take advantage of discounts or allowances amounting to one percent or more, only the net amounts of invoices after deduction of such discounts shall be admissible as the cost of performance, unless adequate justification exists for failure to take discounts.

(n) *Donations.* Donations may not be taken into account except to the extent that necessary service is rendered to the contractor or subcontractor by the recipient, for example, donations to a local hospital serving the contractor or subcontractor or those which, by local general custom, constitute necessary and proper business expenses, such as donations to the Community Chest or the American Red Cross.

(o) *Dredging.* (1) Where it is the established practice of the contractor or subcontractor to accrue a reserve for dredging and to charge to such reserve the cost of particular dredging operations necessary for launching or for the maintenance of depth of water at and for access to the shipyard, such accruals may be taken into account as part of the overhead to the extent that it shall be shown that such accruals represent a reasonable average of such expenses actually incurred over an appropriate period. Direct charges for dredging are allowable only when no such reserve is included in the contractor's or subcontractor's established practice, and then only to such extent as may be reasonably allocated.

(2) In waters open to public navigation, in the absence of reserves for dredging, the costs of dredging may be charged to contract or subcontract performance costs provided such costs are equitably allocated to the contracts or subcontracts accommodated by such dredging.

(3) The initial cost of dredging of privately owned "slips" should be capitalized; amortization or depreciation of such costs is not allowable, but costs of redredging to established depths of such slips, in the absence of reserves, are allowable when properly allocated to contracts or subcontracts affected.

(p) *Drydocks.* Where the contractor or subcontractor uses its own drydock in the performance of the contract or subcontract, it is allowable to base the charge to the contract or subcontract for the use of such drydock upon the average cost of operation of the drydock, inclusive of maintenance, depreciation and taxes, as determined over a suitable accounting period not in excess of one year: *Provided*, That the total such charge shall not exceed an amount determined by use of the prevailing commercial rate for similar services in the vicinity or where the nearest comparable services are available.

(q) *Dues and memberships.* Dues and memberships in regular trade associations and technical societies are in general allowable if approved by the Administration's financial representative, but other dues and memberships may not be allowed.

(r) *Entertainment expenses.* Entertainment expenses are not allowable costs of performing a contract or subcontract. Reasonable luncheon costs necessarily incurred in the normal conduct of a contractor's or subcontractor's business may be allowed.

(s) *Excess material.* (1) Excess material refers to material, in usable condition, which is left over after a contract or subcontract is completed and resulting mainly from overpurchases, overproduction, overdrawn stores, or as a result of changes and extras. Excess material should not be confused with scrap which is such material as is produced during the course of construction or manufacture and which has only scrap value. (See paragraph (pp) *Scrap* of this section.)

(2) Material which has been charged to the cost of performing a contract or subcontract and is found in excess of actual requirements and has not been incorporated in the work shall be credited, at the reasonable value thereof, to the cost of performing the contract or subcontract to which it was originally charged.

(3) If such materials credited to cost are reissued for use in performing a contract or subcontract the materials should be charged into costs at amounts not in excess of the value agreed upon as the reasonable credit.

(t) *Excess profits.* Excess profits paid or repayable to the United States under any contract, whether under the Merchant Marine Act or otherwise, shall not be treated as a deduction or used in any way as a factor in the determination of profit under any other contract.

(u) *Expense and income—nonoperating.* Expense and income—nonoperating (including such items as Income from Investments, Interest, and Royalties, individually commented upon under their respective captions) ordinarily may not be taken into account in determining recapturable profit. Their inclusion in exceptional cases will be subject to the specific approval of the Administration.

(v) *Fees, legal, accounting, and other professional.* (1) Fees, Legal, Accounting, and other Professional, for services required in the performance of a contract or subcontract are allowable to the extent deemed reasonable by the Administration.

(2) Generally speaking, legal and accounting fees in connection with the prosecution of claims against the United States, including income tax matters, are not allowable costs. In cases, however, where such fees are incurred and result in successful adjudication or negotiation of the validity of a claim by a contractor or subcontractor, reasonable expenditures may be taken into account in connection with such contracts or related subcontracts with the Board or the Administration.

(w) *Fees of transfer agents and registrars.* (1) Fees of Transfer Agents and Registrars of stock or other securities and of trustees under mortgage or similar indentures, regularly employed in and necessary to the normal operation of the business, may be allowed as overhead costs, if reasonable in amount.

(2) Fees for the same purposes, covering the organization or reorganization of a corporation, shall not be allowed.

(x) *Fines and penalties.* Fines and penalties incurred for violation of law are not allowable in costs of performing a contract or subcontract.

(y) *Fuel, lube oil, and fresh water on board vessel on date of delivery.* Any quantity of fuel, lube oil, or fresh water remaining aboard on the date the vessel is delivered and accepted which is not covered by a contract specification requiring it to be aboard shall be inventoried and evaluated on the basis of prices at which purchased. The value of the inventory shall be credited to vessel construction costs and billed to the Administration which will pay for any reasonable quantities remaining in excess of construction and trial run needs. This procedure automatically excludes from vessel costs the value of the inventory of the items mentioned.

(z) *Guarantee period expenses.* Expenses incurred during the guarantee period, for the reconstruction of items determined by the Administration to be the contractor's or subcontractor's responsibility, are allowable as costs of performance of the contract or subcontract.

(aa) *Income from investments.* Income from investments shall not be taken into account in determining recapturable profit.

(bb) *Inspection services.* The reasonable cost of inspection services, such as those normally rendered by the American Bureau of Shipping, may be allowed in determining recapturable profit.

(cc) *Insurance.* (1) Monies paid into State funds for compensation insurance, and net premiums paid or accrued for payment to insurance companies for insurance of risks not found by the Administration to be unusual or excessive coverage or inconsistent with reasonable and prudent business practice are allowable items of cost.

(2) If the contractor or subcontractor assumes its own insurable risks (i) for compensation payable to employees for injuries received in the performance of their duties, or (ii) for unemployment risks in States where insurance is required, or (iii) for other risks not found by the Administration to be excessive or unusual coverage or inconsistent with reasonable and prudent business practice, there may be allowed in costs the charges set up for such self-insurance under a system of accounting regularly and consistently employed by the contractor or subcontractor, at rates not exceeding the lawful or approved rates of insurance companies for such insurance reduced by amounts representing the "acquisition cost" (i. e., commissions, fixed expenses and excess losses) in such companies and after giving effect to any credits for safety provisions, experience, etc., to which the contractor or subcontractor would be entitled in determining such rates, but losses actually sustained must be charged only to the reserves created by such self-insurance charges.

(3) If the contractor or subcontractor assumes its own insurable risks and does not record current charges to operations in the manner contemplated by subparagraph (2) of this paragraph, losses sustained from such risks during the performance of the contract or subcontract shall be allowable only by such means and to such extent as the Administration considers equitable under the circumstances attendant upon a specific case.

(4) If the contractor or subcontractor assumes its own insurable risks and its practice with respect to charges therefor is not covered by the principles set forth in subparagraphs (1), (2) and (3) of this paragraph, the contractor or subcontractor shall submit the matter to the Administration for determination at the earliest practicable date after execution of the contract or subcontract, and such charges shall be taken into account in such manner as the Administration shall determine.

(5) Premiums covering insurance on the lives of corporate officers, partners, proprietors, or other executives or employees, where the contractor or the subcontractor is the beneficiary directly or indirectly, shall not be allowed in determining recapturable profit.

(6) Reasonable premiums and other reasonable costs of group insurance plans in existence on the date the contract or subcontract was awarded and consistently administered are allowable. No costs under group insurance plans effective after such date will be allowed unless the plan is specifically approved by the Administration.

(dd) *Interest.* (1) Interest received, paid, or accrued for receipt or payment will not be taken into account in determining profit except that reasonable amounts of interest on bank loans of a contractor for construction, reconditioning or reconstruction of a ship obtained for the purpose of discounting bills or for current working funds, which loans mature not later than six months after the date of delivery of the last vessel covered by the contract, may be allowed to the extent attributable to the contract: *Provided*, That interest on such loans shall not be allowed unless the contractor shall show to the satisfaction of the Administration the necessity for such loans.

(2) Similarly, interest on bank loans of other types of contractors and subcontractors (for example, suppliers of direct materials), when deemed by the Administration to be reasonable and for the purposes enumerated in the preceding subparagraph of this paragraph, shall be allowed to the extent attributable to performance under the contract or subcontract: *Provided also*, That such loans mature not later than six months after the date of timely delivery of the last material or timely performance of the last service, excluding provisions of the guarantee clause.

(ee) *Intracompany and intercompany charges.* (1) Intracompany transfers between plants or divisions must be made at cost, excluding any internal or intermediate profit.

(2) Transactions with subsidiary, affiliated or controlled companies covering material purchases or transfers, services, expense allocations or any other type of charge must be disclosed fully. The net allowable cost of intercompany transactions may not exceed the cost of comparable goods or services from alternative outside sources.

(ff) *Launching expense—ceremonial.* The following is prescribed as a general guide, in connection with vessels constructed by the Administration for Government use, to the nature of expenses incidental to launching ceremonies which will be regarded as not excessive and, consequently, chargeable to performance costs.

(1) In particular instances where a budget or a program for launching ceremonies has been approved by the Administration, or where special instructions with respect thereto have been issued by the Administration, such budget, program, or instructions will govern.

(2) In other cases, expenses not deemed to be excessive would include such items as the erection of launching platform and decorations, erection and use of public address system, christening champagne and preparation of bottle, but would not include expenses of reception, banquets, transportation and entertainment of guests, sponsor's gift and other incidental expenses. In general, traveling and hotel expenses of the sponsor and escort, and cost of invitations are unallowable unless otherwise designated by the Administration in specific instances.

(gg) *Liquidated damages.* Liquidated damages paid by a contractor or subcontractor for failure to meet contract or subcontract requirements are not allowable costs of performance.

(hh) *Losses or profits under other contracts and subcontracts.* In the determination of excess profit under the provisions of contracts executed under the authority of the Merchant Marine Act, 1936, as amended, and under subcontracts related thereto, such contracts and subcontracts, completed in a taxable year, shall be grouped for the determination of excess profit: *Provided however*, That there shall not be grouped with any such contracts or subcontracts any contracts authorized under acts other than the Merchant Marine Act, 1936, as amended, or any subcontracts thereunder. In the determination of excess profit under the provisions of contracts executed under the authority of acts other than the Merchant Marine Act, 1936, as amended, such contracts and related subcontracts may be grouped only when the provisions of the respective contracts and subcontracts so stipulate.

(ii) *Maintenance and repair costs.* Maintenance and repair costs which are of such a nature and extent as under generally accepted accounting practice are chargeable to depreciation reserve or capitalized may not be taken into account except through proper charges for depreciation. Job orders for such major plant and equipment maintenance or repairs should be submitted to the Administration before such work is undertaken

or while it is in progress, for a determination as to whether or not the costs may properly be charged to current operations. Major plant and equipment maintenance or repair expenditures, the orders for which are not so submitted before or while the work is in progress, will be deemed to be capital expenditures or chargeable to depreciation reserve unless it shall be shown otherwise to the satisfaction of the Administration.

(jj) *Material operations — departmental.* In cases where a contractor or subcontractor manufactures for stores or for direct charge to a contract or subcontract items such as rivets, paint, acetylene, etc., such items may be charged upon a fixed price basis, provided that proper adjustments approved by the Administration are made to such charges at reasonably frequent accounting intervals so as to reflect their actual cost.

(kk) *Organization and reorganization expenses.* Costs incident to the formation or refinancing of corporations, partnerships, or proprietorships such as the issuance of capital stock, bonds or other securities, taxes on the issue or transfer of securities, discounts on securities sold, bankers' commissions, or other like financial costs, legal and accounting fees involved in developing organizations or reorganizations, shall not be allowed in determining recapturable profit.

(ll) *Pension and retirement payments.* Pension and retirement payments to employees and payments made into trust funds for pension and retirement purposes: *Provided*, That such trust funds are alienated from the contractor's ownership, may be allowed in the determination of recapturable profit. The Administration shall, in every case, be satisfied that the payments are reasonable in amount and are consistently and equitably distributed.

(mm) *Reserves.* Charges resulting in the creation or increase of reserves for general contingencies or other reserves which are not properly chargeable to current operations shall not be allowed.

(nn) *Royalties.* (1) Income from royalties shall not be taken into account in determining recapturable profit under contracts or subcontracts.

(2) In some cases, royalty expense in connection with material or equipment furnished under a contract or subcontract is not properly chargeable inasmuch as the Government may have a royalty-free license for such material or equipment. Under the Royalty Adjustment Act of 1942, the Government has negotiated a number of agreements providing for the waiver of, or reduction in, royalties. As some agreements are in force and others may be executed, all royalty agreements should be referred to the Administration.

(oo) *Salaries.* (1) Contracts, and subcontracts thereunder, ordinarily limit the per annum rate of salary for the purpose of determining profit. The limitation applies to the full time of an individual. Accordingly, when an individual devotes only a portion of his time to a contractor or subcontractor, the limitation will be reduced proportionately.

(2) "Salary" is construed in its broadest sense to include a bonus, director's fee, and all other forms of compensation. Charges or accruals for salaries, year-end bonuses, vacation pay, or other compensation, not actually paid at the date of completion of a contract or subcontract must be approved by the Administration as to allowability.

(pp) *Scrap.* Scrap is such material as is produced during the course of construction or manufacture and having only scrap value and should not be confused with excess material (see paragraph (s) of this section). Scrap must be credited at the price obtained when sold, or at the current market price if used by the contractor or subcontractor or held for sale beyond the period of the contract or subcontract. If practicable, the credit should be given to the job from which the scrap was derived, otherwise credit should be given through distributable overhead at reasonably frequent intervals.

(qq) *Selling expenses.* (1) Generally, expenses incurred for the distribution of the products of a contractor through usual trade and business channels and methods are not regarded as allowable costs under contracts for the reason that such expenses are not incident to or necessary in doing business with the Government.

(2) Ordinary selling expenses should not be confused with technical, consulting and other services of the application and adaptation of products to the uses and requirements of the customer. Manufacturers' employees attached to sales departments, who are primarily technicians and product service engineers, render services that are as important and essential when products are sold to the Government as when they are sold to other customers.

(3) Special premiums, bonuses, commissions, etc., paid in connection with negotiations for or the procurement of a contract are not allowable in determining the cost of performing the contract.

(4) Selling expenses which represent the cost of marketing an article, as distinguished from the cost of producing an article, are not to be considered a part of the cost of performing a contract.

(5) Reasonable selling expenses consistent with the normal and usual practice of a subcontractor may be allowed in determining the cost of performing a subcontract.

(rr) *Taxes.* (1) Income and excess profit taxes and surtaxes, Federal, State and other, are not allowed as contract or subcontract performance costs; such taxes merely represent a payment of a part of the net profits to the Government.

(2) Franchise and excise taxes, property taxes (except taxes on property held in reserve or for investment, or for other extraneous purposes), social security taxes and the like (not including payments deducted from or chargeable to employees, including corporate officers) are allowable cost items. In those cases where a State franchise tax is in lieu of a State income tax, the portion thereof deemed to be paid for the exercise of the right to do business and the portion thereof deemed to be a tax on income shall be determined by the Administration.

(3) Taxes for which exemptions are available are not allowable costs.

(ss) *Towing.* Where the contractor or subcontractor uses its own tugs or other floating equipment in the performance of a contract or subcontract, reasonable charges therefor are allowable.

(tt) *Travel expenses.* (1) The actual costs of authorized business trips such as transportation, maintenance, communication and other necessary business costs of the traveler during his period of travel may be allowed to the extent such costs are shown to the Administration to be reasonable and equitably charged to a contract or subcontract.

(2) The Administration may accept in lieu of such actual costs a reasonable allowance agreed upon by the traveler prior to his departure if such allowance is deemed to be warranted by the circumstances, conditions, and nature of the assignment involved.

(uu) *Unclaimed wages.* Unclaimed wages charged to contracts and subcontracts shall be adjusted by an allowance for future claims against unclaimed moneys and the remainder shall be reliably credited to the cost of performing the contracts and subcontracts. The allowance and the credit must be satisfactory to the Administration.

(vv) *Unreasonable charges.* Excessive or unreasonable payments, as for example, exorbitant compensation to anyone, expenditures for the personal benefit of officers of the contractor or subcontractor, payments in excess of reasonable market values of any kind including payments to affiliates and payments to individuals who are associated with the contractor or subcontractor through directorship or employment, whether in cash, stock, or other property, shall not be allowed as costs in determining recapturable profit.

(ww) *Welfare expense—employee.* Welfare expense—employee is allowable as a part of overhead, subject to proper distribution, provided the contractor or subcontractor shall, if required, show the reasonableness thereof to the satisfaction of the Administration.

FILING OF REPORTS

§ 285.61 *Contractors.* A contractor for the construction, reconditioning or reconstruction of a ship shall file with the Administration a notarized Shipbuilder's Report of Profit with respect to each contract, in the form prescribed from time to time by the Administration (see accompanying Form MA-250),[1] within 90 days after the expiration of the guarantee period prescribed by the contract, unless the time for filing such report be extended by the Administration. Other contractors shall file on the form prescribed from time to time by the Administration (see accompanying Form MA-251)[1] as soon as possible after the completion of the contract or the expiration of the guarantee period but in no event later than 90 days after the date upon which the contractor is required to file Federal income tax returns (or as extended). Such reports shall reflect all information indicated in the prescribed forms.

[1] Filed as a part of the original document with the Division of the Federal Register; requests for copies should be addressed to the Maritime Administration, Department of Commerce, Washington 25, D. C.

§ 285.62 *Subcontractors.* Each subcontractor whose subcontract is subject to a profit-limiting provision shall file with the Administration as soon as possible after the completion of the subcontract or the expiration of the guarantee period, but in no event later than 90 days after the date upon which it is required to file its Federal income tax return (or as extended), a report, notarized, with respect to each such subcontract completed by it within the income taxable year, setting forth in the form prescribed from time to time by the Administration (see accompanying Form MA-252)[1] the total contract price, the total cost of performing the subcontract, the amount of overhead charged to such cost and such other information as indicated upon the report form.

§ 285.63 *Transmittal.* All reports made by a contractor for the construction, reconditioning or reconstruction of a ship or other contractor or by a subcontractor, should be mailed to the Maritime Administration, Department of Commerce, Washington 25, D. C.

§ 285.64 *Revision of report forms.* The Administration may from time to time revise the form of reports required in this part. Contractors and subcontractors should obtain current forms from the Administration.

Dated: July 21, 1952.

By order of the Federal Maritime Board.

[SEAL] R. L. McDONALD,
Acting Secretary.
E. L. COCHRANE,
Maritime Administrator.

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

PART 1—PRACTICE AND PROCEDURE

PART 3—RADIO BROADCAST SERVICES

FORMS

In the matters of revision of FCC Form 340, adoption of FCC Forms 341 and 342, amendment of the Commission's rules and regulations concerning the use of FCC Forms 340, 341 and 342.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 30th day of July 1952;

It appearing, that the application form for authority to construct a new noncommercial educational FM broadcast station, FCC Form 340, has not been revised since it was adopted in June 1944 and that a revision of that form is desirable at this time; and

It further appearing, that particular application forms for license, original and renewal, for noncommercial educational FM broadcast stations have not been adopted as yet and that §§ 3.511 and 3.520 contemplate the availability of such application forms; and

It further appearing, that the issuance of new and revised application forms as contemplated herein necessitates certain minor editorial changes in the Commission's rules and regulations concerning the use of application forms in the noncommercial educational FM broadcast service; and

It further appearing, that the proposed changes relate to rules of procedure and practice and that therefore the provisions of section 4 of the Administrative Procedure Act with respect to notice of proposed rule making are inapplicable; and

It further appearing, that this order can be issued pursuant to the authority contained in sections 4 (i) and 303 (r) of the Communications Act of 1934, as amended; and

It is ordered, That, effective September 3, 1952, FCC Form 340 "Application for Authority to construct or Make Changes in a Noncommercial Educational FM Broadcast Station" is revised and re-adopted in the form hereto attached;[1] and

It is further ordered, That, effective September 3, 1952, FCC Form 341 "Application for Noncommercial Educational FM Broadcast Station License" is adopted in the form hereto attached;[1] and

It is further ordered, That, effective September 3, 1952, FCC Form 342 "Application for Renewal of Noncommercial Educational FM Broadcast Station License" is adopted in the form hereto attached;[1] and

It is further ordered, That the above new forms may be used immediately upon their availability at Commission offices; and

It is further ordered, That, effective September 3, 1952, §§ 1.311, 1.317 (b), 1.318 (b), 1.319 (b), 1.320 (c), 3.511, 3.520 (a), and 3.557 (b) are amended as set forth below.

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082; 47 U. S. C. 303)

Released: August 20, 1952.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

1. Section 1.311 is amended as follows: Delete the present language of paragraph (e) and substitute the following: FCC Form 340, "Application for Authority to Construct or Make Changes in a Noncommercial Educational FM Broadcast Station."

2. Section 1.317 (b) is amended as follows:

a. Add new subparagraph (4) as follows:

(4) FCC Form 341, Application for Noncommercial Educational FM Broadcast Station License.

b. Redesignate present subparagraph (4) as (5).

3. Section 1.318 (b) is amended as follows:

a. Add a new subparagraph (2) as follows:

(2) FCC Form 341, "Application for Noncommercial Educational FM Broadcast Station License." To be used for all applications for license to use the former main transmitter as the auxiliary transmitter when no new construction is involved.

b. Redesignate present subparagraph (2) as (3).

c. Redesignate present subparagraph (3) as (4).

d. Redesignate present subparagraph (4) as (5).

e. Redesignate present subparagraph (5) as (6).

f. Redesignate present subparagraph (6) as (7).

g. Redesignate present subparagraph (7) as (8).

h. Redesignate present subparagraph (8) as (9).

i. Redesignate present subparagraph (9) as (10).

j. Redesignate present subparagraph (10) as (11).

k. Redesignate present subparagraph (11) as (12).

l. Redesignate present subparagraph (12) as (13).

4. Section 1.319 (b) is amended as follows:

a. Add new subparagraph (4) as follows:

(4) FCC Form 340, "Application for Authority To Construct or Make Changes in a Noncommercial Educational FM Broadcast Station." To be used for all applications for modification of any term of an existing authorization for a noncommercial educational FM broadcast station.

b. Redesignate present subparagraph (4) as (5).

c. Redesignate present subparagraph (5) as (6).

d. Redesignate present subparagraph (6) as (7).

e. Redesignate present subparagraph (7) as (8).

f. Redesignate present subparagraph (8) as (9).

g. Redesignate present subparagraph (9) as (10).

h. Redesignate present subparagraph (10) as (11).

5. Section 1.320 (c) is amended as follows:

a. Delete present language of subparagraph (2) and substitute the following:

(2) FCC Form 311, "Application for Renewal of International, Facsimile, or Experimental Broadcast Station License". To be used for all applications for renewal of licenses of international, facsimile and experimental broadcast stations.

b. Add a new subparagraph (4) as follows:

(4) FCC Form 342. "Application for Renewal of Noncommercial Educational FM Broadcast Station License."

c. Redesignate present subparagraph (4) as (5).

[1] Forms filed as part of the original document. Copies of the forms may be obtained from the Federal Communications Commission.

d. Redesignate present subparagraph (5) as (6).

6. Section 3.511 is amended as follows: Delete text of present section and substitute therefor the following:

§ 3.511 *Application for noncommercial educational FM broadcast stations.* Each applicant for a construction permit for a new noncommercial educational FM broadcast station, change in facilities of any existing noncommercial educational FM broadcast station, or noncommercial educational FM broadcast station license or modification of license shall file with the Commission in Washington, D. C., two copies of applications and a like number of exhibits and other papers incorporated therein and made a part thereof. Only the original copy need be sworn to. If the application is for authority to construct or make changes in a noncommercial educational FM broadcast station, Form FCC No. 340 should be filed; for a noncommercial educational FM license, Form No. 341 should be filed.

7. Section 3.520 (a) is amended as follows:

a. Change parenthetical reference to FCC Form No. 343 to FCC Form No. 342.

b. Delete footnote 4.

8. Section 3.557 (b) is amended as follows:

a. Change parenthetical reference to FCC Form No. 342 to FCC Form No. 340.

b. Delete footnote 7.

[F. R. Doc. 52-9200; Filed, Aug. 19, 1952; 8:52 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[7 CFR Part 986]

HANDLING OF HOPS GROWN IN OREGON, CALIFORNIA, WASHINGTON, AND IDAHO, AND OF HOP PRODUCTS PRODUCED THEREFROM IN THESE STATES

BUDGET OF EXPENSES OF HOP CONTROL BOARD FOR MARKETING SEASON BEGINNING AUGUST 1, 1952, AND RATE OF ASSESSMENT

Notice is hereby given that the Department is considering the issuance of the proposed administrative rule herein set forth pursuant to the provisions of Marketing Agreement No. 107, as amended, and Order No. 86, as amended, regulating the handling of hops grown in Oregon, California, Washington, and Idaho, and of hop products produced therefrom in these States (17 F. R. 6626), effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

Prior to the final issuance of such administrative rule consideration will be given to data, views, or arguments pertaining thereto which are submitted in writing to the Director, Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., and which are received not later than the close of business on the tenth day after publication of this notice in the FEDERAL REGISTER, except that if such tenth day after publication should fall on a holiday, Saturday, or Sunday, such submission may be received by the Director not later than the close of business on the next following work day.

The Hop Control Board, established pursuant to the provisions of the aforesaid amended marketing agreement and amended order, at a duly called meeting in Portland, Oregon, on July 18 and 19, 1952, adopted by unanimous vote a budget of expenses of $154,450 for its maintenance and functioning during the marketing season beginning August 1, 1952. The Board anticipates increased operating expenses, and the budget recommended is $6,550 larger than the budget approved for the 1951-52 marketing season.

The Board also recommended by unanimous vote a rate of assessment of four-tenths of a cent per pound, net dry weight, of hops (including hop products in terms of hops) handled during the marketing season which began on August 1, 1952. The proposed rate of assessment when applied to the quantity of hops (including hop products in terms of hops) which it is estimated will be handled during the said marketing season would provide sufficient funds for the recommended budget of expenses.

Therefore, the proposed rule is as follows:

§ 986.303 *Budget of expenses for the marketing season beginning August 1, 1952, and rate of assessment*—(a) *Budget of expenses.* Expenses in the amount of $154,450 are reasonable and likely to be incurred by the Hop Control Board (including but not limited to the Growers Allocation Committee and the several Growers Advisory Committees) for its maintenance and functioning during the marketing season beginning August 1, 1952; and

(b) *Rate of assessment.* The rate of assessment for the marketing season beginning August 1, 1952, shall be four-tenths ($\frac{4}{10}$) of a cent per pound, net dry weight, of hops handled, and the assessment rate of any hop product shall be based upon the assessment rate for hops, and shall be computed at such conversion ratio on ratios between hops and the respective hop products as determined pursuant to § 986.73 of said amended agreement and amended order.

Done at Washington, D. C., this 14th day of August 1952.

[SEAL] S. R. SMITH, *Director, Fruit and Vegetable Branch.*

[F. R. Doc. 52-9169; Filed, Aug. 19, 1952; 8:50 a. m.]

[9 CFR Part 201]

REGULATIONS UNDER PACKERS AND STOCKYARDS ACT

NOTICE OF HEARINGS ON PROPOSED REVISION

Notice is hereby given that public hearings will be held on the dates and at the times and places set forth below to consider the advisability of revising the regulations issued under the Packers and Stockyards Act, 1921, as amended and supplemented (9 CFR 201 et seq.; 7 U. S. C. 181 et seq.).

Date (1952)	Local time	Location
Sept. 8 and 9	10 a. m.	Livestock Exchange Bldg., Chicago, Ill.
Sept. 10	9 a. m.	Post Office Bldg., South St. Paul, Minn.
Sept. 11	9 a. m.	Western Livestock Reporter Bldg., Billings, Mont.
Sept. 12	9 a. m.	Livestock Exchange Bldg., Portland, Oreg.
Sept. 15	9 a. m.	Livestock Exchange Bldg., Denver, Colo.
Sept. 16	9 a. m.	Livestock Exchange Bldg., Oklahoma City, Okla.
Sept. 17	9 a. m.	Livestock Exchange Bldg., Kansas City, Mo.
Sept. 18	9 a. m.	Livestock Exchange Bldg., Indianapolis, Ind.
Sept. 19	9 a. m.	Room 5709 South Bldg., U. S. Department of Agriculture, Washington, D. C.

At the hearings consideration will be given, among other things, to inclusion in the regulations of provisions:

(1) Requiring market agencies to exclude dealers, packers, and others representing interests which conflict with those of consignors from participation in the making of rules and regulations governing relationships of market agencies to their consignors;

(2) Establishing reasonable standards with respect to the qualifications of persons desiring to register under the act as market agencies or dealers;

(3) Prohibiting, except under certain conditions, the registration of any person as both a market agency and dealer;

(4) Requiring persons registered as both a market agency and dealer to file separate bonds to cover their financial obligations incurred in each capacity;

(5) Providing for the registration under the act of regularly-employed packer buyers;

(6) Defining the term "yardage" and providing that stockyard owners may require payment of reasonable charges for special facilities and services not included within the definition of yardage;

(7) Prohibiting, after one year from the effective date of the revision, clearance of the financial obligations of market agencies;

(8) Providing that after a specified date only applicants for registration as dealers may, in lieu of filing bonds, file satisfactory equivalents thereto;

(9) Providing that after a specified date no market agency selling livestock on commission shall act in the capacity of broker or clearing agency;

(10) Increasing the minimum bond coverage for market agencies and dealers to $5,000.00;

(11) Providing that no brand inspection agency shall impound the net proceeds from the sale of livestock of questioned ownership until market agencies and consignors have been given a reasonable period of time, at least sixty days after sale, within which to establish ownership;

(12) Requiring every market agency selling livestock on commission to set up and maintain a Custodial Account for Shippers' Proceeds and to keep adequate records in connection therewith;

(13) Prohibiting, except upon certain conditions, the sale of consigned livestock by market agencies to buyers in whom the market agencies or their personnel have financial interests;

(14) Requiring that sellers', buyers', and consignors' names, or understandable abbreviations of such names, appear on scale tickets;

(15) Prohibiting persons subject to the act from giving truckers any gratuities except advertising novelties not exceeding fifty cents in value;

(16) Prohibiting persons subject to the act from allowing their owners, officers, agents, or employees to make or receive gifts, payments, loans, or considerations, in connection with the furnishing of stockyard or market agency services, other than the established charges for such services;

(17) Providing that weights shown on accountings or bills issued by persons subject to the act shall be actual weights obtained on stockyard scales at the time of sale unless appropriately explained on the accountings or bills issued;

(18) Providing that no market agency shall use consigned livestock to fill orders except at a price higher than the highest available bid on the open market and that where consigned livestock is used to fill orders market agencies shall collect for their services only the authorized selling commissions plus expense charges not exceeding one-half of the order-buying charges in effect at the market;

(19) Prohibiting owners, officers, agents, or employees of auction markets from buying livestock from consignments for speculative purposes and from sharing in profits from the resale of consigned livestock;

(20) Prohibiting auctioneers, starters, ringmen, graders, weighers, and other employees of auction markets having comparable duties from buying livestock from consignments for any purpose for their own accounts;

(21) Permitting employees of auction markets whose duties are not directly related to the actual auction selling to purchase livestock from consignments in competitive bidding for their own accounts other than for purposes of resale, provided disclosure of the facts is made to consignors;

(22) Prohibiting owners, officers, agents, or employees of market agencies and licensees from purchasing livestock or live poultry from consignments for their own account and from sharing in profits from the resale of consigned livestock or live poultry.

(23) Prohibiting the sale regularly by market agencies of their owners', officers', agents', or employees' livestock in pens assigned to the market agencies in competition with consigned livestock;

(24) Prohibiting market agencies selling livestock on commission from clearing or financing dealers, and prohibiting, except under certain conditions, market agencies buying livestock on commission from clearing or financing dealers;

(25) Prohibiting the employment of full-time salesmen by market agencies on a split-commission basis but permitting the making of incentive payments or bonuses to employees based upon over-all operating results of the market agencies;

(26) Prohibiting the utilization or employment by market agencies, after acceptance of consignments or purchase orders, of dealers or packers or their employees in connection with the rendition of buying or selling services;

(27) Prohibiting dealers and packers from owning, managing, financing, or being affiliated with market agencies;

(28) Prohibiting dealers, packers, order buyers, and their representatives from operating in concert with each other and from furnishing information concerning their proposed buying operations to their competitors for the purpose of, or which would result in, limiting competition, affecting prices, or controlling the movement of livestock through posted stockyards;

(29) Requiring persons subject to the act to employ only competent persons of good character and known integrity to operate scales and requiring such employees to be rotated in their weighing assignments and be removed if found to be operating scales incorrectly, carelessly, or in a manner to favor or injure any party through incorrect weights;

(30) Requiring stockyard owners to assign pens and facilities on a reasonable basis and to review such assignments periodically;

(31) Requiring dealers to operate in the pens assigned to them by the stockyard owner but permitting bona fide planting of livestock for sale or resale in pens assigned to market agencies;

(32) Requiring packer scales to be maintained and operated in a manner comparable to scales at posted stockyards;

(33) Requiring packers to permit authorized representatives of the Secretary of Agriculture to inspect their property and records in order to carry out the provisions of the act and the rules and regulations thereunder; and

(34) Amending the definitions contained in the regulations.

All interested persons will be afforded an opportunity at such hearings to appear and be heard, in person or by attorney, upon any of the proposals referred to above or any other proposed amendments to the regulations. Persons desiring to obtain further information concerning such proposals may do so by requesting the same from the Chief of the Packers and Stockyards Division, Livestock Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C.

It is contemplated that after such hearings have been held and all testimony and material presented thereat have been considered, a notice of proposed rule making setting forth any proposed amendments to the regulations will be published in the FEDERAL REGISTER. At that time all interested persons will be afforded a reasonable opportunity to submit their views, arguments, and data, in writing, on such proposals prior to the issuance of the final revision of the regulations.

Done at Washington, D. C., this 14th day of August 1952.

[SEAL] CHARLES F. BRANNAN, *Secretary of Agriculture.*

[F. R. Doc. 52-9170; Filed, Aug. 19, 1952; 8:50 a. m.]

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 230]

GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

REVISION OF REGULATION A; GENERAL EXEMPTION

The Securities and Exchange Commission has under consideration a proposed revision of Regulation A under the Securities Act of 1933. This regulation provides an exemption from registration under the act for certain securities.

One of the principal changes which would be effected by the proposed revision is the requirement that an offering circular containing certain specified information be used in offering securities under this regulation. However, the revised regulation would permit limited advertising prior to the sending or giving of the required offering circular.

Provision would be made in the revised regulation for denying or suspending the exemption in cases where the Commission finds that the terms and conditions of the exemption have not been met; that the offering circular or other sales literature is misleading; or that fraud or deceit is being perpetrated in connection with the offering or sale of the securities. This provision for denial or suspension of the exemption in individual cases is not intended as a substitute for the Commission's customary letter of comment procedure. The Commission contemplates that this provision will be invoked only in those cases in which it is apparent that the normal procedures will not be sufficient to prevent the perpetration of fraud or deceit or other violation of the Securities Act in connection with the offering or sale of the securities.

The revised regulation would also provide for the filing of semi-annual reports showing the progress of the offering. This requirement merely formalizes in the rules the present administrative practice of requesting such reports. No further reports would be required after completion or termination of the offering and the filing of a final report.

The Commission invites comments and suggestions on the proposed regulation from all interested persons. Comments and suggestions should be submitted in writing to the Securities and Exchange Commission, 425 Second Street NW., Washington, D. C., on or before September 15, 1952.

A copy of the proposed regulation is set forth below.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

AUGUST 14, 1952.

REGULATION A: GENERAL EXEMPTION

§ 230.220 *Definitions of terms used in §§ 230.220 to 230.229.* As used in §§ 230.220 to 230.229, the following terms shall have the meanings indicated:

(a) An "affiliate" of an issuer is a person controlling, controlled by or under common control with such issuer. An individual who controls and issuer is an affiliate of such issuer.

(b) A "predecessor" of an issuer is a person from which such issuer has acquired, directly or indirectly, a substantial portion of its assets.

(c) A "principal underwriter" is an underwriter who is a party to the underwriting agreement (whether written or oral) with the issuer or other person on whose behalf the securities are offered hereunder. "Underwriter" shall have the meaning given in section 2 (11) of the act.

(d) A "promoter" of an issuer is a person who took an important part in the organization of such issuer, the acquisition of its assets or the distribution of its securities.

(e) A "resident" of the United States is an individual resident thereof, or a corporation or other organization which is incorporated or organized under the laws of the United States, any State or Territory or the District of Columbia.

§ 230.221 *Securities exempted.* (a) Except as hereinafter provided in this section, securities issued by any resident of the United States having his or its principal place of business in the United States shall be exempt from registration under the act if offered in accordance with the terms and conditions of §§ 230.220 to 230.229.

(b) No exemption under §§ 230.220 to 230.229 shall be available for any of the following securities:

(1) Assessable securities.

(2) Fractional undivided interests in oil or gas rights as defined in § 230.300, or similar interests in other mineral rights.

(3) Certificates of interest as defined in § 230.360.

(4) Securities of any investment company which is subject to the Investment Company Act of 1940.

(5) Securities of any issuer if such issuer or any of its predecessors or affiliates:

(i) Has filed a registration statement which is the subject of pending proceedings under sections 8 (b), 8 (d) or 8 (e) of the act or is subject to an order entered under any such section; or

(ii) Is subject to pending proceedings under § 230.228 or to an order entered thereunder.

(6) Securities of any issuer if such issuer or any of its directors, officers, affiliates or predecessors, any of its promoters presently connected with it in any capacity, or any principal underwriter of the securities to be offered hereunder:

(i) Has been convicted within five years preceding the filing of the letter of notification required by § 230.223 of any crime or offense involving the purchase or sale of any security or arising out of the conduct of the business of a broker or dealer;

(ii) Is subject to any order, judgment or decree of any court entered within five years prior to the date of such filing, enjoining or restraining such person from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security; or

(iii) Is subject to a United States Post Office fraud order.

(7) Securities of any issuer, if any of its directors, officers or affiliates, any of its promoters presently connected with it in any capacity, or any underwriter of the securities to be offered hereunder, participated in or was connected with any offering of securities of any other issuer which has been at any time subject to:

(i) An order under section 8 (b) or 8 (d) of the act;

(ii) An order under § 230.228; or

(iii) A United States Post Office fraud order,

unless cause be shown as to why it is not necessary or appropriate in the public interest or for the protection of investors that the exemption be denied in a particular case.

(c) The exemption provided by §§ 230.220 to 230.229 shall terminate, as to any securities remaining unsold, if the issuer or any of its directors, officers or affiliates, any promoter currently connected with it in any capacity, any principal underwriter of the securities offered hereunder or any security holder on whose behalf any of the securities are offered (1) shall be convicted of any crime or offense involving the purchase or sale of any security or arising out of the conduct of the business of a broker or dealer, or (2) shall be enjoined from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security.

(d) The exemption provided by §§ 230.220 to 230.229 shall be suspended, and no securities may be offered hereunder, during the pendency of (1) any indictment of any person specified in paragraph (c) of this section for any crime or offense involving the purchase or sale of any security or arising out of the conduct of the business of a broker or dealer, (2) any proceeding initiated by the Commission for the purpose of enjoining any such person from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security, or (3) any proceeding under section 8 (b), 8 (d), or 8 (e) of the act with respect to the issuer or any of its affiliates.

§ 230.222 *Amount of securities exempted.* (a) The aggregate offering price of all securities of the issuer, its predecessors and affiliates offered under this regulation and all securities of such persons sold in violation of section 5 (a) of the act shall not exceed $300,000 during any period of one year: *Provided,* That the aggregate offering price of all securities of such persons so offered or sold on behalf of persons other than the issuer thereof shall not exceed $100,000 during any period of one year.

(b) The aggregate offering price of securities which have a determinable market value shall be computed upon the basis of such market value as determined from transactions or quotations on a specified date within 15 days prior to the date of filing the letter of notification, or the offering price to the public, whichever is higher: *Provided,* That the aggregate gross proceeds actually received from the public shall not exceed the maximum aggregate offering price permitted, in the particular case, by paragraph (a) of this section.

(c) Where securities are offered in exchange for outstanding securities, claims or property, the aggregate offering price thereof shall be computed upon the basis of the market value of the securities, claims or property to be received in exchange, as established by bona fide sales made within a reasonable time, or in the absence of such sales, upon the basis of the fair value of the securities, claims or property to be received in exchange as determined by some accepted standard.

(d) Unsold securities the offering of which has been withdrawn by amending the letter of notification required by § 230.223 to reduce the amount stated therein as proposed to be offered, need not be included in computing the amount of securities which may be offered under §§ 230.220 to 230.229 subsequent to such withdrawal.

§ 230.223 *Letter of notification.* At least 10 days (Saturdays, Sundays and holidays excluded) prior to the date on which the initial offering of any securities is to be made under §§ 230.220 to 230.229, there shall be filed with the Regional Office of the Commission for the region in which the issuer's principal place of business is located, three copies of a letter of notification on Form S–3B–1. The letter of notification shall be signed by the issuer, each principal underwriter of the securities to be offered hereunder and by each person, other than the issuer, on whose behalf any of such securities are to be offered. If the letter of notification is signed by any person on behalf of any other person except the issuer, evidence of authority to sign on behalf of such other person shall be filed with the letter of notification.

§ 230.224 *Filing and use of offering circular.* (a) No securities shall be offered orally or otherwise under §§ 230.220 to 230.229 unless an offering circular containing the information specified in paragraph (b) of this section is concurrently given or has previously been given to the person to whom the offer is made, or has been sent to such person under such circumstances that it would normally have been received by him at or

prior to the time of the offering: *Provided,* That in the case of transactions effected on a national securities exchange, a copy of such circular shall be delivered to the purchaser not later than the time of delivery of the confirmation of the sale to such purchaser.

(b) The offering circular required by paragraph (a) of this section shall be dated and shall contain the following information:

(1) The following statement shall be set forth on the outside front cover page of the offering circular in capital letters in type as large as that used generally in the body of such circular:

These securities are offered pursuant to an exemption from registration with the Securities and Exchange Commission. The Commission does not pass upon the merits of any securities nor does it pass upon the accuracy or completeness of any offering circular or other selling literature.

(2) The name and address of the issuer, the name of the State or other jurisdiction in which it was incorporated or organized and the date of its incorporation or organization.

(3) The type and amount of securities to be offered and if any of such securities are to be offered for the account of security holders, the name and address of each such security holder, the total amount owned and the amount to be offered.

NOTE: See Supplemental Instructions to Regulation A, attached to Form S–3B–1, which indicate more specifically the information required.

(4) A brief description of the method by which the securities are to be offered, and if the offering is to be made through underwriters, the name and address of each principal underwriter and the amount of the participation of each such underwriter, indicating the nature of any material relationship between the issuer and any such underwriter.

(5) The price at which the securities are to be offered to the public, the underwriting discounts or commissions and the proceeds to the issuer or other person on whose behalf the securities are offered. This information shall be furnished both on a per-share basis and in the aggregate and shall be set forth in tabular form on the outside front cover page of the offering circular.

(6) The purposes for which the net cash proceeds to the issuer from the sale of the securities are to be used and the amount to be used for each such purpose, indicating how the actual proceeds will be used if they are insufficient for the purposes stated.

(7) If any of the securities are to be offered otherwise than for cash, the nature, amount and value of the consideration to be received for the securities, the basis upon which the offering is to be made per unit of securities offered, the persons or classes of persons to whom the offering is to be made, and the nature and amount of any commissions or solicitation expenses to be paid in connection with such offering.

(8) A brief description of the business and property of the issuer.

NOTE: See Supplemental Instructions to Regulation A, attached to Form S–3B–1, which indicate more specifically the information required.

(9) The full names and addresses of all directors, officers and promoters of the issuer, their remuneration from and their direct or indirect interests in the issuer and its affiliates and in any material transactions within the past two years or any material proposed transaction to which the issuer or any of its affiliates was or is to be a party.

(10) A brief description of all options or warrants presently outstanding or proposed to be granted to purchase securities of the issuer, including the names of the principal holders of such options or warrants, the terms and conditions upon which they may be exercised, and the price at which the securities may be acquired pursuant thereto.

(11) Appropriate financial statements of the issuer showing the issuer's financial condition as of a date within ninety days prior to filing the letter of notification, and its income and expenses, or receipts and disbursements as appropriate, for a period of at least two years prior to the statement of financial condition, or for the period of the issuer's existence if less than two years.

NOTE: See Supplemental Instructions to Regulation A, attached to Form S–3B–1, which indicates more specifically the financial statements required.

(c) All printed offering circulars shall be set in roman type at least as large as ten-point modern type. All type shall be leaded at least two points.

(d) Three copies of the offering circular required by this rule, which is to be used at the commencement of the offering, shall be filed with, and shall be deemed a part of, the letter of notification required by § 230.223 at the time such letter is filed. If the offering circular is revised or amended subsequent to the commencement of the offering, three copies of the revised or amended circular shall be filed with the office of the Commission with which the letter of notification is filed at least ten days prior to its use, or such shorter period as the Commission may authorize upon a showing of good cause therefor.

§ 230.225 *Use of limited advertisements and other communications.* Notwithstanding § 230.224, any advertisement or other communication which contains only the information specified below may be published or distributed to any person prior to the sending or giving to such person of an offering circular containing the information required by § 230.224:

(a) The name of the issuer;

(b) A brief statement of the type of business, including information, where applicable, that the issuer is not in commercial production;

(c) A brief statement as to the location of the issuer's property;

(d) The title and offering price of the securities;

(e) The name and address of the person or persons from whom an offering circular meeting the requirements of § 230.224 may be obtained; and

(f) A detachable form, substantially as follows, for use in requesting a copy of the offering circular:

Please send me a copy of the offering circular relating to _____
Name _____
Address _____

§ 230.226 *Other material to be filed.* Three copies of every written or other communication prepared or authorized by the issuer or any of its affiliates or any principal underwriter of the securities to be offered which is proposed to be used, in addition to the offering circular, at the commencement of the public offering under §§ 230.220 to 230.229 or intended to be sent or given thereafter to more than ten persons shall be filed at least five days (exclusive of Saturdays, Sundays and holidays) prior to any use thereof, with the office of the Commission with which the letter of notification is filed.

§ 230.227 *Prohibition of certain statements.* No offering circular or other written or oral communication used in connection with any offering under §§ 230.220 to 230.229 shall contain any language stating or implying that the Commission has in any way passed upon the merits of, or given approval to, the securities offered or the terms of the offering, or has determined that the securities are exempt from registration, or has made any finding that the statements in any such offering circular or other communication are accurate or complete.

§ 230.228 *Denial and suspension of exemption.* (a) The Commission may, at any time after the filing of a letter of notification, enter an order temporarily denying the exemption, or if the public offering has commenced, it may enter an order temporarily suspending the exemption, if it has reason to believe that:

(1) No exemption is available under §§ 230.220 to 230.229 for the securities purported to be offered hereunder;

(2) The letter of notification, the offering circular or any other sales literature contains any untrue statement of a material fact or omits to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading;

(3) Any device, scheme or artifice to defraud is being or would be employed in connection with the offering or sale of the securities, or the offering is being or would be made in such manner as to operate as a fraud or deceit upon the purchaser; or

(4) The person on whose behalf the letter of notification was filed has otherwise failed to comply with any of the terms and conditions of §§ 230.220 to 230.229.

(b) Upon the entry of an order under paragraph (a) of this section, the Commission will promptly give notice to the persons on whose behalf the letter of notification was filed (1) that such order has been entered, together with a brief statement of the reasons for the entry of the order, and (2) that the Commission will, upon receipt of a written request, set the matter down for hearing within 20 days after the receipt of such request at a place to be designated by the Commission. If no hearing is requested and none is ordered by the Commission, the order shall remain in effect until it

is modified or vacated by the Commission. Where a hearing is requested or is ordered by the Commission, the Commission will, after notice of an opportunity for such hearing, either vacate the order or enter an order permanently denying or suspending the exemption.

(c) The Commission may at any time after notice of and opportunity for hearing, enter an order permanently suspending the exemption for any reason upon which it could have entered a temporary suspension order under paragraph (a) of this section. Any such order shall remain in effect until vacated by the Commission.

(d) All notices required by this section shall be given to the person or persons on whose behalf the letter of notification was filed by personal service, registered mail or confirmed telegraphic notice at the addresses of such persons given in the letter of notification. In addition, all such notices will be published in the FEDERAL REGISTER.

§ 230.229 *Reports of sales under §§ 230.220 to 230.229.* Within 30 days after the end of each six-month period following the commencement of the offering of the securities under §§ 230.220 to 230.229, the issuer or other person on whose behalf the securities are offered shall file with the Commission four copies of a report on Form S-3B-1A containing the information called for by such form. A final report may be made upon completion or termination of the offering prior to the end of the six-month period in which the last sale is made.

FORM S-3B-1

LETTER OF NOTIFICATION UNDER REGULATION A

The following information is given with respect to an offering of securities to be made pursuant to §§ 230.220 to 230.229 (Regulation A) of the general rules and regulations under the Securities Act of 1933.[1] The offering circular required by § 230.224 (Rule 224) is filed with and is to be deemed a part of this letter of notification.

Item 1. Jurisdiction in which securities are to be offered. State the names of the jurisdictions (States, Territories, District of Columbia and foreign countries) in which it is proposed to offer the securities covered by this letter of notification. If all or any part of the offering is to be made by use of the facilities of a national securities exchange, it will be sufficient or to the securities to be so offered to name the exchange. No securities shall be offered or sold in any jurisdiction not mentioned until an amendment to this letter of notification has been filed stating the name of the additional jurisdiction or jurisdictions.

Item 2. Contemplated additional offerings. State whether or not the issuer or any of its affiliates presently contemplates the offering or sale of any securities in addition to those covered by this letter of notification. If so, describe fully the proposed transaction or transactions in which it is contemplated such additional securities will be offered or sold.

Item 3. Unregistered securities sold within one year. As to all unregistered securities of the issuer or of any of its predecessors or affiliates which were sold at any time within one year prior to the date of filing this letter of notification, state the following:

(a) Name and complete address of the issuer of such securities.

(b) Name and complete address of each person on whose behalf any of such securities were sold.

(c) Title and amount of securities sold on behalf of each such person, the aggregate offering price thereof, and the method of computing such price.

(d) Indicate the section of the act or the rule of the Commission under which exemption from registration was claimed and state briefly the facts relied upon to make the exemption available.

Item 4. Predecessors and affiliates of issuer. List the full name and complete address of each predecessor and each affiliate of the issuer. As to any predecessor which is no longer in existence, give its full name and last address prior to its dissolution.

Item 5. Judicial action within five years. State whether the issuer or any of its predecessors or affiliates or any of its promoters, directors or officers presently connected with it in any capacity, or any underwriter of the securities to be offered hereunder:

(a) Has been convicted within five years preceding the filing of this letter of notification of any crime or offense involving the purchase or sale of any security, or

(b) Is subject to an order, judgment or decree of any court entered within five years preceding the date of such filing enjoining it or him from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security; or

(c) Is subject to any United States Post Office fraud order.

SUPPLEMENTAL INSTRUCTIONS AS TO THE PREPARATION OF THE OFFERING CIRCULAR REQUIRED BY § 230.224 (RULE 224)

Instructions to paragraph (b) (3). In stating the type of the securities to be offered, there shall be given such information as will indicate the general character of the securities, including the following:

(a) In the case of shares, the par or stated value, if any; the rate of dividends, if fixed, and whether cumulative or non-cumulative; a brief indication of the preference, if any; and if convertible, a statement to that effect.

(b) In the case of debt securities, the rate of interest; the date of maturity or if the issue matures serially, a brief indication of the serial maturities such as "maturing serially from 1955 to 1965;" if the payment of principal or interest is contingent, an appropriate indication of such contingency; a brief indication of the priority of the issue; and if convertible, a statement to that effect.

(c) In the case of any other kind of securities, appropriate information of a comparable character.

Instructions to paragraph (b) (8). In furnishing the information called for by paragraph (b) (8), the following instructions shall be observed:

A. For issuers engaged in mining or exploratory mining operations:

1. The location and means of access to the mining properties now held or presently intended to be acquired and the nature of the title under which such properties are held or proposed to be held.

2. State the mineral produced or the nature of the deposit to be explored, indicating whether surface or under ground operations are to be involved.

3. No claim shall be made as to the existence of a body of commercial ore which has not been sufficiently tested to be classified properly as proven ore or probable ore. For the purpose of this rule, the term "proven ore" means a body of ore so extensively surrounded by sampled faces that the risk of failure in continuity is reduced to a minimum, and the term "probable ore" means ore as to which the risk of failure in continuity is greater than for proven ore, but as to which there is sufficient warrant for assuming continuity of the ore.

4. If statements are made as to the existence of proven or probable ore, furnish for the information of the Commission copies of the pertinent reports and other supporting data with respect to such ore.

B. For issuers engaged in the oil and gas industry:

1. State the area, location of and means of access to the various properties proposed to be developed or exploited by the issuer and the nature of the issuer's interest therein.

2. State the development which has occurred to date on or near the properties held.

3. State (in tabular form) for such properties which are productive, net production of oil and gas to issuer's interests from each of the properties by years prior to the latest year, and by months for the latest year, as well as the number of net producing wells owned by the issuer which contributed to the production during each of the time periods involved.

4. State the estimated future reserves net to issuer's interest in such properties which are proved.

5. If statements concerning geology or engineering are made, furnish for the information of the Commission copies of the pertinent reports and other supporting data.

C. For issuers engaged or intending to engage in general commercial, financial or industrial businesses:

1. Nature of issuer's present or proposed products or services.

2. Length of time issuer has been in commercial production.

3. Methods of production and distribution and nature of market for products or services.

4. Location and general character of the plants or other physical properties now held or presently intended to be acquired and the nature of the title under which such properties are held or proposed to be held.

5. If the issuer intends to exploit or develop any new invention or process, set forth how such invention or process is to be applied commercially and whether or not it is covered by any patent, issued or pending. Identify by serial number and date any applicable patents or patent applications.

Instructions to paragraph (b) (11). 1. The financial statements required shall be prepared in accordance with generally accepted accounting principles and practices but need not be certified by independent public or certified public accountants.

2. If the issuer is a commercial, industrial or mining company in the promotional, exploratory or development state the financial statements shall include separate statements of assets and unrecovered promotional exploratory and development costs; liabilities; and capital shares and a statement of cash receipts and disbursements itemized as appropriate to the nature of the enterprise. In these statements dollar amounts shall be extended only for cash transactions. Amounts due to or from, or paid to or received from, underwriters, promoters, directors, officers, employees, and principal holders of equity securities other than affiliates shall be stated separately for each such class of persons, if significant in amount.

Instructions as to exhibits. Three copies of each of the following documents shall be filed as exhibits to the letter of notification:

1. The issuer's charter.
2. The issuer's by-laws.
3. Any indenture or other constituent instrument defining the rights of holders of the securities to be offered hereunder.
4. All underwriting contracts relating to the securities to be offered hereunder.

[1] The letter of notification shall contain the item numbers and captions to all items, but the text of the items may be omitted if all of the information required by each item is clearly set forth under the respective item number and caption.

[2] The letter of notification shall be signed in accordance with § 230.223 (Rule 223).

E. F. Seiller, Deputy Governor, or one of the four commissioners, or one of the deputy commissioners, in the Farm Credit Administration, who is designated by the Governor for such purpose, is hereby authorized to execute and perform all functions, powers, authority, and duties pertaining to the office of Governor of the Farm Credit Administration, in the event that the Governor, Deputy Governor Colvin, and T. F. Murphy, Deputy Governor In Charge of Finance and Accounts and Administrative Divisions, are unavailable to act, by reason of absence or for any other cause.

The foregoing revokes Farm Credit Administration Order No. 487, dated July 26, 1948, and Farm Credit Administration Order No. 439, dated July 26, 1948, 13 F. R. 4375.

DEPARTMENT OF COMMERCE

Federal Maritime Board

[Docket No. M-55]

[Docket Nos. M-20, M-24, M-30, M-31, M-34, M-42, M-43, M-45]

ANNUAL REVIEW OF BAREBOAT CHARTERS

NOTICE OF HEARING

1. By notice published in the FEDERAL REGISTER of July 10, 1952 (17 F. R. 6205), the Federal Maritime Board advised interested parties that in accordance with section 3 (e) (1) of Public Law 591, 81st Congress, an annual review had been made of Government-owned, war-built, dry-cargo vessels employed by American-flag operators as of June 30, 1952; that on the basis of the foregoing review the Federal Maritime Board has tentatively found that conditions exist justifying the continuance of the various charters listed in the aforementioned notice, as previously certified by the Federal Maritime Board; and that any interested party might request a hearing with respect to such tentative finding.

2. The Committee for the Promotion of Tramp Shipping, through their attorneys, timely filed with the Federal Maritime Board a letter dated July 11, 1952, which set forth objections to the continuance of various charters and requested a hearing on charters made pursuant to recommendations of the Federal Maritime Board in Docket Nos. M-14, M-20, M-21, M-24, M-28, M-30, M-31, M-33, M-34, M-35, M-37, M-42, M-43, M-45, M-50, M-51, M-52. (Subsequently, protest was withdrawn except as to the dockets listed in headnote above.)

3. A prehearing conference was held on August 7, 1952 (17 F. R. 7061), resulting in agreement on the following matters:

(a) The Committee will proceed first.

(b) The issues involved are whether the services for which such vessels are chartered are required in the public interest and are not adequately served, and whether privately owned American-flag vessels are available for charter on reasonable conditions and at reasonable rates for use in such services.

(c) The trades will be considered in the following order: Alaska, Intercoastal, Offshore; and charterers will be heard in rebuttal in the following order: Alaska Steamship Company (M-41), Coastwise Line (M-24, 30), Pacific-Atlantic Steamship Company (M-43), Pope & Talbot, Inc. (M-42), American President Lines (M-20), and Prudential S. S. Corporation (M-34, 45).

(d) All testimony is to be on a common record, but the question of relevancy of general testimony to any particular trade or charterer, as well as cross-examination thereon, may be reserved until the particular trade or charterer is reached in the hearing.

(e) Counsel for the Committee is to furnish to all parties, by September 2, 1952, an exhibit showing the number of ships available for charter, where they are located, whether they have intercoastal privileges, and as to each ship the length of charter to be offered and the charter rate thereon.

4. Notice is hereby given that a hearing will be held in this proceeding at Washington, D. C., on September 8, 1952, at 10 o'clock a. m., e. d. s. t., in Room 4821, Department of Commerce Building. The general purpose of such hearing will be to receive evidence with respect to whether conditions exist justifying continuance of the charters included within the scope of the hearing. All persons having an interest in this proceeding will be given an opportunity to be heard if present.

5. The parties may have oral argument before the examiner following the close of the hearing, in lieu of briefs, and the examiner will issue a recommended decision. Parties may have seven (7) days or such shorter time as may be agreed to at the hearing within which to file exceptions to, or memoranda in support of the examiner's recommended decision, but the Board reserves the right to determine whether oral argument on exceptions will be granted and whether briefs in connection therewith will be received.

Dated: August 14, 1952.

By order of the Federal Maritime Board.

[SEAL] R. L. MCDONALD, *Acting Secretary.*

National Production Authority

[Suspension Order 21; Docket No. 31]

DAY CO.

SUSPENSION ORDER

A hearing having been held in the above entitled matter on the 25th day of July 1952 before Palmer D. Edmunds, a Hearing Commissioner of the National Production Authority, on a statement of charges made by the National Produc-

NOTICES

tion Authority in accordance with General Administrative Order 16–06 (16 F. R. 8628), dated July 21, 1951, and Implementation 1 to National Production Authority General Administrative Order 16–06 (16 F. R. 8799); and

The respondent, the Day Company, having been duly apprised of the specific violations charged, and having been fully informed of the rules and procedures which govern these proceedings and the administrative action which may be taken; and

The Day Company having appeared and filed its answer herein by its attorneys Johnson, Sands, Brumfield and Maloney, 1127 First National Soo Line Building, Minneapolis, Minn.; and

Evidence having been taken and statements of counsel heard with respect to the matters set forth in the statement of charges and the respondent's answer, it is hereby determined:

Findings of fact: 1. The Day Company, respondent, is a corporation organized and existing under and by virtue of the laws of the State of Minnesota, maintaining its principal office and place of business in the City of Minneapolis, Minn. Said company, during all times material herein, has been and now is engaged in the engineering, manufacture, fabrication, and installation of filters and dust control systems for the food and chemical industries.

2. During the calendar quarter commencing July 1, 1951, the Day Company made allotments of and placed authorized controlled material orders for controlled material consisting of carbon steel in a total amount which was 99,073 pounds in excess of the related allotment received by it.

3. During the calendar quarter commencing October 1, 1951, the Day Company made allotments of and placed authorized controlled material orders for controlled material consisting of carbon steel in a total amount which was 313,719 pounds in excess of the related allotment received by it.

4. The allotments and authorized controlled material orders thus made and placed by the Day Company were occasioned by inadvertence and mistake by reason of inadequate bookkeeping and accounting system, and violations of applicable CMP regulations therein involved were unintentional.

5. At the termination of the third quarter, 1951, the Day Company failed to return within the prescribed time, or at any time thereafter, its unused allotments for third quarter, 1951, of 6,786 pounds of stainless steel, 480 pounds of copper and copper-base alloy products, and 942 pounds of copper wire mill products.

6. At the termination of the fourth quarter, 1951, the Day Company failed to return within the prescribed time, or at any time thereafter, its unused allotments for fourth quarter, 1951, of 2,538 pounds of stainless steel, and 228 pounds of copper and copper-base alloy foundry products and powder.

Conclusion: During the period beginning July 1, 1951, and ending January 10, 1952, the Day Company committed acts prohibited by sections 12 (b) and (19 (f) of CMP Regulation No. 1 dated May 3, 1951 (16 F. R. 4127), and as amended November 23, 1951 (16 F. R. 11860), and by section 18 (b) of CMP Regulation No. 1 dated May 3, 1951 (16 F. R. 4127), and as amended November 23, 1951 (16 F. R. 11860), in that it made allotments of and placed authorized controlled material orders for controlled material consisting of carbon steel in amounts in excess of the related allotments received by it, and in that it failed to return within the prescribed time its unused allotments of controlled materials for the third and fourth quarters of 1951. The total amount of carbon steel for which the Day Company made excessive allotments and placed excessive authorized controlled material orders is 412,792 pounds. The total amounts of controlled materials with respect to which the Day Company failed to return its unused allotments is 9,324 pounds of stainless steel, 708 pounds of copper and copper-base alloy foundry products and powder, and 942 pounds of copper wire mill products.

In order to correct the unauthorized and excessive making of allotments and placing authorized controlled material orders for controlled material consisting of carbon steel, and in order to correct the damage occasioned by the failure to return unused allotments, all as hereinbefore set forth, and in order to prevent future violations of regulations, orders, and directives of the National Production Authority by the respondent,

It is accordingly ordered: 1. That the Day Company's presently outstanding allotments of carbon steel for the third quarter of 1952 be, and they hereby are, reduced in the amount of 212,792 pounds.

2. That, commencing with the fourth quarter of 1952, the acquisition and use of carbon steel which may have been, or hereinafter may be, authorized to the Day Company, its successors and assigns, for said fourth quarter or succeeding quarters, by allotments, allocations, or orders issued by the National Production Authority be, and the same hereby are, reduced by 50 percent until such time as the allotments and allocations of carbon steel so withdrawn and withheld shall total 200,000 pounds.

3. That the Day Company, its successors and assigns, be and hereby are prohibited, during each and all of said periods, from acquiring any items of carbon steel in excess of their carbon steel allocations and allotments as so reduced.

4. That all allotments of stainless steel, copper and copper-base alloy foundry products and powder, and copper wire mill products be withdrawn and withheld from the Day Company until the conclusion of the third quarter of 1952.

Issued this 8th day of August 1952 at Chicago, Ill.

NATIONAL PRODUCTION AUTHORITY,
By PALMER D. EDMUNDS,
Hearing Commissioner.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

CENTRAL ARIZONA PROJECT, ARIZONA

FIRST FORM RECLAMATION WITHDRAWAL

MAY 9, 1952.

Pursuant to the authority delegated by Departmental Order No. 2515, of April 7, 1949, I hereby withdraw the following described lands from public entry under the first form of withdrawal, as provided by section 3 of the Act of June 17, 1902, (32 Stat. 388).

ARIZONA

GILA AND SALT RIVER MERIDIAN

T. 26 N., R. 10 E.,
Sec. 4, Lots 1 to 6 inc., $S\frac{1}{2}NW\frac{1}{4}$, $SW\frac{1}{4}$;
Sec. 8, $E\frac{1}{2}$;
Sec. 16, Lot 1, $NW\frac{1}{4}NE\frac{1}{4}$, $S\frac{1}{2}NE\frac{1}{4}$, $NW\frac{1}{4}$, $SE\frac{1}{4}$;
Sec. 22, Lots 1 to 4, inc.;
Sec. 28;
Sec. 34, Lots 1 to 4 inc., $SW\frac{1}{4}SE\frac{1}{4}$.
T. 27 N., R. 10 E.,
Sec. 4;
Sec. 8;
Sec. 22, Lots 1 to 4 inc., $NW\frac{1}{4}$, $W\frac{1}{2}SW\frac{1}{4}$;
Sec. 23, Lots 1 to 5 inc., $N\frac{1}{2}NW\frac{1}{4}$, $SW\frac{1}{4}NW\frac{1}{4}$, $NW\frac{1}{4}SW\frac{1}{4}$, $S\frac{1}{2}SW\frac{1}{4}$.

The above areas aggregate 4,329.10 acres.

G. W. LINEWEAVER,
Assistant Commissioner.

I concur. The records of the Bureau of Land Management will be noted accordingly.

WILLIAM PINCUS,
Assistant Director,
Bureau of Land Management.

JUNE 24, 1952.

CENTRAL ARIZONA PROJECT, ARIZONA

NOTICE FOR FILING OBJECTIONS TO ORDER[1] WITHDRAWING PUBLIC LANDS

Notice is hereby given that for a period of 30 days from the date of publication of this notice, persons having cause to object to the terms of the above order withdrawing certain public lands in the State of Arizona, for use in connection with proposed Coconino Dam and Reservoir, Central Arizona Project may present their objections to the Secretary of the Interior. Such objections should be in writing, should be addressed to the Secretary of the Interior, and should be filed in duplicate in the Department of the Interior, Washington 25, D. C.

In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where the proponents of the order can explain its purpose, intent, and extent. Should any objection be filed, notice of the determination by the Secretary as to whether the order should be rescinded, modified or let stand will be given to all

[1] See F. R. Doc. 52-9156, *supra*.

interested parties of record and the general public.

G. W. LINEWEAVER,
Assistant Commissioner.

Geological Survey

COLORADO

NONCOAL CLASSIFICATION

Pursuant to authority vested in me by the act of March 3, 1879 (20 Stat. 394; 43 U. S. C. 31), and to the provisions of applicable regulations (30 CFR Part 201), the following described land, insofar as title thereto remains in the United States, is hereby classified as noncoal land:

SIXTH PRINCIPAL MERIDIAN

T. 13 S., R. 86 W.,
Sec. 31, lots 11, 12, 13, 14, 15, 16, 17, 18, 19, 20 and $SE\frac{1}{4}NW\frac{1}{4}$, $NE\frac{1}{4}SW\frac{1}{4}$, $NW\frac{1}{4}SE\frac{1}{4}$, and $SE\frac{1}{4}SE\frac{1}{4}$.
T. 14 S., R. 86 W.,
Sec. 5, $SW\frac{1}{4}NW\frac{1}{4}$ and $NW\frac{1}{4}SW\frac{1}{4}$;
Sec. 6, lots 3, 8, 9, 10, 11 and $NE\frac{1}{4}SE\frac{1}{4}$.

The area described aggregates 702.21 acres.

W. E. WRATHER,
Director.

DEPARTMENT OF LABOR

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. and Sup. 214), and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners, and learning period for certificates issued under the general learner regulations (§§ 522.1 to 522.14) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Single Pants, Shirts and Allied Garments, Women's Apparel, Sportswear and Other Odd Outerwear, Rainwear, Robes and Leather and Sheep-Lined Garments Divisions of the Apparel Industry Learner Regulations (29 CFR 522.160 to 522.166, as amended December 31, 1951; 16 F. R. 12043, and June 2, 1952; 17 F. R. 3818).

Alby Sportswear Co., 414 Pine St., Scranton, Pa., effective 8–11–52 to 8–10–53; six learners (dresses and blouses).

Colonial Shirt Corp., Woodbury, Tenn., effective 8–11–52 to 2–10–53; 30 learners for expansion purposes (dress and sport shirts).

David Crystal, Inc., 1135 Moss Street, Reading, Pa., effective 8–8–52 to 8–7–53; 10 percent of the productive factory force (ladies' sportswear).

Marion Culver, Inc., 336 North Magnolia Boulevard, Melbourne, Fla., effective 8–11–52 to 8–10–53; five learners; learners not to be engaged at subminimum wage rates in the production of skirts (sportswear).

Day's Tailor D Clothing, Inc., Tacoma, Wash., effective 8–6–52 to 2–5–53; 50 learners for expansion purposes (trousers, jackets and cruisers).

Dick's Dress Co., 25 Forest Street, Rutland, Vt., effective 8–8–52 to 8–7–53; 10 percent of the productive factory force (dresses).

Four's Co., Inc., Blairsville, Pa., effective 8–7–52 to 8–6–53; 10 learners (children's dresses).

J. Freezer & Son, Inc., Radford, Va., effective 8–6–52 to 2–5–53; 40 learners for expansion purposes (men's sport shirts).

Kramer Manufacturing Co., 313 Arch Street, Philadelphia, Pa., effective 8–8–52 to 8–7–53; three learners (work and semidress pants).

Legion Dress Co., Main and Paxton Streets, Centralia, Pa., effective 8–6–52 to 8–5–53; 10 percent of the productive factory force (ladies' dresses).

The Owenby Manufacturing Co., Marietta, Ga., effective 7–30–52 to 7–29–53; 10 percent of the productive factory force (children's wear).

Rocket Manufacturing Co., Inc., 1000 Spring Street, Little Rock, Ark., effective 8–12–52 to 10–11–52; 25 learners for expansion purposes (women's and misses' house robes and blouses).

Southern Textiles, Inc., Alamo, Tenn., effective 8–11–52 to 8–10–53; 10 learners (corsets).

Taunton Garment Corp., 42 Adams Street, Taunton, Mass., effective 8–6–52 to 8–5–53; 10 percent of the productive factory force (dresses).

Todd Manufacturing Co., Elkton, Ky., effective 8–9–52 to 8–8–53; 10 percent of the productive factory force (work shirts).

Toni Styles, Inc., 129 West Market Street, Scranton, Pa., and 1204 South Main Street, Old Forge, Pa., effective 8–4–52 to 8–3–53; 10 learners (dresses).

Top Mode Manufacturing Co., Warsaw, N. C., effective 8–11–52 to 2–10–53; 40 learners for expansion purposes (women's cotton house dresses).

Whittemore Manufacturing Co., Wolfe City, Tex., effective 8–8–52 to 8–7–53; five learners; learners not to be engaged at subminimum wage rates in the manufacture of women's or children's skirts (ladies' dresses, blouses, jackets and children's garments).

Glove Industry Learner Regulations (29 CFR 522.220 to 522.231, as amended October 26, 1950; 15 F. R. 6888).

Indianapolis Glove Co., Inc., Houlka, Miss., effective 8–8–52 to 2–7–53; 15 learners for expansion purposes (canton flannel work gloves).

Hosiery Industry Learner Regulations (29 CFR 522.40 to 522.51, as revised November 19, 1951; 16 F. R. 10733).

Skyland Textile Co., Salisbury Road, Statesville, N. C., effective 8–8–52 to 4–7–53; 30 learners for expansion purposes.

West Hickory Color & Chemical Co., Hickory, N. C., effective 8–8–52 to 8–7–53; three learners.

Knitted Wear Industry Learner Regulations (29 CFR 522.68 to 522.79, as amended January 21, 1952; 16 F. R. 12866).

Louis Gallet Knitting Mills, Inc., Penn-Craft, East Millsboro, Pa., effective 8–8–52 to 2–7–53; 10 learners for expansion purposes (outerwear).

Lloyd's Lingerie, Inc., 4405½ Oakland Avenue, Greensboro, N. C., effective 8–5–52 to 2–4–53; 10 learners for expansion purposes (ladies' and children's lingerie).

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.14).

G. H. Rauschenberg Co., Box 76, Dalton, Ga., effective 8–4–52 to 2–3–53; 10 percent of the productive factory force; sewing machine operators; 320 hours; 65 cents per hour for the first 160 hours and 70 cents per hour for the remaining 160 hours (cotton chenille robes) (replacement certificate).

The following special learner certificate was issued to the school-operated industries listed below.

Emmanuel Missionary College, Berrien Springs, Mich., effective 9–1–52 to 8–31–53; bookbinder, bindery workers and related skilled and semi-skilled occupations; 25; 200 hours at 55 cents, 200 hours at 60 cents, 200 hours at 70 cents; pressman, compositor and related skilled and semi-skilled occupations; 35; 350 hours at 55 cents, 325 hours at 60 cents, 325 hours at 70 cents; assembler (furniture), machine operator, furniture finisher and related skilled and semi-skilled occupations; 55; 250 hours at 55 cents, 250 hours at 60 cents, 250 hours at 70 cents; bookkeeper, typist and related skilled and semi-skilled occupations; 15; 200 hours at 55 cents, 200 hours at 60 cents, 200 hours at 70 cents.

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be canceled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 12th day of August 1952.

ROBERT G. GRONEWALD,
Authorized Representative of the Administrator.

ECONOMIC STABILIZATION AGENCY

Office of Price Stabilization

[Ceiling Price Regulation 67, Supplementary Regulation 2, Special Order 2]

AUTO VENTSHADE CO.

MANUFACTURERS SUGGESTED RESALE PRICES

Statement of considerations. A schedule of suggested price lists and discounts for resellers of ventshades manufactured by the Auto Ventshade Company is established by this special order pursuant to section 2 of Supplementary Regulation 2 of Ceiling Price Regulation 67. Sup-

plementary Regulation 2 to Ceiling Price Regulation 67 authorizes the Director of Price Stabilization to approve manufacturers' new published price lists provided the manufacturers' net ceiling price per item will not be affected by the new price lists, and that the weighted average margins of resellers using the proposed price list will not exceed the weighted average margins of resellers using the price list in effect in the period April 1, 1950 to June 24, 1950.

On the basis of the statements made in the application of the Auto Ventshade Company and the facts submitted by them, it appears that the Auto Ventshade Company is proposing a change in their published price list for ventshades, and that their own net ceiling price per item will not be affected by the change. It further appears that on the basis of resellers' volume of sales during the 1950 fiscal year and other data submitted by the Auto Ventshade Company, the weighted average margin of resellers using the proposed price list will be no greater than the weighted average margin of resellers using the price list in effect in the period April 1, 1950 to June 24, 1950.

Special provisions. For the reasons set forth in the Statement of Considerations and pursuant to section 2 of Supplementary Regulation 2 to Ceiling Price Regulation 67, this special order is hereby issued.

1. The following revised published price list of the Auto Ventshade Company, Chamblee, Georgia, for their ventshades is hereby approved:

SUGGESTED LIST PRICES

2-piece sets	$5.25
4-piece sets	10.00
Full-length hard tops	15.00

2. The list prices in paragraph 1 are subject to the following:

DISCOUNT SCHEDULE AND TERMS

(a) Discount to retail dealers, 40 percent from list prices.

(b) Discount to jobbers and distributors on orders other than factory-packed case lots, 50 percent from list prices.

(c) Discounts to jobbers and distributors on orders in factory packed case lots, 60 percent from list price.

(d) Freight perpaid on orders of 48 sets or more in one shipment. Orders for less than 48 sets are F. O. B. Chamblee, Georgia.

(e) Terms to accounts of approved credit are 2 percent discount for payment on or before the 10th day of the succeeding month.

3. The discount schedule and terms approved in paragraph 1 of this special order will be applicable to any ventshades subsequently added to the price list of the Auto Ventshade Company.

4. This special order or any provision thereof may be revoked, suspended, or amended by the Director of Price Stabilization at any time.

Effective date. This Special Order 2 shall become effective August 15, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 14, 1952.

[F. R. Doc. 52-9135; Filed, Aug. 14, 1952; 4:58 p. m.]

FEDERAL POWER COMMISSION

[Docket No. G-2011]

OHIO FUEL GAS CO.

NOTICE OF APPLICATION

AUGUST 14, 1952.

Take notice that The Ohio Fuel Gas Company (Applicant), an Ohio corporation, address, Columbus, Ohio, filed on July 25, 1952, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of approximately 2.2 miles of 6⅝-inch and 7-inch natural-gas transmission pipeline, representing replacement of a portion of its existing Line E–2 and extension of said Line E–2 to a new point of delivery to the National Fireproofing Corporation, at Haydenville, Ohio, and in connection therewith, the abandonment of a portion of said Line E–2 consisting of 1.3 miles of 4½-inch pipe not suitable for continued service.

Said facilities were constructed by Applicant in 1950 and the abandoned facilities were disconnected and abandoned in the ground. Applicant states that said facilities were constructed in order to increase the capacity of pipelines delivering natural gas to National Fireproofing Corporation to permit the delivery of approximately 1,100 Mcf per day of natural gas required by that company as a result of changing several coal-fired kiln to operation on natural gas. Applicant requests a certificate of public convenience and necessity and permission and approval to abandon facilities or in the alternative, a determination that the facilities hereinbefore described are not subject to the jurisdiction of the Commission.

The total over-all capital cost of the construction was $31,011. The retirements, consisting of $2,954 credit to Fixed Capital, $51 for cost of retirement, and $53 for salvage, resulted in a net increase in investment of $28,057.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 3d day of September 1952. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 52-9159; Filed, Aug. 19, 1952; 8:47 a. m.]

[Docket No. G-2013]

OHIO FUEL GAS CO.

NOTICE OF APPLICATION

AUGUST 14, 1952.

Take notice that The Ohio Fuel Gas Company (Applicant), an Ohio corporation, address, Columbus, Ohio, filed on July 28, 1952, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of approximately 34.5 miles of 20-inch natural-gas transmission pipeline in Fairfield, Franklin, Delaware, and Licking Counties, in Ohio, extending from a point of connection with the transmission facilities of Texas Eastern Transmission Corporation to a point near Johnstown, Ohio, and partially looping Applicant's existing Lines B–100 and "B" between its Crawford and its Treat Compressor Stations.

Applicant proposes, by means of the proposed facilities, to increase the capacity of its transmission facilities northward from the point of connection with Texas Eastern Transmission Corporation and from its Crawford Station by approximately 52,000 Mcf per day in order to make available approximately 50,000 Mcf per day for delivery into Applicant's proposed Holmes Storage Area during July 1953. Applicant proposes, also, to utilize the proposed facilities to provide additional winter market capacity for the Columbus, Ohio, area.

The total estimated capital cost of construction of the proposed facilities is $1,675,000. Applicant proposes to finance such cost from funds which its parent, The Columbia Gas System, Inc. has agreed to provide.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 3d day of September 1952. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 52-9160; Filed, Aug. 19, 1952; 8:47 a. m.]

[Docket No. G-2022]

PACIFIC GAS AND ELECTRIC CO.

NOTICE OF APPLICATION

AUGUST 14, 1952.

Take notice that Pacific Gas and Electric Company (Applicant), a California corporation, located at 245 Market Street, San Francisco 6, California, filed on August 4, 1952, an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain pipeline facilities hereinafter described.

Applicant proposes to construct and operate 14.5 miles of 12¾-inch O. D. pipeline for the transportation of natural gas which will loop a portion of its existing Ripon-Salida pipeline in San Joaquin and Stanislaus Counties, California. It is proposed to construct 4.1 miles in 1952 and the remainder in 1954 and 1956.

The estimated cost of the proposed facilities is $474,388 which will be met from presently available funds.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Commission's rules of practice and procedure (18 CFR 1.8 or

1.10) on or before the 3d day of September 1952. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

OFFICE OF DEFENSE MOBILIZATION

[Defense Manpower Policy No. 4, Notification 53, Amdt.]

PLACEMENT OF PROCUREMENT WITH THE APPAREL INDUSTRY

Paragraph 1 of the recommendations of the Surplus Manpower Committee concerning the apparel industry under Defense Manpower Policy No. 4 (17 F. R. 6675) is amended to read as follows:

1. The Department of Defense should conduct a test to determine whether the cutting of jackets or coats and trousers in the same lay is more economical, resulting in a smaller cloth consumption than if these garments are cut separately, and report the results of progress thereon to the Office of Defense Mobilization by September 15, 1952.

OFFICE OF DEFENSE MOBILIZATION,
ARTHUR S. FLEMMING,
Chairman,
Surplus Manpower Committee.

Approved:

JOHN R. STEELMAN,
Acting Director,
Office of Defense Mobilization.

[F R. Doc. 52-9252; Filed, Aug. 19, 1952; 10:16 a. m.]

SECURITIES AND EXCHANGE COMMISSION

DETROIT STOCK EXCHANGE

RECORD DISPOSAL PLAN

The Securities and Exchange Commission today announced that it had declared effective a Plan filed on July 17, 1952, by the Detroit Stock Exchange pursuant to § 240.17a–6 (Rule X-17A–6) under the Securities Exchange Act of 1934 for the disposal of the following material filed with the Exchange prior to January 1, 1946:

(1) Forms 10K and Amendments thereto filed pursuant to section 13 of the Securities Exchange Act of 1934 or the rules and regulations thereunder.

(2) Forms 4, 5 and 6 filed pursuant to section 16 of the Securities and Exchange Act of 1934 or the rules and regulations thereunder.

The Exchange proposes to commence disposing of the specified material as soon as practicable after the Commission has declared its Plan effective. Notice of the Commission's proposal to declare this Plan effective was published for comment in Securities Exchange Act Release No. 4735.

The purpose of the Plan is to alleviate the record storage problem of the Exchange and to facilitate the availability of material filed with the Exchange subsequent to January 1, 1946. Information contained in the material to be disposed of by the Exchange is on file with the Commission where it will continue to be available.

The text of the Commission's action follows:

The Securities and Exchange Commission, acting pursuant to the Securities Exchange Act of 1934, particularly sections 17 (a), 23 (a), and 24 (b) thereof and § 240.17a–6 thereunder, having due regard for the public interest and for the protection of investors, and deeming it necessary in the public interest, for the protection of investors and for the exercise of the functions vested in it, does hereby declare effective the Plan filed on July 17, 1952, by the Detroit Stock Exchange pursuant to § 240.17a–6, on condition that if at any time it appears to the Commission necessary or appropriate in the public interest or for the protection of investors so to do, the Commission may suspend or terminate the effectiveness of the said Plan by sending at least 10 days written notice to the Detroit Stock Exchange.

The Commission finds that § 240.17a–6 and this action taken thereunder have the effect of granting exemption and relieving restriction, and that this action may be and is hereby declared to be effective August 13, 1952.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

AUGUST 12, 1952.

[File No. 70-2911]

UNITED GAS CORP.

NOTICE OF FILING CONCERNING SUBORDINATION AGREEMENT

AUGUST 14, 1952.

Notice is hereby given that United Gas Corporation ("United"), a gas utility subsidiary of Electric Bond and Share Company, a registered holding company, has filed an application pursuant to the Public Utility Holding Company Act of 1935, particularly sections 9 (a) (1), 10 (a) (1), 10 (b) and 10 (c) thereof with respect to certain proposed transactions which are summarized as follows:

United, together with the other holders of the outstanding 6 percent promissory notes of Carthage-Hydrocol, Inc. ("Hydrocol"), proposes the subordination of such notes to borrowings made and to be made by Hydrocol from June 6, 1952, to October 1, 1952, in the aggregate principal amount of not to exceed $3,000,000. There is presently outstanding $28,000,000 principal amount of such 6 percent notes of Hydrocol, of which the amount of $3,747,000 is held by United.

The commission has previously authorized the subordination by United of its holdings of the 6 percent notes by Hydrocol to borrowings to be made by Hydrocol from June 6, 1952, to August 1, 1952, in the aggregate principal amount of not to exceed $2,000,000. Pursuant to such agreement, Hydrocol has borrowed from the Texas Company, an aggregate principal amount of $1,000,000 and has issued its 6 percent notes therefor in like amount. The effect of the transaction herein proposed is to increase the amount which Hydrocol may borrow under the subordination agreement to $3,000,000, and to extend the date for such borrowings to October 1, 1952.

The application states that the funds to be obtained by Hydrocol from the borrowings will be used to enable it to continue its operations and to allow it sufficient time to work out a plan of reorganization.

Notice is further given that any interested person may, not later than August 27, 1952, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by the said application which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after August 27, 1952, said application, as filed or as amended, may be granted as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 (a) and Rule U-100 thereof. All interested persons are referred to said application which is on file in the office of this Commission for a statement of the transactions therein proposed.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 27310]

CEMENT FROM POINTS IN KANSAS AND DEWEY, OKLA., TO POINTS IN OFFICIAL TERRITORY

APPLICATION FOR RELIEF

AUGUST 15, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: L. E. Kipp, Agent, for carriers parties to his tariff I. C. C. No. A–3758.

Commodities involved: Cement and related articles, carloads.

From: Fort Scott, Fredonia, Humboldt, Independence, and Iola, Kans., and Dewey, Okla.

To: Points in official territory.

Grounds for relief: Competition with rail carriers, circuitous routes, to maintain grouping, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: L. E. Kipp, Agent, I. C. C. No. A–3758, Supp. 5.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] W. P. BARTEL, *Secretary.*

[F. R. Doc. 52-9175; Filed, Aug. 19, 1952; 8:51 a. m.]

[4th Sec. Application 27311]

CANNED OR PRESERVED FOODSTUFFS BETWEEN POINTS IN OFFICIAL TERRITORY

APPLICATION FOR RELIEF

AUGUST 15, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: C. W. Boin and I. N. Doe, Agents, for carriers parties to Agent Boin's tariff I. C. C. No. A-962.

Commodities involved: Canned or preserved foodstuffs, carloads.

Between: Points in official territory, including extended Zone C territory.

Grounds for relief: Rail and motor competition, circuity, grouping, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. W. Boin, Agent, I. C. C. No. A-962.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[4th Sec. Application 27312]

GLASSWARE BETWEEN BALTIMORE, MD., AND BORDER TERRITORY

APPLICATION FOR RELIEF

AUGUST 15, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: J. G. Kerr, Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 668.

Commodities involved: Glassware, other than cut, viz: tumblers, glass, pressed or machine made, in carloads.

Between: Baltimore, Md., on the one hand, and points in North Carolina, Kentucky, southern Virginia, and northeastern Tennessee, on the other, over rail-water and water-rail routes.

Grounds for relief: Rail competition, circuity, grouping, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 668, Supp. 209.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[4th Sec. Application 27313]

IRON AND STEEL ARTICLES FROM CINCINNATI AND PORTSMOUTH, OHIO, AND LIMEVILLE, KY., TO ORANGEBURG, S. C.

APPLICATION FOR RELIEF

AUGUST 15, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: J. G. Kerr, Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1258.

Commodities involved: Manufactured iron and steel articles, carloads.

From: Cincinnati and Portsmouth, Ohio, and Limeville, Ky. (applicable on traffic originating at Cleveland, Ohio).

To: Orangeburg, S. C.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1258, Supp. 1.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

SEWER PIPE FROM ILLINOIS TERRITORY TO SOUTHERN TERRITORY

APPLICATION FOR RELIEF

AUGUST 15, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. G. Raasch, Agent, for carriers parties to his tariff I. C. C. No. 766.

Commodities involved: Sewer pipe and related articles, carloads.

From: Illinois territory.

To: Southern territory.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: R. G. Raasch, Agent, I. C. C. No. 766.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

FEDERAL REGISTER

VOLUME 17 NUMBER 164

Washington, Thursday, August 21, 1952

TITLE 3—THE PRESIDENT

PROCLAMATION 2987

FIRE PREVENTION WEEK, 1952

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS destructive fires continue to take an enormous toll of life and property despite the compelling need for the conservation of our human and natural resources in order to strengthen the defense of the Nation; and

WHEREAS a more concerted and widespread effort to prevent such fires must be made during the coming year if the lives of approximately eleven thousand of our citizens are to be spared, and the suffering and disability of many thousands more prevented; and

WHEREAS, in this period of crisis, the Nation can ill afford the needless waste of nearly a billion dollars in irreplaceable materials, facilities, and resources:

NOW, THEREFORE, I, HARRY S. TRUMAN, President of the United States of America, do hereby designate the week beginning October 5, 1952, as Fire Prevention Week.

I urge that every man, woman, and child in this great country contribute to the nation-wide effort to strengthen the United States by accepting a personal responsibility in the never-ending campaign to save life and property by preventing destructive fires. I request that State and local governments, the American National Red Cross, the National Fire Waste Council, the Chamber of Commerce of the United States, and business, labor, and farm organizations, as well as churches, schools, civic groups, and agencies of public information, cooperate fully in the observance of Fire Prevention Week. I also direct the appropriate agencies of the Federal Government to assist in this crusade against the loss of life and property resulting from fires.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this 18th day of August in the year of our Lord nineteen hunded and fifty-two, and of the Independence of the United States of America the one hundred and seventy-seventh.

[SEAL] HARRY S. TRUMAN

By the President:

DAVID BRUCE,
Acting Secretary of State.

Chapter VII—Production and Marketing Administration (Agricultural Adjustment), Department of Agriculture

[(1022-Burley and Flue-53)-3]

PART 725—BURLEY AND FLUE-CURED TOBACCO

PROCLAMATION OF RESULTS OF MARKETING QUOTA REFERENDUM

§ 725.403 *Basis and purpose.* This section is issued to announce the results of the flue-cured tobacco marketing quota referendum for the marketing year beginning July 1, 1953, and for the three-year period beginning July 1, 1953. Under the provisions of the Agricultural Adjustment Act of 1938, as amended, the Secretary proclaimed a national marketing quota for flue-cured tobacco for the 1953-54 marketing year (17 F. R. 6022). The Secretary announced (17 F. R. 6058) that a referendum would be held on July 19, 1952, to determine whether flue-cured tobacco producers were in favor of or opposed to marketing quotas for the marketing year beginning July 1, 1953, and to determine whether flue-cured tobacco producers were in favor of or opposed to marketing quotas for the three-year period beginning July 1, 1953. Since the only purpose of this proclama-

year period beginning July 1, 1953. In a referendum of farmers engaged in the production of the 1952 crop of flue-cured tobacco held on July 19, 1952, 260,163 farmers voted. Of those voting, 254,317, or 97.8 percent, favored quotas for a period of three years beginning July 1, 1953; 2,639, or 1.0 percent, favored quotas for only the one year beginning July 1, 1953; and 3,207, or 1.2 percent, were opposed to quotas. Therefore, the national marketing quota of 1,234 million pounds proclaimed July 1, 1952 (17 F. R. 6022) for flue-cured tobacco for the 1953–54 marketing year will be in effect for such year and marketing quotas on flue-cured tobacco will be in effect for three marketing years beginning July 1, 1953.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 164]

CPR 164—GROCERS, VARIETY AND SPECIALTY PAPER, FILM AND FOIL BAGS

Pursuant to the Defense Production Act of 1950, as Amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Ceiling Price Regulation 164 is hereby issued.

STATEMENT OF CONSIDERATION

This regulation establishes ceiling prices for all manufacturers of bags made from paper, film, or foil. These bags exclude paper shipping sacks covered by Ceiling Price Regulation 115, but include those other bags made of paper and those made wholly or partly of plastic film, mesh, foil or protective laminants, and those made wholly or partly by hand or machine. However, manufacturers whose ceiling prices have been established under General Overriding Regulation 20 or 21, or under Supplementary Regulation 17 or 18 to Ceiling Price Regulation 22, may elect to retain their ceiling prices so established for products covered by this regulation.

The ceiling price provisions of the regulation are divided into two subarticles under Article II. Subarticle I covers all bags which are made to standard specifications and the ceiling prices for the most part are spelled out. Subarticle II covers all bags which are made to order to the specifications and quantity requirements of an individual buyer and the ceiling prices are computed by a formula for each order.

Generally speaking, the bags covered by Subarticle I are carried in stock by manufacturers for sale to wholesale buyers who in turn stock these bags for resale to retail stores. However, the bags covered by Subarticle II are generally sold and shipped by the manufacturer directly to the ultimate user.

Description of the product and the industry covered. The largest single segment of bags covered by Subarticle I is composed of retail store bags, commonly used for over-the-counter delivery of food and other consumer merchandise. Within this segment the largest single grade is the grocers bag. The cubic capacity, basic weight and minimum strength of paper for each grocers bag size have been standardized by the U. S. Department of Commerce, National Bureau of Standards, in Simplified Practice Recommendation R42–43.

All other types of standard-size bags used in retail stores, such as notion and millinery bags used by department stores, garment bags used by dry-cleaning establishments and bottle bags used by package stores are commonly designated in the trade as Variety bags. Some of these Variety bags also have been standardized by the U. S. Bureau of Standards in Simplified Practice Recommendations R129–41 and R107–31, covering millinery and notion, and glassine bags, respectively.

A third, well-established group of bags which is covered by Subarticle I of Article II is designated in the trade as Household bags, and includes bags designed for household, hospital, restaurant, and similar uses, such as kitchen and garbage bags, lunch bags, sandwich bags and moth-proof storage bags. Although Household bags also are manufactured for stock in standard sizes, their specification standards (and also some variety bags) may vary as between different manufacturers, whereas grocers bags specifications are standardized for all manufacturers by the Government.

More than 100 manufacturers produce Standard bags of the types which fall under Subarticle I. Twenty-eight of them produce Grocers and Variety bags. The others produce one or more types of Variety or Household bags or both. The total volume of all bags covered by Subarticle I is estimated at 700,000 tons annually, with a sales value of approximately $200,000,000.

In the Grocers and Variety bag group, 10 of the 28 manufacturers are integrated, i. e., producers of most of their raw materials, and the remaining 18 are converters who buy the raw materials from which they manufacture bags. In general, the 18 converters distribute in less-than-carload lots of their respective local markets, while the integrated manufacturers distribute nationally on a carload basis. The 10 integrated manufacturers produce approximately 75 percent of the total tonnage of Grocers and Variety bags made by this group.

Many of the manufacturers who produce Standard bags covered by Subarticle I produce some types of Specialty bags covered by Subarticle II. There are also many converters who produce Specialty bags only. Combined, over 150 manufacturers produce Specialty bags covered by Subarticle II. No exact figures are available, but it is estimated that these Specialty bags total 90,000 tons annually, with a sales value of $100,000,000. This is about four times the value-per-ton of the Standard bags in Subarticle I, due to the use of higher priced materials and to the higher-cost "tailored-made" nature of the manufacturing operations required for Specialty as compared with Standard bags.

Recent economic developments. Although some stability is exhibited by this industry in price, there is an unusual degree of stability in consumption of bags. For the large volume items, grocers bags, the average annual shipment from 1936 through 1940 was 12.7 million bales while for the comparable period 10 years later, 1946 through 1950, it was 12.1 million bales. During World War II there was an extreme shortage, shipments dropping to as low as 7.6 million bales in 1945. For the year 1951, there were 13.0 million bales shipped, 3.2 percent above the 1950 rate of 12.6 million bales.

Much of the growth in the industry's volume lines occurred in grocers sacks, reflecting a change in consumer habits and the development of supermarkets where this type of bag has extensive use. For the period 1937 through 1940, shipments of grocers sacks averaged 1.6 million bales annually while 10 years later for the comparable period (1947-50) this average was 3.1 million bales. The average weight of each bale of sacks is about the same as of grocers bags (60 pounds) but there are five times as many bags as there are sacks in a bale. Only 1.5 million bales of sacks were shipped in 1945, the low point of the World War II shortage. During the year 1951, there were 4.0 million bales of sacks shipped, which was 10 percent above 1950.

The most representative product for this segment of the bag industry is the 12-pound grocers bag. It is of medium size and is made of 35-pound basis weight paper, which is about an average for all grocers bags. The raw material paper cost is about two-thirds of the selling price of the finished bag. Over the past five years the domestic price of 35-pound basis weight unbleached kraft paper rose from an average of $120 per ton in 1947 to $137 in 1950 and $156 in 1951. The corresponding price movement of the 12-pound bag in carload lots was from an average of $182 per ton in 1947 to $192 in 1950 and $226 in 1951. In 1947, paper cost was 66 percent of the price of the bag, in 1950 it was 71 percent and in 1951 it was 69 percent.

Summary of the main features of the regulation. Dollar-and-cent ceilings are established in section 4 for about 75 percent of the tonnage of Standard bags. For the remaining 25 percent of the tonnage, ceiling prices are fixed in section 5 by applying the historical differential of each manufacturer to the dollar-and-cent ceiling price established for his largest volume item in the category in which the product for which he is de-

tion is to announce the results of the referendum, it is hereby found and determined that with respect to this proclamation, application of the notice and procedure provisions of the Administrative Procedure Act (5 U. S. C. 1003) is unnecessary.

§ 725.404 *Proclamation of the results of the flue-cured tobacco marketing quota referendum for the marketing year beginning July 1, 1953, and for the three-*

termining a ceiling price falls; or if there are no spelled out ceiling prices in section 4 of grades produced by him, the manufacturer's ceiling prices on all items are those which he had in effect on November 1, 1951. On new grades, ceiling prices are determined by use of his most closely competitive manufacturer's price or by relating the bag in question to his own most comparable grade.

For many years most paper bag manufacturers have priced their standard product by the use of discounts from base lists and this regulation utilizes that technique in specifying the ceiling prices of Standard and Variety bags. These discounts are stated in terms of so many "fives"; that is, each successive "five" representing 5 percent discount from the previous net figure. A common base list is used by the trade so that any difference in price can be recognized and measured immediately for any size and grade of bag by the difference in discount. Base list and discount tables are located in Appendix A.

Ceiling prices for the Specialty bags are related directly to the individual specifications and quantities requested by each buyer. Consequently, they are computed by a formula which adds a markup, or a profit margin, to the material and conversion cost factors used in pricing the production of the exact specifications and quantity which the customer requests. Whatever formula was in use during the base period, January 25 through February 24, 1951, becomes the basis for determining the ceiling price on any such Specialty bag. All the factors in the formula, except for the basic raw materials (paper, film or foil), are frozen as of the base period.

For the basic raw materials an adjustment is made necessary by the particular pricing conditions which existed during the general freeze period. Standard bag prices generally are highly sensitive to competitive conditions and move more widely and quickly than Specialty bag prices which are set by relatively fixed formula, reflecting changes in costs with a fixed profit margin, and without the sensitivity to market conditions which obtains on Standard bag prices. For this reason, Specialty bag prices had not moved upward, by the time of the general freeze, to the extent that Standard bags had adjusted themselves to the demand and, consequently, there was an imbalance between the two categories of bag production.

Being tailor-made, Specialty bags normally sell at prices netting more dollars per ton than do Standard bags made of identical material. The distortion during the freeze period reversed this relationship and the present action corrects this distortion by permitting the use, in this raw material factor, of costs for the basic raw materials (paper, film and foil) not exceeding the ceiling prices initially established in tailored regulations covering such raw materials, or until such a regulation is issued, the highest cost incurred for such basic raw materials up to and including December 31, 1951.

Although this adjustment affects unbleached bag specialties to a limited extent due to the light weight paper differentials of CPR 88, it is of prime consequence in only about one-sixteenth of the tonnage of this industry, in the bleached paper and plastics group where it is quite important to a large number of the smaller companies which tend toward production to individual specification and might otherwise be forced out of this type of manufacture or to the use of substitute materials.

The level of ceiling prices under this regulation. The ceiling prices established for standard bags are at or below the ceilings which were in effect under the General Ceiling Price Regulation and reflect current prices except in the case of standard plastic film bags, where cost studies have indicated that the appropriate level lies between the GCPR ceilings and the lower selling prices currently in effect. The spelled out ceiling prices established for Standard stock size bags, for orders of minimum lots of 600 bales or more, are those which manufacturers accounting for most of the production of such bags had in effect during the base period January 25 through February 24, 1951, and have currently in effect. They are substantially below the ceiling prices that have been filed for this tonnage with the Office of Price Stabilization under Ceiling Price Regulation 22. Orders for intermediate quantities (250 to 599 bales) take a one "five" upcharge above the ceiling price for minimum orders of 600 bales. Orders for less than 250 bales take an upcharge of three "fives" above the ceiling price for minimum orders of 600 bales of paper bags, other than those made from glassine paper and from plastic films.

The ceiling prices on Standard bags made from glassine paper are adjusted to the current level which is 7 percent less than the prices in effect during the base period. Standard bags made from plastic film have ceiling prices about 3 percent less than those in effect during the base period and 5 percent higher than prices currently in effect. The ceiling prices for Standard bags made of plastic film were developed by adjusting their prices prior to June 1950 for changes in costs other than basic raw materials through July 26, 1951 and reflecting the increase in basic raw material costs up to and including December 31, 1951.

Ceiling prices for Specialty bags will be above those which have been in effect since January 25, 1951, but well below the filed ceiling prices which were permitted many manufacturers under Ceiling Price Regulation 22. These ceiling prices will correct the imbalance, referred to above, between the ceiling prices for specialty bags and the ceiling prices for standard bags which were in effect under the General Ceiling Price Regulation.

FINDINGS OF THE DIRECTOR OF PRICE STABILIZATION

In the judgment of the Director of Price Stabilization, the ceiling prices established by this regulation are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended.

So far as practicable, the Director of Price Stabilization gave due consideration to the national effort to achieve maximum production in furtherance of the objective of the Defense Production Act of 1950, as amended; to prices prevailing during the period January 25 through February 24, 1951, and just before the issuance of this regulation, and to relevant factors of general applicability.

In the formulation of this regulation there has been consultation with industry representatives, including meetings with the industry advisory committee and with trade association representatives, and consideration has been given to their recommendations.

Every effort has been made to conform this regulation to existing business practices, cost practices or methods, or means or aids to distribution. Insofar as any provisions of this regulation may operate to compel changes in the business practice or methods or means or aids to distribution, such provisions are found by the Director of Price Stabilization to be necessary to prevent circumvention or evasion of this regulation.

APPENDIX A: Industry Base Lists and Discount Tables and General specifications of certain Standard bags.

AUTHORITY: Sections 1 to 22 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101-2110, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR 1950 Supp.

ARTICLE I—APPLICABILITY

SECTION 1. *What this regulation does.* (a) This regulation establishes ceiling prices for sales by manufacturers of all types of bags produced in the United States, which are made from paper, film, foil or any combination thereof (except shipping sacks). This includes bags wholly or in part of bag-making plastic films, paper, paper mesh, foil or protective laminants. It also includes paper bags made with a textile mesh window.

(b) Ceiling prices for all bags which are made in standard specification are established under Subarticle I of Article II. For most of these, uniform dollar-and-cent ceiling prices per thousand bags are established in section 4 of this regulation in the form of discounts from base lists and net price tables which are located in Appendix A. Ceiling prices for the remaining Standard bags, covered by section 5, are determined by the application of historical differentials to the grades of bags having spelled-out ceiling prices in section 4 of this regulation.

(c) Ceiling prices of all Specialty (made-to-order) bags are established under Subarticle II of Article II. A separate ceiling price for each bag is determined by the application of each manufacturer's base period formula. In applying the formula, he may not use raw material costs higher than the ceiling prices which existed during the base period, except for the basic raw material (paper, film, or foil) which cost may be adjusted to the ceiling price established in the initial tailored regulation or, until such regulation is issued, the highest cost to the manufacturer of such basic raw materials through December 31, 1951.

SEC. 2. *Applicability.* The provisions of this regulation are applicable to all sales by manufacturers to purchasers located in the United States, the District of Columbia and the territories and possessions of the United States.

SEC. 3. *What this regulation supersedes.* The ceiling prices in this regulation supersede those established under the provisions of the General Ceiling Price Regulation and Ceiling Price Regulation 22. Ceiling Price Regulation 61 and 9 are superseded with respect to shipments to the territories and possessions of the United States. However, manufacturers who have received ceiling price adjustments under General Overriding Regulation 20 or 21, or under Supplementary Regulation 17 or 18 to Ceiling Price Regulation 22, may elect to retain the ceiling prices which have been established thereunder, but in all other respects are subject to this regulation. If a manufacturer so elects, he must do so for all the products covered by this regulation for which his ceiling prices are now determined under GOR 20 or 21, or SR 17 or 18 to CPR 22.

ARTICLE II—CEILING PRICES

SUBARTICLE I—CEILING PRICES FOR STANDARD BAGS

SEC. 4. *Grocers and certain variety bags.* (a) For the grades of grocers and variety bags listed below and further specified in Appendix A, ceiling prices are determined by applying the following discounts to the corresponding industry base price lists included in Appendix A to obtain a net ceiling price. This net ceiling price for each bag is obtained by deducting 5 percent from the base price, then deducting 5 percent from the resultant figure, and so on until the indicated number of "fives" has been applied. The net price tables with each base list provide a method of rapid determination of the net ceiling prices for standard sizes and grades of bags after deducting the manufacturer's discount but before applying any cash discount or other terms of sale. This section applies to a manufacturer who publishes net prices as well as to one who publishes base price lists and discounts.

STANDARD GROCERS AND VARIETY BAGS

Column No. / Items	Minimum discounts (1) 600 bales minimum	(2) 250 to 599 bales	(3) Less than 250 bales	(4) Base list No. (Appendix A)
Grocers bags, automatic:				
Popular weight brown M. F	18/5	17/5	15/5	1
Popular weight white M. F	14/5	13/5	11/5	1
Popular weight white M. G. striped	13/5	12/5	10/5	1
Heavy weight brown M. F	14/5	13/5	11/5	1
Extra heavy weight brown M. F	18/5	17/5	15/5	2
Grocers bags, square or flat:				
Popular weight brown M. F	19/5	18/5	16/5	1
Popular weight white M. F	15/5	14/5	12/5	1
Popular weight white M. G. striped	14/5	13/5	11/5	1
Grocers sacks, satchel bottom:				
Standard Bundle, Brown M. F Poultry	19/5	18/5	16/5	3
Bread bags, square:				
30-pound brown M. F	14/5	13/5	11/5	4
30-pound brown M. G. striped	13/5	12/5	10/5	4
25-pound brown M. G. striped	15/5	14/5	12/5	4
30-pound white M. F	10/5	9/5	7/5	4
30-pound white M. G. striped	9/5	8/5	6/5	4
Candy bags, automatic, flat:				
30-pound white M. F. automatic	7/5	6/5	4/5	5
30-pound white M. F. flat	8/5	7/5	5/5	5
Garment and pants bags, flat with shoulder:				
30-pound brown M. F. striped	14/5	13/5	11/5	6
25-pound brown M. F. striped	15/5	14/5	12/5	6
30-pound brown M. G. striped	12/5	11/5	9/5	6
25-pound brown M. G. striped	13/5	12/5	10/5	6
30-pound white M. F. striped	10/5	9/5	7/5	6
25-pound white M. F. striped	11/5	10/5	8/5	6
30-pound white M. G. striped	9/5	8/5	6/5	6
25-pound white M. G. striped	10/5	9/5	7/5	6
Garbage bags (bulk square): 41-pound brown M. F. waxed	11/5	10/5	8/5	7
Liquor bags, square: Brown M. F	18/5	17/5	15/5	8
Mail bags, automatic: Brown M. F	18/5	17/5	15/5	9
Notion and millinery bags, flat:				
30-pound brown M. F	13/5	12/5	10/5	10
28-pound brown M. F	14/5	13/5	11/5	10
30-pound brown M. G. striped	12/5	11/5	9/5	10
28-pound brown M. G. striped	13/5	12/5	10/5	10
Shoe bags, square:				
30-pound brown M. F	15/5	14/5	12/5	11
30-pound brown M. G. striped	14/5	13/5	11/5	11
38-pound brown M. F	18/5	17/5	15/5	11
Glassine bags:				
25-pound white glassine, flat			10/5	12
25-pound white glassine, square			10/5	13
Cellophane bags, satchel bottom, flat or square:				
Merchants discount			18/5-2½	14
Consumers discount			17/5-2½	14

[1] The affix "2½" after the discount in column (3) for cellophane bags means that an additional reduction of 2½ percent is applied to the net price to establish a ceiling price for these bags. Example: The ceiling price for sale to the merchants on a 1-pound satchel bottom cellophane bag made from 300 M.S.T. is shown as 8/5-2½ from the industry base list No. 14 in Appendix A. 8/5 applied to that base list for that grade and size bag is $7.04 per thousand. That price is reduced by 2½ percent or by $0.18, resulting in a ceiling price of $6.86 per thousand for that grade and size of bag.

NOTE.—M. F. means machine finished and M. G. means machine glazed.

(b) The discounts in the column (1) above apply to the base price lists (indicated by number in the fourth column above) which appear in Appendix A. The resulting net ceiling prices apply to orders of no less than 600 bales of Grocers or Variety bags or a combination of both shipped at one time to one buyer, one shipping destination f. o. b. the bag manufacturer's plant with the same amount of freight allowance as was allowed by each manufacturer during the base period.

(c) The discounts in column (2) above apply to the base price lists (indicated by the number in the fourth column above) which appear in Appendix A. The resulting net ceiling prices apply to orders of 250 through 599 bales of Grocers or Variety bags or a combination of both shipped at one time to one buyer, one shipping destination f. o. b. the bag manufacturer's plant with the same amount of freight allowance as was allowed by each manufacturer during the base period.

(d) The discounts in the column (3) above apply to the base price lists (indicated by number in the fourth column above) which appear in Appendix A. The resulting net ceiling prices apply to orders of less than 250 bales of Grocers or Variety bags f. o. b. the bag manufacturer's plant subject to the same freight allowance for the same minimum order quantities that each manufacturer had in effect during the base period.

(e) For glassine bags, the resulting net ceiling prices shall apply to all orders shipped to all destinations covered by

this regulation, except those shipments made into the States of California, Oregon, Washington, Idaho, Montana, Wyoming, Utah, Nevada, Colorado, Arizona or New Mexico. On orders to be shipped to points in those eleven States all manufacturers shall be permitted to use a price 7 percent higher than the ceiling prices established in section 4 (a) of this regulation on glassine bags.

SEC. 5. *Standard bags not listed in section 4 of this regulation.* For all other grades of Standard bags for which you had a published base or net price list in effect on November 1, 1951, you shall establish your ceiling prices f. o. b. your plant, with the same amount of freight allowance as was allowed by you during the base period by the following procedure:

(a) Select from your November 1, 1951, price list those items which are listed in section 4 and which are in the same category as the item for which you are determining a ceiling price under this section. From such items, select that one which was your largest volume item. This selection is your "reference item". Your largest volume item can be measured by tons or by sales dollars as of the calendar year 1950 or, if you began manufacturing bags after January 1950, as of the first 12 months of your operations. The determination of category is by the material from which the bag is made: (1) Paper other than glassine; (2) glassine paper; (3) cellophane, plastic, and other films. Where a product for which the ceiling price is to be determined by the provisions of this section is made of materials which fall within more than one of the three categories, your reference item should be chosen from the category of the material which adds most to the cost of the product.

(b) Next determine the difference, if any, between the net price on the price list which you had in effect on November 1, 1951, for the largest quantity sales of your reference item and the net price given for that same item in the corresponding quantity in section 4 of this regulation. This difference is your "adjustment factor".

(c) Then apply the adjustment factor, determined above, to the price for each size bag in the same category shown on those base or net price lists which you had in effect on November 1, 1951, other than those items listed in section 4. The prices resulting from application of the adjustment factor are your ceiling prices under this regulation for Standard bags not listed in section 4 of this regulation.

Example A: Assume that your reference item is popular weight Brown M. F. Grocers Bags for which item section 4 establishes a discount of 18/5's and that on November 1, 1951, your discount for the reference item on your price list was 16/5's. Since this is a difference of 2/5's, your ceiling prices on all your Standard bags made of other than glassine or films, which do not appear in section 4 are your November 1, 1951, prices reduced by 2/5's.

Example B: Assume that your reference item is satchel bottom cellophane bags and that you wish to price a 1 lb. size bag made from 300 M S T cellophane:

(1) On the effective date of this regulation the discount in section 4 resulting from the application of 8/5's–2½ for this size bag produces a ceiling price of $6.86 per M to the merchants for those manufacturers using net price lists and that,

(2) On November 1, 1951 your price on this 1 lb. bag was $7.36 per thousand. It follows that:

(3) The ceiling price of $6.86 per thousand is 6.8 percent below your November 1, 1951 price of $7.36 per thousand for this size bag.

Consequently, your ceiling prices on all your Standard bags made from cellophane, plastic, or other films, which do not appear in section 4 are your November 1, 1951 net list prices reduced by 6.8 percent.

SEC. 6. *Standard bags which are not covered by sections 4 and 5 of this regulation.* (a) If you cannot determine a ceiling price for any Standard bag under the provisions of sections 4 and 5 of this regulation you must apply for approval of a ceiling price by filing your application with the Forest Products Division, Office of Price Stabilization, Washington 25, D. C. Your application shall contain the following:

(1) The reason why you cannot determine a ceiling price for that same item under the provisions of sections 4 and 5 of this regulation.

(2) Your proposed ceiling price for that same item which may not exceed the ceiling price of that same item established by your most closely competitive manufacturer to purchasers of the same class.

(3) The ceiling price of your most closely competitive manufacturer for that same item to purchasers of the same class and the reason why you have selected him as your most closely competitive manufacturer.

(4) The name and address of your most closely competitive manufacturer.

(b) If the item is one for which you are unable to find that another manufacturer has established a ceiling price under this regulation, you shall propose a ceiling price calculated as follows:

(1) Find the percentage markup (margin factor) over total current unit direct cost of labor and materials which you are currently receiving on the most comparable item for which you have established a ceiling price under sections 4 and 5 of this regulation.

(2) Apply not more than the same margin factor to the total current unit direct cost of labor and materials of the proposed item to determine your proposed price.

(c) You may not sell the item priced under this section 6 of this regulation until the Director of Price Stabilization in writing establishes your ceiling price for the item. However, if the commodity is one required to be priced under this section, and which, prior to the effective date of this regulation, you sold or offered for sale upon the basis of a ceiling price determined under the GCPR or CPR 22, you may continue to use your ceiling price which was applicable on the effective date of this regulation for 21 days from the filing of your application, or until you receive notice from the Director of Price Stabilization concerning your proposed ceiling price if such notice is received before the 21 day period expires. If within 21 days from the filing of the application you have not received notice from the Director approving, disapproving, or modifying the proposed ceiling price, requesting additional information, or extending for cause the time within which to do any of the foregoing, such application may be deemed to have been approved, subject to non-retroactive disapproval or modification at any later time by the Director.

SUBARTICLE II—CEILING PRICES FOR SPECIALTY BAGS

SEC. 7. *Application of base period formulas.* (a) For all Specialty bags, as defined in section 22 (b) (7) of this regulation, each manufacturer shall determine his ceiling prices by using the formula which he had in effect during the base period January 25, 1951, through February 24, 1951.

(b) His formula shall contain the following factors: Raw material, conversion, margin and delivery. The ceiling price for each bag shall be established by computing the sum of those factors in the same manner that prices were determined during the base period, subject, however, to the following limitations in the determinations of each factor.

(1) *Raw material factors.* Your basic raw material costs shall be calculated in your base period manner:

(i) Except as provided in subdivision (ii) of this subparagraph, in calculating your factor for basic raw materials (paper, film and foil) you may use, and shall not exceed, the ceiling prices of the basic raw materials as initially established by a tailored regulation or, until such a regulation is issued, the highest costs to you of such basic raw materials up to and including December 31, 1951. For all other raw material you may use the highest lawful costs to you during the base period.

(ii) If you produce any basic raw material and during the base period it was your practice to use a transfer price for that basic raw material which was lower than your market price, you shall reduce the ceiling price in the tailored regulation for such basic raw material by the same dollar amount as your transfer price was below your market price during the base period. If, however, you did not have a market price for such basic raw material during the base period, you shall reduce the ceiling price in the tailored regulation for such basic raw material by the same dollar amount as your transfer price was below the market price of your most closely competitive manufacturer who had a market price during the base period.

(iii) If you included amounts for waste or spoilage in computing your raw material factor during the base period, you may continue to do so in your base period manner. However, you may not add more than the same percentage allowed for waste or spoilage during the base period, and you must subtract credits received from the sale or other disposition of waste material in the same manner in which such credits were subtracted during the base period.

(2) *Conversion factor.* (i) Conversion charges for any hand or machine operation, or both, incident to the manufacture of the bags, including make-ready, fabrication, printing, assembly, marking and packing, shall be computed in accordance with the hourly or piece rates, or both, and standards of production which you used for the same commodity during the base period, or if any of these supplementary operations were covered by a price list during the base period, the same base period prices may be added to, but not included in, the formula for these supplementary operations.

(ii) Conversion charges for a bag which was not offered or manufactured by you during the base period shall be calculated by the same method as for your conversion charges for the most comparable bag upon which you did quote a price during the base period.

(3) *Margin factor.* Your margin factor is the difference between your selling price f. o. b. your plant and the sum of your raw material and conversion factors as computed during the base period. Your margin factor may be figured on a percentage basis, or on a rate per unit of material basis, or it may be included in the machine hour rate. It may also be a combination of any or all of these methods, but it must be based upon the same accounting and costing practices which you used during the base period. In no event shall the margin factor exceed the following limitations:

(i) If the bag is one which you sold to the same class of purchaser during the base period, your margin factor shall not exceed the margin factor employed by you for sales of the same bag to the same class of purchaser during the base period.

(ii) If the bag is one that you did not sell to the same class of purchaser during the base period, the margin factor shall not exceed that employed by you in pricing the most comparable bag which you sold to the same class of purchaser during the base period.

(iii) If you did not sell any bag to the same class of purchaser, then you should apply for a margin factor under section 9.

(4) Differentials for quantities shall be no less favorable to the buyer than those you had in effect during the base period for the same or similar type of bag to the same class of purchaser.

(5) *Delivery factor.* With respect to all delivery charges, you shall continue to use the method employed by you during the base period, for example, f. o. b. mill pricing, f. o. b. mill pricing with a freight allowance, delivered pricing, delivered zone pricing, or any other method which you applied consistently during the base period.

SEC. 8. *Ceiling prices for new manufacturers.* (a) If you are a manufacturer of Specialty bags who started business after February 24, 1951, and before the date of issuance of this regulation, your ceiling prices shall be determined under the provisions of Subarticle II of this regulation except insofar as you are concerned, the term "base period" wherever used in this regulation shall refer to the thirty day period immediately preceding the issuance of this regulation. Your ceiling prices shall be subject to non-retroactive modification by the Director of Price Stabilization.

(b) If you are a manufacturer of Specialty bags who starts business after the effective date of this regulation, you shall file a proposed formula with the Office of Price Stabilization, Forest Products Division, Washington 25, D. C., including such items as, but not limited to, hourly rates or piece rates for hand or machine operations, or rates per thousand units, and standards of production applicable thereto, as defined in section 22 of this regulation, make-ready charges, delivery charges, and margin factors employed by you in determining the selling price of each commodity or service, as well as one sample estimate showing how each formula is applied. You may not sell the commodity or service until the Director of Price Stabilization, in writing, approves your formula. If the Director does not approve your formula within twenty-one days from the date your formula is filed, your formula may be deemed to be approved subject to non-retroactive disapproval or modification at any later time by the Director of Price Stabilization.

SEC. 9. *Application for approval of new formula factors.* (a) If you are a manufacturer who was in business during the base period and who has subsequently installed new equipment or methods of production requiring new conversion or margin factors, or if you cannot establish a margin factor under section 7, you shall file by registered mail return receipt requested, an application with the Office of Price Stabilization, Forest Products Division, Washington 25, D. C., which shall include your proposed factors for approval, disapproval or modification.

(b) Your application for approval of a new conversion factor shall include: (1) The hourly or piece rates for similar hand or machine operations generally prevailing in your immediate competitive area during the base period, and (2) an explanation for any variance between such generally prevailing rate and the rate you now wish to apply.

(c) Your application for approval of a new margin factor shall include: (1) The location of your plants; (2) the type of equipment you use; (3) the capacity of your equipment; (4) a list of the products you intend to produce; (5) the margins proposed; and (6) a statement and an example of the method you use to determine special differentials.

(d) You may use the proposed conversion or margin factors as soon as you file your application. However, until your application has been approved by the Director of Price Stabilization, you shall notify the purchaser in writing that all prices which have been based upon the proposed conversion or margin factors are subject to adjustment by you, and to refunds if necessary, to conform with the conversion or margin factors as established by the Director of Price Stabilization. If the Director does not disapprove or revise your formula or factor by letter order within twenty-one days from the date of the return receipt of the application (or date of receipt by the Office of Price Stabilization if the application is delivered by hand), the factors requested may be deemed to be approved subject to non-retroactive disapproval or revision at any later time by the Director. In the event that more information is requested, your ceiling price shall not be deemed to be approved until fifteen days after filing the additional information.

ARTICLE III—REPORTS AND RECORDS

SEC. 10. *Base period records.* On and after the effective date of this regulation, and for so long as the Defense Production Act of 1950, as amended, shall remain in effect, and for two years thereafter, each manufacturer shall maintain and keep for examination by the Director of Price Stabilization:

(a) All of his existing records, relating to prices and terms of sale which he charged for bags sold or offered for sale during the base period, and his published base or net price list which was in effect on November 1, 1951.

(b) His price formulas or estimating manuals for grades under section 7 of Article II which were employed by him during the base period for each formula including such items as, but not limited to, material costs, hourly rates or piece rates per thousand units and standards of production applicable thereto as defined in section 22 of this regulation, make-ready charges, charges for all extra operations such as printing, tin tie or handle attachment, punching, die cutting, special packing, etc., margins and delivery charges, plus one sample of each formula to show how it was applied.

SEC. 11. *Current records.* (a) Each manufacturer, and each person who in the course of business buys bags from manufacturers covered by this regulation, shall keep for inspection by the Director of Price Stabilization for a period of two years from date of sale accurate records or invoices for each sale or purchase made after the effective date of this regulation showing (1) the date of the sale or purchase, (2) the name and address of the seller and purchaser, (3) the price charged or paid, and (4) the quantity and specifications of the bag.

(b) Each manufacturer who produces bags covered by this regulation shall keep and maintain so long as the Defense Production Act, as amended, shall remain in effect and for two years thereafter for inspection by the Director of Price Stabilization:

(1) His net price lists, or base price lists and discount tables and his actual discounts or prices put into effect after determining ceiling prices under sections 5 and 6 of this regulation.

(2) The calculation by which his ceiling price was determined for each bag covered by Subarticle II of Article II of this regulation.

SEC. 12. *Agents of manufacturers.* Within 30 days of the effective date of this regulation each manufacturer shall file with the Forest Products Division, Office of Price Stabilization, Washington 25, D. C., the names of his authorized agents, as defined in section 22 of this regulation.

ARTICLE IV—GENERAL PROVISIONS

SEC. 13. *Export sales and shipment to territories and possessions of the United States.* (a) Ceiling prices for export sales and sales for export to foreign countries are established under Ceiling Price Regulation 61.

(b) If you are a manufacturer located within the continental United States and you ship a commodity covered by this regulation to one or more of the territories and possessions, your ceiling price for the sale of that commodity is your ceiling price on that commodity as established under this regulation for a domestic sale, f. o. b. the nearest domestic port of exit, plus all actual direct or indirect costs incident to such transactions, such as but not limited to, special packaging, warehousing, transportation, insurance and taxes.

SEC. 14. *Cash discount and terms of sale.* Your cash discount and terms of sale shall be no less favorable to your purchaser than you allowed during the base period to the same or most comparable class of purchaser.

SEC. 15. *Petitions for amendment.* Any person who wishes to have this regulation amended may file a petition for amendment in accordance with the provisions of Price Procedural Regulation 1, Revision 2.

SEC. 16. *Modification of ceiling prices by the Director of Price Stabilization.* The Director of Price Stabilization may at any time disapprove or reduce ceiling prices established under this regulation so as to bring them into line with the level of ceiling prices otherwise established by this regulation.

SEC. 17. *Adjustable pricing.* Nothing in this regulation shall be construed to prohibit the making of a contract or offer to sell paper bags at (a) the ceiling price in effect at the time of delivery, or (b) the lower of a fixed price or the ceiling price in effect at the time of delivery.

SEC. 18. *Interpretations.* If you want an official interpretation of this regulation, you should write to the District Counsel of your local OPS District Office. Any action taken by you in reliance upon and in conformity with a written official interpretation will constitute action in good faith pursuant to this regulation. Further information on obtaining official interpretations is contained in Price Procedural Regulation 1.

SEC. 19. *Transfer of business or stock in trade.* If the business, assets or stock in trade of any business are sold or otherwise transferred after the effective date of this regulation and the transferee carries on the business or continues to deal in the same type of commodities in an establishment separate from any other establishment previously owned or operated by him, the ceiling prices of the transferee, with respect to sales of bags, shall be the same as those to which his transferor would have been subject if no such transfer had taken place, and his obligation to keep records sufficient to verify such prices shall be the same. The transferor shall either preserve and make available for so long as the Defense Production Act of 1950, as amended, remains in effect, and for two years thereafter, or turn over to the transferee all records of transactions prior to the transfer which are necessary to enable the transferee to comply with the provisions of this regulation.

SEC. 20. *Prohibitions and violations.* (a) You shall not do any act prohibited or omit to do any act required by this regulation, nor shall you offer, solicit, attempt, or agree to do or omit to do any such acts. Specifically, but not in limitation of the above, you shall not, regardless of any contract or other obligation, sell, and no person in the regular course of trade or business shall buy from you, at a price higher than the ceiling prices established by this regulation, and you and buyers from you shall keep and preserve true and accurate records and reports required by this regulation. Prices lower than the ceiling prices may be charged, paid or offered.

(b) If you violate any provisions of this regulation, you are subject to criminal penalties, enforcement action, and action for damages.

(c) If any person subject to this regulation fails to prepare or keep any record or file any report required by this regulation in connection with the establishment of his ceiling price, or if any person subject to this regulation fails to establish a ceiling price or apply to the Office of Price Stabilization for the establishment of a ceiling price, if he is required to do so, the Director of Price Stabilization may issue an order fixing his ceiling prices. Any ceiling price fixed in this manner will be in line with ceiling prices generally established by this regulation. The order fixing the ceiling price may apply to all deliveries or transfers completed prior to the date of issuance of the order. The issuance of such an order will not relieve the seller of his obligation to comply with the requirements of this regulation or of the various penalties for failure to do so.

SEC. 21. *Evasion.* Any means or device which results in obtaining indirectly a higher price than is permitted by this regulation, or in concealing or falsely representing information as to which this regulation requires records to be kept, constitutes an evasion and is a violation of this regulation. This prohibition includes, but is not limited to, means or devices making use of commissions, services, gross sales, transportation arrangements, premiums, discounts, special privileges, tie-in agreements, and trade understandings, as well as the omission from records of true data and the inclusion in records of false data.

SEC. 22. *Definitions and explanations*—(a) *General.* (1) "Authorized agent" means a person whom the manufacturer designates as his representative and who is directed by that manufacturer to sell the latter's products at prices and terms no higher than those authorized by that manufacturer, and who bills and collects in his own name or his firm name. This does not include any manufacturer's sales representative whose orders are billed by the manufacturer to the customer.

(2) "Class of purchaser" refers to the practice adopted by you in setting different prices for commodities or services for sales to different purchasers or kinds of purchasers. The practice may (but need not) be based on the characteristics or distributive level of the buyer (for instance manufacturer, wholesaler, individual retail store, retail chain, mail order house, government agency, public institution). It may (but need not) be based on the location of the purchaser or the quantity purchased by him. If you have followed the practice of giving an individual customer a price differing from that charged others, that customer is a separate class of purchaser.

If in your industry a practice prevails of charging different prices for sales to groups of buyers based on their characteristics or distributive level, any such group to whom you did not make sales during your base period and for whom you did not have a customary differential in effect during or before your base period, is a separate class of purchaser as to you.

(3) "Contract to sell" means the written acceptance of any written or oral order or an oral acceptance of a written order.

(4) "Fives" means the number of consecutive 5 percent discounts (each taken from the previous net figure) from any of the base price lists.

(5) "Manufacturer" means any person who fabricates paper, film or foil or a combination of any of these materials into bags, and includes any person who sells such bags as an "authorized agent" of the manufacturer as that term is defined in this section.

(6) "Most closely competitive manufacturer" means the manufacturer who is your most direct competitor by reason of his sales of similar grades to similar classes of purchasers.

(7) "Person" means any individual, corporation, partnership, association, or other organized group of persons, or legal successors or representatives of the foregoing, and the United States or any other government or other political subdivisions or agencies.

(8) "Sell" means sell, supply, dispose, barter, exchange, lease, transfer, and deliver, and contracts and offers to do any of the foregoing. The terms "sale", "selling", "sold", "buy", "purchase", or "purchaser" shall be construed accordingly.

(9) "You" means any person subject to this regulation. "Your" and "yours" are construed accordingly.

(b) *Grade identifications.* (1) "Bag" means any type, shape or style of flexible container, sealed at one end and on either one or both sides, and produced from paper, film, foil, or any combination thereof, including those made of paper with a textile mesh window. They are used chiefly for over-the-counter delivery of food and other consumer merchandise.

(2) "Grocers bags" mean standard bags manufactured for all-purpose over-the-counter use in food stores in accordance with the specifications of the U. S. Department of Commerce, National Bureau of Standards, Simplified Practice Recommendation R–42–43 or any revision thereof. Such bags are usually identified by the mark (SWS) which means standard weight and size.

(3) "Household bags" mean standard bags manufactured for use in hospitals, restaurants, homes, etc., on which standard specifications have been established by individual manufacturers.

(4) "Most comparable bag" means the bag of the same general class furnished by you during the base period which differs the least from the bag to be priced as determined by the use of the following tests, applied successively:

(i) Size and shape and number of walls.

(ii) Kind and quantity of raw materials per M bags.

(iii) Supplementary operations, such as printing, attachment of handles, punching, and string and button attachment.

(5) "Most comparable grade" means the grade of bag furnished by you for which you have established a ceiling under this regulation and which differs the least from the grade to be priced in terms of end use, materials and construction.

(6) "Shipping sacks" mean new bags or sacks manufactured basically from shipping sack kraft paper, rope paper, or a combination of rope and kraft paper for use as (i) plant-packed shipping containers designed to carry 25 pounds or more of any particular commodity either as the primary container or as an overship for the primary container or as a container (baler) for assembly of a number of primary containers into a single shipping unit; or (ii) plant-packed consumer packages, designed to carry one pound or more of the same commodities which are also packed in the larger shipping containers.

(7) "Specialty bags" mean any bag manufactured to individual order in the specifications and in the quantity requested by the buyer.

(8) "Standard bags" mean any bags manufactured in standardized specifications, viz: size, shape, kind and basis weight of paper. A bag is considered to be standard whether its specifications are standardized for the entire industry or only by an individual manufacturer.

(9) "Variety bags" mean standard bags manufactured primarily for use in retail stores, other than grocers bags. Industry specifications for certain variety bags (millinery, notion and glassine) are given in the U. S. Department of Commerce, National Bureau of Standards, Simplified Practice Recommendations R–129–41 and R–107–31. Other grades of variety bags have been standardized by individual manufacturers.

(c) *Technical terms and miscellaneous.* (1) "Base period" means the period from January 25, 1951, through February 24, 1951, except as provided in section 8 of this regulation.

(2) "Base price list and discount table" means a schedule of base prices for each size in a given grade of standard bags, with a computation of net selling prices for each bag size at various discounts. (See Appendix A.)

(3) "File, filed or filing" means the forwarding of any records or reports by registered mail, return receipt requested, to the Office of Price Stabilization, Washington 25, D. C. The date of filing shall be construed as the date of receipt by the Office of Price Stabilization in Washington, D. C. If hand delivered, the date of delivery shall be the date of receipt.

(4) "Hourly rates" mean the cost per hour for labor, machine overhead, and other manufacturing expenses as established in your base period accounting procedures for estimating purposes.

(5) "Make-ready" means the preparation of a machine for a particular conversion operation, including such procedures as adjustment of feeding devices, installation of proper printing plates, adjustment of gears or cutting knives and cleaning of the machine after the completion of the conversion operation.

(6) "Piece rate" means the cost per numerical unit for labor, machine, machine overhead and other manufacturing expenses as established for estimating purposes in your base period accounting procedures.

(7) "Published price" means the price listed in any form of written or printed notice to the trade or to a sales representative by which a manufacturer offers his product for sale.

(8) "Rate per unit of material" means a method used by some manufacturers in computing the margin on the basis of bag wall area and weight or both. (For example: $\$\_\_\_\_$ per pound of paper per M Sacks.)

(9) "Standards of production" means the number of units produced in relation to machine or man-hours.

Effective date: This regulation shall become effective August 25, 1952.

NOTE: The reporting and record keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

JOSEPH H. FREEHILL,
Acting Director of Price Stabilization.

AUGUST 19, 1952.

APPENDIX A

The basic manufacturers' price lists, and the computation of discounts off such lists as referred to in Article II of this regulation are set forth below, together with the general specifications of such grade:

Chapter XXI—Office of Rent Stabilization, Economic Stabilization Agency

[Rent Regulation 1, Amdt. 16 to Schedule B]

[Rent Regulation 2, Amdt. 16 to Schedule B]

RR 1—HOUSING

RR 2—ROOMS IN ROOMING HOUSES AND OTHER ESTABLISHMENTS

SCHEDULE B—SPECIFIC PROVISIONS RELATING TO INDIVIDUAL DEFENSE-RENTAL AREA OR PORTIONS THEREOF

FLORIDA

Effective August 21, 1952, Rent Regulation 1 and Rent Regulation 2 are amended as set forth below.

(Sec. 204, 61 Stat. 197, as amended; 50 U. S. C. App. Sup. 1894)

Issued this 18th day of August 1952.

TIGHE E. WOODS,
Director of Rent Stabilization.

1. A new item 61 is added to Schedule B of Rent Regulation 1, reading as follows:

61. *Provisions relating to the Seminole County, Florida, Defense-Rental Area (Item 64a of Schedule A):*

(a) Wherever the words "December 1 to March 31" appear in section 41, the words "December 1 to April 30" are substituted.

(b) All provisions of this regulation insofar as they are applicable to the Seminole County, Florida, Defense-Rental Area, are hereby amended to the extent necessary to carry these provisions of item 61 into effect.

2. A new item 67 is added to Schedule B of Rent Regulation 2, reading as follows:

67. *Provisions relating to the Seminole County, Florida, Defense-Rental Area (Item 64a of Schedule A):*

(a) Wherever the words "December 1 to March 31" appear in section 42, the words "December 1 to April 30" are substituted.

(b) All provisions of this regulation insofar as they are applicable to the Seminole County, Florida, Defense-Rental Area, are hereby amended to the extent necessary to carry these provisions of item 67 into effect.

[F. R. Doc. 52-9228; Filed, Aug. 20, 1952; 8:48 a. m.]

[Rent Regulation 3, Amdt. 14 to Schedule B]

[Rent Regulation 4, Amdt. 7 to Schedule B]

RR 3—HOTELS

RR 4—MOTOR COURTS

SCHEDULE B—SPECIFIC PROVISIONS RELATING TO INDIVIDUAL DEFENSE-RENTAL AREA OR PORTIONS THEREOF

FLORIDA

Effective August 21, 1952, Rent Regulation 3 and Rent Regulation 4 are amended as set forth below.

(Sec. 204, 61 Stat. 197, as amended; 50 U. S. C. App. Sup. 1894)

Issued this 18th day of August 1952.

TIGHE E. WOODS,
Director of Rent Stabilization.

1. A new item 19 is added to Schedule B of Rent Regulation 3, reading as follows:

19. *Provisions relating to the Seminole County, Florida, Defense-Rental Area (Item 64a of Schedule A):*

(a) Wherever the words "December 1 to March 31" appear in section 27, the words "December 1 to April 30" are substituted.

(b) All provisions of this regulation insofar as they are applicable to the Seminole County, Florida, Defense-Rental Area, are hereby amended to the extent necessary to carry these provisions of item 19 into effect.

2. A new item 19 is added to Schedule B of Rent Regulation 4, reading as follows:

19. *Provisions relating to the Seminole County, Florida, Defense-Rental Area (Item 64a of Schedule A):*

(a) Wherever the words "December 1 to March 31" appear in section 26, the words "December 1 to April 30" are substituted.

(b) All provisions of this regulation insofar as they are applicable to the Seminole County, Florida, Defense-Rental Area, are hereby amended to the extent necessary to carry these provisions of item 19 into effect.

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53079]

PART 8—LIABILITY FOR DUTIES, ENTRY OF IMPORTED MERCHANDISE

INVOICES; GLASSWARE AND GLASS ARTICLES

In order to assist collectors of customs in properly classifying glass articles sold as beverage, toilet, cruet, or other sets, customs invoices for glassware commercially known as plated or cased glass and for articles of every description, not specially provided for, wholly-or in chief value of glass, blown or partly blown in the mold or otherwise, or colored, cut, engraved, etched, frosted, gilded, ground (except such grinding as is necessary for fitting stoppers or for purposes other than ornamentation), painted, printed in any manner, sand-blasted, silvered, stained, or decorated or ornamented in any manner, shall contain the separate value of each component article when such articles are imported in sets.

This requirement shall be effective as to certified or commercial invoices filed after the expiration of 30 days after the publication of this ruling in the weekly Treasury Decisions.

Section 8.13 (i), Customs Regulations of 1943 (19 CFR 8.13 (i)), as amended, is further amended by adding the following to the list of merchandise with respect to which information is required to be furnished on customs invoices, and by placing opposite such addition the number and date of this Treasury decision:

§ 8.13 *Contents of invoices; incomplete invoices; general requirements supplemented.* • • •

(i) • • •

Glassware commercially known as plated or cased glass, and articles of every description, not specially provided for, composed wholly or in chief value of glass, blown or partly blown in the mold or otherwise, or colored, cut, engraved, etched, frosted, gilded, ground (except such grinding as is necessary for fitting stoppers or for purposes other than ornamentation), painted, printed in any manner, sand-blasted, silvered, stained, or decorated or ornamented in any manner; all the foregoing when imported in sets.

(Sec. 624, 46 Stat. 759; 19 U. S. C. 1624. Interprets or applies sec. 481, 46 Stat. 719; 19 U. S. C. 1481)

[SEAL] FRANK DOW,
Commissioner of Customs.

Approved: August 14, 1952.

JOHN S. GRAHAM,
Acting Secretary of the Treasury.

[F. R. Doc. 52-9234; Filed, Aug. 20, 1952; 8:50 a. m.]

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 36—SERVICEMEN'S READJUSTMENT ACT OF 1944

SUBPART A—TITLE III; LOAN GUARANTY

MISCELLANEOUS AMENDMENTS

1. In § 36.4301, paragraph (a) is amended to read as follows:

§ 36.4301 *Definitions.* • • •

(a) "Act" means Public Law 346, 78th Congress (58 Stat. 284), cited as the "Servicemen's Readjustment Act of 1944," as amended by Public Law 268, 79th Congress (59 Stat. 626), Public Law 864, 80th Congress, 2d session (62 Stat. 1206), Public Law 475, 81st Congress, 2d session (64 Stat. 48), Public Law 139, 82d Congress, 1st session (65 Stat. 293), Public Law 142, 82d Congress, 1st session (65 Stat. 320), and Public Law 550, 82d Congress, 2d session (66 Stat. 663) (38 U. S. C. 694, et seq.).

• • • • •

2. In § 36.4302, paragraph (c) is amended to read as follows:

§ 36.4302 *Computation of guaranties or insurance credits.* • • •

(c) The following formula shall govern the ascertainment of the amount of the guaranty or insurance entitlement which remains available to an eligible veteran after prior use of entitlement: Add to the amount of such entitlement previously used for realty, twice the amount previously used for non-realty purposes. Subtract this sum from $4,000. The sum remaining is the amount available for the guaranty or insurance of a real estate loan other than a section 501 (b) loan and one-half of such sum is so available for a non-real estate loan. For the purpose of ascertaining the amount of guaranty entitlement which remains available for a section 501 (b) loan after prior use of entitlement, add to the amount of such entitlement previously used for realty, twice the amount previously used for non-realty purposes. Subtract this sum from $7,500. Subject to the provisions of paragraph (j) of this section, the sum remaining is the amount of entitlement available for section 501 (b) purposes.

• • • • •

3. Section 36.4331 is revised to read as follows:

§ 36.4331 *Disqualification of lenders.* In the event the Administrator takes action under section 514 of the act to suspend a lender or holder from obtaining the guaranty or insurance of loans or from acquiring guaranteed or insured loans, such lender or holder shall there-

upon become entitled then or thereafter to apply to the Administrator for a hearing at which the lender or holder shall be afforded full opportunity to introduce evidence showing why such suspension should be terminated or modified. The Administrator shall designate such time and place as he may deem appropriate for such hearing. The person or persons designated by the Administrator to conduct such hearing shall have the authority to administer oaths to witnesses. The lender concerned shall have the right to appear at such hearing in person or by attorney or both and to submit such evidence as he may deem material. Based on the evidence presented at such hearing the Administrator will determine whether to terminate the suspension conditionally or otherwise, or affirm its continuance for a definite period or permanently.

4. The centerhead "Real Estate Loans" immediately preceding § 36.4346 is hereby deleted.

5. Section 36.4347 is revised to read as follows:

§ 36.4347 *Minimum property and construction requirements.* No loan for the purchase or construction of residential property shall be eligible for guaranty or insurance unless such property complies or conforms with those standards of planning, construction, and general acceptability that may be applicable thereto and prescribed by the Administrator pursuant to section 504 (b) of the act.

6. In § 36.4501, paragraph (a) is amended to read as follows:

§ 36.4501 *Definitions.* • • •

(a) "Act" means Public Law 346, 78th Congress (58 Stat. 284), cited as "Servicemen's Readjustment Act of 1944," as amended by Public Law 268, 79th Congress (59 Stat. 626), Public Law 864, 80th Congress, 2d session (62 Stat. 1206), Public Law 475, 81st Congress, 2d session (64 Stat. 48), Public Law 139, 82d Congress, 1st session (65 Stat. 293), Public Law 142, 82d Congress, 1st session (65 Stat. 320), Public Law 325, 82d Congress, 2d session (66 Stat. 64), and Public Law 550, 82d Congress, 2d session (66 Stat. 663) (38 U. S. C. 694, et seq.).

• • • • •

7. Section 36.4521 is revised to read as follows:

§ 36.4521 *Minimum property and construction requirements.* No loan for the purchase or construction of residential property shall be eligible for guaranty or insurance unless such property complies or conforms with those standards of planning, construction, and general acceptability that may be applicable thereto and prescribed by the Administrator pursuant to section 504 (b) of the act.

(Sec. 504, 58 Stat. 293, as amended; 38 U. S. C. 694d)

This regulation is effective August 21, 1952.

[SEAL] H. V. STIRLING,
Deputy Administrator.

[F. R. Doc. 52-9232; Filed, Aug. 20, 1952; 8:49 a. m.]

TITLE 46—SHIPPING

Chapter I—Coast Guard, Department of the Treasury

[CGFR 52-9]

MARINE ENGINEERING REGULATIONS

A notice regarding the proposed revision of the marine engineering regulations and material specifications, together with certain proposed changes and transfer of requirements relating to marine engineering presently published in the tank vessel regulations, load line regulations, and general rules and regulations for vessel inspection, was published in the FEDERAL REGISTER dated August 16, 1951, 16 F. R. 8136–8139, as Items I to IX, inclusive, on the agenda to be considered by the Merchant Marine Council, and a public hearing was held by the Merchant Marine Council on September 18, 1951, in Washington, D. C. Another notice regarding further proposed changes in the marine engineering regulations and material specifications was published in the FEDERAL REGISTER dated February 27, 1952, 17 F. R. 1727–1731, as Items VII, and XII to XVII, inclusive, on the agenda to be considered by the Merchant Marine Council, and a public hearing was held by the Merchant Marine Council on March 25, 1952, in Washington, D. C. Since the 1948 Convention for Safety of Life at Sea becomes effective on and after November 19, 1952, and it is necessary to change the regulations to complement and implement this Convention, a revision in the format of the regulations presently contained in Chapter I of Title 46 (Shipping), Code of Federal Regulations, is necessary in order that the regulations may be published in compliance with the Administrative Procedure Act. In order to have an orderly presentation of marine engineering regulations, only those changes in 46 CFR Parts 51 to 57, inclusive, which will not be affected by the general revision of regulations to be made to implement the 1948 Convention, are contained in this document. The proposed changes described in the notices published in the FEDERAL REGISTER dated August 16, 1951, and February 27, 1952, and considered by the Merchant Marine Council at public hearings held September 18, 1951, and March 25, 1952, which have not been included in this document, will be incorporated in the document containing the necessary revision of Chapter I (Shipping) expected to be published before the 1948 Convention becomes effective November 19, 1952.

All the comments, views, and data submitted either in writing or orally at the public hearings were considered and, where practicable, were incorporated into the regulations.

The purpose of the amendments to the regulations contained in this document is to revise and bring up to date the requirements for marine engineering and material specifications applicable to merchant vessels and to transfer to the marine engineering regulations certain revised engineering requirements from the tank vessel regulations, load line regulations, and general rules and regulations for vessel inspection, as well as to establish a new specification for automatically controlled, packaged auxiliary boilers.

The requirements for steering apparatus have been revised, consolidated and transferred to 46 CFR Subpart 57.25 in the marine engineering regulations. This was done to eliminate conflicting requirements, as well as to clarify Coast Guard regulations previously contained in over 14 different sections in 46 CFR Chapter I, which were also published in the Tank Vessel Regulations (CG–123), Load Line Regulations (CG–176) and the various General Rules and Regulations for Vessel Inspection (CG–170, 188, 189, and 185). Where necessary, appropriate cross references have been made. This was considered as Item IX on the agenda for the public hearing held September 18, 1951, and Item VII on the agenda for the public hearing held March 25, 1952. The revised regulations for steering apparatus are in substantial agreement with the American Bureau of Shipping Rules and the petitions from several manufacturers and others were considered and incorporated into the regulations.

This revision of the marine engineering regulations in 46 CFR Parts 51 to 57, inclusive, as well as the Marine Engineering Regulations and Material Specifications (CG–115), changes the requirements to permit the use of liberalized design stresses based upon a factor of safety of four under certain restricted requirements which must be met in order to use the higher stresses allowed; to utilize common practices and procedures employed in the industry insofar as possible; to clarify existing requirements; to effect necessary editorial changes; and to bring the requirements into closer agreements with the rules of the American Bureau of Shipping, standards for the American Society for Testing Materials, and various codes of the American Society of Mechanical Engineers. While relaxations have been made to permit the use of liberalized design stresses under certain conditions, the application of the revised regulations may in certain isolated cases be more stringent than before. This will be based on individual findings of each Officer in Charge, Marine Inspection. The petitions received from industry, as well as the many comments submitted, were considered and in most cases were accepted with minor modifications.

The revision of 46 CFR Part 51, regarding materials and material specifications used in marine engineering construction, has been made in order to utilize insofar as possible the practices and procedures used by industry. In this revision of material requirements, the Coast Guard has adopted by reference various material specifications of the American Society for Testing Materials and, where necessary, only those specific limitations applicable to certain materials are set forth in the regulations. Since the A. S. T. M. specifications have been widely accepted and are normally used in specifying requirements for materials purchased from steel manufacturers, the adoption of standard specifications with limitations

applicable to certain materials when used in marine service, will be beneficial to both the steel manufacturer and the purchaser. A new regulation designated 51 CFR 51.01–95 permits the use of materials complying with the requirements set forth in applicable A. S. T. M. emergency alternate provisions for the period of the National Emergency proclaimed by the President on Dec. 16, 1950. The revision also relaxes material requirements for flange and firebox quality steel plate in order that the maximum temperature permitted may be increased from 500° to 650° F. to be consistent with the limitations imposed on this material when used as flange material in piping systems.

The revision of the construction regulations in 46 CFR Part 52, as well as in the Marine Engineering Regulations and Material Specifications (CG–115), brings these regulations up to date with modern usages and practices of industry; changes certain definitions and general requirements by incorporating the American Society of Mechanical Engineers stresses in the design formulas governing shells and heads of boilers and unfired pressure vessels; provides stress tables for ferrous materials; establishes definite limitations for the design of boilers and unfired pressure vessels employing stresses based upon a factor of safety of four, such as corrosion allowance, removal of welding reinforcement, and consideration of additional stresses imposed by effects other than internal pressure; establishes new tables for allowable welded joint efficiencies, which permit increases in the basic welding efficiencies for classes I, II, and III pressure vessels by the removal of weld reinforcement and by the use of spot radiography and stress relief; revises design formulas for cylindrical shells and dished heads of boilers and unfired pressure vessels, welding requirements covering furnaces, fireboxes, and waterlegs on fire tube boilers, and formulas for determining the allowable pressure and minimum thickness of boiler tubes so that these requirements will be in closer agreement with the American Society of Mechanical Engineers boiler code as petitioned by manufacturers; and provides a method for determining the ligament efficiency in tube sheets with unsymmetrically spaced holes.

The changes in 46 CFR Part 53, regarding low pressure heating boilers, (Marine Engineering Regulations and Material Specifications (CG–115)) make the Coast Guard requirements similar to the current heating boiler code of the American Society of Mechanical Engineers. The factor of safety of five has been retained for the design of heating boilers. However, the requirements regarding the capacity and testing of safety and relief valves on low pressure heating boilers have been revised in part and further changes will be considered by the Merchant Marine Council at its next public hearing. New requirements have been added covering automatically controlled packaged type heating boilers.

The revision of the unfired pressure vessel regulations in 46 CFR Part 54, as well as in the Marine Engineering Regulations and Material Specifications (CG–115), establishes a uniform set of requirements for the design and construction of unfired pressure vessels. The requirements covering stress relieving of unfired pressure vessels constructed of A. S. T. M. A204 and A212 steel plate have been revised to agree with the American Society of Mechanical Engineers unfired pressure vessel code. There have been added a table of stresses for nonferrous materials and cast iron; design formulas for tube sheets and tubes of heat exchangers, and cast iron heads; and requirements regarding access and inspection openings to provide for suitable inspection and cleaning of unfired pressure vessels. The requirements have been revised for nozzle openings and reinforcements and pressure relief devices on unfired pressure vessels.

The piping system regulations in 46 CFR Part 55, as well as in Marine Engineering Regulations and Material Specifications (CG–115), have been revised and new requirements have been added for new materials permitted. The piping material stress table has been revised by incorporating additional piping materials for use in high temperature service and a number of new nonferrous grades have been added. The design pressures for piping have been clarified in order to establish minimum design requirements for saturated and superheated steam piping. The requirements covering the design of pipe pierced with tube holes have been revised to agree with the American Society of Mechanical Engineers code. The allowable variations in pressures and temperatures above the design limit for piping have been clarified. Certain requirements covering design of valves, plug cocks, and flange joints have been revised to clarify their intent. The design of boiler feed and blow-off piping has been revised to require a design pressure of not less than 125 percent of the maximum allowable pressure of the boiler. The number and location of independent bilge suctions required have been revised to agree with the 1948 Convention for Safety of Life at Sea. Changes have also been made to the fuel oil service requirements to permit a vessel having an auxiliary packaged boiler not exceeding 3,000 pounds per hour generating capacity to be equipped with a single fuel oil pump and heater. Vessels buring fuel oils of low viscosity will no longer be required to be equipped with fuel oil heaters. Certain requirements covering lubricating oil systems have been revised to agree with the American Bureau of Shipping Rules. The regulations for sounding pipes have been revised to clarify their intent.

The welding regulations in 46 CFR Part 56, as well as in the Marine Engineering Regulations and Material Specifications (CG–115), have been revised by clarifying the scope of the regulations; redefining welding terms employed in welding processes to agree with the American Welding Society standard, and changing certain requirements regarding acceptable types of welded joints to agree with the American Society of Mechanical Engineers' codes and American Bureau of Shipping rules. The revision of Subpart 56.01, regarding arc welding and gas welding, deals with the scope of the regulations; definition of welding terms used; approval of plans showing essential fabrication details; requirements for submerged arc welding electrodes; joint efficiency requirements for classes II and III welded pressure vessels; revised figures illustrating joint details; requirements for various types of welded joints, seal welding and intermittent welding; stress relieving requirements for class II welded pressure vessels; classes I and II welded piping connections; and slip-on flanges of class I welded piping. The revision of Subpart 56.06, regarding tests and inspection, deals with new requirements for spot radiography of welded joints for class II welded pressure vessels designed with a factor of safety of 4. The changes in Part 56 bring the regulations into closer agreement with American Welding Society standards, American Society of Mechanical Engineers' codes, Navy Department requirements, and American Bureau of Shipping rules.

The requirements regarding installations, tests, inspections, repairs, etc., in 46 CFR Part 57, and considered as Item VIII on the agenda of the Merchant Marine Council at the public hearing held September 18, 1951, were considered favorably but the publication of the revised regulations is being postponed in order that these regulations will not be further amended by changes in section numbers and cross references when it is necessary to revise the arrangement of regulations in 46 CFR Chapter I (Shipping). These regulations will be included in the document containing the necessary revision of Chapter I expected to be published before the 1948 Convention of Safety of Life at Sea becomes effective November 19, 1952.

The new specification regarding automatically controlled, packaged, auxiliary boilers has been added as a new Subpart 162.026 in Subchapter Q (Specifications) in 46 CFR Chapter I. This specification sets forth the requirements for the manufacturer to follow in manufacturing such equipment and covers design, construction, controls required, boiler alarms, tests and inspections required, and procedure for approval.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), as well as the statutes cited with the regulations below, the following amendments to the regulations are prescribed which shall become effective 30 days after the date of publication of this document in the FEDERAL REGISTER:

Subchapter D—Tank Vessels

PART 32—SPECIAL EQUIPMENT, MACHINERY, AND HULL REQUIREMENTS

SUBPART 32.35—MAIN AND AUXILIARY MACHINERY

1. Section 32.35–25 is amended to read as follows:

§ 32.35–25 *Steering apparatus on tank vessels—TB/ALL.* Tank vessels shall be provided with steering apparatus as required by Subpart 57.25 of Subchapter F (Marine Engineering) of this chapter.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4417a, as amended; 46 U. S. C. 391a)

2. Section 32.35-30. *Steering apparatus on tank ships constructed on or after July 1, 1951—T/ALL* is canceled.

3. Section 32.35-35 *Steering apparatus on tank barges—B/ALL* is canceled.

Subchapter E—Load Lines

PART 46—SUBDIVISION LOAD LINES FOR PASSENGER VESSELS

RULES FOR DETERMINING SUBDIVISION LOAD LINES FOR PASSENGER VESSELS ENGAGED ON FOREIGN AND COASTWISE VOYAGES

1. Section 46.40 *Auxiliary steering apparatus* is canceled.

(Sec. 2, 49 Stat. 888, as amended; 46 U. S. C. 88a)

Subchapter F—Marine Engineering

1. Part 51 is amended to read as follows:

PART 51—MATERIALS

SUBPART 51.01—GENERAL

Sec.
51.01-1 Statutory requirements.
51.01-5 Basic information requirements.
51.01-10 General classification of materials.
51.01-15 Inspection and testing of class A material.
51.01-20 Chemical analyses.
51.01-25 Certification of class B material.
51.01-30 Tension tests.
51.01-40 Retests.
51.01-45 Rejections.
51.01-50 Appeals.
51.01-55 Process of steel manufacture.
51.01-60 Stamping plates and specimens.
51.01-65 Stock plates.
51.01-70 Workmanship and finish.
51.01-75 Heat treatment.
51.01-80 Reclassification of materials.
51.01-85 Alternative materials.
51.01-90 Material specification standards.
51.01-95 Emergency alternate provisions.

SUBPART 51.04—MARINE BOILER STEEL PLATE

51.04-1 Scope.
51.04-5 Heat treatment.
51.04-10 Test specimens.
51.04-15 Marking.

SUBPART 51.07—STAYBOLT AND RIVET STEEL

51.07-1 Scope.

SUBPART 51.10—STEEL BARS AND SHAPES

51.10-1 Scope.
51.10-5 Process.
51.10-10 Chemical composition.
51.10-15 Tensile properties.
51.10-20 Modification in elongation.
51.10-25 Bending properties.
51.10-30 Test specimens.
51.10-35 Number of tests.
51.10-40 Finish.
51.10-45 Marking.

SUBPART 51.13—STAYBOLT AND RIVET IRON

51.13-1 Scope.

SUBPART 51.22—FLANGE AND FIREBOX STEEL PLATES

51.22-1 Scope.

SUBPART 51.25—CARBON AND ALLOY-STEEL AND WROUGHT IRON TUBES

51.25-1 Scope.

SUBPART 51.34—CARBON AND ALLOY-STEEL AND WROUGHT IRON PIPE

51.34-1 Scope.

SUBPART 51.46—STEEL FORGINGS

Sec.
51.46-1 Scope.
51.46-5 Hydrostatic tests.

SUBPART 51.49—CARBON AND ALLOY-STEEL BOLTING AND NUT MATERIAL

51.49-1 Scope.

SUBPART 51.58—STEEL CASTINGS

51.58-1 Scope.
51.58-5 Hydrostatic tests.

SUBPART 51.61—MALLEABLE IRON AND GRAY IRON CASTINGS

51.61-1 Scope.
51.61-5 Hydrostatic tests.

SUBPART 51.67—COPPER AND COPPER-ALLOY PLATE

51.67-1 Scope.

SUBPART 51.70—SEAMLESS COPPER AND COPPER-ALLOY PIPE

51.70-1 Scope.

SUBPART 51.73—SEAMLESS COPPER AND COPPER-ALLOY TUBES

51.73-1 Scope.

SUBPART 51.76—COPPER-ALLOY CASTINGS

51.76-1 Scope.
51.76-5 Hydrostatic tests.

SUBPART 51.79—ALUMINUM-ALLOY PLATE

51.79-1 Scope.

AUTHORITY: §§ 51.01-1 to 51.79-1 issued under R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275.

SUBPART 51.01—GENERAL

§ 51.01-1 *Statutory requirements.* (a) Plates, bars, and shapes used as pressure parts of boilers intended for marine service shall be tested, inspected, and stamped by an inspector in accordance with the requirements of Title 52 of the Revised Statutes of the United States.

(b) Material used for pressure parts in the construction of pressure vessels other than boilers shall conform to the requirements of this part.

§ 51.01-5 *Basic information requirements.* When ordering material for the construction of boilers or unfired pressure vessels to be installed on vessels subject to the inspection of the Coast Guard, boiler manufacturers shall, as far as practicable, furnish the following information to the manufacturer of the material and to the Officer in Charge, Marine Inspection, in the district where the boiler or unfired pressure vessel is to be fabricated:

(a) Name and location of manufacturer's works.

(b) Type and size of boiler or unfired pressure vessel.

(c) Manufacturer's serial or shop number.

(d) Design pressure.

(e) Name of shipyard and hull number.

(f) Vessel's name.

§ 51.01-10 *General classification of materials.* (a) The materials to be used in the construction of boilers and unfired pressure vessels, piping, valves, fittings, and appurtenances below listed shall be of three general classes of which classes A and B shall be used for pressure parts and class C may be used for other parts as specified.

Class A: Tested materials manufactured under the supervision of the Coast Guard, tests of which shall be witnessed by an inspector.

Class B: Certified materials tested by the manufacturers, and certified by them as conforming to the requirements.

Class C: Materials for nonpressure parts of boilers or unfired pressure vessels such as casings for water-tube boilers, uptakes, furnace fronts, and operating equipment shall be of good commercial quality. No detail requirements are herein specified for materials in this class. Class C materials shall be accepted by inspectors without requiring tests or certification by manufacturers.

(b) Except as may be otherwise required, the classification of materials under classes A and B and the sections of this part in which they are specified, are as follows:

CLASS A

Subparts
51.04 Marine boiler steel plate.
51.07 Staybolts and rivet steel.
51.10 Steel bars and shapes.
51.13 Staybolt and rivet iron.

CLASS B

51.22 Flange and firebox steel plates.
51.25 Carbon and alloy-steel and wrought iron tubes.
51.34 Carbon and alloy-steel and wrought iron pipe.
51.46 Steel forgings.
51.49 Carbon and alloy-steel bolting material.
51.58 Steel castings.
51.61 Malleable iron and gray iron castings.
51.67 Copper and copper-alloy plate.
51.70 Seamless copper and copper-alloy pipe.
51.73 Seamless copper and copper-alloy tubes.
51.76 Copper-alloy castings.
51.79 Aluminum-alloy plate.

§ 51.01-15 *Inspection and testing of class A material.* Inspectors shall have free entry at all times to those parts of the works where material subject to the regulations in this part is being manufactured. The manufacturer shall afford inspectors all reasonable facilities to satisfy them that the material is being manufactured in accordance with the requirements of the Commandant. Unless otherwise authorized, tests and inspection shall be made at the place of manufacture prior to shipment and shall be so conducted as not to interfere unnecessarily with the operation of the works. Inspectors shall assure themselves that test specimens are marked for positive identification with the materials which they represent. Unless otherwise specified, tests shall be made at ordinary temperature.

§ 51.01-20 *Chemical analyses.* (a) A ladle analysis of each melt of class A materials shall be made by the manufacturer and a certified report thereof shall be furnished by him to the inspector upon request. This analysis shall be made from a test ingot taken during the pouring of the melt. The chemical composition thus determined shall conform to the specified requirements. This requirement shall apply also to the following class B materials:

(1) Flange and firebox quality steel plates specified in Subpart 51.22.

(2) Steel forgings specified in Subpart 51.46.

(3) Alloy-steel bolting material specified in Subpart 51.49.

(4) Steel castings specified in Subpart 51.58.

(5) Copper-alloy plate specified in Subpart 51.67.

(6) Copper-alloy castings specified in Subpart 51.76.

(b) A check analysis may be made at the discretion of the Commandant from test specimens representing material for which chemical composition is specified in any section of this part, in either class A or B. The chemical composition thus determined shall conform to the requirements.

§ 51.01-25 *Certification of class B material.* (a) Certification of chemical analyses and physical tests of materials of class B shall be an affidavit by the manufacturer certifying that all materials of this class supplied by him for marine service do, or will conform to all the requirements of the regulations in this part applicable thereto.

(b) Materials in this class are not required to be tested in the presence of an inspector, but whenever deemed necessary by the Commandant, he may detail an inspector to witness such tests and satisfy himself that the requirements of the specification for class B materials are met.

§ 51.01-30 *Tension tests.* All tension tests shall be made on standard calibrated machines. The yield point in tension tests shall be determined by the drop of the beam or the halt in the gauge of the testing machine. Except where otherwise specified in this part, the speed of the crosshead of the machine shall not exceed 1/16 inch per minute per inch of gauge length up to the yield point, nor shall it exceed ½ inch per minute per inch of gauge length beyond the yield point. Any convenient speed of the crosshead may be used from the start of loading the test specimen until a value estimated as one-half of the yield point is reached. In determining the yield strength by use of an extensometer, the crosshead speed shall not exceed 0.025 inch per minute per inch of gauge length. In the event the machine is stopped in taking readings, the speed may be exceeded in the take up only. The ends of all test specimens shall be of form to fit the holders of the testing machine in such a way that the load will be axial.

§ 51.01-40 *Retests.* When the result of any of the physical tests specified for any of the materials does not conform to the requirements, two additional specimens may, at the request of the manufacturer, be taken from the same lot and tested in the manner specified, but in such case, both of the specimens shall conform to the requirements. In the case of tension tests, this retest shall be allowed if the percentage of elongation obtained is less than required, or if any part of the fracture is outside of the middle third of the gauge length. If any test specimen develops flaws, it shall be discarded and another specimen from the same lot substituted.

§ 51.01-45 *Rejections.* Failure of the tests (or retests) specified in the regulations in this subchapter for each particular material shall be cause for rejection. Unless otherwise required, any rejection shall be reported by the inspector within 5 working days from the receipt of the test specimen. Acceptance of material on results of tests at the place of manufacture shall not prejudice the right to reject any of such material in which injurious defects are subsequently discovered. The manufacturer shall be promptly notified of such subsequent rejections, and the records shall be corrected.

§ 51.01-50 *Appeals.* In case of dissatisfaction with the results of any test, the manufacturer may appeal to the Coast Guard District Commander from the decision of the Officer in Charge, Marine Inspection. Should the Coast Guard District Commander sustain the Officer in Charge, Marine Inspection, the manufacturer may appeal to the Commandant. Tested specimens which represent rejected material shall be retained for at least 30 days.

§ 51.01-55 *Process of steel manufacture.* Unless otherwise officially authorized by the Commandant, all wrought steel to be used in the construction of boilers or unfired pressure vessels to be installed on vessels shall be manufactured by the open-hearth, electric furnace, or crucible process.

§ 51.01-60 *Stamping plates and specimens.* (a) Class A plates shall be stamped by the manufacturer, before they are tested, with his name or trademark, the word "Marine", the letter indicating the grade of the steel, and the minimum tensile strength of the plate per square inch of cross-sectional area expressed in thousands. Inspectors shall permit cutting a plate into two or more parts before testing, but each part shall be stamped or match-marked for identification before cutting. All plates accepted by the inspector as conforming to the requirements shall be stamped by him near the manufacturer's stamp with the official stamp of the Coast Guard, the initials of his name, and the serial number. All test specimens shall be ring-stamped or match-marked for identification before being detached. Plates shall be stamped lengthwise in two places on one long side about 18 inches from the edges at the corners. Each butt strap shall be stamped lengthwise of the plate about the middle of the strap.

(b) The impression of the official stamp of the Coast Guard for stamping plates and specimens shall be as shown below:

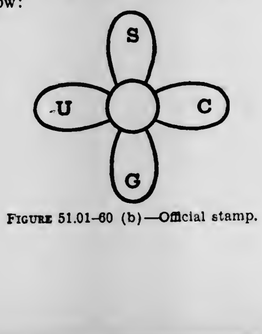

FIGURE 51.01-60 (b)—Official stamp.

§ 51.01-65 *Stock plates.* Plates may be ordered to be carried in stock ashore or on shipboard for repairs to boilers and unfired pressure vessels. Such plates shall be inspected and tested at the place of manufacture and stamped for identification as stock plates. A test report for such plates shall be furnished to the Coast Guard District Commander of the district where the purchaser is located, with a copy to the purchaser. The Coast Guard District Commander shall furnish a copy thereof to the Officer in Charge, Marine Inspection, in the district where the material is kept in stock, and if the material is to be used by persons other than the original purchaser, they shall also be furnished with a copy of such report, for submittal by them to the Officer in Charge, Marine Inspection, in the district where the repairs are actually to be made before the material may be used. Vessels carrying such stock plates shall obtain and carry identification and test records of each plate. Where such plates are cut into pieces for repairs, the Officer in Charge, Marine Inspection, shall, upon request, stamp each piece so detached for identification with the original plate and a record of such stamping shall be made.

§ 51.01-70 *Workmanship and finish.* All materials within the scope of the regulations in this subchapter shall be free from injurious defects and shall have a workmanlike finish.

§ 51.01-75 *Heat treatment.* Some of the materials herein specified require heat treatment. This may consist of annealing, or of normalizing, or of normalizing followed by annealing, or of normalizing followed by a draw back to a temperature below the critical range. Annealing shall consist of allowing material to cool after forging or rolling to a temperature below the critical range, then reheating it to proper temperature to refine the grain and allowing it to cool in the furnace. Normalizing shall consist of allowing material to cool after forging or rolling to a temperature below the critical range, then reheating it to proper temperature to refine the grain and allowing it to cool in still air.

§ 51.01-80 *Reclassification of materials.* When more than one grade is specified for any material or purpose and tests of a material of a superior grade fail to meet the requirements, such material may be reclassified and accepted as a specified lower grade if it fulfills the specified requirements for the latter. In such cases, the material shall be restamped or re-marked as required for proper identification, and revised records shall be made to cover it.

§ 51.01-85 *Alternative materials.* If, in the development of industrial arts, other suitable or improved materials differing from those specified in this part are developed, their use will be given consideration, upon formal application to the Commandant with full information as to the characteristics of the material, and such scientific data and facts as may be necessary to establish the suitability and safety of the material for the use proposed. The material requirements in this subchapter are minimum

requirements and are not intended to bar better materials.

§ 51.01–90 *Material specification standards.* (a) The specifications prescribed in this part cover materials for use in the construction of boilers, unfired pressure vessels, piping, valves, fittings, and appurtenances, and shall comply with the standard specifications issued by the American Society for Testing Materials (A. S. T. M.), as listed in this part, subject to the limitations noted in the applicable subparts.

(b) Reference copies of all A. S. T. M. specifications listed in this part are available for reading purposes at U. S. Coast Guard Headquarters, Washington 25, D. C., and are on file with various Coast Guard District Commanders.

(c) The A. S. T. M. Standards referred to in this subchapter may be purchased from the American Society for Testing Materials, 1916 Race Street, Philadelphia 3, Pa.

§ 51.01–95 *Emergency alternate provisions.* For the period of the National Emergency proclaimed by the President on December 16, 1950 (Proclamation 2914, 3 CFR, 1950 Supp.), the "Emergency Alternate Provisions" issued by the American Society for Testing Materials affecting the A. S. T. M. Standards specified in this part may be used as alternate specifications.

SUBPART 51.04—MARINE BOILER STEEL PLATE

§ 51.04–1 *Scope.* (a) The material specifications covering marine boiler steel plate subject to class A inspection shall comply with the following standard specifications issued by the American Society for Testing Materials, subject to the limitations given in this subpart:

TABLE 51.04–1—MATERIAL SPECIFICATIONS

A. S. T. M. designation	A. S. T. M. grade	Coast Guard grade
A201–52T	A and B	A and B
A212–52T	A and B	C and D
A204–52T	A, B, and C	E, F, and G

(b) Steel plates for any part of a boiler subject to pressure and exposed to the fire or products of combustion shall be of firebox quality, steel plates for any part of a boiler subject to pressure and not exposed to the fire or products of combustion shall be of either flange or firebox quality.

(c) The grades listed in paragraph (a) of this section are suitable for arc or gas welding, but are not suitable for forge welding.

(d) Sufficient discard from the top of each ingot shall be made at any stage of the manufacture, to secure freedom from piping and undue segregation in the finished product, but in no case shall the amount of top discard be less than 30 percent.

§ 51.04–5 *Heat treatment.* (a) Plates over 2 inches in thickness, before being fabricated, shall be uniformly heat-treated to produce grain refinement. Heat treatment involving quenching in a liquid medium is prohibited. If this treatment is not done at the rolling mill, the testing shall be carried out in accordance with paragraph (d) of this section.

(b) When plates are heat-treated to produce grain refinement the test specimens and the plates shall be stamped "G. R." The tensile strength of the plates in the grain-refined state shall be not less than the minimum of the specified range.

(c) Orders to the plate manufacturer or the fabricator shall specify when plates subject to the requirements of this section are to be stress-relieved and when they are to be heat-treated for grain-refinement so that proper provision may be made for the treatment of test specimens.

(d) When a fabricator, equipped to perform the work, elects to do the required heat treatment of plates for grain refinement, he shall accept the plates on the basis of the mill tests. The plate manufacturer shall make the tests prescribed in this subpart. The tension and bend test specimens shall be prepared from full thickness pieces heat-treated under conditions he considers appropriate for grain refinement and to meet the test requirements. The manufacturer shall inform the fabricator of the procedure followed in treating the pieces at the mill for guidance in treating the plates. The required physical properties shall be determined after heat treatment of the plates on specimens prepared from pieces similarly and simultaneously treated with the plates. Pieces for two tension tests, one top and one bottom, shall be provided from each plate as rolled. These pieces shall be stamped by the inspector with his official stamp for identification.

NOTE: The term "plate as rolled" as used in this section and in § 51.04–10 (c) refers to the unit plate rolled from a slab or directly from an ingot in its relation to the location and number of specimens; not to its condition.

(e) In the case of plates over 2 inches in thickness which subsequently are to be stress-relieved, the test specimens for such plates shall, before testing, be stress-relieved following the heat treatment for grain refinement.

§ 51.04–10 *Test specimens.* (a) For plates 2 inches and under in thickness, tension and bent test specimens shall be the full thickness of the material and shall be machined to the form and dimensions shown in figure 51.04–10 (a); or the bend test specimen may be machined with both edges parallel.

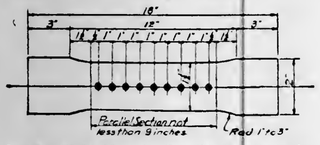

FIGURE 51.04–10 (a)—Standard rectangular tension-test specimen with 8-inch gauge length.

(b) For grade A or B plates over 2 inches and not over 4 inches in thickness, tension-test specimens may be the full thickness of the material and of the form shown in figure 51.04–10 (a); when adequate testing machine capacity is available.

(c) For plates over 2 inches in thickness, except as permitted in paragraph (b) of this section, tension-test specimens shall be machined to the form and dimensions shown in figure 51.04–10 (c); and the axis of each such specimen shall be located midway between the center and the top or bottom surface of the plate. The bend test specimens shall be at least 1½ inches in width, with both edges parallel, and may be reduced to 2 inches in thickness; but shall have one surface as rolled.

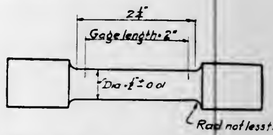

FIGURE 51.04–10 (c)—Standard round tension-test specimen with 2-inch gauge length.

§ 51.04–15 *Marking.* The quality classification to be marked on all class A plates in accordance with § 51.01–60 shall be the word, "Marine" followed by the letter designating the grade of the steel.

SUBPART 51.07—STAYBOLT AND RIVET STEEL

§ 51.07–1 *Scope.* The material specifications covering staybolt and rivet steel subject to class A inspection shall comply with the following standard specifications issued by the American Society for Testing Materials:

TABLE 51.07–1—MATERIAL SPECIFICATIONS

A. S. T. M. designation	A. S. T. M. grade	Coast Guard grade
A31–52T	A	A
A31–52T	B	B
A302–52T	A	C

SUBPART 51.10—STEEL BARS AND SHAPES

§ 51.10–1 *Scope.* (a) The material specifications covering round steel bars and structural steel shapes subject to class A inspection shall comply with the following standard specification issued by the American Society for Testing Materials, subject to the limitations noted in this subpart:

A. S. T. M. designation:	Grade
A107–52T	1010 through 1030

§ 51.10–5 *Process.* The steel shall be made by either or both of the following processes: open-hearth or electric-furnace.

§ 51.10–10 *Chemical composition.* The steel shall conform to the following requirements as to chemical composition:

Phosphorus, maximum, percent:	
Acid	0.05
Basic	.04
Sulfur, maximum percent	.05

§ 51.10–15 *Tensile properties.* The material shall conform to the following requirements as to tensile properties:

Tensile strength, p. s. i.	55,000 to 65,000
Yield point, p. s. i.	0.5 tensile strength
Elongation in 8 inches, minimum, percent	1,500,000 ÷ tensile strength
Elongation in 2 inches, minimum, percent	26

§ 51.10–20 *Modification in elongation.* For material over ¾ inch in thickness, a deduction from the percentages of elongation specified in § 51.10–15 of 0.125 percent shall be made for each increase of 1/32 inch of the specified thickness above ¾ inch.

§ 51.10–25 *Bending properties.* The bend test specimen shall stand being bent cold through 180° without cracking on the outside of the bent portion to an inside diameter which shall have the following relation to the thickness of the specimen:

TABLE 51.10–25—BENDING TEST

Thickness of material	Ratio of inside diameter of bend to thickness of specimen
¾ inch and under	½
Over ¾ to 1 inch, inclusive	1
Over 1 to 1½ inches, inclusive	1½
Over 1½ to 2 inches, inclusive	2½
Over 2 inches	3

§ 51.10–30 *Test specimens.* (a) Test specimens shall be of the full thickness or diameter of material as rolled, except as specified in paragraphs (b) and (c) of this section.

(b) Test specimens for shapes and flats may be machined to the form and dimensions shown in figure 51.04–10 (a), or with both edges parallel.

(c) Test specimens for bars over 1½ inches in thickness or diameter may be machined to a thickness or diameter of at least ¾ inch for a length of at least 9 inches; or tension test specimens may conform to the dimensions shown in figure 51.04–10 (c). Bend test specimens may be 1 by ½ inch in section.

§ 51.10–35 *Number of tests.* (a) One tension and one bend test shall be made from each melt; except that if material from one melt differs ⅜ inch or more in thickness, one tension and one bend test shall be made from both the thickest and the thinnest material rolled.

(b) If any test specimen shows defective machining or develops flaws, it may be discarded and another specimen substituted.

(c) If the percentage of elongation of any tension test specimen is less than that specified in § 51.10–15 and any part of the fracture is more than ¾ inch from the center of the gauge length of a 2-inch specimen, or is outside the middle third of the gauge length of an 8-inch specimen, as indicated by scribe scratches marked on the specimen before testing, a retest shall be allowed.

§ 51.10–40 *Finish.* The finished material shall be free from injurious defects and shall have a workmanlike finish.

§ 51.10–45 *Marking.* Bars shall, when loaded for shipment, be properly separated, and marked with the name or brand of the manufacturer and melt number for identification. The melt number shall be legibly marked on each test specimen.

SUBPART 51.13—STAYBOLT AND RIVET IRON

§ 51.13–1 *Scope.* The material specifications covering wrought iron bars for stays and staybolts and wrought iron rivets subject to class A inspection shall comply with the following standard specifications issued by the American Society for Testing Materials:

TABLE 51.13–1—MATERIAL SPECIFICATIONS

A. S. T. M. designation	A. S. T. M. grade	Coast Guard grade
A84–39	Staybolts	A
A152–39	Rivets	B

SUBPART 51.22—FLANGE AND FIREBOX STEEL PLATE

§ 51.22–1 *Scope.* The material specifications covering carbon steel plate of flange and firebox quality, class B, certified material, shall comply with the following standard specification issued by the American Society for Testing Materials:

TABLE 51.22–1—MATERIAL SPECIFICATIONS

A. S. T. M. designation	A. S. T. M. grade	Coast Guard grade
A285–52T	A (flange quality)	A
A285–52T	B (flange quality)	B
A285–52T	C (flange quality)	C
A285–52T	A (firebox quality)	A
A285–52T	B (firebox quality)	B
A285–52T	C (firebox quality)	C

SUBPART 51.25—CARBON AND ALLOY STEEL AND WROUGHT IRON TUBES

§ 51.25–1 *Scope.* (a) The material specifications covering steel and iron tubes, class B, certified material, shall comply with the following standard specifications issued by the American Society for Testing Materials, subject to the limitations noted in this subpart:

TABLE 51.25–1 (a)—MATERIAL SPECIFICATIONS

A. S. T. M. designation	A. S. T. M. grade	Coast Guard grade
Carbon steel and iron:		
A83–46	Type A (low-carbon seamless steel).	T83–A
A178–51T	Type A (low-carbon electric-resistance-welded steel).	T178–A
A178–51T	Type B (electric-resistance welded iron).	T178–B
A178–51T	Type C (medium-carbon electric resistance-welded steel).	T178–C
A179–51T	Low-carbon seamless steel condenser tubes.	T179
A192–51T	Low-carbon seamless steel	T192
A210–51T	Medium-carbon seamless steel	T210
A226–51T	Electric-resistance welded steel	T226
Alloy steel:		
A209–51T	T1 (C–Mo)	T1
A209–51T	T1a (C–Mo)	T1a
A209–51T	T1b (C–Mo)	T1b
A213–51T	T2 (1.75 Cr–0.75 Mo)	T2
A213–51T	T5 (5 Cr–0.50 Mo)	T5
A213–51T	T11 (1.25 Cr–0.50 Mo)	T11
A213–51T	T12 (1 Cr–0.50 Mo)	T12
A213–51T	T14 (2 Cr–0.50 Mo)	T14
A213–51T	T21 (3 Cr–1 Mo)	T21
A213–51T	T22 (2.25 Cr–1 Mo)	T22
A213–51T	TP321 (18 Cr–8Ni+Ti)	TP321
A213–51T	TP347 (18 Cr–8Ni+Co)	TP347

(b) Grade T179 shall be permitted only for use as tube material in heat exchangers.

SUBPART 51.34—CARBON AND ALLOY STEEL AND WROUGHT IRON PIPE

§ 51.34–1 *Scope.* The material specifications covering steel and wrought iron pipe, class B, certified material, shall comply with the following standard specifications issued by the American Society for Testing Materials:

TABLE 51.34–1—MATERIAL SPECIFICATIONS

A. S. T. M. designation	A. S. T. M. grade	Coast Guard grade
Carbon-steel and iron:		
A53–52T	Lap-welded steel	P53–LW
A53–52T	Butt-welded steel	P53–BW

A335–52T[1]	(A280) P2 (0.50 to 0.70 Cr—0.50 Mo).	P2 (P280)
A335–52T[1]	(A158) P3a (1.75 Cr—0.70 Mo).	P3a
A335–52T[1]	(A158) P3b. (2 Cr.—0.50 Mo).	P3b
A335–52T[1]	(A158) P11 (1.25 Cr—0.50 Mo).	P11
A335–52T[1]	(A315) P12 (1 Cr—0.50 Mo).	P12 (P315)
A335–52T[1]	P21 (3 Cr—0.90 Mo)	P21
A335–52T[1]	P22 (2.25 Cr—1 Mo)	P22
A312–51T[1]	(A158) TP321 (18 Cr—8Ni+Ti).	TP 321
A312–51T[1]	(A158) TP347 (18 Cr—8Ni+Co).	TP 347

[1] This A. S. T. M. specification for seamless ferritic alloy steel pipe for high temperature service is a combination of, and is intended to replace A. S. T. M. specifications A206–51T, A280–51T, A158–51T, and A315–51T, with the addition of two new grades P21 and P22.

[2] The austenitic grades TP321 and TP347 formerly in A. S. T. M. specifiction A158 have been incorporated in specification A312.

SUBPART 51.46—STEEL FORGINGS

§ 51.46–1 *Scope.* The material specifications covering carbon-steel and alloy-steel pipe flanges, forged fittings, valves and parts of class B, certified material, intended for general service and high-temperature service, shall comply with the following standard specifications issued by the American Society for Testing Materials, subject to the limitations noted in this subpart:

TABLE 51.46–1—MATERIAL SPECIFICATIONS

A. S. T. M. designation	A. S. T. M. grade	Coast Guard grade
Carbon-steel:		
A105–46	I	F105–I

A181–49	I	F181–I
A181–49	II	F181–II
Alloy-steel:		
182–52T	F1 (C—Mo)	F1
182–52T	F2 (1 Cr—0.50 Mo)	F2
182–52T	F5 (5 Cr—0.50 Mo)	F5
182–52T	F22 (2.25 Cr—1 Mo)	F22
182–52T	Fsm (18 Cr—8 Ni+Mo)	Fsm
182–52T	Fsc (18 Cr—8 Ni+Co)	Fsc
182–52T	Fst (18 Cr—8 Ni+Ti)	Fst

§ 51.46–5 *Hydrostatic tests.* Valve bodies or fittings and other pressure-containing parts shall be tested after machining to the hydrostatic test pressures specified in tables 55.07–15 (e12) and 55.07–15 (e13) in § 55.07–15 of this subchapter.

SUBPART 51.49—CARBON AND ALLOY-STEEL BOLTING AND NUT MATERIAL

§ 51.49–1 *Scope.* The material specifications covering carbon and alloy-steel

bolts and nuts of class B, certified material, shall comply with the following

SUBPART 51.61—MALLEABLE IRON AND GRAY IRON CASTINGS

ing standard specifications issued by the American Society for Testing Mate-

SUBPART 51.79—ALUMINUM-ALLOY PLATE

(j) *Maximum allowable pressure.* The

design stress shall not exceed the maxi-

mum allowable stresses for the material

bolts and nuts of class B, certified material, shall comply with the following standard specifications of the American Society for Testing Materials:

TABLE 51.49–1—MATERIAL SPECIFICATIONS

A. S. T. M. designation	A. S. T. M. grade	Coast Guard grade
Carbon-steel bolting:		
A261–51T	BO	BO
A307–50T	B	B

A193–51T	B8c (18 Cr—8Ni+Co)	B8c
A193–51T	B8t (18 Cr—8Ni+Ti)	B8t
A193–51T	B8F (18 Cr—8 Ni)	B8F
Carbon and alloy steel nuts:		
A194–51	Class 1 (carbon-steel)	1
A194–51	Class 2 (carbon-steel)	2
A194–51	Class 2H (carbon steel)	2H
A194–51	Class 3 (5 Cr—0.50 Mo—1W)	3
A194–51	Class 4 (0.15 Si—0.20 Mo)	4

SUBPART 51.58—STEEL CASTINGS

§ 51.58–1 *Scope.* (a) The material specifications covering carbon and alloy-steel castings of class B, certified material, shall comply with the following standard specifications issued by the American Society for Testing Materials, subject to the limitations noted in this subpart:

TABLE 51.58–1—MATERIAL SPECIFICATIONS

A. S. T. M. designation	A. S. T. M. grade	Coast Guard grade
Carbon-steel:		
A95–44		A
A216–47T	WCA	WCA
A216–47T	WCB	WCB
Alloy-steel:		
A217–49T	WC1 (C—Mo)	WC1
A217–49T	WC4 (1 Ni—0.65 Cr—0.50 Mo)	WC4
A217–49T	WC5 (0.80 Ni—0.70 Cr—1 Mo)	WC5
A217–49T	WC6 (1.25 Cr—0.50 Mo)	WC6
A217–49T	WC9 (2.25 Cr—1 Mo)	WC9
A217–49T	C5 (5 Cr—0.50 Mo)	C5
A217–49T	C12 (9 Cr—1 Mo)	C12

(b) Grades C5, C12, WCA, WCB, WC1, WC4, WC5, WC6, and WC9 are suitable for arc or gas welding. Other grades may be considered weldable when employing proper welding technique approved by the Commandant.

§ 51.58–5 *Hydrostatic tests.* (a) Castings intended for use as pipe flanges and flanged fittings shall be tested after machining to the hydrostatic test pressures specified in tables 55.07–15 (e12) and 55.07–15 (e13) in § 55.07–15 of this subchapter, and show no leaks.

(b) Pressure containing castings other than those specified in paragraph (a) in this section shall be tested to a hydrostatic pressure of 2 times the maximum allowable pressure and show no leaks.

SUBPART 51.61—MALLEABLE IRON AND GRAY IRON CASTINGS

§ 51.61–1 *Scope.* The material specifications covering malleable and gray iron castings of class B, certified material, used for pipe fittings, valves, flanges, and manifolds, shall comply with the following standard specifications issued by the American Society for Testing Materials, subject to the limitations noted in this subpart:

TABLE 51.61–1—MATERIAL SPECIFICATIONS

A. S. T. M. designation	A. S. T. M. grade	Coast Guard grade
Malleable iron:		
A47–48	32510	A1

A197–47	Cupola	B
Cast iron:		
A126–42	Class A (regular)	C
A126–42	Class B (higher strength)	D
A126–42	Class C (high-test)	E
A48–48	Class No. 20	No. 20
A48–48	Class No. 25	No. 25
A48–48	Class No. 30	No. 30
A48–48	Class No. 35	No. 35
A48–48	Class No. 40	No. 40
A48–48	Class No. 50	No. 50

§ 51.61–5 *Hydrostatic tests.* Castings intended for use as pipe flanges and flanged fittings shall be tested after machining to a hydrostatic pressure as required by § 55.07–30 of this subchapter.

SUBPART 51.67—COPPER AND COPPER-ALLOY PLATE

§ 51.67–1 *Scope.* (a) The material specifications covering copper and copper-alloy rolled plate of class B, certified material, suitable for use as shells and tube sheets of heat exchangers and unfired pressure vessels, shall comply with the following standard specifications issued by the American Society for Testing Materials, subject to the limitations noted in this subpart:

TABLE 51.67–1—MATERIAL SPECIFICATIONS

B111–51	Copper	B111–A
B111–51	Arsenical copper	B111–B
B111–51	Admiralty metal grade B, C, or D.	B111–C
B111–51	Aluminum brass	B111–D
B111–51	Aluminum bronze	B111–E
B111–51	Red brass	B111–F
B111–51	Copper nickel 70–30	B111–G
B111–51	Copper nickel 80–20	B111–H
B111–51	Copper nickel 90–10	B111–I

(b) When copper tubes are to be welded, deoxidized copper shall be employed.

SUBPART 51.76—COPPER-ALLOY CASTINGS

§ 51.76–1 *Scope.* The material specifications covering bronze castings of class B, certified material, for pressure-containing parts of valves, pipe fittings, and similar appliances, shall comply with the following standard specifications issued by the American Society for Testing Materials, subject to the limitations noted in this subpart:

TABLE 51.76–1—MATERIAL SPECIFICATIONS

A. S. T. M. designation	A. S. T. M. grade	Coast Guard grade
B62–51	Composition brass or ounce metal.	4A
B61–51	Steam or valve bronze	2A

B178–51T	GS11A (61S)	GS11A

PART 52—CONSTRUCTION

SUBPART 52.01—PROCEDURE AND GENERAL REQUIREMENTS

1. Sections 52.01–1, 52.01–5, 52.01–10, and 52.01–15 are amended to read as follows:

§ 52.01–1 *Definitions*—(a) *Main boiler.* A main boiler is a steam boiler used for generating steam for propulsion purposes on shipboard.

(b) *Auxiliary or donkey boiler.* An auxiliary or donkey boiler is a steam boiler used for all purposes on shipboard for which steam may be required other than propulsion.

(c) *Pressure vessel.* A pressure vessel is an unfired vessel containing gases, vapors, or liquids under pressure. (See § 54.01–5 of this subchapter.)

(d) *Water-tube boiler.* A water-tube boiler is a steam boiler in which the boiler tubes contain water and steam, the heat being applied to the outside surface of the tubes; and is composed generally of drums, headers, and tubes.

(e) *Internally-fired fire-tube boiler (Scotch boiler).* An internally-fired fire-tube boiler is a steam boiler containing furnaces, one or more combustion chambers and tubes or flues, which are surrounded by water and through which the products of combustion pass from the furnace to the uptake. In such boilers no part of the shell is in contact with the fire or products of combustion.

(f) *Externally fired fire-tube or flue boiler (horizontal return tubular).* An externally fired fire-tube or flue boiler is a steam boiler, part of the outer shell of which is exposed to fire or to the products of combustion, and containing flues through which such products pass from the furnace to the uptake.

(g) *Factor of safety.* Factor of safety is the ratio of the ultimate strength of the material to the maximum allowable stress.

(h) *Pressure or p. s. i.* Pressure or p. s. i. is the gauge pressure or the pressure above the atmospheric pressure in pounds per square inch.

(i) *Design pressure.* Design pressure is the theoretical bursting pressure of the weakest part of a boiler, pressure vessel, or piping divided by its factor of safety.

(j) *Maximum allowable pressure.* The maximum allowable pressure of a boiler and its appurtenances or of an unfired pressure vessel shall be considered as the highest setting of the safety valves or relief valves.

(k) *Repair.* Repair is the restoration of any damaged or impaired part to an effective and safe condition.

(l) *Alteration.* Alteration is a structural modification of or departure from an approved design or existing construction.

(m) *Packaged boiler.* A packaged boiler is a steam boiler equipped, and shipped complete with fuel burning equipment, mechanical draft equipment, feed water apparatus and all necessary controls for manual or automatic operation, all completely mounted on a common base and requiring only to be connected to fuel, water and electric supplies to be ready for use.

§ 52.01–5 *Plans.* (a) Manufacturers intending to fabricate boilers, unfired pressure vessels or appliances of riveted, welded, brazed, or seamless material to be installed on vessels subject to inspection by the Coast Guard, shall submit detail plans in triplicate which shall be fully descriptive of the pressure containing parts of such boilers, unfired pressure vessels, or appliances to be manufactured, to the Officer in Charge, Marine Inspection, having jurisdiction over the vessel. When due to location of the shipyard or design office, such a procedure would result in unnecessary delay in transmission, the plans may be forwarded directly to the Commandant (MMT), U. S. Coast Guard, Washington 25, D. C.

(b) The procedure specified in paragraph (a) of this section shall apply also to proposed alterations in boilers, unfired pressure vessels, or appliances of riveted, welded, brazed, or seamless material.

(c) In addition to the requirements specified in paragraph (a) of this section, manufacturers intending to fabricate packaged boilers to be installed on vessels subject to inspection by the Coast Guard shall submit detail plans, in triplicate, fully descriptive of the manual or automatic features of such boilers, to the Commandant (MMT), U. S. Coast Guard, Washington 25, D. C. Manufacturers intending to fabricate automatically controlled packaged auxiliary boilers shall submit plans and descriptive data, in quadruplicate, as specified in Subpart 162.026 of Subchapter Q (Specifications) of this chapter.

§ 52.01–10 *Automatically controlled packaged boilers.* All automatically controlled packaged auxiliary boilers shall be designed, constructed and tested in conformance with the requirements of Subpart 162.026 of Subchapter Q (Specifications) of this chapter.

§ 52.01–15 *Conditions for approval.* (a) Manufacturers of boilers to be installed on vessels subject to inspection by the Coast Guard shall make calculations of the pressure parts of such boilers using the formulas provided in this subchapter, and submit such calculations together with the drawings required by § 52.01–5. In making calculations, the design stress shall not exceed the maximum allowable stresses for the material permitted in this subchapter.

(b) When it is determined that the design of the boiler complies with all of the requirements specified in this subchapter and in Part 162 of Subchapter Q (Specifications) of this chapter, the drawings shall be approved for the maximum allowable pressure at which the boiler may be operated. If it is determined that the design does not comply with the specified requirements, the manufacturer will be notified by a written statement which will list the reasons for disapproval.

(R. S. 405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. 2. Section 52.01–35, is amended to read as follows:

§ 52.01–35 *Auxiliary, donkey, and low-pressure heating boilers.* (a) All auxiliary and donkey boilers shall be designed, constructed, installed, and inspected in accordance with the requirements specified in this subchapter for main boilers, and shall be subject to the same initial procedure and general requirements.

(b) Low-pressure steam and hot-water heating boilers, the maximum allowable pressure of which does not exceed 30 pounds per square inch, shall conform to the requirements of Part 53 of this subchapter. Boilers of this type, the maximum allowable pressure of which exceeds 30 pounds per square inch, shall conform to the requirements specified in this subchapter for main boilers.

(R. S. 4405, as amended, 4463, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

SUBPART 52.05—CYLINDRICAL SHELLS

3. Sections 52.05–5, 52.05–10, 52.05–15, and 52.05–20 are amended and § 52.05–12 is added to Part 52 and these sections read as follows:

§ 52.05–5 *Materials.* (a) Plates shall be of marine boiler steel complying with Subpart 51.04 of this subchapter, except that boilers designed for pressures not exceeding 150 pounds per square inch may be constructed of steel plate meeting the specifications of Subpart 51.22 of this subchapter, and which are tested, inspected, and stamped as required by § 51.01–1 of this subchapter.

(b) Boiler shells not exceeding 24 inches in diameter may be of seamless pipe or tubing in accordance with requirements of § 52.05–15. Boiler shells not exceeding 18 inches in diameter may be fabricated of electric-resistance butt-welded pipe in accordance with § 52.05–20.

§ 52.05–10 ***Computations.*** **(a) The maximum allowable pressure and the minimum thickness of cylindrical shells subject to internal pressure shall be determined by the strength of the weakest course computed from the thickness and tensility of the material, the efficiency of the longitudinal joint, or of the ligament efficiency between the tube holes in the shell or drum (whichever is the least), the inside or outside radius of the course, and the maximum allowable stress. Shell plates for boilers shall not be less than ¼ inch thick. Where the thickness of the shell does not exceed one-half of the inside radius, formula (1) or (2) shall be used; where the thickness exceeds or is equal to one-half of the inside radius, formula (3) may be used.**

$$P=\frac{STE}{R+0.6T} \quad (1)$$

$$T=\frac{PR}{SE-0.6P} \quad (2)$$

$$P=SE\frac{(R_o^2-R^2)}{(R_o^2+R^2)} \quad (3)$$

Where:

P = maximum allowable pressure, in pounds per square inch.
S = maximum allowable stress, in pounds per square inch, taken from tables 52.05–10 (a) and 54.03–10 (c) and subject to the limitations of § 52.05–12.
T = minimum thickness of the shell plates, in inches.
R = inside radius of the shell, in inches.
R_o = outside radius of the shell, in inches.
E = minimum efficiency of the longitudinal joints or of ligaments between tube holes or other openings.

51.58	A217	C5	C5	90,000	(11)	22,500	21,600	20,400	19,000	17,000	13,600	10,000	7,300	
51.58	A217	C12	C12	90,000	(11)	22,500	22,000	21,000	19,400	17,300	15,000	11,750	8,500	

[1] In general, the allowable S values in table 52.05–10 (a), except for welded pipe and tubing, and bolting, are based on one-fourth of the minimum of the specified tensile range of the material for temperatures of 650° and below; and on creep stress or stress-rupture for temperatures above 650° F.

[2] Intermediate values of S may be obtained by interpolation.

[3] Carbon-molybdenum alloy-steel plate, pipe, forging, and cast material shall be limited to a maximum temperature of 875° F.

[4] The minimum tensile strength employed not given in the specification; tensile strength value assumed.

[5] Permitted only for use as tube material in heat exchangers.

[6] This material shall be limited to a temperature of 875° F. when used in the design of pressure vessels.

[7] Maximum allowable stress values for temperatures below 700° F. are as follows:

A. S. T. M. designation	Grade	For metal temperatures not exceeding °F. −20 to 400	500	600	650
A213	T5	15,000	14,500	14,000	13,700
A182	F2	17,500	17,500	17,500	16,800
A182	F5	22,500	21,000	20,100	19,000

[8] These stresses include weld joint efficiency of 0.85.

[9] Between temperatures of −20° to 400° F., stress values equal to the lower of the following will be permitted: 20 percent of the minimum tensile strength or 25 percent of the minimum yield strength.

[10] Material not permitted for temperatures exceeding 450° F.

[11] To these stresses a quality factor as specified in § 52.05–13 shall be applied.

[12] These stresses apply to the normalized material only.

(b) (1) The efficiency E for riveted joints shall be calculated as required by § 52.10–10.

(2) The efficiency E for ligaments between tube holes shall be calculated as required by § 52.40–5 and 52.40–15.

(3) The efficiency E for seamless shells may be taken as 100 percent.

(4) The efficiency E for welded joints shall be as given in § 56.01–30 of this subchapter.

(5) The efficiency E for brazed unfired pressure vessels shall be taken as 90 percent.

§ 52.05–12 ***Maximum allowable stress.*** (a) The maximum allowable stresses given in tables 52.05–10 (a) and 54.03–10 (c) in Part 54 of this subchapter may be used in the formulas for determining the maximum allowable pressure and the minimum thickness of seamless or arc- or gas-welded shells which do not require staying, unstayed blank hemispherical and ellipsoidal heads, with the pressure on the concave side, flat heads which do not require staying, bolting flanges, and reinforced openings in shells and heads of boilers and unfired pressure vessels, provided the fabrication complies with the requirements of this section.

(b) The pressure parts of boilers designed in accordance with the requirements of paragraph (a) of this section, shall have a minimum thickness of ½ inch, and to the calculated thickness as determined by the applicable design formula, a corrosion allowance of 0.1 inch shall be added.

(c) The pressure parts of unfired pressure vessels, designed in accordance with the requirements of paragraph (a) of this section, shall have a corrosion allowance of one sixth of the calculated thickness, or 1/16 inch, whichever is smaller, added to the calculated thickness as determined by the applicable design formula, except that no additional thickness need be provided when suitable corrosion-resistant materials are employed.

(d) All weld reinforcement on both inside and outside of the plates at the longitudinal and circumferential joints shall be removed substantially flush with the surface of the plate.

(e) Class II welded pressure vessels which are not given a complete radiographic examination shall have portions of the welded joints examined by spot radiography as required by § 56.05–6 of this subchapter.

(f) The stresses due to hydrostatic head shall be taken into account in determining the maximum thickness of the shell or head of any pressure vessel. Additional stresses, imposed by effects other than internal pressure or static head, which increase the average stress over substantial sections of the shell or head by more than 10 percent of the allowable stress shall be taken into account. These effects include the weight of the vessel and its contents, and method of support, impact loads, superimposed loads, localized stresses due to the reactions of supports, and stresses due to temperature gradient.

(g) (1) The maximum allowable stress used in the formulas for determining the maximum allowable pressure and the minimum thickness of the following pressure parts of boilers and unfired pressure vessels, shall not exceed 80 percent of the values given in tables 52.05–10 (a) and 54.03–10 (c) in Part 54 of this subchapter for:

(i) Riveted or brazed shells.

(ii) Dished heads, other than hemispherical or ellipsoidal.

(iii) Unstayed hemispherical or ellipsoidal heads with pressure on the convex side.

(iv) Hemispherical and ellipsoidal heads with flanged-in or other reinforced manholes.

(v) All stays, braces, and parts requiring staying.

(2) Where the maximum allowable stress does not exceed 80 percent of the values given in tables 52.05–10 (a) and 54.03–10 (c) in Part 54 of this subchapter, compliance with the other provisions of this section is not required.

§ 52.05–13 *Quality factors for steel castings.* (a) A quality factor as specified in this section shall be applied to the allowable stresses for steel casting materials as given in table 52.05–10 (a), when used in special design of pressure parts.

(b) A factor not to exceed 80 percent shall be applied when a casting is produced only in accordance with the material specifications given in Subpart 51.58 of this subchapter.

(c) A factor not to exceed 90 percent may be used for castings which have been radiographed at all critical sections [1] and found free of injurious defects.

(d) Radiographing, where required shall conform to the requirements of § 56.05–5 of this subchapter.

(e) Serious defects shall be the basis for rejection of the casting. Defects which are not considered as impairing the strength of the castings may be repaired by welding in accordance with the applicable requirements of this subchapter for welding repairs to defective carbon-steel or alloy-steel castings.

(f) Castings to which a quality factor exceeding 80 percent is to be applied shall be marked as required by § 51.58–5 of this subchapter, and in addition, the applicable quality factor shall be clearly stamped on the casting.

§ 52.05–15 *Seamless pipe shells.* Shells may be of seamless pipe or tubing with or without integral heads not exceeding 24 inches in diameter, provided the material conforms to Subpart 51.25 or 51.34 of this subchapter, except that grades T83, P53–A and P53–B shall not be used for diameters exceeding 18 inches.

§ 52.05–20 *Electric-resistance-welded pipe shells.* (a) Shells not exceeding 18 inches in diameter may be fabricated of electric-resistance-welded pipe or tubing made of open-hearth or electric furnace steel, as specified in Subpart 51.25 or 51.34 of this subchapter. The maximum allowable stress values in table 52.05–10 (a) shall be substituted in formulas (1) or (2) of § 52.05–10 for the values of *SE*.

(b) Holes for tubes, nozzles or other openings shall not be drilled in the weld.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

4. Section 52.05–25 *Cylindrical shells pierced for tubes* is canceled.

5. Subparts 52.10, 52.15, 52.20, and 52.25 consisting of §§ 52.10–1 to 52.10–25, 52.15–1 to 52.15–15, 52.20–1 to 52.20–20, and 52.25–1 to 52.25–20 are amended and Subparts 52.22 and 52.24 are added to Part 52 and these subparts and sections read as follows:

[1] Critical sections of a casting are defined as the sections where defects are usually encountered, such as the junction of risers, gates, or feeders to the castings, and at abrupt changes in section. All integrally cast bosses and all chaplets and internal chills shall be radiographed.

SUBPART 52.10—SHELL JOINTS

Sec.
52.10–1 Type of shell joints.
52.10–5 Materials and workmanship.
52.10–8 Longitudinal riveted joints.
52.10–10 Efficiency of riveted joints.
52.10–15 Butt straps and computations.
52.10–20 Circumferential joints.
52.10–25 Welded joints.

§ 52.10–1 *Type of shell joints.* The shells of boilers or unfired pressure vessels may be fabricated by riveting or welding.

§ 52.10–5 *Materials and workmanship.* (a) The butt straps of riveted joints shall be of steel conforming with the specifications and requirements for the shell plates.

(b) Rivets shall conform to the requirements of Part 51 of this subchapter, as follows:

Steel rivets ..... Subpart 51.07
Iron rivets ..... Subpart 51.13

(c) Rivet holes shall be drilled wholly and fairly, preferably in position. After drilling, plates and straps shall be disassembled, burrs removed, and edges of holes faired before the plates are riveted together. Drifting of rivet holes is prohibited.

(d) The calking edges of plates, butt-straps, and heads shall be beveled to an angle not sharper than 70° to the plane of the plate and as near thereto as practicable. Every portion of the unfinished surfaces of the calking edges of plates, butt-straps, and heads shall be planed or milled to a depth of not less than ¼ of the thickness of the plate, but in no case less than ⅛ inch. Calking shall be done with a tool of such form that there is no danger of scoring or damaging the plate underneath the calking edge, or splitting the calked sheet.

(e) Plates and shapes shall be so closely fitted, metal to metal, as to require a minimum of calking to obtain tightness.

(f) The seal welding of rivet heads to secure tightness is prohibited.

§ 52.10–8 *Longitudinal riveted joints.* (a) The longitudinal joints of drums and shells of all boilers shall be of riveted double-butt strap construction, at least double-riveted.

(b) The longitudinal joints of externally fired fire-tube or flue boilers shall be located above the fire line of the setting.

(c) Boiler shell plates having longitudinal joints shall be rolled or formed by pressure, not blows, to the proper curvature.

(d) The maximum allowable pitch of rivets in longitudinal joints shall be such as to insure good calking.

(e) The distance between the center lines of any two adjacent rows of rivets in longitudinal joints or the "back pitch" measured at right angles to the direction of the joint, shall have the following minimum values:

(1) If $\frac{P}{d}$ is 4 or less, the minimum value shall be: $2d$, or

(2) If $\frac{P}{d}$ is over 4, the minimum value shall be: $2d+0.1(P-4d)$

Where:
P = Pitch of the rivets in outer row where a rivet in the inner row is located midway between two rivets in the outer row, in inches, or
P' = pitch of rivets in the outer row less pitch of rivets in the inner row where two rivets in the inner row is located between two rivets in the outer row, in inches.
d = diameter of the rivet holes, in inches.

(3) The "back pitch" of rivets shall be measured either on the flat plate before rolling or on the median line after rolling. The "back pitch" thus measured shall govern the locations of the rivet holes in the butt-straps. The diagonal ligaments between staggered rivets shall have the proper strength, as determined by figure 52.40–5 (c) (4).

(f) On longitudinal joints the distance from the center of rivet holes to the edge of the plate, except rivet holes in the ends of butt-straps, shall be not less than 1½ and not more than 1¾ times the diameter of the rivet holes, the distance to be measured from the center of the rivet holes to the calking edge of the plate before calking.

§ 52.10–10 *Efficiency of riveted joints.* (a) The efficiency of riveted joints is the ratio which the strength of the joint bears to the strength of the solid plate. The efficiency of a riveted joint is determined by calculating the breaking strength of a unit section of the joint, considering each possible mode of failure separately, and dividing the lowest result by the breaking strength of the solid plate of a length equal to that of the section considered. It shall be computed in accordance with the following formulas:

(1) For plate section:

$$E=\frac{P-d}{P} \quad (1)$$

(2) For rivet section:

$$E=\frac{Nas}{PST} \quad (2)$$

(3) For combined efficiency of plate in second row and shearing strength of rivet in outer row:

$$E=\frac{p-d}{p}+\frac{nas}{PST} \quad (3)$$

(4) For combined efficiency of plate in second row and crushing strength of butt strap in front of rivet in outer row:

$$E=\frac{p-d}{p}+\frac{ncdt}{PST} \quad (4)$$

where:
E = efficiency of riveted joint in ratio to solid plate.
P = pitch in inches of rivets in outer row.
p = pitch in inches of rivets in second row.
d = diameter of rivet hole, in inches.
N = total number of rivets per pitch P.
n = number of rivets in outer row per pitch P.
T = thickness of shell plate, in inches.
t = thickness of butt strap, in inches.
a = sectional area of the driven rivet, in square inches.
c = crushing strength of plate in front of rivets. (Assumed as 95,000 pounds per square inch.)
S = tensile strength of plate in pounds per square inch.

[1] It is assumed that the joints are of the usual construction where the rivets are symmetrically spaced.

s = shearing strength of rivets in pounds per square inch of sectional area, assumed as follows:

Iron rivets in single shear	38,000
Iron rivets in double shear	76,000
Steel rivets, grade A, in single shear	44,000
Steel rivets, grade A, in double shear	88,000
Steel rivets, grade B, in single shear	52,000
Steel rivets, grade B, in double shear	104,000
Alloy-steel rivets, grade C, in single shear	60,000
Alloy-steel rivets, grade C, in double shear	120,000

(b) Where the drums of water-tube boilers are pierced through the longitudinal butt-strap joint for the purpose of inserting tubes to connect the headers to the drum, the combined thickness of both butt straps shall be taken in computing the efficiency of the ligament between tube holes. This efficiency shall in no case be less than that required for the riveted joint.

§ 52.10–15 *Butt straps and computations.* (a) The thickness of butt straps shall be such as to permit efficient calking of the edges. Where the pitch of the rivets is so great as to make effective calking doubtful, as occurs in quadruple riveting, the edge should be scalloped around the outer rivets.

(b) The thickness of the outer butt strap shall be not less than that determined by the following formula, but it shall in no case be less than ¼ inch:

$$t=\frac{5T(P-d)}{8(P-Kd)} \quad (1)$$

where:
t = thickness of outer strap, in inches.
T = required thickness of shell plate, in inches.
P = pitch of rivets in outer rows, in inches.
d = diameter of rivet holes, in inches.
K = ratio of pitch of rivets in outer row to minimum pitch in inner rows.

(c) The thickness of the inner butt strap shall equal t plus 0.125 inch, but is not required to exceed the thickness of the shell plate.

(d) The thickness of butt straps on drums of water-tube boilers pierced for the purpose of inserting tubes to connect the headers to the drums, shall be increased if necessary to maintain the efficiency on which the allowable pressure is based.

(e) Butt straps shall be formed to the curvature of the shell by rolling or pressing.

§ 52.10–20 *Circumferential joints.* (a) The minimum strength of circumferential joints attaching shells to heads of boilers or other pressure vessels shall bear the following ratios to that required for the longitudinal joints of the shell:

(1) Fifty percent when no part of the load on the head is supported by either tubes or stays.

(2) Forty percent when one-half or more of the load on the head is sustained by stay tubes, flues, or stays; except that circumferential head joints of externally fired fire-tube or flue boilers exposed to fire or to the products of combustion, shall have a minimum strength of not less than 50 percent of that of the longitudinal joint.

(b) The strength of the circumferential joints connecting courses of the shell shall be not less than 75 percent of that required for the longitudinal joints of the shell except that in the case of externally fired flue boilers the strength of circumferential joints need not exceed 60 percent of the strength of the longitudinal joint.

(c) Circumferential end joints of shell plates over ⅝ inch thick and circumferential joints connecting courses of shells, the required thickness of which is over ½ inch, shall be at least double riveted. Where the thickness of the shell plate exceeds 1⅜ inches for single-ended boilers, and 1⅜16 inches for double-ended boilers, the circumferential seams connecting shell courses shall be triple riveted.

(d) On circumferential joints of shells having heads which are not supported by tubes or through stays, the distance from the center of rivet holes to the calking edges of the plates, shall be not less than 1½ and not more than 1¾ times the diameter of the rivet holes. The distance from the centers of rivet holes of circumferential joints to the edges of the plate in boilers having heads which are supported by tubes or through stays shall not be less than 1¼ times the diameter of the rivet holes.

(e) The distance between any two rows of rivets in a circumferential joint or the "back pitch" shall be not less than 1¾ times the diameter of the rivet hole.

§ 52.10–25 *Welded joints.* (a) Drums, shells, or other cylindrical pressure parts and non-cylindrical pressure parts of boilers and unfired pressure vessels, except stays or braces as specified in Subpart 52.35, may be fabricated by means of arc or gas welding, provided the construction meets the requirements for material and design as specified in Parts 51 and 52 of this subchapter, and the welding conforms to the requirements of Part 56 of this subchapter.

(b) Arc or gas welding used in the fabrication of the pressure parts of boilers, as specified in paragraph (a) of this section, need not be radiographed, unless otherwise specified in this subchapter, provided the stress or load is carried by other construction which conforms to the requirements of the regulations in this subchapter, such as stays, staybolts, and stay tubes, and where the adequacy of the boiler design is not solely dependent upon the strength of the weld. Welding done under these provisions shall otherwise conform in all respects to Part 56 of this subchapter, unless otherwise specified in this subchapter.

(c) Arc or gas welding is permitted in the construction of boilers and unfired pressure vessels for the purpose of securing tightness in parts of riveted joints which are otherwise constructed fully in accordance with the regulations in this subchapter.

(d) The ends of inner butt-straps of riveted butt-strap longitudinal joints may be arc- or gas-welded to the edges of heads or of the adjoining shell plate, or to the circumferential butt-straps for tightness. When the butt-strap of a longitudinal joint does not extend the full length of the shell plates, the abutting edges of the shell plate may be welded provided the distance from the end of the butt-strap to the edge of the flange of the head or adjacent shell plate is not greater than 2½ inches.

(e) The longitudinal and circumferential joints of corrugated furnaces may be fabricated by arc welding in accordance with the requirements of § 52.50–15 (g).

(f) (1) A furnace in a fire tube boiler may be attached to an outwardly flanged opening in a front tube sheet by a circumferential fillet weld, or, the furnace may be attached to either tube sheet by flaring the end which extends beyond the outside face of the head to an angle of 20 to 30 degrees, and using a circumferential fillet weld, provided:

(i) The area of the heads around the furnace is stayed by tubes or braces in accordance with the requirements of Subpart 52.35;

(ii) The joint is wholly outside the furnace;

(iii) The throat of the full fillet weld is not less than 0.7 times the thickness of the head;

(iv) Unless protected by refractory material, the furnace shall not extend beyond the outside face of the tube sheet a distance greater than the thickness of the tube sheet. Any excess shall be removed before welding.

(v) The welding conforms in all respects to Part 56 of this subchapter, except that radiographic examination is not required.

(2) A furnace may also be attached by a full penetration weld, provided the furnace extends through the full thickness of the tube sheet. The furnace shall not extend beyond the toe of the weld and the toe shall not project beyond the face of the tube sheet by more than 3/32 inch.

(g) Arc- or gas-welded construction may be used in lieu of riveted joints in the fire boxes of internally-fired boilers provided the welds are located between two rows of staybolts, or in the case of flat surfaces, the weld is not less than one half of a staybolt pitch from the corner of the knuckle.

(h) The bottom edges of plates of vertical tubular and firebox types of boilers may be attached by full penetration butt welds provided the load due to internal pressure is carried by staybolting and the inside width of the waterleg does not exceed 4 inches. The plates may be considered as fully supported if the distance from the welds to the nearest row of staybolts is not more than one-half the pitch allowed by Subpart 52.35.

(i) Mud rings of plate material may be used in the construction of waterlegs of vertical fire-tube boilers and may be attached as shown in figure 52.20–10 (E), provided the width of the waterleg does not exceed 4 inches, and the thickness of the mud ring plate is at least ½ inch. The welding shall be stress-relieved, but radiographic examination is not required.

SUBPART 52.15—DOMES AND STEAM CHIMNEYS

Sec.
52.15–1 Definitions.
52.15–5 Materials and workmanship.
52.15–10 Computations.
52.15–15 Detail requirements.

§ 52.15–1 *Definitions*—(a) *Domes.* Domes are superstructures of shells, attached by riveting or welding. They generally consist of a cylindrical shell with one end flanged for attachment to the main shell and the other end closed by a head which may be integral with, riveted, or welded to the shell.

(b) *Steam chimneys.* Steam chimneys are superstructures of steam boilers which are fitted with a lining inside of which the products of combustion pass to the smokestack. They may be constructed in the form of a dome integral with the boiler or as independent steam vessels connected by piping to the boiler.

§ 52.15–5 *Materials and workmanship.* (a) Steel plates used in the construction of domes shall conform to the specifications and requirements for the shell plates. For steam chimneys the steel plates used shall conform to the specifications and requirements of Subpart 51.04 or 51.22, and which are tested, inspected, and stamped in accordance with § 51.01–1 of this subchapter.

(b) Rivets shall conform to the requirements of Part 51 as follows:

Steel rivets	Subpart 51.07
Iron rivets	Subpart 51.13

§ 52.15–10 *Computations.* (a) The maximum allowable pressure and the minimum thickness of the shell of domes and steam chimneys shall be computed as specified for cylindrical shells in Subpart 52.05, employing the minimum efficiency of the joint.

(b) Flat surfaces of heads of domes and steam chimneys shall be stayed as specified for surfaces to be stayed or reinforced in Subparts 52.30 and 52.35.

(c) The maximum allowable pressure on unstayed steam chimney linings, or the minimum thickness of such linings, shall depend upon their type and shall be computed in accordance with the requirements for furnaces and flues specified in Subpart 52.50.

(d) A cylindrical surface exposed to external pressure and not entirely self-supporting shall be stayed in accordance with the requirements of Subparts 52.30 and 52.35, specifically § 52.30–10 (g).

(e) The strength of the rivets and of ligaments between rivets in the flange attaching a dome or steam chimney to a main shell shall be sufficient to give a factor of safety of not less than six against the full load acting on the head. This factor of safety may be reduced to not less than four when not less than 50 percent of the load on the head is carried by stays secured to the main shell.

(f) Domes attached to shells of boilers shall comply with the requirements for reinforced openings as specified in Subpart 52.25.

§ 52.15–15 *Detail requirements.* (a) All domes and steam chimneys shall be so arranged that any water can drain back into the boiler.

(b) The diameter of a dome shall not exceed one-half of the diameter of the boiler shell.

(c) Flanges of domes shall be formed with a corner radius of at least twice the thickness of the plate for plates 1 inch in thickness or less, and at least three times the thickness of the plate, for plates over 1 inch in thickness.

(d) The longitudinal joints of a dome or steam chimney may be butt-welded and the dome flange may be double full-fillet lap-welded to shell, in lieu of riveting, provided the welding fully complies with the requirements of Part 56 of this subchapter, except that radiographic examination of the fillet welds may be omitted.

SUBPART 52.20—DISHED HEADS

Sec.
52.20–1 Definitions.
52.20–5 Materials and workmanship.
52.20–10 Computations.
52.20–15 Detail requirements.
52.20–20 Openings in dished heads.

§ 52.20–1 *Definitions*—(a) *Unstayed heads.* Unstayed heads are the ends of a pressure vessel shell. They may be either flat or dished. Heads may be integral with, riveted or welded, to the shell.

(b) *Dished heads.* Dished heads are heads formed to a segment of a sphere or to a hemispherical or elliptical section and may be attached to the shell so that the pressure will be either on the concave or on the convex side.

§ 52.20–5 *Materials and workmanship.* (a) Steel plate used in the fabrication of heads shall be either flange or firebox quality complying with Subpart 51.04 or 51.22. Flanged or dished heads if pressed or flanged cold shall be stress-relieved as required by § 56.01–70 of this subchapter after the cold-forming operations are completed. Heads that are flanged or dished hot need not be stress-relieved.

NOTE: It is not mandatory in fresh and salt water service systems that flanged or dished heads be stress-relieved for use on compression tanks with an air cushion containing liquids operating at temperatures not exceeding 212° F.

(b) The inside radius of the bend of the flange formed on an unstayed dished head shall be not less than three times the thickness of the head and shall in no case be less than 6 percent of the diameter of the shell.

(c) Dished heads having the pressure on the convex side shall be formed to a true surface without flats.

(d) The heads here considered are of steel plate. Cast-steel, bronze and cast-iron heads may be used for unfired pressure vessels, but only where specifically authorized by the Commandant.

(e) The edge of the flange formed on a head shall be machined to a true surface. Where the flange is to be calked inside, the edge shall be beveled as specified for the edges of plates and straps in § 52.10–5. Care shall be taken in calking to avoid damaging the surface of the plate.

(f) The holes for rivets to attach the head to the shell shall, as far as practicable, be drilled in position, and the shell and head shall be taken apart after the holes are drilled, and burrs removed. In cases where holes cannot be drilled in position, the holes shall be examined after assembly and faired by reaming where necessary. (The requirements to take apart shell and head for removing burrs shall not apply to heads where the contact surfaces have been machined and the heads shrunk in place.)

§ 52.20–10 *Computations.* (a) The maximum allowable pressure and the minimum thickness of blank unstayed spherically dished heads, hemispherical heads, or ellipsoidal heads having the pressure on the concave side shall be calculated by the following:

(1) *Spherically dished heads.*

$$P=\frac{STE}{0.833R} \quad (1)$$

$$T=\frac{0.833PR}{SE} \quad (2)$$

(2) *Hemispherical heads.*

$$P=\frac{2STE}{R} \quad (3)$$

$$T=\frac{PR}{2SE} \quad (4)$$

Where:
P = maximum allowable pressure, in pounds per square inch.
S = maximum allowable stress, in pounds per square inch, taken from tables 52.05–10 (a) and 54.03–10 (c), and subject to the limitations of § 52.05–12.
T = minimum thickness of the head, in inches.
E = efficiency of the weakest joint used in forming the head, including the head to shell joint for hemispherical heads only, for the following types:
Riveted joints = calculated riveted efficiency, § 52.10–10.
Welded joints = efficiency specified in table 52.05–10 (b).
Seamless shells with integral heads = 100 percent.
R = radius to which the head is dished or formed, measured on the concave side, in inches.

(3) *Ellipsoidal heads.* A blank head of a semi-ellipsoidal form in which half the minor axis (or the depth of the head not including the flange) is at least equal to one-fourth of the inside diameter of the head, shall be made at least as thick as the required thickness of a seamless shell of the same diameter, as specified in § 52.05–10.

(b) The radius to which a head is dished shall be not greater than the outside diameter of the flanged portion of the head. Where two radii are used, the longer shall be taken as the value of R in formulas (1) and (2) of this section.

(c) The maximum allowable pressure and minimum thickness of dished cast steel or bronze heads, where permitted, shall be calculated by the appropriate formulas in this section.

(d) The maximum allowable pressure and minimum thickness of cast-iron dished heads, where permitted, shall be calculated by the appropriate formulas in Part 54 of this subchapter for unfired pressure vessels.

§ 52.20–15 *Detail requirements.* (a) Where the radius R to which a dished head is formed is less than 80 percent of the inside diameter of the shell, the thickness of a head with a flanged-in manhole opening shall be not less than the value found by making R, in formulas (1) and (2) in § 52.20–10, equal to 80 percent of the outside diameter of the shell and with the added thickness for the manhole. The thickness calculated shall be the minimum thickness of a head with a flanged-in manhole opening for

any form of head and the maximum allowable stress shall not exceed the values given in table 52.05–10 (a) or 54.03–10 (c) in Part 54 of this subchapter.

(b) When dished heads are of a thickness less than called for by § 52.20–10 they shall be stayed as flat surfaces. Allowance may be made for the holding power of the spherical form provided the following conditions are met:

(1) The heads are at least two-thirds of the thickness required for unstayed dished heads;

(2) The heads are at least 7/8 inch in thickness;

(3) Through stays are used and attached to the dished head by outside and inside nuts; and,

(4) The maximum allowable pressure shall not exceed that calculated by the regulations for an unstayed dished head plus the pressure corresponding to the strength of the stays or braces obtained by Subpart 52.30, using 170 for the value of C.

(c) If a dished head concave to the pressure is formed with a flattened spot or surface, the diameter of the flat spot shall not exceed that allowed for flat heads as given by formulas (1) and (2) of § 52.22–10, and the minimum thickness shall be computed by these formulas, using C=0.25.

(d) When a spherically dished head has a flanged-in manhole or other access opening exceeding 6 inches in any dimension, the thickness of the head shall be increased by not less than 15 percent of the required thickness for a blank head computed by formula (2) of § 52.20–10, but in no case by less than 1/8 inch additional thickness over a blank head.

(e) If a flanged-in manhole which meets the requirement of § 52.20–20 is placed in a full-hemispherical head or ellipsoidal head, the thickness of the head shall be the same as for a head dished to a segment of a sphere, with the radius of dish equal to eight-tenths of the outside diameter of the shell and with the added thickness for the manhole as specified in paragraph (d) of this section.

(f) (1) Except as provided for in paragraphs (d) and (e) of this section, all openings which require reinforcement placed in an unstayed spherically dished head, or an ellipsoidal head, or in a full-hemispherical head, including all types of manholes except those of the integral flanged-in type, shall be reinforced in accordance with § 52.25–20, in the application of which the opening shall be treated as though it were in a shell:

(i) Of the same outside diameter as the outside diameter of the flange of the head;

(ii) Of the same material, thickness and allowable pressure; and,

(iii) One-half the required thickness of the shell used for computing the amount of reinforcement required may be used for T when the opening is in a full-hemispherical head.

(2) When so reinforced, the thickness of such a head may be the same as for a blank unstayed dished head.

(g) Where a spherically dished head has a flanged opening supported by an attached flue, an increase in the thickness over that computed by formula (2) of § 52.20–10 is not required.

(h) If more than one manhole is inserted in a dished head, the thickness of which is calculated by paragraphs (f) and (g) of this section, the minimum distance between the openings shall be not less than one-fourth of the outside diameter of the head.

(i) The maximum allowable pressure and the minimum thickness of an unstayed dished head of any form without manholes or handholes with the pressure on the convex side shall be calculated by formulas (1) and (2) of § 52.20–10, but only 60 percent of the maximum allowable pressure thus determined shall be allowed.

(j) No head, except a full-hemispherical head, shall be of a lesser thickness than that required for a seamless shell of the same diameter.

(k) When the flange of an unstayed dished head is machined to make a close fit into or onto the shell, the thickness shall be not reduced to less than 90 percent of that required for a blank head.

§ 52.20–20 *Openings in dished heads.* (a) Flanged-in manholes or other flanged openings in a dished head shall be flanged to a minimum radius measured on the inside of the plate of not less than 7/8 inch, for plates up to and including 1 1/8 inches in thickness, and for plates exceeding 1 1/8 inches thickness, the radius shall be increased proportionately. The minimum depth of the flange measured from the outside of the plate at the ends of the major axis shall be determined by the following formula:

$$d=\sqrt{Tw} \quad (1)$$

Where:
d = depth of flange, measured from the outer face, in inches.
T = thickness of the plate, in inches.
w = minor axis of the opening, in inches.

(b) A manhole opening may be reinforced by a riveted manhole frame or other attachment in lieu of flanging.

(c) Unreinforced openings in dished heads shall be governed by the following:

(1) The edge of any unreinforced opening, excluding rivet holes, shall come no closer to the line bounding the spherical or ellipsoidal portion of the head around a manhole than the distance equal to the thickness of the head, and in no case, except for water-column connections, shall it come within the part formed by the corner radius of a dished head.

(2) The maximum allowable diameter of any unreinforced opening in a head, except in a full-hemispherical head, shall not exceed that permitted by § 52.25–15 (a) for a shell of the same outside diameter as the outside diameter of the flange of the head, of the same thickness, allowable pressure and material as that in the head, nor shall it exceed 8 inches in any case.

(3) For unreinforced openings in full-hemispherical heads, the requirements of subparagraph (2) of this paragraph shall apply, except that the value of K shall be one-half the value given by the formula in § 52.25–15 (a).

(4) The minimum distance between the centers of any two unreinforced openings, rivet holes excepted, shall be determined by the following formula:

$$L=\frac{A+B}{2(1-K)} \quad (2)$$

Where:
L = distance between the centers of the two openings, measured on the surface of the head, in inches.
A and B = diameters of the two openings in inches.
K = same as defined in § 52.25–15 (a) for the equivalent shell described in subparagraph (2) of this paragraph.

SUBPART 52.22—FLAT HEADS

Sec.
52.22–1 Definitions.
52.22–5 Materials and workmanship.
52.22–10 Computations.
52.22–15 Openings in flat head.

§ 52.22–1 *Definitions*—(a) *Unstayed heads.* Unstayed heads are the ends of a pressure vessel. They may be either flat or dished. Heads may be integral with, riveted, or welded to the shell. Unstayed flat heads may be used to close shells as permitted by § 52.22–10.

(b) *Stayed heads.* Stayed heads are heads supported in whole or in part by stays, furnaces, flues, tubes, etc.

§ 52.22–5 *Materials and workmanship.* (a) Steel used in the fabrication of flat heads shall be either flange or firebox quality complying with Subpart 51.04 or 51.22.

(b) The heads here considered are of steel plate. Cast steel, cast iron or bronze heads may be used for pressure vessels other than boilers, but only where specifically authorized by the Commandant.

§ 52.22–10 *Computations.* (a) The maximum allowable pressure and minimum required thickness of unstayed flat heads, cover plates, blind flanges, etc., shall be determined by the following formulas:

$$P=\frac{ST^2}{CD^2} \quad (1)$$

$$T=D\sqrt{\frac{CP}{S}} \quad (2)$$

Where:
D = diameter, or shortest span, measured as indicated in figure 52.22–10, in inches.
P = maximum allowable pressure, in pounds per square inch.
T = minimum required thickness of plate, in inches.
S = maximum allowable stress, in pounds per square inch, taken from tables 52.05–10 (a) and 54.03–10 (c) and subject to the limitations of § 52.05–12.
C = 0.162 for plates rigidly riveted or bolted to shells, flanges, or side plates as shown in figure 52.22–10 (A); and for integral flat heads as shown in figure 52.22–10 (B) where dimension D does not exceed 24 inches and the ratio of thickness of the head to dimension D is at least equal to or greater than 0.05.

C=0.25 for heads forged integral with or butt-welded to shells, pipes, or headers as shown in figures 52.22–10 (C) and (D), where the corner radius on the inside is not less than three times the thickness of the flange immediately adjacent thereto, and where the welding meets all the requirements for circumferential joints given in Part 56, including stress relieving and radiographic examination.

C=0.50 for plates arc- or gas-welded to the inside of pressure vessels, pipes or headers and otherwise meeting the requirements for respective type of arc- or gas-welded vessels, including stress relieving but omitting radiographic examination. The plate shall be welded as shown in figure 52.22–10 (E), with a fillet weld having a throat equal to two times the required thickness of a seamless shell, but not greater than the head thickness nor in any case less than 1.25 times the actual shell thickness, and where the weld is deposited in a welding groove with the root of the weld at the inner face of the head. The remainder of the head plate may be beveled to an angle not exceeding 45°.

$C=0.30+1.40\frac{Wh_g}{HD}$ for plates bolted to shells, flanges, or side plates, in such a manner that the setting of the bolts tends to dish the plate, and where the pressure is on the same side of the plate as the bolting flange, as shown in figures 52.22–10 (F) and (G), where:

W=flange design bolt load, in pounds.
h_g=radial distance from the bolt-circle diameter to the diameter D, in inches.
H=total hydrostatic end force on area bounded by the mean diameter of the gasket or joint contact surface, in pounds.
D=diameter, or shortest span, measured as indicated in figure 52.22–10, in inches.

C=0.50 for plates having a dimension D not exceeding 18 inches inserted into pressure vessels and welded thereto as shown in figure 52.22–10 (H), and otherwise meeting the requirements for the respective type of class II welding including stress relieving but omitting radiographic examination. The end of the pressure vessel shall be crimped over to an angle not less than 30° nor more than 45°. The throat of the weld shall be not less than the thickness of the shell or head, whichever is the greater.

C=0.75 for plates screwed into the end of a pressure vessel having an inside diameter D not exceeding 12 inches, as shown on figure 52.22–10 (I), or for heads having an integral flange screwed over the end of a pressure vessel having an inside diameter D not exceeding 12 inches. The design of the threaded joint against failure by shear, tension, or compression resulting from the end force due to pressure shall be based on a factor of safety of at least 4 and the threaded parts are at least as strong as the threads for standard piping of the same diameter, and the head shall be welded to the pressure vessel by means of a seal weld.

C=0.30 for plates inserted into the ends of pressure vessels and held in place as shown in figure 52.22–10 (J) where all possible means of failure, either by shear, tension, or compression, due to the hydrostatic end force, are resisted with a factor of safety of 4. Seal welding may be used, if desired.

§ 52.22–15 *Openings in flat head.* (a) Unreinforced openings in unstayed flat heads shall be calculated in accordance with § 52.25–15 (a), where the value of D (outside diameter of shell or drum) shall be equal to the diameter D or shortest span of the flat head measured as indicated in figure 52.22–10, and K shall be the ratio of the thickness T required by formula (2) of § 52.22–10 (a) to the actual thickness of the flat head.

(b) Reinforced openings in unstayed flat heads, where the maximum diameter of the opening does not exceed 50 percent of the dimension D or shortest span of the flat head measured as indicated in figure 52.22–10, shall be designed in accordance with § 52.25–20, where T is the thickness required by formula (2) of § 52.22–10 (a), except that the required cross-section need only be 75 per cent of that specified in § 52.25–20.

(c) Where the maximum diameter of an opening exceeds 50 percent of the dimension D as indicated in figure 52.22–10, the flat plate shall be designed as a flange.

SUBPART 52.24—ACCESS AND INSPECTION OPENINGS

Sec.
52.24–1 Definitions.
52.24–5 Materials and workmanship.
52.24–10 Detail requirements.

§ 52.24–1 *Definitions*—(a) *Openings.* Access or inspection openings, as defined in this subpart, are holes cut in the shells or heads of boilers or other pressure vessels for the purpose of inspection and cleaning.

NOTE: Openings in the shells or heads of boilers or other pressure vessels, including domes and steam chimneys, for other purposes than above defined (such as pipe connections and mountings) are covered in Subpart 52.25.

(b) *Manhole.* A manhole is an access opening in a boiler or unfired pressure vessel of sufficient size to permit an inspector to enter the vessel. Manholes may be of elliptical or circular shape.

(c) *Handhole.* A handhole is an opening in a pressure part of a boiler or unfired pressure vessel for the purpose of access or inspection, usually not exceeding 6 inches in longest dimension.

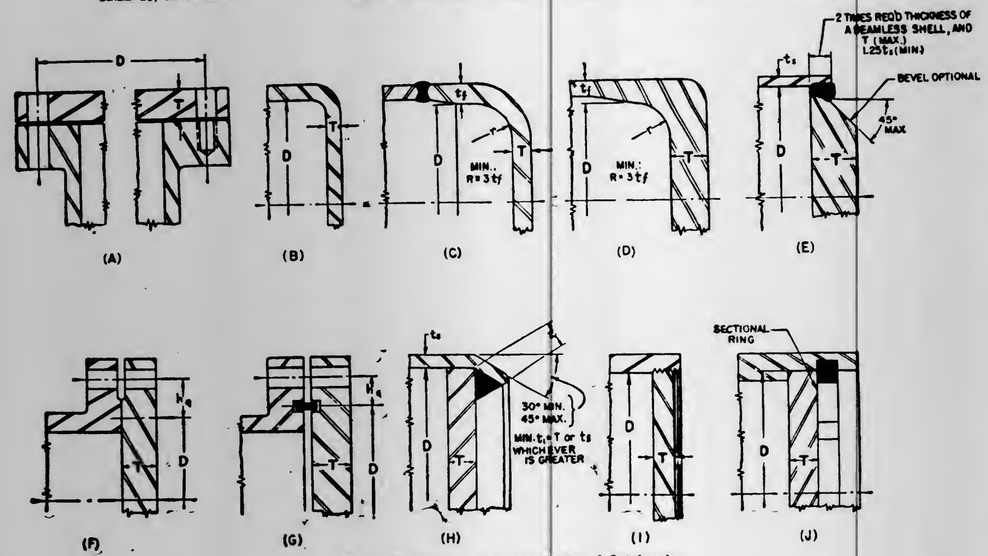

FIGURE 52.22–10—Acceptable types of flat heads.

The shapes of handholes may be circular, elliptical, or rectangular with rounded corners.

§ 52.24–5 *Materials and workmanship.* (a) The cover plates for manholes shall be of rolled or forged steel conforming to the requirements of Subpart 51.04 or 51.46 of this subchapter. Handhole covers may be made of rolled, forged or cast steel conforming to the requirements of Subpart 51.04, 51.22, 51.46 or 51.58 of this subchapter.

(b) Manhole covers shall be marked with the manufacturer's name or trademark together with the maximum allowable pressure.

(c) Manhole and handhole yokes or dogs shall be of forged steel, pressed steel, or cast steel conforming to the requirements of Subpart 51.04, 51.22, 51.46 or 51.58 of this subchapter. The material of bolts securing yokes or dogs and cover plates shall conform to the requirements of Subpart 51.07 of this subchapter.

(d) When handhole or other access openings are made, a margin of not less than ¼ inch shall be left when punching operations are used, and not less than ⅛ inch shall be left when machine burning methods are employed. Such margins shall be machined or ground away to relieve the metal of any stresses which may be set up due to burning or punching operations.

(e) The minimum width of bearing surface for a gasket on a manhole opening shall be 1 1/16 inch. No gasket for use on a manhole or handhole of any boiler shall have a thickness greater than ¼ inch, when compressed.

§ 52.24–10 *Detail requirements.* (a) All boilers or pressure parts thereof shall be provided with suitable manhole, handhole, or other inspection openings for examination and cleaning.

(b) Manhole openings shall be of elliptical form, the dimensions of which shall be not less than 10 by 16 inches or 11 by 15 inches. The size 12 by 16 inches should be used wherever practicable. Circular manholes having diameters of not less than 15 inches may be permitted.

(c) A handhole opening in a boiler shell or header shall be not less than 4 inches in any direction. This requirement does not apply to small access openings such as used in superheater headers.

(d) Inspection openings smaller than specified for handholes are permissible where a handhole is impracticable.

(e) Where elliptical openings are made in the shell of a boiler or other pressure vessel, the minor axis shall, as far as practicable, be placed longitudinally.

(f) All manholes, handholes, and inspection openings shall be closed by readily removable internal cover plates which shall be held by one or more girders or dogs and bolts. The cover plates shall be formed with a projection to fit within the opening with a radial clearance not exceeding 1/16 inch at any point. This projection may be in form of a raised face which shall protrude straight out from the joint face within the opening not less than ½ inch on manholes or ⅜ inch on smaller cover plates.

(g) When a threaded opening is to be used for inspection or washout purposes, it shall be not less than 1 inch pipe size. The closing plug or cap shall be of nonferrous material, except for pressures over 250 p. s. i. or temperatures over 406° F.

(h) A manhole shall be located in the front head below the tubes of a horizontal-return tubular boiler 48 inches or over in diameter. Smaller boilers shall have either a manhole or a handhole below the tubes. There shall be a manhole in the upper part of the shell or head of a fire-tube boiler over 40 inches in diameter, except on a vertical fire-tube boiler, or except on internally fired boilers not over 48 inches in diameter. Smaller boilers shall have either a manhole or a handhole above the tubes.

(i) Externally fired boilers shall be fitted with a manhole opening in the lower front head beneath the flues. The minimum dimensions of such opening shall be 10 inches on the minor axis and 16 inches on the major axis. When shells are less than 46 inches in diameter, handholes 4 by 5 inches in size may be used in place of manholes.

(j) A vertical fire-tube boiler shall have not less than four handhole openings in the shell located as follows:

(1) One at or about the water line or opposite the fusible plug.

(2) Three at or about the line of the crown sheet or lower tube sheet, and if internally fired, not less than three additional handholes at the lower part of the waterleg.

(k) If a vertical fire-tube boiler is equipped with manholes or other access openings through which adequate inspection may be made, the required handholes and/or inspection openings at the water line and for the tube sheets may be omitted.

SUBPART 52.25—NOZZLE OPENINGS AND REINFORCEMENTS

Sec.
52.25–1 Definitions.
52.25–5 Materials and workmanship.
52.25–10 Unreinforced openings.
52.25–15 Computations.
52.25–20 Reinforced openings.

§ 52.25–1 *Definitions*—(a) *Openings.* Openings, as defined in this subpart, are holes cut in shells or heads of boilers or other pressure vessels, including domes and steam chimneys, for the purpose of connecting nozzles or mountings to the shell or head of such boilers or pressure vessels.

§ 52.25–5 *Materials and workmanship.* (a) The material for reinforcing plates around openings shall conform to the requirements of the plate to be reinforced. When they are locally heated for flanging or forming, they shall be properly annealed.

(b) A forged nozzle or forged flange, riveted or welded to the plate, may be considered as reinforcement, provided such fittings are properly designed to compensate for the material removed.

(c) Rivets used in securing reinforcing plates to the shell or other structural part shall conform to the requirements of Subpart 51.07 or 51.13 of this subchapter.

(d) The inner radius of the bend of any flanged opening in heads, except manholes or other access openings as specified in § 52.20–20, shall be: for furnace attachments, not less than twice the thickness of the plate flanged; for flue attachments in externally fired boilers, not less than one and one-half times the thickness of the plate flanged.

(e) The riveted joint of a reinforcing plate fitted to an opening in the shell or other part of a boiler or other pressure vessel, shall be properly calked along the edge of the opening and the outer edge of the reinforcing plate as specified in Subpart 52.10 for riveted joints.

§ 52.25–10 *Unreinforced openings.* (a) The regulations in this subpart governing the maximum size of an unreinforced opening apply only to shells in which there are tube holes or other plain unreinforced openings, and are limited to shells 8 inches or more in outside diameter in which the shell thickness does not exceed one-fifth of this diameter and in which the largest opening does not exceed six-tenths of the shell diameter.

(b) Plain unreinforced openings shall not exceed the diameter determined by § 52.25–15, nor shall they exceed a diameter of 8 inches in any case.

§ 52.25–15 *Computations.* (a) (1) The maximum diameter of an unreinforced opening in a shell or drum shall be determined by the following formulas:

$$d=2.75\sqrt[3]{DT^2(1-K)} \quad (1)$$

$$K=\frac{1.1PD}{2ST} \quad (2)$$

$$K=\frac{PD}{2ST} \quad (3)$$

Where:
d=maximum allowable diameter of unreinforced openings, in inches.
T=actual full thickness of shell plate, in inches (including the 0.10 inch additional thickness).
D=outside diameter of the drum or shell, in inches.
S=maximum allowable stress as given in table 52.05–10 (a), in pounds per square inch.
K=ratio of the computed stress in the solid plate to the maximum allowable stress.

(2) In determining the maximum size of an unreinforced opening in a shell, head, or header designed under the provisions of § 52.05–10 (a), the value of K shall be computed by formula (2). Where the value of K equals or exceeds unity, the maximum size of an unreinforced opening shall be 2 inches.

(3) In determining the maximum size of an unreinforced opening in a shell, head, or header in which the value of S is taken as not more than 80 percent of that given in tables 52.05–10 (a) and 54.03–10 (c) in Part 54 of this subchapter, the value of K shall be computed by formula (3). When computing K by this formula, the pressure P shall be that for which the part is designed, S shall be 80 percent of the value from tables 52.05–10 (a) and 54.03–10 (c), and T shall be the actual thickness of the shell. Where K so computed equals or exceeds unity, a value of 0.99 shall be used.

(b) (1) The maximum diameter of unreinforced openings may be determined

by use of diagrams, figures 52.25–15 (b1) and 52.25–15 (b2).

(2) To use the diagrams compute the value of (*DT*) and also the value of *K* as shown in the preceding formula (2). Next find on a diagram the vertical line corresponding to the (*DT*) value and follow this line vertically to the point where the line representing the *K* value intersects. By projecting this point horizontally to the left-hand edge of the diagram, the maximum diameter of an unreinforced opening may be read from the scale.

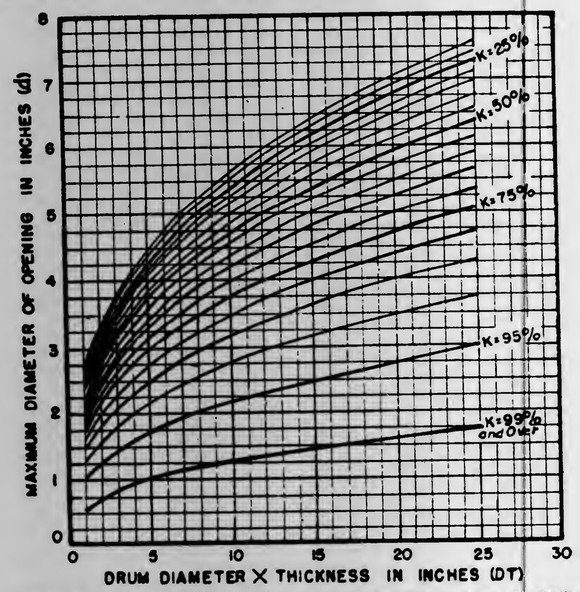

FIGURE 52.25–15 (b1)—Maximum diameter of unreinforced openings in shells.

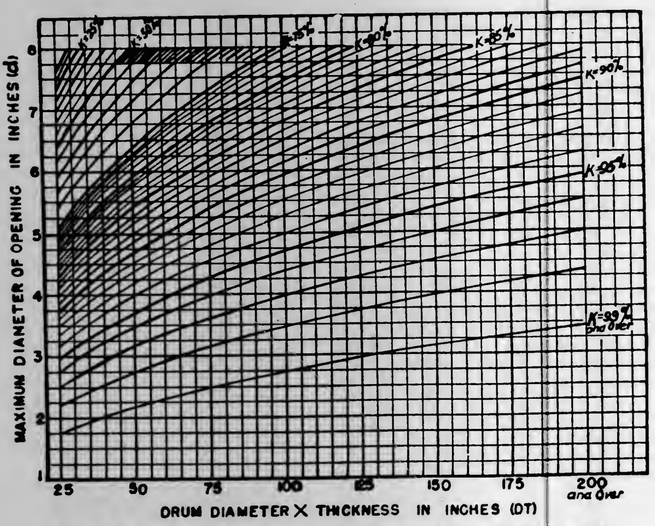

FIGURE 52.25–15 (b2)—Maximum diameter of unreinforced openings in shells.

§ 52.25–20 *Reinforced openings.* (a) An opening in a shell or drum with a diameter greater than the maximum unreinforced opening permitted by § 52.25–15 shall be provided with reinforcement. Openings of the reinforced type shall consist of one or more reinforcing rings or flanges riveted or welded to the shell and a nozzle or fitting welded to the shell and/or welded to or integral with the reinforcing flange. Openings requiring reinforcement shall have the reinforcement applied equally on the outside and inside of the shell. If placed in shells constructed under the requirements of § 52.05–12 (g) the reinforcement need not be so applied, provided however, the amount of reinforcement required shall be calculated for a required shell thickness using 80 percent of the allowable stress values given in table 52.05–10 (a). Openings in heads may have reinforcement on the outside only.

(b) (1) The thickness of a nozzle or fitting welded to the shell, reinforcing ring or flange shall be of a thickness not less than schedule 80 pipe for boilers and in no instance shall the nozzle wall thickness be less than that determined by § 55.07–5 of this subchapter.

(2) For nozzle fittings having a bolting flange and an integral flange for riveting, the thickness of the flange attached to the boiler shall also be not less than the thickness of the neck of the fitting.

(c) All circular or elliptical openings of the reinforced type shall comply with the following requirements:

(1) On a line parallel to the longitudinal axis of the shell and passing through the center of the opening, the total cross-sectional area in the complete reinforced opening including the shell and cross-sectional area of the welds and reinforcing rings, if any, within the limits defined by rectangle *ABCD* in figure 52.25–20 (c), shall be at least equal to the area of the cross section *EFGH* plus *JKLM*, obtained by multiplying the shell thickness *T* required by § 52.05–10, using *E*=0.90, by twice the diameter (*d*) of the opening less 2 inches. The limits of rectangle *ABCD* are:

(i) A distance on each side of the center line of the opening equal to the actual inside diameter *d* of the opening in the shell, defined by lines *AD* and *BC*.

(ii) A distance on each side of the middle line of the actual thickness *m* of the shell equal to three times such actual thickness, defined by lines *AB* and *DC*, except that in no case shall the limits extend along the tubular portion of the nozzle connection beyond the surface *NP* of the reinforcement more than two and one-half times the thickness *n* of the nozzle.

(2) On either side of the line parallel to the longitudinal axis of the shell, as determined in subparagraph (1) of this paragraph, the strength of the attachment to the vessel of each separate part entering into the construction of the reinforced opening shall be at least equal to the tensile strength of the cross section of the reinforcing part within rectangle *ABCD*, or to the tensile strength of a cross-sectional area equal to the sum of rectangles *QFGR* plus *JSTM*, determined by multiplying the shell thickness *T* required by § 52.05–10, using *E*=0.90, by diameter *d* of the shell opening less 2 inches, whichever tensile strength is smaller. For riveted construction, the strength of the attachment is the shearing strength of the rivets, and for welded construction, it is the strength of the weld in shear or in tension, whichever is smaller.

(3) When there are two or more adjacent openings, the limits for the openings, defined by *AD* and *BC*, shall not be considered to overlap, and in no case shall any portion of a cross section be considered to apply to more than one opening.

(d) Figure 52.25–20 (d) illustrates some types of arc or gas welded connections which are acceptable.

(e) The unit shear stress of a weld shall not exceed 0.8 times the allowable stress in tension.

(f) For arc or gas welded connections, in addition to complying with the regulations given in paragraph (c) of this section, the following additional requirements shall be met:

(1) Where the thickness *t* of the thinner of the two parts being joined is ¾ inch or less, the dimensions of the welds shall not be less than the requirements given in figure 52.25–20 (d).

(2) Where the thickness *t* is greater that ¾ inch, the dimensions of the welds shall not be less than the requirements given in figure 52.25–20 (d), using a value of ¾ inch for *t* in the formulas.

(3) When nozzles or couplings are attached to boilers and unfired pressure vessels as shown in figures 52.25–20 (d), (B) and (D), and are welded from one side only, backing strips shall be used unless the inside of the joint can be visually inspected in order that the inspector may satisfy himself that complete penetration is obtained. When attachments as shown in figures 52.25–20 (d), (K) and (L), are employed they shall be limited to 2-inch pipe size for pressures exceeding 150 p. s. i.

(g) When the end faces of nozzles or manhole necks are to remain unwelded in the completed vessel, these end faces shall not be cut by shearing unless at least ⅛ inch of the additional metal is removed by any method that will produce a smooth finish.

(h) The thickness of each independent riveted reinforcing flange or ring shall not be less than given in table 52.25–20 (h).

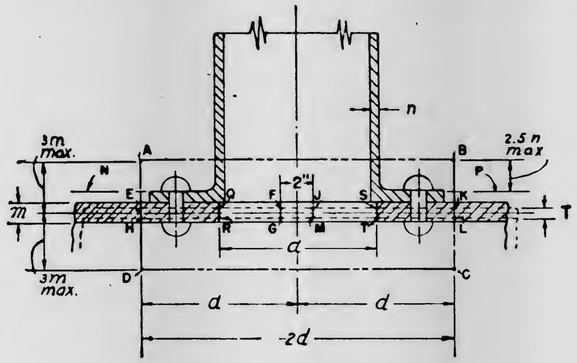
TABLE 52.25–20 (h)—MINIMUM THICKNESS OF INDEPENDENT RIVETED REINFORCING RINGS OR FLANGES

Thickness of shell plate	Thickness of reinforcing ring or flange	Thickness of shell plate	Thickness of reinforcing ring or flange
Inch	*Inch*	*Inches*	*Inch*
¼	¼	⅞–¾	½
5/16	5/16	⅞	9/16
11/32–13/32	⅜	1	11/16
7/16–15/32	7/16	1¼–2	¾
17/32–9/16	½	Over 2	1
19/32–11/16	9/16		

(i) The outside diameter of a riveted reinforcing ring or flange shall not be less than one and one-half times the diameter of the opening in the shell.

(j) The rivets attaching the nozzle shall be so placed as to avoid the possibility of the shell plate failing by tearing around the rivet holes.

(k) Manhole or other openings in a flat, stayed surface shall be deemed to be sufficiently reinforced if the plate is flanged inwards to a depth not less than that determined by § 52.20–15 (b).



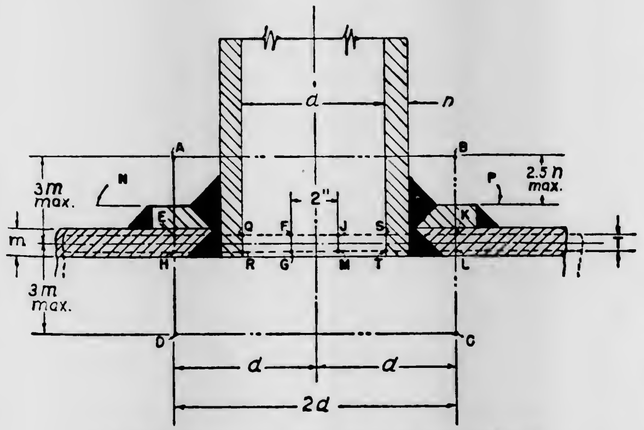


FIGURE 52.25–20 (c)—Computation of reinforced nozzle fittings.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

SUBPART 52.30—SURFACES REQUIRED TO BE STAYED OR REINFORCED

6. The cross references following § 52.30–1 are amended to read as follows:

§ 52.30–1 *Definitions.* • • •

CROSS REFERENCES: For unstayed flat heads, see Subpart 52.22. For flat tube sheets, see Subpart 52.45. For curved tube sheets, see Subpart 52.40.

SUBPART 52.35—STAYS AND REINFORCEMENTS

7. Section 52.35–1 is amended by changing paragraphs (b) and (c) to read as follows:

§ 52.35–1 *Definitions.* • • •

(b) *Solid screw staybolt.* Solid screw staybolt is a threaded bar screwed through the plates, the ends being riveted over or fitted with nuts or welded collars. (See figures 52.35–1 (b) and 52.35–1 (1).)

(c) *Hollow screw staybolt.* Hollow screw staybolt is a hollow threaded bar screwed through the plate, the ends being riveted over or fitted with nuts or

welded collars. (See figure 52.35–1 (c).)

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

8. Sections 52.35–5 and 52.35–10 (b) are amended to read as follows:

§ 52.35–5 *Materials.* (a) Round bar stays which require no welding or forging other than upsetting at the ends for threading or to form eyes for use in conjunction with crowfeet, or similar fastenings, shall conform to the requirements of Subpart 51.07, 51.10, or 51.13 of this subchapter.

(b) Crowfeet, lugs, and similar connections for stays shall be forgings without welds conforming to the requirements of Subpart 51.46 of this subchapter.

(c) Forged-welded stays or parts thereof shall conform to the requirements of Subpart 51.13 of this subchapter. All welds in the body of the stay shall be made by the hammer-weld process.

(d) Stiffeners made of structural shapes shall conform to the requirements specified in Subpart 51.10 of this subchapter.

(e) Gusset and diagonal stays made of steel plate, also doubling plates and girders shall conform to the requirements specified in Subpart 51.04 of this subchapter.

(f) Stay tubes shall conform to the requirements of Subpart 51.25 of this subchapter.

(g) Rivets shall conform to the following requirements:

Steel rivets	Subpart 51.07
Iron rivets	Subpart 51.13

(h) Nuts for screw stays shall be made of steel, conforming to the requirements of Subpart 51.46 or 51.49, or, refined wrought iron, conforming to the requirements of Subpart 51.13 of this subchapter.

§ 52.35–10 *Workmanship.* • • •

(b) Holes for screw staybolts shall be drilled and tapped fair and true and shall have a full thread.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

9. Section 52.35–20 is amended to read as follows:

§ 52.35–20 *Detail requirements.* (a) All screw staybolts, except flexible staybolts, shall have a telltale hole in the center of each end not less than $\frac{3}{16}$ inch diameter extending not less than $\frac{1}{2}$ inch beyond the inside of the plate.

(b) Joining of steel stays in the body by any process of welding is not permissible.

(c) The length of screw staybolts shall not exceed 20 diameters.

(d) Where the length of a boiler exceeds 18 feet, the through stays shall be supported in the middle.

(e) Where the heads of screw staybolts are riveted over, the end of the staybolt before riveting shall extend not less than $\frac{1}{4}$ inch from the surface of the plate to provide sufficient material for a substantial head.

(f) Where welded collars are used instead of nuts, the depth of the collar, measured on the staybolt, and the width, measured on the plate, shall not be less than one-half the diameter of the staybolt.

(g) The minimum thickness of nuts used in connection with screw stays shall be one-half of the diameter of the stay, but in no case less than $\frac{3}{4}$ inch. The stays shall be so placed in relation to the joints that the plates can be calked without removing the nuts.

(h) Nuts shall not be fitted to staytubes at the combustion chamber end.

(i) The ends of stays fitted with nuts shall not be exposed to the direct radiant heat of the fire.

(j) The minimum thickness of staytubes measured at the root of the threads shall be $\frac{1}{4}$ inch for marginal staytubes and $\frac{3}{8}$ inch for other staytubes.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

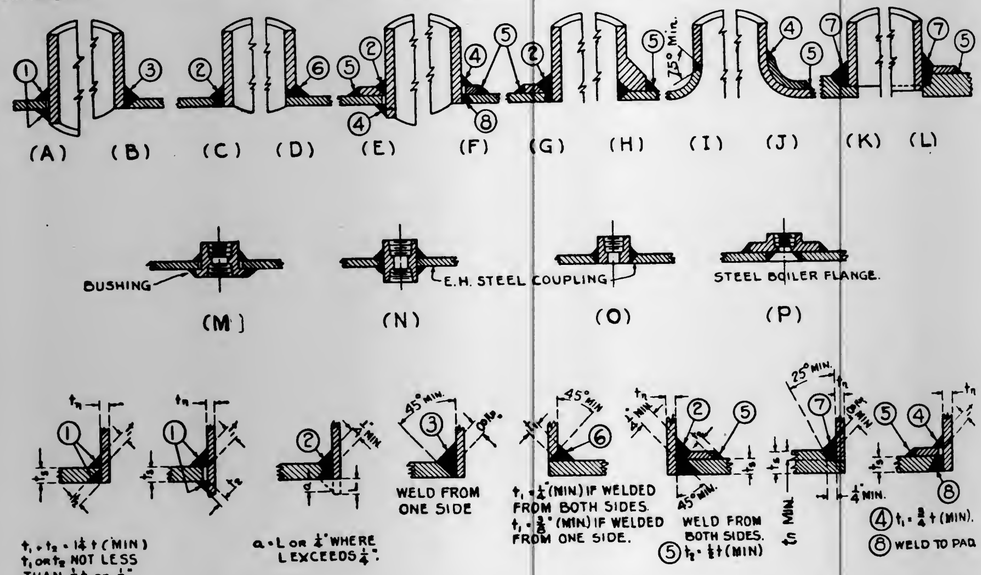

FIGURE 52.35–20 (d)—Acceptable types of welded nozzles and fittings.

SUBPART 52.40—TUBE SHEETS OF WATER-TUBE BOILERS

10. Sections 52.40–5, 52.40–10 and 52.40–15 are amended to read as follows:

§ 52.40–5 *Computations for curved tube sheet.* (a) The maximum allowable pressure and minimum thickness of a cylindrical shell pierced for tubes and of a curved tube sheet shall be calculated by formula (1), (2), or (3) of § 52.05–10, using the lowest value of E, determined in accordance with this section.

(b) (1) Where cylindrical shells are pierced by a single row of tubes or by two or more rows so placed in the cylindrical shell as not to be considered nests of tubes, as in a double-butt strap joint, or where reinforcing plates are fitted, the ligament efficiency between tube holes shall be computed by formula (1) of this section. For tube rows other than those placed on the longitudinal joint, the shell if necessary shall be either reinforced or increased in thickness.

(2) The relative strength of the ligaments between tube holes which come in a single line in a butt-strap joint or reinforced shell, shall be computed by the following formula:

$$E = \frac{(p-d)\,T_1}{pT} \qquad (1)$$

where:

E = relative strength of ligament.
p = pitch of tubes, in inches.
d = diameter[1] of tube holes, in inches.
T = thickness of shell, in inches.
T_1 = the aggregate thickness of the two butt straps, or the shell and reinforcing plate, in inches.

(c) When a shell is pierced for tubes in a series of rows parallel to its axis, the efficiency of the ligament between the tube holes in any row shall be determined as follows:

(1) When the pitch of the tube holes in any row is uniform. (See figure 52.40–5 (c1).)

$$E = \frac{p-d}{p} \qquad (2)$$

(2) When the pitch of the tube holes in any row is not uniform. (See figures 52.40–5 (c2) and 52.40–5 (c3).) The calculations shall be made for a section of the row not exceeding the diameter of the shell.

$$E = \frac{p_1 - nd}{p_1} \qquad (3)$$

(3) When the holes in one row are placed so as to form diagonal ligaments with the holes in an adjacent row. (See figure 52.40–5 (c4).) The efficiency of these ligaments shall be taken from the diagram figure 52.40–5(c5). To use this diagram compute the value of $\frac{pd}{p}$ and also the efficiency of the longitudinal ligament. Next find in the diagram, the vertical line corresponding to the longitudinal efficiency of the ligament and follow this line vertically to the point where the diagonal line representing the ratio of $\frac{pd}{p}$ intersects. By projecting

[1] Where the tube hole is not of the straight bore type, the equivalent diameter shall be calculated by dividing the cross-sectional area of the removed metal by the material thickness.

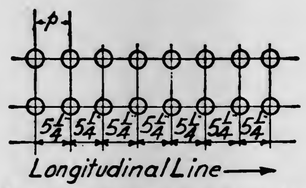

FIGURE 52.40–5 (c1)—Example of tube spacing with pitch of holes equal in every row.

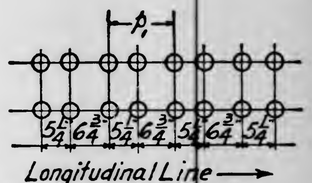

FIGURE 52.40–5 (c2)—Example of tube spacing with pitch of holes unequal in every second row.

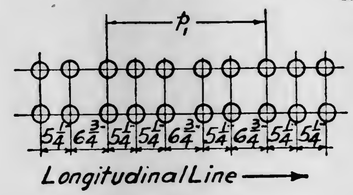

FIGURE 52.40–5 (c3)—Example of tube spacing with pitch of holes varying in every second and third row.

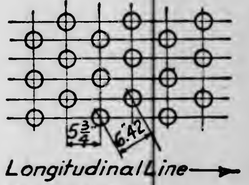

FIGURE 52.40–5 (c4)—Example of tube spacing with holes on diagonal lines.

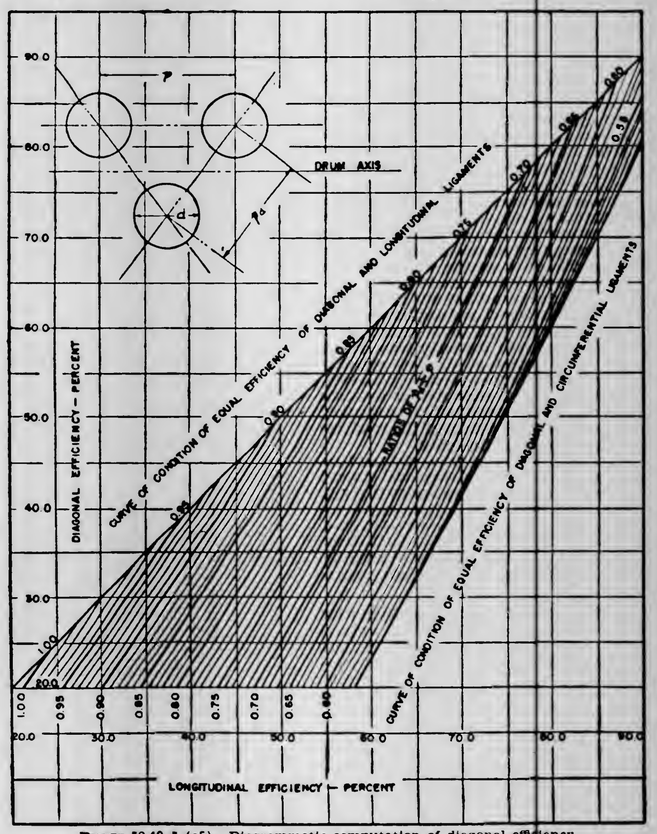

FIGURE 52.40–5 (c5)—Diagrammatic computation of diagonal efficiency.

this line horizontally to the left on the edge of the diagram, the diagonal efficiency of the ligament may be read from the scale. If this efficiency is less than that of the longitudinal ligament it shall be used in computing the allowable pressure.

(4) The symbols used in the formulas in this paragraph mean:

E = relative strength of the ligament.
p = longitudinal pitch of tube holes, in inches.
p_d = diagonal pitch of tube holes, in inches.
p_1 = unit length of section of the row considered, in inches.
d = diameter[3] of tube holes, in inches.
n = number of tube holes in section p_1.

(d) The pitch of the tube holes shall be measured either on the flat plate before rolling or on the middle line of the plate after rolling.

(e) The strength of the circumferential ligaments between tube holes shall be at least one-half the required strength of the longitudinal ligaments.

(f) When the tube holes are not normal to the plate, the plate thickness shall be sufficient to provide a parallel seating not less than ⅜ inch depth between planes at right angles with the axis of the tube for tubes 2½ inches in diameter and under; for tubes having diameters over 2½ inches, the depth of the parallel seating shall not be less than ½ inch.

§ 52.40–10 *Reinforcement of ligaments.* (a) Where reinforcing plates are applied to the drums of water-tube boilers to strengthen the shell at the point where the tubes enter, they shall be riveted to the shell, and where outside calking is used, the tubes shall be expanded into the inner and outer plates so that the rivets and tubes will hold the plates together in accordance with the regulations for stayed surfaces.

(b) The rivet spacing with respect to the tubes shall conform to the requirements of Subparts 52.30 and 52.35, using a value of 250 for C, and shall be based on a unit pressure equal to the pressure that can be carried by the inner plate with a factor of safety of 5. The shearing strength of the rivets securing the reinforcing plate on each side of the tube line shall be at least equal to the required strength of the ligament of the reinforcing plate between the tubes.

(c) The combined drum shell and reinforcing plate or plates, and riveted connections, shall have a factor of safety of not less than 5 in the ligaments when calculated in accordance with § 52.40–5. When reinforcing plates or butt-straps are exposed to the products of combustion, the joints shall be protected therefrom.

§ 52.40–15 *Unsymmetrical ligaments.* (a) When tubes or holes are unsymmetrically spaced, the average ligament efficiency shall be not less than that required by this section, which applies to ligaments between tube holes and not to single openings. When this procedure results in lower efficiencies than those for symmetrical groups which extend a distance greater than the inside diameter of the shell as covered by § 52.40–5, the efficiencies computed by § 52.40–5 may be used.

(b) For a length equal to the inside diameter of the shell for the position which gives the minimum efficiency, the efficiency shall be not less than that on which the maximum allowable pressure is based.

(c) For a length equal to the inside radius of the shell for the position which gives the minimum efficiency, the efficiency shall be not less than 80 percent of that on which the maximum allowable pressure is based.

(d) For holes placed longitudinally along a shell but which do not come in a straight line, the requirements of this section shall apply, except that the equivalent longitudinal width of a diagonal ligament shall be used. To obtain the equivalent width the longitudinal pitch of the two holes having a diagonal ligament shall be multiplied by the efficiency of the diagonal ligament. The efficiency to be used for the diagonal ligaments is given in figure 52.40–15 (d).

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

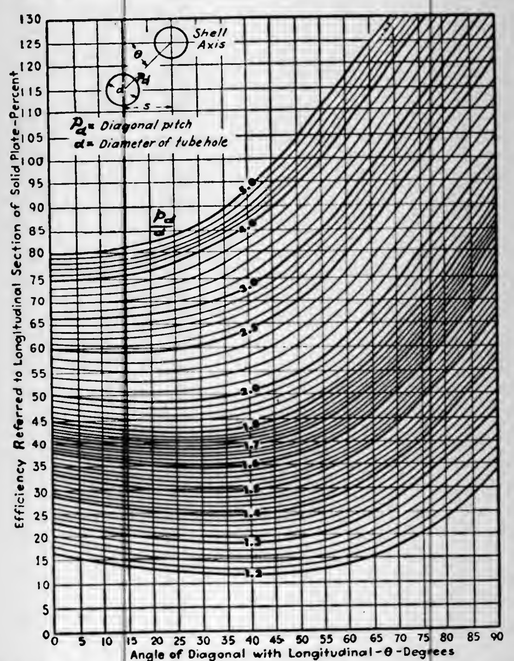

FIGURE 52.40–15 (d)—Diagram for determining efficiency of diagonal ligaments in order to obtain equivalent longitudinal efficiency.

[3] Where the tube hole is not of the straight bore type, the equivalent diameter shall be calculated by dividing the cross-sectional area of the removed metal by the material thickness.

SUBPART 52.45—COMBUSTION CHAMBERS AND TUBE SHEETS OF FIRE-TUBE BOILERS

11. Section 52.45–15 (c) is amended to read as follows:

§ 52.45–15 *Detail requirements.* • • •

(c) When plates are flanged to form the combustion chamber and back connections, the minimum inner radius shall be not less than one and one-half times the thickness of the plate flanged.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 389, 1333, 50 U. S. C. App. 1275)

SUBPART 52.50—FURNACES AND FLUES

12. Section 52.50–5 and 52.50–15 (g) are amended to read as follows:

§ 52.50–5 *Materials.* (a) Steel plate used in the fabrication of furnaces or flues shall be of firebox quality complying with Subpart 51.04 or 51.22 of this subchapter.

(b) Seamless, lap welded or electric resistance welded flues may be made of pipe complying with Subpart 51.34 of this subchapter.

§ 52.50–15 *Detailed requirements.* • • •

(g) Plain or corrugated furnaces may be constructed by arc welding. The longitudinal and circumferential joints shall be of the double-welded butt type, and the following modifications in the requirements for Class I welded pressure vessels will be acceptable:

(1) The customary test plates need not be furnished, provided each furnace has sufficient material left on one end to obtain two guided side bend specimens, which shall not be detached until all the work and heat treatment on the furnace has been completed. One retest will be permitted for each specimen failing to meet the specified requirements.

(2) Radiographic examination of the furnace seam is not required, but will be accepted in lieu of the guided side bend specimens. If radiographs are taken, they shall meet the requirements of § 56.05–5 of this subchapter except that the films will not be retained by the Coast Guard.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 389, 1333, 50 U. S. C. App. 1275)

SUBPART 52.55—BOILER AND SUPERHEATER TUBES

13. Sections 52.55–1, 52.55–5, and 52.55–10 (with tables) are amended to read as follows:

§ 52.55–1 *Definitions—(a) Tubes.* Tubes, within the meaning of this subpart, are cylindrical shells of comparatively small diameter constituting the main part of the heating surface of a boiler or superheater.

(b) *Safe end.* Safe end is a short piece of boiler tube which is usually thicker than the ordinary tube and is welded to a tube of lighter gauge for the purpose of lengthening it.

(c) *Seamless tube.* Seamless tube is a tube without any longitudinal joint.

(d) *Electric-resistance-welded tube.* Electric-resistance-welded tube is a tube the longitudinal joint of which is made by the electric-resistance butt welding process and the tube is required to be normalized after welding.

(e) *Stay tube.* Stay tube is a thick-walled tube, the end of which is usually thickened by upsetting to compensate for threading. Such tubes are used for staying tube sheets into which they are screwed and expanded.

(f) *Expanding.* Expanding is the process of enlarging the end of a tube to make it fit tightly in the tube sheet.

(g) *Beading.* Beading is the process of turning over the protruding end of a tube after expanding to form a supporting collar for the tube sheet.

(h) *Bell-mouthing.* Bell-mouthing is the process of flaring the end of a tube beyond where it is expanded in the tube sheet.

§ 52.55–5 *Materials and workmanship.* (a) Seamless steel boiler tubes shall comply with the requirements of Subpart 51.25 of this subchapter for such tubes.

(b) Electric-resistance-welded steel and iron boiler tubes shall comply with the requirements of this Subpart 51.25 of this subchapter for such tubes.

(c) The ends of tubes used in fire-tube boilers shall not extend more than ⅜ inch beyond the tube sheet. All such tubes shall be rolled tight in the sheet and the ends shall be beaded over, or the ends rolled, beaded, and welded around the edge of the bead. Where the tubes do not exceed 1½ inches in diameter, the tube sheet may be chamfered or recessed to a depth equal to the thickness of the tubes and the tubes rolled in place and welded.

(d) (1) The ends of all tubes and nipples shall be expanded and flared not less than ⅛ inch over the diameter of the tube hole on all water tube boilers and headers, or they may be flared not less than ⅛ inch, rolled and beaded, or flared, rolled and seal welded, or rolled and seal welded without flaring provided the throat of the weld is not less than 5/16 inch nor more than ⅜ inch.

(2) The ends of tubes or nipples of water tube boilers when not seal welded shall project through the tube plates or headers not less than ¼ inch nor more than ½ inch before flaring. When the tubes enter at an angle, the maximum limit of ½ inch shall apply only at the point of least projection.

(3) If tubes and nipples are seal welded, they shall be reexpanded. Stress relieving shall not be used after welding.

(4) Superheater, waterwall, or economizer tubes of a weldable quality may be arc or gas welded to tubular manifolds, headers, or drums, without being expanded, provided the welds are full-strength welds complying with figure 52.25–20 (d), (A) or (B), and are stress-relieved by means of controlled temperature. Radiographic examination is not required.

(e) Tube holes shall be drilled full size from the solid plate. Tube holes may be counterbored where the metal is thicker than that required to get a proper bearing by expanding, so as to form narrow seats into which the tube ends can be properly expanded, provided there is space available to permit a proper amount of flare of the tube end.

§ 52.55–10 *Computations.* (a) (1) The maximum allowable pressure and the minimum thickness of seamless and electric-resistance-welded carbon and seamless alloy steel tubes or nipples subject to internal pressure for water tube boilers, economizers and superheaters shall be computed by the following formulas:

$$P = S\left[\frac{2T - 0.027D - 2e}{D - 2T + 0.027D + 2e}\right] \quad (1)$$

$$T = \frac{D}{2}\left(\frac{P}{P+S}\right) + 0.0135D + e \quad (2)$$

where:

P = maximum allowable pressure, in pounds per square inch. Where the calculated maximum allowable pressure exceeds an even unit of 10 by more than 1, the next higher unit of 10 may be used.
S = maximum allowable stress, in pounds per square inch, as given in table 52.05–10 (a), at not less than the maximum expected mean wall temperature, which in no case shall be taken as less than 700° F., for tubes absorbing heat. The mean wall temperature is defined as the sum of the outside and inside surface temperatures divided by 2. For tubes which do not absorb heat, the wall temperature may be taken as the temperature of the fluid within the tube but not less than the saturation temperature.
T = thickness of the tube wall, in inches.
D = outside diameter of the tube, in inches.
e = 0.04 inch over a length at least equal to the width of the seat plus 1 inch, for tubes expanded into the tube seats.
e = 0, for tubes strength-welded to headers and drums.

(2) Where tubes are expanded into drums or headers, table 52.55–10(a2) may be used in lieu of formula (1) or (2) for determining the maximum allowable pressure and minimum thickness of seamless or electric-resistance-welded low carbon steel tubes, provided the maximum mean wall temperature does not exceed 700° F.

(3) The thickness of the ends of tubes strength-welded to drums or headers need not be greater than the run of the tube as determined by formula (2), but the thickness of no tube, where expanded into headers or drums, shall be less than that given in table 52.55–10(a3).

TABLE 52.55–10 (a2)—MAXIMUM ALLOWABLE PRESSURE FOR SEAMLESS AND ELECTRIC-RESISTANCE WELDED LOW CARBON STEEL TUBES SUBJECT TO INTERNAL PRESSURE, WHERE EXPANDED INTO DRUMS OR HEADERS [1]

(b) (1) The maximum allowable pressure and minimum thickness of seamless or welded boiler tubes less than 6 inches in diameter, and subject to external pressure, shall be computed by the following formulas:

$$P=\frac{14{,}000\,(T-0.065)}{D} \quad (4)$$

$$T=\frac{PD}{14{,}000}+0.065 \quad (5)$$

where:

P=maximum allowable pressure, in pounds per square inch.
T=thickness of tube, in inches.
D=external diameter of tube, in inches.

(2) As a matter of convenience, table 52.55–10 (b) has been computed from the preceding formulas.

TABLE 52.55–10 (b)—MAXIMUM ALLOWABLE PRESSURE AND MINIMUM THICKNESS FOR SEAMLESS OR WELDED BOILER TUBES LESS THAN 6" IN DIAMETER AND SUBJECT TO EXTERNAL PRESSURE

SUBPART 52.60—SUPERHEATERS, HEADERS, WATER WALLS, AND ECONOMIZERS

14. Subpart 52.60, consisting of §§ 52.60–1 to 52.60–20, inclusive, is amended to read as follows:

Sec.
52.60–1 Definitions.
52.60–10 Materials.
52.60–15 Computations.
52.60–20 Detail requirements.

§ 52.60–1 *Definitions*—(a) *Superheaters.* Superheaters, within the meaning of this subpart, are appliances for the purpose of increasing the temperature of steam.

(b) *Header.* Header is a hollow forging, pipe, or welded plate of cylindrical, square, or rectangular cross-section, serving as a manifold to which tubes are connected.

(c) *Water wall.* Water wall is a series of tubes or elements spaced along or integral with a wall of a furnace to protect the wall and provide additional heating surface.

(d) *Economizer.* Economizer is a feed-water heater usually located in the uptake or casing of a boiler to absorb heat from the waste gases.

§ 56.60–10 *Materials.* (a) Headers or fittings used in connection with these appurtenances, shall be constructed of steel plate conforming to the requirements of Subpart 51.04 of this subchapter; seamless steel pipe conforming to the requirements of Subpart 51.34 of this subchapter or of steel forgings conforming to the requirements of Subpart 51.46 of this subchapter.

(b) Ends of the headers may be closed by plug material conforming to the requirements of Subpart 51.04 or Subpart 51.22 of this subchapter.

(c) Alternate materials may be used in the construction of headers, provided such materials are approved by the Commandant for the particular application.

§ 52.60–15 *Computations.* (a) The maximum allowable pressure of cylindrical headers shall be determined by formula (1), (2), or (3) of § 52.05–10.

(b) The maximum allowable pressure and minimum thickness of tubes shall be in accordance with the tables and formulas provided in Subpart 52.55.

§ 52.60–20 *Detail requirements*—(a) *Superheater.* (1) The design pressure of a superheater integral with the boiler shall be not less than the highest setting of the drum safety valves, except that the superheater outlet connections may have a pressure rating conforming to § 52.70–10 (e).

(2) Superheaters fitted in conjunction with water-tube boilers may be considered as a part of the boiler, provided the pipe between the boiler and superheater and between superheaters is made of seamless steel material having a minimum thickness computed by the formula specified for piping in § 55.07–5 of this subchapter. Fittings used in making such connections shall be of forged or cast steel.

(3) Superheater headers in which it is possible for water to accumulate shall be fitted with adequate means for draining.

(4) Superheaters designed for normal operating temperatures in excess of 850° F., at the superheater outlet shall be fitted with controls to insure that the maximum temperature does not rise more than 15° above the design conditions. Visual or audible alarms shall be provided.

(b) *Economizer.* The design pressure of an economizer integral with the boiler and connected to the boiler drum without intervening stop valves shall be at least equal to 110 percent of the highest setting of the safety valves on the drum.

(c) *Headers.* Headers fabricated by means of arc or gas welding shall comply with the requirements of Part 56 of this subchapter for Class I welded pressure vessels.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

SUBPART 52.70—BOILER MOUNTINGS AND ATTACHMENTS

15. Subpart 52.70, consisting of §§ 52.70–1 to 52.70–55, inclusive, is amended to read as follows:

Sec.
52.70–1 Definitions.
52.70–5 Materials and workmanship.
52.70–10 Detail requirements.
52.70–25 Feed connections.
52.70–30 Blow-off connections.
52.70–35 Dry pipes.
52.70–40 Fusible plugs.
52.70–45 Pressure gauges.
52.70–50 Water indicators.
52.70–55 Salinometer cocks.

§ 52.70–1 *Definitions*—(a) *Mountings.* Mountings, within the meaning of the regulations in this subchapter, are nozzle connections, distance pieces, valves, or fittings attached directly to the boiler.

(b) *Main stop valve.* Main stop valve is a valve usually connected directly to the boiler for the purpose of shutting off the steam from the main steam line.

(c) *Auxiliary stop valve.* Auxiliary stop valve is a valve usually connected directly to the boiler for the purpose of shutting off the steam from the auxiliary lines (including the whistle lines).

(d) *Manifold.* Manifold is a fitting with two or more branches having valves either attached by bolting or integral with the fitting.

(e) *Feed valve.* Feed valve is a valve in the feed-water line which controls the boiler feed.

(f) *Blow-off valve.* Blow-off valve is a valve connected directly to the boiler for the purpose of blowing out water, scum, or sediment.

(g) *Dry pipe.* Dry pipe is a perforated or slotted pipe placed in the highest part of the steam space of a boiler to prevent priming.

(h) *Water column.* Water column is a fitting or tube equipped with a water glass attached to a boiler for the purpose of indicating the water level.

(i) *Test cocks.* Test cocks are small cocks on a boiler for indicating the water level.

(j) *Salinometer cocks.* Salinometer cocks are cocks attached to a boiler for the purpose of drawing off a sample of water for salinity tests.

(k) *Fusible plugs.* Fusible plugs are plugs made with a bronze casing and a tin filling which melts at a temperature of 450° to 500° F. They are intended to melt in the event of low water and thus warn the engineer on watch.

§ 52.70–5 *Materials and workmanship.* (a) Boiler mountings or attachments shall be made of steel forgings conforming to the requirements of Subpart 51.46 of this subchapter; steel castings conforming to the requirements of Subpart 51.58 of this subchapter; or, where the temperature does not exceed 450° F., they may be made of bronze castings conforming to the requirements of Subpart 51.76 of this subchapter.

(b) For temperatures exceeding 450° F., high strength or alloy steel bolting material complying with the requirements of Subpart 51.49 of this subchapter shall be employed. For temperatures not exceeding 450° F., commercial carbon-steel bolting conforming to the requirements of Subpart 51.49 of this subchapter may be used.

(c) The use of cast iron for mountings, fittings, valves, or cocks, attached directly to boilers operating at pressures exceeding 30 p. s. i. is prohibited.

§ 52.70–10 *Detail requirements.* (a) Boiler nozzles, mountings and attachments having diameters over 1¼ inches shall be fitted with flanged or welding ends. Slip-on flanges may be used for sizes not exceeding 2 inches in diameter and butt-welded flanges may be used without diameter limitations. Socket welded connections are prohibited for use in boiler mountings and attachments. Screwed ends shall be limited to ½-inch maximum pipe size for boilers of design pressures exceeding 600 p. s. i.

(b) Where bolt holes extend through the plating of a boiler or pressure vessel, the plate shall be threaded to receive the bolt. The bolt head, or, in the case of stud bolts, a nut with washer and grommet shall be fitted on the inside. Where stud bolts are used, with the holes not extending through the plate, the stud shall be screwed into the plate a distance at least equal to the diameter of the stud over the threads.

(c) Where pipes are screwed into the plating of the boiler, the minimum number of pipe threads permitted shall be in accordance with the following table:

TABLE 52.70–10 (c)—MINIMUM NUMBER OF PIPE THREADS FOR CONNECTIONS TO BOILER

Size of pipe connection, inches	1 and 1¼	1½
Number of threads per inch	11½	
Minimum number of threads required in opening	4	
Minimum thickness of material required to give above number of threads (inches)	0.348	

(d) The nearest steam stop valves and fittings attached to the boiler drum or superheater inlet shall have a pressure rating at least equal to the maximum set pressure of any safety valve on the boiler drum at the corresponding saturated steam temperature.

(e) The nearest steam stop valves and fittings attached to the superheater outlet shall have a pressure rating at least equal to the maximum set pressure of any safety valve on the superheater and at the normal operating superheated steam temperature. Where the superheater safety valve is of the drum pilot actuated type, the pressure rating shall be at least squal to 95 percent of the drum pilot safety valve setting at the normal operating steam temperature of the superheater outlet.

(f) All nozzles wherein steam or water enters or leaves a shell or head at a temperature differential of 100° F. or greater above or below the normal contents therein shall be fitted with a sleeve or other suitable means to reduce the effects of metal temperature differentials.

§ 52.70–25 *Feed connections.* (a) Feed water shall not be discharged into a boiler against surfaces exposed to hot gases, to the radiant heat of the fire or close to a riveted joint.

(b) Feed water nozzles shall be fitted with a sleeve or other suitable means to reduce the effects of metal temperature differentials in the shells or heads for design pressures of 400 pounds per square inch or over.

§ 52.70–30 *Blow-off connections.* (a) Boilers shall be fitted with a surface and a bottom blow-off valve or cock attached directly to the boiler or to a short distance piece. The surface blow-off valve shall be located within the permissible range of the water level, or fitted with a scum pan or pipe at this level. The bottom blow-off valve shall be attached to the lowest part of the boiler or fitted with an internal pipe leading to the lowest point inside the boiler. Water-tube boilers designed for pressures of 350 pounds per square inch or over are not required to be fitted with a surface blow-off valve. Boilers equipped with a continuous blow-down valve on the steam drum are not required to be fitted with an additional surface blow-off connection.

(b) Where blow-off pipes are exposed to radiant heat of the fire, they shall be protected by fire brick or other suitable heat-resisting material.

§ 52.70–35 *Dry pipes.* Internal dry pipes may be fitted to stop valves and safety valves, provided such dry pipes have a wall thickness at least equal to standard commercial pipe thickness for their diameter. The area of the opening in such dry pipes shall be at least twice the nominal area of the dry pipe. Openings in dry pipes shall be as near as practicable to the valve and shall be slotted or drilled, the width of the slots to be not less than ¼ inch, or the diameter of the holes to be not less than ⅜ inch. Where dry pipes are used, they shall be provided with drains at each end to prevent an accumulation of water.

§ 52.70–40 *Fusible plugs.* (a) All boilers, except water-tube boilers, and low-pressure heating boilers operating at pressures not in excess of 30 pounds per square inch, shall be fitted with fusible plugs manufactured from acceptable heats in accordance with Subpart 162.014 of Subchapter Q (Specifications) of this chapter.

(b) Vertical boilers shall be fitted with one fusible plug located in a tube not more than 2 inches below the lowest gauge cock.

(c) Externally fired, cylindrical boilers, with flues, shall have one plug fitted to the shell immediately below the fire line not less than 4 feet from the front end.

(d) Firebox, Scotch, and other types of shell boilers not specifically provided for, having a combustion chamber common to all furnaces, shall have one plug fitted at or near the center of the crown sheet of the combustion chamber.

(e) Double-ended boilers having individual combustion chambers for each end, which combustion chambers are common to all the furnaces in one end of the boiler, shall have one plug fitted at or near the center of the crown sheet of each combustion chamber.

(f) Boilers constructed with a separate combustion chamber for each individual furnace shall be fitted with a fusible plug in the center of the crown sheet of each combustion chamber.

(g) Boilers of types not herein provided for shall be fitted with at least one fusible plug of such dimensions and located in a part of the boiler as will, in the judgment of the inspector, best meet the purposes for which it is intended.

(h) Fusible plugs shall be so fitted that the smaller end of the filling is in direct contact with the radiant heat of the fire, and shall be at least 1 inch higher on the water side than the plate or flue in which they are fitted, and in no case more than 1 inch below the lowest permissible water level as defined in paragraph (i) of this section.

(i) The lowest permissible water level shall be determined as follows:

(1) Vertical fire-tube boilers, one-half of the length of the tubes above the lower tube sheets.

(2) Vertical submerged tube boiler, 1 inch above the upper tube sheet.

(3) Internally-fired fire-tube boilers with combustion chambers integral with the boiler, 2 inches above the highest part of the combustion chamber.

(4) Horizontal-return tubular and dry back Scotch boilers, 2 inches above the top row of tubes.

(5) The lowest permissible water level for all water-tube boilers shall be determined at the time drawings of the boilers are submitted for approval.

(j) Fusible plugs shall be cleaned and will be examined by the inspector at each annual inspection, and oftener if necessary, and if, in the inspector's opinion, the condition of the plugs is satisfactory, they may be continued in use.

(k) Fusible plugs shall not be permitted where the maximum steam temperature to which they are exposed exceeds 425° F.

§ 52.70–45 *Pressure gauges.* (a) Each boiler shall have a steam gauge connected to the steam space or to the water column or its steam connection. The steam gauge shall be connected to a syphon or equivalent device of sufficient capacity to keep the gauge tube filled with water. Stop valves shall be provided at the connections to the boiler and at the gauge. Gauges shall be located where they can be easily seen.

(b) The gauge connections to the boiler, except the syphon, shall be not less than ¼ inch pipe size, but where ferrous pipe or tubing is used, they shall be not less than ½ inch inside diameter.

(c) The dial of the steam gauge shall be graduated to approximately double the pressure at which the safety valve is set, but in no case less than 1½ times this pressure.

(d) Each double-ended boiler shall be fitted with two steam gauges, one on either end of the boiler.

(e) The error in reading at any point on the gauge shall not exceed 1½ percent of the maximum reading to which the scale is graduated; except that the error in reading at the graduation indicating the steam pressure shall not exceed one-

half of 1 percent of the maximum reading to which the scale is graduated.

§ 52.70–50 *Water indicators.* (a) Each boiler shall have two independent means of indicating the water level in the boiler, one of which shall be a gauge glass. The secondary indicator may consist of a gauge glass, or other device approved by the Commandant, or where the allowable steam pressure does not exceed 250 pounds per square inch, three test cocks attached directly to the head or shell of the boiler. Where the allowable pressure exceeds 250 pounds per square inch, the gauge glasses shall be of the flat type instead of the common tubular type.

(b) Glass water gauges shall be so located that the lowest visible part of the glass is not lower than the lowest permissible water level, as determined by § 52.70–40 (i). The lowest gauge cock shall be located 2 inches higher than the lowest visible part of the gauge glass, except that for horizontal boilers 48 inches or less in diameter they may be located at the lowest permissible water level.

(c) Double-ended fire-tube boilers shall be equipped as specified in paragraphs (a) and (b) of this section, except that a water-gauge glass, and three water-gauge cocks shall be installed on each end of the boiler.

(d) Externally fired flue boilers, such as are used on central western river vessels, shall be equipped as specified in paragraphs (a) and (b) of this section, except that float gauges may be substituted for gauge glasses.

(e) Gauge glass connections, and pipe connections shall be not less than ½ inch pipe size. Each water gauge glass shall be fitted with a globe or gate-valved drain piped to a safe discharge point. Water-gauge glasses shall be fitted with top and bottom shut-off valves of such through-flow construction as to prevent stoppage by deposits of sediments. Straight-run globe valves of the ordinary type so designed as to form pockets in which sediment may collect shall not be used on such connections.

(f) When water columns are provided they shall be fitted to the heads or shells of boilers or drums with shut-off valves attached directly to the boiler or drums, or if necessary, connected thereto by a distance piece both at the top and bottom of the water columns. Shut-off valves used in the pipe connections between the boiler and water column or between the boiler and the shut-off valves required by paragraph (e) of this section for gauge glasses, shall be locked or sealed open. Water column piping shall not be fitted inside the uptake, the smoke box, or the casing.

(g) No connections, except for regulators, drain, steam gauges, or appurtenances which do not permit the escape of an appreciable amount of steam or water therefrom, shall be placed on the pipes connecting a water column or gauge glass to a boiler.

§ 52.70–55 *Salinometer cocks.* In vessels operating in salt water, each boiler shall be equipped with a salinometer cock or valve which shall be fitted directly to the boiler in a convenient position. They shall not be attached to the water gauge or water column.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

PART 53—LOW PRESSURE HEATING BOILERS

SUBPART 53.03—STEEL PLATE HEATING BOILERS

1. Section 53.03–15 (b) is amended to read as follows:

§ 53.03–15 *Computations and design.* * * *

(b) The maximum allowable pressure and the minimum thickness of the cylindrical shell and dished heads of steel plate boilers shall be determined in accordance with the requirements of Subparts 52.05 and 52.20 of this subchapter except that the maximum allowable stress shall not exceed 80 percent of the values given in table 52.05–10 (a) in Part 52 of this subchapter.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

2. Section 53.03–25 (b) is amended to read as follows:

§ 53.03–25 *Areas to be stayed.* * * *

(b) The staying of unflanged heads of welded boilers is not required if the greatest distance measured along a radial line from the inner surface of the shell to a fully supported line or point does not exceed 1¼ times the maximum allowable pitch of the stays as determined by Subpart 52.30 of this subchapter. For boilers fabricated with the heads set inside of the shell plates so that the distance from the end of the shell to the outside face of the head is at least 3 times the shell thickness, staying is not required if the greatest distance measured as above does not exceed 1½ times the maximum allowable pitch of the stays. For the purposes of applying this paragraph, a fully supported point is a stay rod or tube extending through the head and welded, having sufficient area to meet the requirements of table 53.03–30, and having area of weld in shear at least 1¼ times the required area of the stay member. A fully supported line is the tangent to a row of rolled or welded tubes or welded stays complying with the requirements of Subpart 52.30 of this subchapter or a bent or welded corner joint.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 stat. 690, 41 stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

3. Section 53.03–45 is amended to read as follows:

§ 53.03–45 *Welded boilers.* (a) The design and construction of welded heating boilers shall conform to the applicable requirements prescribed in Part 56 of this subchapter for power boilers, except as specified in this subpart.

(b) Radiographic examination and stress relieving of welded joints are not required.

(c) Welded longitudinal shell joints shall be of the double welded butt type or of the single welded butt type fitted with a backing strip.

(d) The circumferential welded shell joints may be of the single or double welded butt type.

(e) Unstayed dished heads, either concave or convex to the pressure, with or without flanges, may be used, provided the diameter of the heads does not exceed 42 inches and the radius of the dish does not exceed 75 inches. For diameters exceeding 42 inches, dished heads shall have flanges not less than 1 inch in length, and shall meet the requirements for power boilers.

(f) Where stays or tubes are welded to plates which require staying, the attachment shall meet the following requirements:

(1) The stays shall be inserted into holes through the tube sheets and attached thereto by strength fillet welds. The size of the fillet weld attaching the stay to the plate shall be not less than the thickness of the plate being stayed, except for plates thicker than ⅜ inch, in which case the size of the fillet weld shall be ⅜ inch. The holes in the plate shall be countersunk or beveled by machining or pressing, or the stays may protrude through the plates or a combination of these methods may be used. The area of the weld, in shear, measured parallel to that portion of the stay in or extending through the plate shall be not less than 1¼ times the required cross-sectional area of the stay.

(2) The ends of stays inserted through plates shall not project more than ⅜ inch beyond surfaces exposed to the products of combustion.

(3) The welding shall be done in such manner that excessive weld deposits do not project beyond the surface of the plate at the root of the weld.

(g) Welded joints attaching unflanged heads, tube sheets, sides, or combustion chamber plates shall be of the single or double welded butt type where possible. Other acceptable types of attachments are the square tee double fillet welded joint and single or double bevel grooved joints.

(h) Unflanged plates of welded joints shall be beveled not less than 45° to permit complete penetration of the weld metal and shall have a fillet reinforcement whose throat dimension shall not be less than one and one-fourth times the thickness of the shell or head, whichever is the least.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

4. Part 53 is amended by adding a new § 53.03–63 reading as follows:

§ 53.03–63 *Installation of safety and relief valves.* (a) Safety and relief valves shall be installed with the spindle vertical, if possible, and may be connected directly to the boiler, or to a fitting connected to the boiler by a close nipple, or to a Y base or valveless steam or water pipe between adjacent boilers, or to a valveless header connecting steam or water outlets in the same boiler. Safety and relief valves shall not be connected to an internal pipe in the boiler.

(b) When a Y base is used the inlet area shall be not less than the combined outlet areas.

(c) When the size of the boiler requires a safety or relief valve larger than 4 inches in diameter, two or more valves having the required combined capacity shall be used. When two or more valves are used on a boiler, they may be single, directly attached, or mounted on a Y base.

(d) No shut-off of any description shall be placed between the safety or relief valve and the boiler, nor on discharge pipes between such valves and the atmosphere.

(e) The escape from safety or relief valves shall be fitted with discharge piping so arranged that there is no danger of scalding operating personnel.

(f) The area of the discharge pipe shall be not less than the area of the valve or aggregate area based on the nominal diameters of the valves with which it connects. The discharge pipe shall be fitted with an open drain to prevent water from lodging in the upper part of the valve or in the pipe. When an elbow is placed on a safety- or relief-valve discharge pipe, it shall be located close to the valve outlet.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

5. Sections 53.03–70 and 53.03–75 are amended to read as follows:

§ 53.03–70 *Fittings and appliances—*(a) *Steam gauges.* (1) Each steam boiler shall have a steam gauge connected to its steam space, or to its water column, or to its steam connection by means of a siphon or equivalent device exterior to the boiler and of sufficient capacity to keep the gauge tube filled with water and so arranged that the gauge cannot be shut off from the boiler except by a cock, with T or lever handle, placed in the pipe near the gauge. The handle of the cock shall be parallel to the pipe on which it is located when the cock is open.

(2) Connections to steam gauge siphon shall be of nonferrous metal when smaller than 1 inch pipe and longer than 5 feet between the siphon and point of connection of pipe to boiler, and also when smaller than ½ inch pipe size and shorter than 5 feet between the siphon and point of connection of pipe to boiler.

(3) The scale on the dial of the gauge shall be graduated to not less than 30 p. s. i. The gauge shall be provided with effective stops for indicating pointer at the zero point. The travel of the pointer from zero to 30 p. s. i. shall be at least 3 inches.

(b) *Water pressure gauges.* (1) Each hot water boiler shall have a pressure gauge connected to it or to its flow connection in such a manner, that it cannot be shut off from the boiler except by a cock, with T or lever handle, placed on the pipe near the gauge. The handle of the cock shall be parallel to the pipe on which it is located when the cock is open.

(2) Pressure gauge connections shall be of nonferrous material when smaller than 1 inch pipe size and longer than 5 feet between gauge and point of connection of pipe to boiler, and also when smaller than ½ inch pipe size and shorter than 5 feet between gauge and point of connection of pipe to boiler.

(c) *Thermometers.* (1) Each hot-water boiler shall have a thermometer so located and connected that the temperature may be read at the same time as the water pressure is being observed.

(2) The thermometer shall be so located that it shall at all times indicate the temperature in degrees Fahrenheit of the water in the boiler or near the outlet.

(d) *Temperature combustion regulator.* A temperature combustion regulator, which will control the rate of combustion to prevent the temperature of the water from rising above 250° F. at or near the outlet, or a thermostatic device which will relieve the pressure on the boiler when the temperature exceeds 250° F. shall be installed on each hot water heating boiler.

(e) *Pressure control regulator.* When a pressure control regulator is used, it shall operate and prevent the steam pressure from rising above 30 p. s. i.

(f) *Bottom blowoff.* Each boiler shall have a blowoff pipe connection fitted with a valve or cock of not less than ¾ inch pipe size connected to the lowest water space available.

(g) *Water gauge glasses.* Each steam boiler shall have one or more water gauge glasses attached to the water column or boiler by means of valved fittings with the lower fitting provided with a valve or pet cock.

(h) *Gauge cocks.* Each steam boiler shall have two or more gauge cocks located within the visible range of the water glass.

(i) *Water column pipes.* The minimum size of pipes connecting a water column to a steam boiler shall be 1 inch. No connections, except for regulator, drain or steam gauge, shall be attached to a water column or the piping connecting a water column to a boiler. If the water column or gauge glass is connected to the boiler by pipe and fittings, a T, or equivalent fitting, in which a drain valve and piping may be attached, shall be installed in the water piping connection at every right angle turn to facilitate cleaning.

(j) *Automatic low-water fuel cut-off.* (1) Each automatically-fired steam boiler shall be equipped with an automatic low-water fuel cut-off, so located as to automatically cut off the fuel supply when the surface of the water falls below the lowest safe water level. If a water-feeding device is installed in conjunction with the required low-water fuel cut off, it shall be so constructed that the water inlet valve cannot feed water into the boiler through the float chamber and so located as to supply the required amount of feed-water when the surface of the water falls to the lowest safe water level. This point shall be not lower than the lowest visible part of the water glass.

(2) The fuel or feed-water control device may be attached direct to the boiler or to the tapped openings provided for attaching a water glass direct to a boiler, provided that such connections from the boiler are non-ferrous T's or Y's not less than ½-inch pipe size between the boiler and the water glass, so that the water glass is attached direct and as close as possible to the boiler. The straightway tapping of the Y or T shall take the water glass fitting, and the side outlet of the Y or T shall take the fuel cut-off of water-feeding device.

(3) Low water cut-off devices employing a float and float bowl shall have a vertical straight-a-way valved drain pipe at the lowest point in the water equalizing pipe connection by which the bowl and equalizing pipe can be flushed and the device tested.

§ 53.03–75 *Hydrostatic tests, inspection, and stamping.* (a) Each boiler shall be subject to a hydrostatic test pressure of not less than 60 pounds per square inch by the manufacturer.

(b) In the event of any defects developing, the defective material may be replaced and the boiler retested.

(c) Individual shop inspection of heating boilers by an inspector is not required. Such inspection shall be made by the manufacturer while the boiler is subjected to the required hydrostatic test pressure to insure that there are no defects in workmanship and materials.

(d) Steel plate heating boilers of the automatically controlled packaged type shall be subjected to such operating tests as may be prescribed by the Commandant.

(e) Upon completion of the hydrostatic test and inspection and after the boiler is found acceptable it shall be stamped in a suitable location so as to be readily visible, with the following data:

(Name of fabricator and serial number)

(Month and year fabricated)
---p. s. i.
(Maximum w. p.) (Steam or water)
------ B. t. u. per hour, or pounds per hour.
(Safety or relief valve capacity, minimum)

(Coast Guard Approval No.)

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

SUBPART 53.05—CAST-IRON HEATING BOILERS

6. Section 53.05–30 (c) is amended to read as follows:

§ 53.05–30 *Hydrostatic tests, inspection and stamping.* • • •

(c) The requirements of § 53.03–75 (c) and (d) apply to cast-iron heating boilers.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

7. Section 53.05–50 is amended to read as follows:

§ 53.05–50 *Fittings and appliances.* The provisions of § 53.03–70 shall apply to fittings and appliances for cast-iron boilers, except that the pressure control regulator shall operate to prevent the pressure from rising above 15 p. s. i.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

PART 54—UNFIRED PRESSURE VESSELS

Part 54 is amended to read as follows:

SUBPART 54.01—GENERAL REQUIREMENTS

Sec.

54.01–1 Scope.
54.01–5 Definitions.
54.01–10 Plan approval.

SUBPART 54.03—DESIGN AND CONSTRUCTION

54.03–1 Materials.
54.03–5 Workmanship and design.
54.03–10 Cylindrical shells and heads.
54.03–12 Cast iron heads.
54.03–15 Tube sheets.
54.03–20 Heat exchanger tubes.
54.03–25 Bolted flanged connections.
54.03–30 Evaporators.
54.03–35 Access and inspection openings.
54.03–40 Nozzle openings and reinforcements.

SUBPART 54.07—PRESSURE-RELIEF DEVICES

54.07–1 General requirements.
54.07–5 Relief valves.
54.07–10 Evaporator safety valves.
54.07–15 Heat exchanger relief valves.
54.07–20 Rupture disks.

AUTHORITY: §§ 54.01–1 to 54.07–20 issued under R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275.

§ 54.01–1 *Scope.* (a) The regulations in this part contain detail requirements for the design and construction of unfired pressure vessels subject to inspection by the Coast Guard.

(b) An unfired pressure vessel is subject to shop inspection when such a vessel may contain any of the following:

(1) Steam, gas, or vapors at pressures exceeding 15 pounds per square inch or temperatures exceeding 300° F. The shell, tubes, or coils of a heat exchanger shall be considered a pressure vessel if such parts may be subjected to steam, gas, or vapor pressures exceeding 15 pounds per square inch or temperatures exceeding 300° F.

(2) Fuel oil at pressures exceeding 100 pounds per square inch or temperatures exceeding 150° F.

(3) Lubricating oil at pressures exceeding 100 pounds per square inch or temperatures exceeding 200° F.

(4) Liquids, except fuel oil and lubricating oil, at pressures exceeding 100 pounds per square inch or temperatures exceeding 200° F.

(5) Liquids in compression tanks with air cushions of pressures exceeding 100 pounds per square inch.

(6) Stored or stowed dangerous articles, substances, or combustible liquids which are required by law or regulation to be carried in containers fabricated as a pressure vessel, irrespective of pressures, temperatures, or capacities, except such stored or stowed dangerous articles, substances, or combustible liquids which are permitted by Subchapter N (Explosives or Other Dangerous Articles or Substances and Combustible Liquids on Board Vessels) of this chapter to be carried in containers constructed in accordance with the requirements of the Interstate Commerce Commission.

(c) Unfired pressure vessels may be exempted from shop inspection when the internal volume does not exceed 5 cubic feet capacity and the design pressure does not exceed 100 pounds per square inch; however, such vessels shall otherwise comply with the requirements for materials, construction, welding and marking as specified in this subchapter.

§ 54.01–5 *Definitions*—(a) *Unfired pressure vessel.* An unfired pressure vessel is a tank containing gas, vapor, or liquid, or a combination thereof, under pressure, and not exposed to the products of combustion.

(b) *Heat exchanger.* A heat exchanger is a device usually consisting of a shell and tubes or coils by which heat is transferred from one substance to another.

§ 54.01–10 *Plan approval.* Manufacturers intending to fabricate unfired pressure vessels, heat exchangers, evaporators and similar appurtenances covered by the regulations in this part, to be installed on vessels subject to inspection by the Coast Guard, shall submit to the Officer in Charge, Marine Inspection, having jurisdiction over the vessel, detail plans in triplicate, which shall be fully descriptive of the pressure parts of such unfired pressure vessels. When due to location of the fabrication shop, such procedure would result in unnecessary delay in transmission, the plans may be forwarded directly to the Commandant (MMT), U. S. Coast Guard, Washington 25, D. C.

SUBPART 54.03—DESIGN AND CONSTRUCTION

§ 54.03–1 *Materials.* (a) Unfired pressure vessels and appurtenances covered by this part may be fabricated of material conforming to the specifications given in Part 51 of this subchapter and limited to the grades of material listed in table 52.05–10 (a) in Part 52 of this subchapter and table 54.03–10 (c) except as otherwise provided for in this part.

(b) Steel plate used for pressure parts of unfired pressure vessels may be of Class B material complying with the requirements of Subpart 51.04 or 51.22, except that unfired pressure vessels designed for pressures exceeding 700 pounds per square inch or temperatures exceeding 650° F. shall be constructed of Class A steel plate meeting the requirements of Subpart 51.04.

(c) (1) Arc- or gas-welded pressure vessels over 1 inch in thickness constructed of steel plate complying with Subpart 51.04 of this subchapter for grades C, D, E, F and G shall conform to the requirements for Class I welded pressure vessels.

(2) Where vessels constructed of these grades of steel plate do not exceed 1 inch in thickness, the requirements for Class II welded pressure vessels shall apply and the vessels shall be stress-relieved as required by § 56.01–70 (h) of this subchapter.

(d) Carbon- and alloy-steel castings shall comply with the grades of material listed in table 52.05–10 (a) in Part 52 of this subchapter. The casting quality factor specified in § 52.05–13 of this subchapter shall be applied to the stresses given in table 52.05–10 (a).

(e) For electric resistance-welded pipe or tubing the stress values in table 52.05–10 (a) in Part 52 of this subchapter shall be substituted in the applicable design formulas for the factor SE.

(f) Unfired pressure vessels may be constructed of cast iron conforming to the applicable specifications of Part 51 of this subchapter under the following conditions:

(1) Cast iron shall not be used in the construction of shells and heads of pressure vessels where subject to steam pressures exceeding 30 pounds per square inch or where subject to gas or liquid pressures exceeding 125 pounds per square inch.

(2) The maximum allowable stress for cast iron as given in table 54.03–1 (f) shall be used in the application formula for unfired pressure vessels.

TABLE 54.03–1 (f)—MAXIMUM ALLOWABLE STRESS FOR CAST IRON

Minimum tensile strength, p. s. i.:	Maximum tensile stress, p. s. i.
20,000	2,000
25,000	2,500
30,000	3,000
35,000	3,500
40,000	4,000
50,000	5,000

(g) Nonferrous materials may be used in the construction of unfired pressure vessels subject to the following conditions:

(1) The grade of material shall be as specified in Part 51 of this subchapter, and as given in table 54.03–10 (c).

(2) The pressure and temperature limitations for nonferrous materials shall be as given in § 55.07–1 (d) of this subchapter.

§ 54.03–5 *Workmanship and design.* (a) Equipment covered by this part and constructed of plates with riveted or welded joints shall conform to all the requirements of Part 52 of this subchapter for such construction, except as provided otherwise in this part.

(b) Flanges cast integral with shells or heads shall have a fillet radius not less than the thickness of the necks to which they are attached.

(c) The corner radius of a cast unstayed dished head measured on the concave side of the head shall be not less than three times the thickness of the head, but in no case less than 6 percent of the outside diameter of the shell.

§ 54.03–10 *Cylindrical shells and heads.* (a) The maximum allowable pressure of cylindrical shells and heads of unfired pressure vessels shall be determined by the applicable formulas given in Part 52 of this subchapter, except as provided otherwise in this part.

(b) The minimum thickness of shell plates, heads or dome plates, after flanging, shall be ⅛ inch, except that for riveted construction, the minimum thickness shall be 3/16 inch.

(c) The maximum allowable stresses for nonferrous materials shall be as given in table 54.03–10 (c).

TABLE 54.03–10 (c)—MAXIMUM ALLOWABLE STRESSES[1] FOR NON-FERROUS MATERIALS USED IN UNFIRED PRESSURE VESSELS

Specification subpart	A. S. T. M. designation	Grade: A. S. T. M.	Grade: C. G.	Minimum tensile strength (p. s. i.)	Minimum yield strength (p. s. i.)	Notes	For metal temperatures not exceeding °F.: Subzero to 150	250	300	350	400	450	500

[1] All stresses refer to the annealed condition of the material, unless otherwise specified. For wrought material, the allowable S values are based upon one-fourth of the minimum tensile strength or two-thirds of the minimum yield strength for temperatures of 150° F. and below, whichever is lower; and upon creep stress or stress-rupture at the higher temperatures. For cast material, the allowable S values are based upon one-fifth of the minimum tensile strength for temperatures of 150° F. and below; and upon creep stress or stress-rupture at the higher temperatures.

[2] The same stress may be employed for a temperature of 406° F.

[3] The minimum yield strength employed not included in the specification.

[4] For temperatures of 100° F. and below, the following stress values may be used: B11A, 3,350; GS11A, 4,000; GS11A (T4), 7,500.

[5] The minimum tensile strength employed not included in the specification.

[6] This material approved for tube sheets only.

[7] These stresses refer to the light drawn condition.

[8] The same stress may be employed for 321° F.

[9] To these stresses a casting quality factor of 80 percent shall be used. This is not intended to apply to valves and fittings complying with A. S. A. standards.

[10] This stress is not permitted for temperatures exceeding 366° F.

§ 54.03–12 *Cast-iron heads.* (a) The maximum allowable pressure and minimum thickness of circular cast iron blank spherically dished heads concave to the pressure shall be calculated by the following formulas:

$$P = \frac{ST}{0.6R} \quad (1)$$

$$T = \frac{0.6PR}{S} \quad (2)$$

where:

P = maximum allowable pressure, in pounds per square inch.

T = thickness of dished portion of the head, in inches.

R = radius to which the head is dished measured on the concave side of the head, in inches (not to exceed the inside diameter of the shell to which the head is attached).

S = maximum allowable tensile stress, as given in table 54.03–1 (f), in pounds per square inch.

(b) Cast-iron heads of semi-ellipsoidal form in which the inside depth of the head (one-half of the minor axis of the ellipse) is not less than one-quarter of the inside diameter of the shell to which the head is to be attached, shall have a thickness of at least that required for a cast-iron shell of the same diameter.

(c) Heads flatter than the limits prescribed in this section for dished heads shall be designed as flat plates.

(d) Cast-iron dished heads integral with the cast shell shall have a corner radius equal to at least three times the thickness of the head.

§ 54.03–15 *Tube sheets.* (a) The maximum allowable pressure and the minimum thickness of fixed tube sheets to which the tubes are attached by expanding shall be calculated by the following formulas:

$$P = \frac{ST^2}{0.25D^2} \quad (1)$$

$$T = D\sqrt{\frac{0.25P}{S}} \quad (2)$$

where:

P = maximum allowable pressure, in pounds per square inch.

S = maximum allowable stress, 80 percent of the values as given in tables 52.05–(10) (a) and 54.03–10 (c), in pounds per square inch.

T = minimum thickness of the tube sheet, in inches.

D = means gasket diameter for flanged attachments, or inside diameter of shell when bolted attachment is not employed, in inches.

(b) The minimum thickness of a fixed tube sheet shall be not less than ¾ inch.

(c) Where tubes are welded or brazed to fixed tube sheets and no expansion joint is employed in the shell construction, consideration may be given by the Commandant to the use of a tube sheet of lesser thickness than required by formula (2) of this section.

(d) Floating tube sheets shall have a thickness not less than that required for a fixed tube sheet.

(e) U-tube tube sheets shall have a thickness of at least one and one-fourth times the thickness required for a fixed tube sheet.

(f) The pitch of tubes attached to tube sheets by expanding shall be not less than that given in table 54.03–15 (f).

TABLE 54.03–15 (f)—MINIMUM PITCH OF TUBES

Outside diameter of tube (in inches):	Pitch of tube (in inches)
½ and below	⅝
⅝	13/16
¾	15/16
1	1¼
1¼	1 3/16
1½	1⅞

(g) Some types of arc or gas welded tube sheet attachments which are acceptable are illustrated in figure 54.03–15 (g).

§ 54.03–20 *Heat exchanger tubes.* (a) The maximum allowable pressure and the minimum thickness of tubes for heat exchangers subject to internal pressure shall be calculated by the following formulas:

$$P=\frac{2.3\ ST}{D}-0.036\ S \qquad (1)$$

$$T=\frac{D}{2.3\ S}(P+0.036\ S) \qquad (2)$$

where:

P = maximum allowable pressure, in pounds per square inch.
S = maximum allowable stress, 80 percent of the values as given in table 52.05–10 (a), or 100 percent of the values as given in table 54.03–10 (c), in pounds per square inch.
T = minimum thickness of the tube wall, in inches.
D = external diameter of the tube, in inches.

(b) Additional wall thickness above the minimum required by formula (2) of this section shall be provided as follows:

(1) When tubes act as stays, additional wall thickness shall be provided to carry the external load imposed upon the tubes.

(2) When tubes are expanded into the tube seats, at least one additional B. W. G. thickness shall be provided over a length at least equal to the width of the seat plus 1 inch.

(3) Bent tubes shall have the thickness increased when the radius is less than 5 times the outside diameter of the tube, to compensate for the reduction in wall thickness due to fabrication.

§ 54.03–25 *Bolted flanged connections*—(a) *Scope.* (1) Bolted flanged connections conforming to the American Standard for Steel Pipe Flanges and Flanged Fittings as given in tables 55.07–15 (e1) to 55.07–15 (e11), inclusive, in Part 55 of this subchapter shall be used for connections to external piping and may be used for other flanged connections.

(2) Bolted flanged connections to pressure vessels and special flange designs other than those meeting the requirements of subparagraph (1) of this paragraph shall be designed in accordance with the requirements of this section.

(3) The regulations in this section may be applied to flanges having the gasket entirely within the inner edge of the bolt holes.

(4) This section shall not be construed to prohibit the use of other types of bolted flanged connections, such as flanges using full-face gaskets, or other means to provide effective restraint against flange deflection. Such designs may be used provided the design is acceptable to the Commandant.

(b) *Material.* (1) For temperatures not exceeding 450° F., commercial carbon-steel bolting material may be used for attaching heads, doors, covers, or flanges. Carbon-steel bolting and nut material shall comply with Subpart 51.49 of this subchapter. Bolting and nuts shall meet the minimum requirements of American Standard Heavy Dimensions as given in table 54.03–25 (b).

(2) For temperatures exceeding 450° F., high strength of alloy steel bolting and nut material complying with the requirements of Subpart 51.49 of this subchapter shall be employed. Nuts of the below classes shall not be used for temperatures exceeding the following: class 1, 750° F.; classes 2 and 2H, 800° F.; class 4, 900° F.; and class 3, 1,050° F. Bolting and nuts shall meet the minimum requirements of the American Standard Heavy Dimensions and the American Standard Threads for High Strength Bolting as given in table 54.03–25 (b). Washers are not required but when used shall be of forged rolled steel.

(3) Studs continuously threaded or bolts with the unthreaded portion reduced to the same diameter as that of the root of the thread, shall be employed when the temperature exceeds 450° F.

(4) Bolting shall have a length of thread engagement of not less than the normal thickness dimension of American Standard heavy nuts.

(5) In no case shall the size of a bolt be less than ½ inch in diameter.

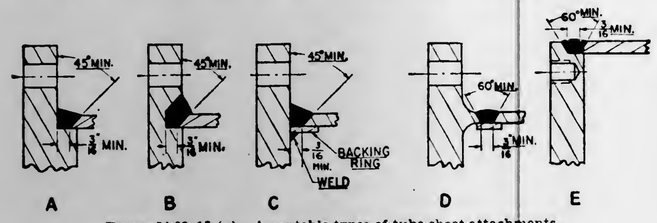

FIGURE 54.03–15 (g)—Acceptable types of tube sheet attachments.

(c) *Bolt loads*—(1) *Operating bolt load.* The minimum required operating bolt load W_{m_1} shall be determined by formula (1) under maximum operating conditions.

$$W_{m_1}=H+H_p=0.785\ G^2P+(2b\times 3.14\ GmP) \qquad (1)$$

NOTE 1: Under maximum operating conditions the minimum required operating bolt load W_{m_1} is the load required to resist the hydrostatic end force H exerted by the maximum internal pressure upon the area bounded by the mean diameter of the gasket, and, in addition, maintain a compression load H_p on the gasket or joint-contact surface which experience has shown to be sufficient to insure a tight joint.

(2) *Initial bolt load.* The minimum required initial bolt load W_{m_2} shall be determined by formula (2) under atmospheric temperature conditions without consideration of internal pressure.

$$W_{m2}=H_y=3.14\ bGy \qquad (2)$$

NOTE 2: Under atmospheric temperature conditions without consideration of internal pressure, the minimum required initial bolt load W_{m_2} is the load H_y required to seat the gasket or joint-contact surfaces sufficiently to insure a tight joint.

(3) *Bolt areas.* (i) The total required bolt area A_m shall be determined from the greater of the values obtained from formula (3) under operating conditions, or from formula (4) under atmospheric temperature conditions without consideration of internal pressure.

$$A_{m_1}=\frac{W_{m_1}}{S_b} \qquad (3)$$

$$A_{m_2}=\frac{W_{m_2}}{S_a} \qquad (4)$$

(ii) The actual total cross-sectional area of the bolts A_b shall be not less than A_m.

(4) *Flange design bolt load.* The bolt load W used in the design of the flange shall be not less than the greater of the values obtained from formula (1) under maximum operating conditions, or from formula (5) under atmospheric temperature conditions without consideration of internal pressure.

$$W=\frac{(A_m+A_b)}{2}S_a \qquad (5)$$

(5) *Nomenclature of bolt and flange design symbols.* The symbols used in this paragraph mean:

W_{m_1} = minimum required bolt load for maximum operating conditions, in pounds.
W_{m_2} = minimum required initial bolt load for atmospheric temperature conditions without consideration of internal pressure, in pounds.
W = flange design bolt load, in pounds.
H = total hydrostatic end force, in pounds.
H_p = total joint-contact-surface compression load, in pounds.
H_y = total joint-contact-surface-seating load, in pounds.
G = mean diameter of gasket or joint-contact-surface, in inches (except for lap joints with full face gasket, in which case it is midpoint of contact between flange and lap).
P = maximum allowable pressure, in pounds per square inch.
b = effective gasket or joint-contact-surface seating width, in inches (see table 54.03–25 (c)).
$2b$ = effective gasket or joint-contact-surface pressure width, in inches (see table 54.03–25 (c)).
N = possible contact width of gasket in inches (see table 54.03–25 (c)).
w = width of local concentration on gasket, in inches (see table 54.03–25 (c)).
m = limit contact compression factor (see table 54.03–25 (c)).
y = gasket or joint-contact-surface unit seating load, in pounds per square inch (see table 54.03–25 (c)).
S_b = maximum allowable bolt stress at operating temperature, in pounds per square inch, as given in table 52.05–10 (a).
S_a = maximum allowable bolt stress at atmospheric temperature, in pounds per square inch, as given in table 52.05–10 (a).
A_m = total required cross-sectional area of bolts at root of thread or section of least diameter under stress, in square inches.
A_b = total actual cross-sectional area of bolts at root of thread or section of least diameter under stress, in square inches.

TABLE 54.03–25 (b)—BOLTING AND NUTS

[All dimensions given are in inches]

Diameter	Commercial steel bolts: Number of threads [1]	Commercial steel bolts: Root area	High strength steel bolts: Number of threads [1]	High strength steel bolts: Root area	American Standard heavy nuts semifinished hexagonal: Width across flats (min.)	Width across corners (min.)	Nut thickness (min.)

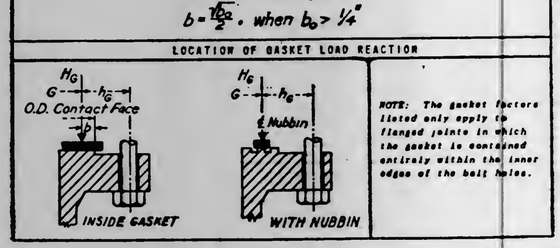
EFFECTIVE GASKET SEATING WIDTH "b"

$b = b_o$ when $b_o \leq 1/4"$

$b = \frac{1}{2}\sqrt{b_o}$ when $b_o > 1/4"$

LOCATION OF GASKET LOAD REACTION



§ 54.03–30 *Evaporators.* (a) An evaporator in which steam is generated shall be fitted with an efficient water level indicator, a pressure gauge, and a blow-down valve.

(b) An approved safety valve shall be fitted on evaporators as required by § 54.07–10.

§ 54.03–35 *Access and inspection openings.* (a) All unfired pressure vessels for use with compressed air or where subject to internal corrosion shall be provided with suitable manhole, handhole, or other inspection openings for examination and cleaning.

(b) Unless otherwise specified in this subchapter, the access and inspection openings in the shell or head of an unfired pressure vessel shall comply with the requirements of Subpart 52.24 of this subchapter for power boilers.

(c) When a threaded inspection opening is to be used for inspection or cleaning purposes, it shall be not less than 1½ inches pipe size.

(d) All unfired pressure vessels which require access or inspection openings shall be equipped as follows:

(1) Vessels less than 18 inches in diameter shall have at least two handholes or two plugged threaded inspection openings of not less than 2-inch pipe size.

(2) Vessels 18 to 36 inches, inclusive, in diameter, shall have a manhole, or at least two handholes, or two plugged threaded inspection openings of not less than 2 inches pipe size.

(3) Vessels over 36 inches in diameter shall have a manhole, except those whose shape or use make it impracticable, in which case they shall have at least two 4 x 6 inch handholes or two handholes of equivalent area.

(4) When handholes or plugged openings are used for inspection openings in place of a manhole, where permitted, one handhole or one plugged opening shall be placed in each head or in the shell near each head.

(5) Removable heads or cover plates may be used in place of the required openings provided they are equal at least to the required size of the required inspection openings.

§ 54.03–40 *Nozzle openings and reinforcements.* (a) Unless otherwise specified in this subchapter, nozzle openings and reinforcement in the shell or heads of unfired pressure vessels shall comply with the requirements of Subpart 52.25 of this subchapter for power boilers.

(b) The thickness of a nozzle or fitting welded to the shell, reinforcing ring, or flange shall be not less than that for schedule 40 pipe of the same diameter, and in no instance shall the nozzle wall thickness be less than that determined by § 55.07–5 of this subchapter.

(c) Screwed and flanged piping connections to the outlets on a pressure vessel shall comply with the requirements of Part 55 of this subchapter. When subject to Class I piping, screwed nozzle connections shall be limited to a maximum diameter of 2 inches.

(d) Some types of acceptable arc- or gas-welded nozzle connections are illustrated in figure 52.25–20 (d) in Part 52 of this subchapter.

SUBPART 54.07—PRESSURE-RELIEF DEVICES

§ 54.07–1 *General requirements.* (a) Unfired pressure vessels, such as tanks, containing liquids, gases, or vapors, and in which steam is not generated, shall be protected by a relief valve set to relieve at a pressure not exceeding that for which the vessel is designed and of sufficient relieving capacity to prevent a pressure increase exceeding 10 percent above the maximum allowable pressure, except as provided for in paragraph (b) of this section.

(b) Where an additional hazard can be created by exposure of an unfired pressure vessel containing compressed gas to fire or other unexpected sources of external heat (for example, vessels used for the transportation of liquefied compressed gasses) relief valves shall be capable of preventing the pressure from rising more than 20 percent above the maximum allowable pressure of the vessel. The minimum required relief valve capacities for liquefied compressed gases are in Part 38 of Subchapter D (Tank Vessels) and in Part 146 of Subchapter N (Explosives or other Dangerous Articles or Substances and Combustible Liquids on Board Vessels) of this chapter.

(c) Pressure-relief devices shall be constructed so that they can not be readily rendered inoperative, and shall be so located, and installed as to be readily accessible for inspection and repair.

(d) For certain pressure vessels containing substances that may render a relief valve inoperative, or where the installation of a relief valve is considered impracticable, the Commandant may authorize the use of a rupture disk in lieu of a relief valve, provided such pressure vessels contain liquids or vapors that are not lethal or noxious and the temperature of the contents does not exceed 212° F. When the use of rupture disks is approved by the Commandant, the installation shall comply with the requirements of § 54.07–20.

(e) The opening through all pipes and fittings between a pressure vessel and its pressure-relieving device shall have at least the area of the pressure-relieving device inlet, and in all cases shall have sufficient area so as not to unduly restrict the flow to the pressure-relieving device. The opening in the vessel shall be designed to provide direct and unobstructed flow between the vessel and its pressure-relieving device.

§ 54.07–5 *Relief valves.* (a) All relief valves for use on unfired pressure vessels or on piping systems where approved safety valves are not required shall in general comply with the requirement of safety valve construction in Part 52 of this subchapter and shall be designed to suitably meet the protection and service requirements for which they are intended, except that relief valves are not required to have huddling chambers for service other than steam.

(b) In no case shall the diameter of a relief valve be less than ½ inch.

(c) Cast iron may be employed in the construction of relief valves for pressures not exceeding 125 pounds per square inch and temperatures not exceeding 450° F. Seats or disks of cast iron are prohibited.

(d) Relief valves for steam or air service shall be provided with a substantial lifting device so that the disk can be lifted from its seat when the pressure in the vessel is 75 percent or less of that at which the valve is set to blow.

(e) If the design of a relief valve is such that liquid can collect on the discharge side of the disk, the valve shall be equipped with a drain at the lowest point where liquid can collect.

(f) The spring in a relief valve in service for pressures up to and including 250 pounds per square inch shall not be re-set for any pressure more than 10 percent above or 10 percent below that for which the relief valve is marked. For higher pressures, the spring shall not be re-set for any pressure more than 5 percent above or 5 percent below that for which the relief valve is marked.

(g) The capacities of relief valves shall be rated at pressures of 3 percent for steam, 10 percent for gases or vapors, and at 10 or 25 percent for liquids above the pressure at which the valve is set to operate.

§ 54.07–10 *Evaporator safety valves.* (a) An approved safety valve set to relieve at a pressure not exceeding that for which the shell is designed shall be fitted to all evaporators except the following:

(1) Evaporators of the coil or tube type designed to operate with a steam inlet pressure not exceeding 15 pounds per square inch gauge.

(2) Evaporators of the atmospheric type designed for vapor discharge direct to a distiller with no shut-off valve in the discharge line. The distiller connected to atmospheric evaporators shall be fitted with a vent to obviate a build-up in pressure. In no case shall the vent be less than 1½ inches in diameter.

(b) Safety valves for use on unfired pressure vessels in which pressure is generated shall comply with the requirements specified in Part 52 of this subchapter for power boilers when subject to pressures exceeding 30 p. s. i., and Part 53 of this subchapter for low pressure heating boilers when subject to pressures of 30 p. s. i. or less.

(c) The relieving capacity of safety valves required by paragraph (a) of this section shall be at least equal to the capacity of the orifice fitted in the steam supply to the evaporator. The orifice capacity shall be determined in accordance with formula (1) or (2) as follows:

(1) Where the set pressure of the evaporator shell safety valve is 58 percent or less than the setting of the safety valve in the steam supply:

$$W = 51.45AP \qquad (1)$$

(2) Where the set pressure of the evaporator shell safety valve exceeds 58 percent of the setting of the safety valve on the steam supply:

$$W = 105.3A\sqrt{P_1(P-P_1)} \qquad (2)$$

where:

W = the required orifice capacity, in pounds per hour.
A = cross-sectional area of rounded entrance orifice, in square inches.[1]
P = set pressure of steam supply safety valve, in pounds per square inch, absolute.
P_1 = set pressure of evaporator shell safety valve, in pounds per square inch, absolute.

(d) On new installations and where the orifice size of an existing evaporator is increased, an accumulation test shall be made by closing all steam outlet connections except the safety valves for a period of five minutes. When conducting the accumulation test, the water shall be at the normal operating level and the steam pressure shall be at the normal operating pressure, and while under this test the pressure shall not rise more than 6 percent above the safety valve setting.

§ 54.07–15 *Heat exchanger relief valves.* (a) A heat exchanger with liquid in the shell and the heating medium in the tubes or coils, shall be fitted with a liquid relief valve meeting the requirement of § 54.07–1.

(b) (1) A heat exchanger with steam in the shell and liquid in the tubes or coils at a pressure exceeding that in the shell, shall have a liquid relief valve fitted to protect the shell against excess pressure.

(2) The discharge capacity of such relief valves shall be calculated on the basis of the discharge from one tube using the difference in pressures between that in the shell and that in the tubes, and shall be not less than that determined by the following formula:

$$Q = 29.81\ KD^2\sqrt{P_1 - P_2} \qquad (1)$$

where:

Q = required relief valve discharge capacity, in gallons per minute, based on relief valve set pressure.
P_1 = pressure in the tube or coils, in pounds per square inch.
P_2 = set pressure of the shell relief valve, in pounds per square inch.
D = internal diameter of the largest tube or coil, in inches.
K = coefficient of discharge = 0.62.

[1] The orifice shall be installed near the steam inlet of the coils or tubes and where no orifice is employed the area used in the formula shall be that of the inlet connection or manifold.

§ 54.07–20 *Rupture disks.* (a) Every rupture disk shall have a specified bursting pressure at a specified temperature, shall be marked with a lot number and shall be guaranteed by its manufacturer to burst at within 5 percent (plus or minus) of its specified bursting pressure.

(b) The specified bursting pressure at the coincident operating temperature shall be determined by bursting two or more specimens from a lot of the same material and of the same size as those to be used. The test shall be made in a holder of the same form and pressure area dimensions as that with which the disk is to be used.

(c) Where it is desired to minimize the loss by leakage through the safety or relief valve of liquids or vapors, the rupture disk may be installed between a safety or relief valve and the vessel, provided the following requirements are met:

(1) The bursting pressure of the disk does not exceed the maximum allowable pressure of the vessel.

(2) The connection between the rupture disk and the relief valve is provided with a pressure gauge, test cock, or free vent to atmosphere, to indicate when the rupture disk has leaked or burst.

(3) The opening provided through the rupture disk, after breakage, is sufficient to permit a flow equal to the capacity of the attached valve and there is no chance of interference with the proper functioning of the relief valve; but in no case shall this area be less than the inlet area of the relief valve.

PART 55—PIPING SYSTEMS, PUMPS, REFRIGERATION MACHINERY, AND FUEL TANKS

SUBPART 55.07—DETAIL REQUIREMENTS

1. Sections 55.07–1 to 55.07–25, inclusive, are amended to read as follows:

§ 55.07–1 *Material.* (a) Materials used in the manufacture of pipe, valves, flanges, fittings or bolting shall conform with the requirements of this part, and shall comply with the respective specifications of Part 51 of this subchapter unless alternate equivalent material is approved by the Commandant.

(b) Pipe and flange material are acceptable for the pressures and temperatures listed in table 55.07–1 (b).

(c) Forged steel or cast steel, conforming to the requirements of Subparts 51.46 and 51.58 of this subchapter, may be used for the construction of valves and fittings for any system without pressure limitation, subject to the maximum design temperatures as specified in table 52.05–10 (a) in Part 52 of this subchapter. Grades F181–I and II, Subpart 51.46, may be used in the construction of valves and fittings for pressures and temperatures not exceeding those allowed for 300-pound service pressure rating for steel pipe flanges and flanged fittings.

(d) Bronze castings conforming to the requirements of Subpart 51.76, of this subchapter, for Grade 4A (ounce metal) may be used in the construction of valves and fittings for pressures not exceeding 150 pounds per square inch and temperatures not exceeding 366° F. Grade 2A (steam bronze) and Grades 1A and 1B (tin bronze) may be used for steam pressures not exceeding 300 pounds per square inch and temperatures not ex-

TABLE 55.07-1 (b)—PIPING MATERIALS[1]

Material specification subpart	A. S. T. M. specification	Grade	Maximum design: Pressure (p. s. i.)	Maximum design: Metal temperature °F.	Limitation
Steel pipe

51.22	A285	C	150	650	(6 7)

[1] The carbon content of the material listed in table 55.07-1 (b) shall not exceed 0.35 percent if welded fabrication is to be employed.
[2] Copper pipe shall not be used for hot oil service other than short flexible connections at the burners.
[3] Copper pipe shall be annealed prior to installation for Class I piping systems.
[4] Copper pipe fabricated with brazed longitudinal joints shall be limited to water or saturated steam service for the maximum pressure and temperature as indicated.
[5] These limitations apply only when plates are used as flange material. See table 52.05-10 (a) for maximum design temperatures of plate material used in the construction of pressure vessels.
[6] Not permitted for hubbed flanges. Ring type flanges may be machined from plate.
[7] For temperatures exceeding 500° F., the pressure shall not exceed that permitted by table 55.07-15 (c12).

ceeding 450° F., and for hydraulic or compressed air service at higher pressures where the temperature does not exceed 150° F.

(e) (1) Malleable iron castings conforming to the requirements of Subpart 51.61 of this subchapter for Grade A1 or A2 material, may be used in the construction of valves and fittings for pressures not exceeding 300 pounds per square inch and temperatures not exceeding 450° F. Grade B malleable iron may be used for pressures not exceeding 150 pounds per square inch and temperatures not exceeding 450° F. Cast iron conforming to the requirements of Subpart 51.61 may be used in the construction of valves and fittings for pressures not exceeding 125 pounds per square inch and temperatures not exceeding 450° F.

(2) Malleable iron and cast-iron valves and fittings designed and marked for class 300 refrigeration service may be used for such service, provided the pressure limitation of 300 pounds per square inch is not exceeded. Malleable iron flanges of this class may also be used in sizes 4 inches and smaller (oval and square design).

(f) Ferrous pipe used for salt-water service should be protected against corrosion by hot-dipped galvanizing or other suitable means.

(g) Carbon-steel bolting material conforming to the requirements of Subpart 51.49 of this subchapter may be used for temperatures not exceeding 450° F. For temperatures exceeding 450° F. alloy-steel bolting material as specified in Subpart 51.49 shall be employed.

(h) If it is desired to use materials other than those specified in this section, a request furnishing chemical and physical properties of the material which it is desired to employ shall be submitted to the Commandant for special consideration.

§ 55.07-5 *Design pressures and thickness of pipes.* (a) (1) The maximum allowable pressure and minimum thickness of pipes shall be calculated by the following formulas:

$$P = \frac{2S}{D-M}\frac{(T-A)}{(T-A)} \quad (1)$$

$$T = \frac{PD}{2S+MP} + A \quad (2)$$

Where:

P = maximum allowable pressure, p. s. i.[1]
T = minimum wall thickness of pipe, inches.[2]
D = external diameter of pipe, inches.
S = allowable fiber stress, p. s. i. (for pipe stresses see table 55.07-5 (a). When steel tubing material is employed, the allowable fiber stresses shall be 80 percent of the stresses as given in table 52.05-10 (a).
M = multiplier as given in table 55.07-5 (a).
A = allowance for threading or grooving,
= 0.05 inch for threaded pipe ⅜ inch and below.
= depth of thread h for threaded pipe ½ inch and above.
= depth of groove for grooved pipe.

NOTE: The depth of thread h may be determined by the formula $h = 0.8/n$; where, n = the number of threads per inch, or from the following values: $h = 0.100$ inch, 0.0696 inch, and 0.0571 inch, for 8, 11½, and 14 threads per inch, respectively.

(2) The value of P in the formula shall not be taken at less than 150 p. s. i. for class I piping nor less than 50 p. s. i. for nonferrous class II piping; however, copper piping shall be of not less than 0.065 inch in thickness except for lines below 1 inch in diameter, nor shall ferrous material to be fabricated by welding be of a thickness less than 0.120 inch.

(b) (1) The design pressures of the steam piping connected to the boiler drum or to the superheater inlet header shall be not less than the highest pressure at which any drum safety valve is set to blow.

(2) The design pressure of the superheater outlet flange and the superheated steam piping beyond the superheater outlet shall be not less than the pressure at which the superheater safety valve is set to blow. Where the superheater safety valve is of the drum pilot actuated type, the design pressure shall be at least equal to 95 percent of the drum pilot safety valve setting. The S value for the material shall not exceed that permitted for the total steam temperature at the superheater outlet.

(c) Carbon steel or wrought iron pipe shall have a wall thickness of not less than standard weight pipe. Where the installation of light wall pipe is deemed satisfactory, the use of pipe having a wall thickness less than standard weight will be given special consideration by the Commandant.

(d) Where the Officer in Charge, Marine Inspection, is not otherwise satisfied, each length of piping having a diameter exceeding 4 inches shall be drilled, for the purpose of gauging, and fitted with a screw plug to extend beyond the pipe covering. Where bends are used, the test holes shall be drilled in the outer wall of the bend. The drilling of such pipes may be omitted where pipes which are intended for bending comply with paragraph (e) of this section.

(e) The radius of a pipe bend measured from the centerline of the pipe shall be not less than three times the nominal pipe diameter, except for copper which shall have a radius of not less than twice the nominal pipe diameter.

(f) (1) Where pipe is pierced with tube holes the ligament efficiency of the tube holes shall be employed in the formulas in § 52.05-10 of this subchapter to determine the maximum allowable pressure of the piping. The pressure thus calculated shall in no case be greater than that allowed for the unpierced pipe.

(2) Where branch connections are welded to Class I piping, or to piping conveying steam at pressures exceeding 50 p. s. i., reinforcement of the pierced pipe shall be provided unless the connection is adequate for the design pressure. The amount of reinforcement required shall be determined by § 52.25-20 of this subchapter.

(3) The longitudinal joint of a welded pipe shall not be pierced with holes.

§ 55.07-6 *Expansion and flexibility.* (a) Piping systems shall be designed to have sufficient flexibility to prevent thermal expansion or contraction from causing excessive stresses in the piping material, excessive bending moments at the joints, or excessive forces or moments at points of connection to equipment or at anchorage and guide points.

(b) Provision shall be made for expansion and contraction by changes in direction of pipe runs or by the use of expansion bends, loops, offsets, or slip joints.

(c) Piping shall be installed to avoid excessive strains and shall be adequately

[1] When computing the allowable pressure for a pipe, the pipe wall thickness used in formula (1) shall not be more than the minimum thickness resulting from the application of mill tolerances prescribed in the applicable pipe specifications for the material to be employed, including tubing material when used for piping. For bent sections of pipe, the reduction in wall thickness due to fabrication, in addition to the mill tolerance, shall be subtracted from the nominal pipe wall thickness to obtain the minimum pipe wall thickness.
[2] The wall thickness to which the pipe or tubing is ordered shall not be less than the sum of the minimum wall thickness determined by formula (2), plus the mill tolerance, and the reduction in wall thickness due to bending.

[1] Intermediate values of "S" and "M" may be obtained by interpolation.
[2] This material shall be limited to a maximum temperature of 875° F.
[3] These stresses include a weld efficiency factor of 0.85.
[4] These stresses include a weld efficiency factor of 0.80.
[5] Stress permitted for temperatures not to exceed 450° F.
[6] These stresses include a weld efficiency factor of 0.60.
[7] The same stress may be employed for a temperature of 406° F.
[8] The minimum tensile and yield strengths employed not given in the specifications, tensile and yield strengths shown are assumed.
[9] The same stress may be employed for a temperature of 320° F.

supported by hangers or guides, so that the weight of the piping is not transmitted to valves and fittings, and the effects of vibrations, pitching and rolling of the vessel are minimized. Pipe supports shall be designed and arranged so as not to interfere with expansion and contraction of the piping. Anchors, pivots and restraints shall be fabricated and installed to secure the desired points of piping in relatively fixed positions and freely permit expansion and contraction in opposite directions. Main junction points of piping subject to temperatures exceeding 450° F., which are not balance points shall be fitted with fixed anchors. If considered as a balance point the junction point may be free to move in all directions, or may be guided to limit the movement in one or more directions if computations indicate excessive strain may occur in any of the branch pipes.

(d) The combined stresses due to bending and pressure for the normal operating conditions shall not exceed two-thirds of the sum of the "S" value given in table 55.07–5 (a) for the piping material at 650° F. and the "S" value at the design temperature.

(e) In order to modify the effect of expansion and contraction, runs of pipe should be cut short and sprung into place. Piping may be cold sprung any amount up to 100% of the total expansion. When it is desired to take credit for cold spring, the piping shall be cold sprung at least half of its computed expansion. In computing stress calculations for the hot condition, the total expansion movement may be reduced by one-third of the actual cold spring applied: *Provided*, That, in the opinion of the Commandant, satisfactory provision is made to obtain the design amount of cold spring. The full amount of cold spring shall be taken into account in considering the forces, moments, and stresses acting in the cold condition.

(f) A summary of the results of pipe stress calculations for the main and auxiliary steam piping where the design temperature exceeds 800° F., together with the arrangement piping drawings, shall be submitted for approval. Calculations shall be made in accordance with one of the recognized methods of stress analysis acceptable to the Commandant. Under no conditions shall the calculated value of the combined stress be taken as less than the total longitudinal stress (the sum of the longitudinal bending stress and the longitudinal pressure stress).

(g) The stress calculations and piping arrangement plans shall indicate all piping runs, connections, materials, sizes, design pressure and temperature, anchorages, guides or junction points, total thermal expansion between anchor points, and design cold spring. The moment of inertia of the pipe shall be based upon the minimum thickness of the pipe or tubing.

(h) Stress calculations shall be made to determine the magnitude and direction of the forces (reactions) and moments at all terminal connections, anchor, guide and junction points, as well as the longitudinal bending and pressure stress, hoop stress, shear stress, and combined stress at all such points. The location of the maximum combined stress shall be indicated in each run of pipe between anchor or junction points. Where deemed necessary by the Commandant, and conditions are such as to warrant it, calculations for the cold conditions shall be made.

(i) Where it is desired to employ alloy steel pipe materials of better heat resistant properties than those specified in Part 51 of this subchapter, special consideration may be given by the Commandant for an increase in the maximum combined stress, if satisfactory evidence is furnished to establish the suitability of the material for the design temperature.

§ 55.07–8 *Variations in pressures and temperatures.* (a) Superheater outlet flanges and superheated and desuperheated steam piping direct from the boiler shall be designed for not less than the maximum pressure and temperature to which they may be exposed in service under normal sustained operating conditions.

(b) Occasional increases in pressure and/or temperature are unavoidable and may be permitted without changing the normal design provided the corresponding stress in the pipe wall calculated by formulas (1) and (2) of § 55.07–5 does not exceed the maximum allowable stress (S) values as given in table 55.07–5 (a) for the actual expected temperature by more than the following allowances for the periods of duration indicated:

(1) Up to 15 percent increase above the S value during 10 percent of the operating period.

(2) Up to 20 percent increase above the S value during 1 percent of the operating period.

§ 55.07–10 *Valves and fittings.* (a) All valves shall close with a right hand (clockwise) motion of the handwheels when facing the end of the valve stem. Valves shall be of the rising stem type preferably with the stem threads external to the valve body. Where operating conditions will not permit of such installations, the use of a non-rising stem valve will be permitted, provided indicators are fitted to show clearly whether same is opened or closed. Valves installed in cargo tanks of tank vessels are not required to be fitted with indicators.

(b) Valves of class I piping having diameters exceeding 2 inches shall have bolted, pressure seal, or breech lock bonnets and flanged or welding ends, except that socket type welding ends shall not be used where the diameter exceeds 2 inches. For diameters not exceeding 2 inches, screwed union bonnet valves or a type which will positively prevent the stem from screwing out of the body may be employed. Cast-iron valves with screwed-in or screwed-over bonnets are prohibited. Union bonnet type cast-iron valves shall have the bonnet ring made of steel, bronze or malleable iron.

(c) Valves, flanges, fittings and appurtenances shall be designed for the maximum pressure to which they may be subjected, but in no case shall the design pressure be less than 50 p. s. i. for the medium to be conveyed, except large fabricated ballast manifolds connecting lines exceeding 8 inches nominal pipe size may be designed for a pressure of not less than 25 p. s. i.

(d) Disks or disk faces, seats, stems and other wearing parts of valves shall be made of material possessing corrosion and heat-resisting qualities suitable for the service conditions to which they may be subjected.

(e) Valves, flanges, and fittings shall be legibly marked with the manufacturer's name or registered trademark and if of alloy steel, the type and grade of alloy steel used, and the primary service pressure rating for which same are guaranteed in service, except as otherwise permitted below:

(1) Screwed malleable iron fittings of the 150-pound ASA standard need not carry a service pressure marking.

(2) Screwed bronze fittings of the 125-pound ASA standard which are identifiable as to pressure rating by the narrow bands at the inlet and outlet widely separated at the fitting crotches need not carry a service pressure rating.

(3) Screwed bronze fittings of the 250-pound ASA standard which are identifiable as to pressure rating by the heavy bands at the inlet and outlet and which meet and fill the crotches need not carry a pressure rating.

(4) Small finished or polished nonferrous products such as trycocks need not be marked.

(f) Plug cocks shall be constructed with satisfactory and positive means of preventing the plug from becoming loosened or removed from the body when the plug is operated. Cocks having plug locking arrangements depending on cotter pins are prohibited.

(g) Cocks shall be marked in a straight line with the body to indicate whether same are open or closed.

§ 55.07–15 *Joints and flange connections.* (a) Flanged or butt-welded joints are required for Class I piping for diameters exceeding 2 inches, except as otherwise specified in this subchapter.

(b) Slip-on flanges, complying with the requirements of tables 55.07–15 (c5) and (e6) for 150-pound and 300-pound standard may be used in Class I piping for temperatures not exceeding 450° F. Screwed joints for Class I piping are not permitted for pipe diameters exceeding 2 inches.

(c) Forged or cast steel valves, flanges, and pipe fittings of the socket welding type, wherein the pipe is inserted into the socket and is secured by means of a strength fillet weld may be employed for pipe diameters not exceeding 2 inches for Class I piping and without diameter limitation for Class II piping.

(d) Valves, flanges and fittings may be attached to nonferrous pipe by means of soldering where the pressures do not exceed 10 pounds per square inch at 240° F. and 100 pounds per square inch at 150° F. For temperatures between 150° F. and 240° F. the pressure shall be proportionate. Silver brazing alloy shall be employed for temperatures and pressures exceeding the foregoing.

(e) (1) Flanges shall conform in strength at least to the dimensional standards in the following tables:

TABLE 55.07-15 (c5)—STEEL FLANGED FITTINGS AND COMPANION FLANGES—Continued

[For maximum steam service pressure at a temperature of 750° F.]

Nominal pipe size (inches)	300 pounds								
	Outside diameter of flange (inches)	Thickness of flange; minimum [1] (inches)	Diameter of bolt circle (inches)	Number of bolts	Size of bolts (inches)	Metal thickness of fitting; minimum (inches)	Hub diameter at base (inches)

14 O. D	21	15/16	18¾	12	¾	9/16	13¼	2.65	1.02	1⅞
16 O. D	23½	15/16	21	16	¾	9/16	15⅜	2.85	1.02	1⅞
18 O. D	25	15/16	22½	16	¾	9/16	16⅞	3.25	1.02	1⅞
20 O. D	27½	15/16	25	20	¾	9/16	18⅜	----	1.02	1⅞
24 O. D	32	15/16	29½	20	¾	9/16	22	----	1.02	1⅞

[1] All 125-pound standard flanges have a plain face.

[2] Sizes 14 inches and larger are to be used with O. D. pipe.

[3] All blind flanges for size 12 inches and larger must be dished, with inside radius equal to the port diameter.

TABLE 55.07-15 (e2)—CAST-IRON FLANGED FITTINGS AND COMPANION FLANGES, CLASS 250

[250-pound cast-iron flanges. All dimensions given in inches]

Nominal pipe size [2]	Diameter of flange	Thickness of flange [1] (minimum)	Diameter of bolt circle	Number of bolts	Size of bolts	Metal thickness (minimum)	Diameter of hub (minimum)	Length through hub (minimum)	Length of threads (minimum)
1	4¾	15/16	3⅛	4	¾	----	2⅜	----	0.64
1¼	5¼	1	3½	4	¾	----	2⅝	----	0.67
1½	6⅛	1⅛	4⅛	4	¾	----	2⅞	----	0.70
2	6½	1⅛	4¾	8	¾	----	3⅜	----	1.14
2½	7⅜	1⅜	5½	8	¾	----	3⅞	----	1.20
3	8¼	1⅜	6	8	¾	----	4⅜	----	1.20
3½	9	1½	6½	8	¾	----	4⅞	----	1.20
4	10	1⅝	7½	8	¾	----	5⅜	----	1.61
5	11	1¾	8½	8	¾	----	6⅜	----	1.71
6	12½	1⅞	9½	12	¾	----	7⅜	----	1.81
8	15	2⅛	11¾	12	¾	----	9⅜	----	2.13
10	17½	2⅜	14¼	16	1	----	11½	----	2.25
12	20½	2½	16¾	16	1⅛	----	12¾	----	2.45
14 O. D	23¼	2⅝	19¼	16	1⅛	----	13¼	----	2.65
16 O. D	25½	2¾	21¼	20	1¼	----	15⅜	----	2.85
18 O. D	28	2⅞	23¼	20	1¼	----	16⅞	----	3.25
20 O. D	30½	3	25½	20	1⅜	----	18⅜	----	----
24 O. D	36	3⅜	30	24	1½	----	22	----	----

[1] All 250-pound cast-iron standard flanges have a 1/16-inch raised face. This raised face is included in the minimum thickness of flange dimensions.

[2] Sizes 14 inches and larger are to be used with O. D. pipe of the same nominal size.

[3] All blind flanges for sizes 10 inches and larger must be dished, with inside radius equal to the port diameter.

TABLE 55.07-15 (c3)—BRONZE FLANGED FITTINGS AND COMPANION FLANGES

[For maximum steam service pressure at a temperature of 450° F.]

Nominal pipe size (inches)	125 pounds								
	Outside diameter of flange (inches)	Flange thickness; minimum [1] (inches)	Diameter of bolt circle (inches)	Number of bolts	Size of bolts (inches)	Metal thickness of fitting; minimum (inches)	Hub diameter at base (inches)	Depth through hub (inches)	
½	3½	⅝	2⅜	4	½	⅝	1⅝	1⅜	
¾	3⅞	⅝	2¾	4	½	⅝	1⅞	1⅜	
1	4¼	⅝	3⅛	4	½	⅝	2⅛	1⅜	
1¼	4⅝	⅝	3½	4	½	⅝	2½	1⅜	
1½	5	⅝	3⅞	4	½	⅝	2⅞	1⅜	
2	6	¾	4¾	4	¾	¾	3⅜	1⅝	
2½	7	¾	5½	4	¾	¾	3⅞	1⅞	
3	7½	¾	6	4	¾	¾	4⅜	1⅞	
3½	8½	¾	7	4	¾	¾	4⅞	1⅞	
4	9	¾	7½	8	¾	¾	5⅜	1⅞	
5	10	¾	8½	8	¾	¾	6⅜	1⅞	
6	11	¾	9½	8	¾	¾	7⅜	1⅞	
8	13½	¾	11¾	8	¾	¾	9⅜	1⅞	
10	16	15/16	14¼	12	¾	¾	11½	1⅞	
12	19	15/16	17	12	¾	¾	12	1⅞	

[1] The "flange thickness; minimum" as shown in the table is the dimension from back of flange to gasket contact face. Blind flanges may be recessed 1/16 inch with a diameter equal to the inside diameter of the flange fitting.

TABLE 55.07-15 (e4)—BRONZE FLANGED FITTINGS AND COMPANION FLANGES

[For maximum steam service pressure at a temperature of 450° F.]

Nominal pipe size (inches)	300 pounds								
	Outside diameter of flange (inches)	Flange thickness; minimum [1] (inches)	Diameter of bolt circle (inches)	Number of bolts	Size of bolts (inches)	Metal thickness of fitting; minimum (inches)	Diameter of hub; minimum (inches)	Depth through hub (inches)	
½	3¾	¾	2⅝	4	½	¾	1¾	1⅜	
¾	4⅝	¾	3⅛	4	½	¾	2⅛	1⅜	
1	4⅞	⅞	3½	4	½	¾	2⅝	1⅜	
1¼	5¼	1	4¼	4	½	¾	3⅛	1⅜	
1½	6⅛	1⅛	5	4	¾	⅞	3⅝	1⅝	
2	6½	1⅛	5⅜	8	½	⅞	4⅛	1⅝	
2½	7⅜	1⅜	6⅛	8	¾	⅞	4⅝	1⅞	
3	8¼	1⅜	7⅛	8	¾	⅞	5⅜	1⅞	
3½	9	1½	7½	8	¾	⅞	5⅞	1⅞	
4	10	1⅝	8½	8	¾	⅞	6⅜	1⅞	
5	11	1¾	9½	8	¾	⅞	7⅜	1⅞	
6	12½	1⅞	10⅝	12	¾	⅞	8⅜	1⅞	
8	15	2⅛	12¾	12	¾	⅞	10⅜	1⅞	
10	17½	2⅜	15	16	1	1	12½	1⅞	
12	20½	2½	17⅝	16	1⅛	1	14¾	1⅞	

[1] The "flange thickness; minimum" as shown in the table is the dimension from back of flange to gasket contact face. Blind flanges may be recessed 1/16 inch with a diameter equal to the inside diameter of the flange fitting.

(2) The service pressure ratings for carbon steel pipe, flanges and flanged fittings at design temperatures of 800° F. and below shall conform to Table 55.07-15 (e12). Service pressure ratings for carbon-molybdenum steel for temperatures of 875° F. and below, and low chrome-molybdenum alloy ferritic steel pipe flanges and flanged fittings for temperatures of 1,000° F. and below shall conform to Table 55.07-15 (e13). Service pressure ratings for higher chromemolybdenum alloy ferritic and austenitic steel pipe flanges and flanged fittings for use in connection with design temperatures exceeding 1,000° F. will be given special consideration by the Commandant.

1,000	190	250	380	570	950	1,580	230	310	470	700	1,170	1,950

[1] All pressures are in pounds per square inch, gauge.
[2] Carbon-molybdenum steel flanges and flanged fittings are not permitted for temperatures exceeding 875° F.
[3] All tests shall be made with water at a temperature not to exceed 125° F.
[4] Primary service pressure ratings.

(f) **Flanges** shall be attached to the pipe by any method shown by figures 55.07-15 (f1) to 55.07-15 (f15), inclusive, or by any additional means that may be approved by the Commandant.

(1) *Figure 55.07-15 (f1).* Flanges with screwed threads may be used for class I piping not exceeding 2 inches nominal pipe size. For class II piping, flanges with screwed threads may be used without diameter limitation.

(2) *Figure 55.07-15 (f2).* 150-pound and 300-pound low-hubbed flanges with screwed threads plus the addition of a strength fillet weld of the size as shown may be used for class I piping without diameter limitation for temperatures not exceeding 750° F., subject to the pressures and temperatures as given in Table 55.07-15 (e12).

(3) *Figure 55.07-15 (f3).* 150-pound and 300-pound slip-flanges may be used for class I piping for temperatures not exceeding 450° F. For Class II piping slip-on flanges may be used for pressures and temperatures not exceeding the limitations as given in table 55.04-5.

(4) *Figure 55.07-15 (f4).* Socket welding flanges may be used for class I piping of nominal pipe size not exceeding 2 inches. For class II piping, socket welding flanges may be used without diameter limitation.

(5) *Figure 55.07-15 (f5).* Flanges machined from steel plate meeting the requirements of subpart 51.22 may be used for class II piping for pressures not exceeding 125 pounds per square inch and temperatures not exceeding 450° F. The machined flanges shall comply with table 55.07-15 (e5).

(6) *Figure 55.07-15 (f6).* Steel plate flanges meeting the material and construction requirements listed in figure 55.07-15 (f5) may be used for class II piping for pressures not exceeding 150 pounds per square inch or temperatures not exceeding 650° F. The flange shall be attached to the pipe as shown by figure 55.07-15 (f6). For temperatures exceeding 500° F. the pressure shall not exceed that permitted by table 55.07-15 (e12).

(7) *Figure 55.07-15 (f7).* Lap joint flanges (Van Stone) may be used for class I and class II piping. The Van Stone equipment shall be operated by qualified personnel and the ends of the pipe shall be heated from 1,650° F. to 1,900° F. dependent upon the size of the pipe prior to the flanging operation. The foregoing temperatures shall be carefully adhered to in order to prevent excess scaling of the pipe. The extra thickness of metal built up in the end of the pipe during the forming operation shall be machined to restore the pipe to its original diameter. The machined surface shall be free from surface defects and the back of the Van Stone lap shall be machined to a fine tool finish to furnish a line contact with the mating surface on the flange for the full circumference as close as possible to the fillet of the flange. The number of heats to be used in forming a flange shall be determined by the size of the pipe and not more than two push-ups per heat are permitted. The width of the lap flange shall be at least three times the thickness of the pipe wall and the end of the pipe shall be properly stress-relieved after the flanging operation is completed. Manufacturers desiring to employ this type of joint shall demonstrate to an inspector that they have the proper equipment and personnel to produce acceptable lap joints.

(8) *Figure 55.07-15 (f8).* Welding neck flanges may be used on any piping provided the flanges are butt-welded to the pipe. The joint shall be welded as indicated by figure 55.07-15 (f8) and a backing ring employed which will permit complete penetration of the weld metal.

(9) *Figure 55.07-15 (f9).* Welding neck flanges may also be attached to pipe by a double-welded butt joint as shown by figure 55.07-15 (f9).

(10) *Figure 55.07-15 (f10).* Flanges may be attached by shrinking the flange on to the end of the pipe and flaring the end of the pipe to an angle or not less than 20°. A fillet weld of the size shown by figure 55.07-15 (f10) shall be used to attach the hub to the pipe. This type of flange is limited to a maximum pressure of 300 pounds per square inch at temperatures not exceeding 500° F.

(11) *Figure 55.07-15 (f11).* The flange of the type described and illustrated by figure 55.07-15 (f10), except with the fillet weld omitted, may be used for class II piping for pressures not exceeding 150 pounds per square inch and temperatures not exceeding 450° F.

(12) *Figure 55.07-15 (f12).* High-hub bronze flanges may be used for temperatures not exceeding 406° F. The hub of the flange shall be bored to a depth of not less than that required for a threaded connection of the same diameter leaving a shoulder for the pipe to butt against. A preinserted ring of silver brazing alloy having a melting point of not less than 1,000° F. and of sufficient quantity to fill the annular clearance between the flange and the pipe shall be inserted in the groove. The pipe shall then be inserted in the flange and sufficient heat applied externally to melt the brazing alloy until it completely fills the clearance between the hub and the flange of the pipe. A suitable flux shall be applied to the surfaces to be joined to produce a satisfactory joint. (For clearances of silver soldered joints, see § 56.10–30 (e) of this chapter.)

(13) *Figure 55.07–15 (f13).* The type of flange as described for figure 55.07–15 (f12) may be employed and in lieu of an annular groove being machined in the hub of the flange for the preinserted ring of silver brazing alloy, a bevel may be machined on the end of the hub and the silver brazing alloy introduced from the end of the hub to attach the pipe to the flange. (For clearances of silver soldered joints, see § 56.10–30 (e) of this chapter.)

(14) *Figure 55.07–15 (f14).* Flanges may be attached to nonferrous pipe by inserting the pipe in the flange and flanging the end of the pipe into the recess machined in the face of the flange to receive same. The width of the flange shall be not less than three times the pipe wall thickness. In addition thereto, the pipe shall be securely brazed to the wall of the flange. This flange is limited to a maximum temperature of 406° F.

(15) *Figure 55.07–15 (f15).* The flange of the type described and illustrated by figure 55.07–15 (f14), except with the brazing omitted, may be used for class II piping and where the temperature does not exceed 250° F.

§ 55.07-20 *Bolting.* (a) Valves, fittings and flanges for piping systems shall have bolting complying with the standards for the various pressure ratings as given in tables 55.07–15 (e1) to 55.07–15 (e11), inclusive. For the design requirements of bolted flanged connections on pressure vessels, see § 54.03-25 of this subchapter.

(b) Bolting material shall comply with the requirements of § 54.03–25 of this subchapter.

§ 55.07-25 *Installation.* (a) Slip joints shall not be used in cargo holds, deep tanks, and in other places that are not always accessible, except that they may be used in cargo lines of tank vessels. Where used, slip joints shall be provided with positive means for preventing the end of the pipe from pulling out of the joint.

(b) Pumps used to transfer oil shall have no discharge connections to firemains, boiler feed systems, or condensers unless approved positive means are provided to prevent oil from being accidentally discharged into any of the aforementioned systems.

(c) Piping may be run through deep tanks or fuel tanks, provided a pipe tunnel is installed. Where a pipe tunnel is installed, the watertight integrity of the bulkheads shall be maintained, and if the tunnel is not of sufficient size to afford easy access, no valve or fitting shall be located therein. Bilge and ballast piping may be run through such tanks without a pipe tunnel, where the thickness of the piping is not less than Schedule 80, expansion bends are fitted, and all joints within the tanks are welded.

(d) Where pipes are carried through watertight or oiltight bulkheads, decks or tank tops, the watertight integrity of the structure shall be maintained. Where plate insert pads are used, bolted connections shall have threads tapped into the plate to a depth of not less than the diameter of the bolt. If welded, the pipe or flange shall be welded to both sides of the plating. Openings in structure through which pipes pass shall be reinforced where necessary. Flanges shall not be bolted to bulkheads so that the plate forms a part of the joint.

(e) Piping shall not be run over or in the vicinity of switchboards or other electrical equipment if avoidable. When such leads are necessary, welded joints only shall be used and provision shall be made to prevent leakage from damaging the equipment.

(f) Fresh water piping shall not run through oil tanks nor oil piping through fresh water tanks. Care should be taken to prevent the accidental contamination of fresh water from salt water lines.

(g) Stuffing boxes shall not be used on deep tank bulkheads, double bottoms or in any position where they cannot be easily examined. This requirement does not apply to ore carriers operating on the Great Lakes or cargo lines of oil tankers.

(h) Piping systems shall be installed so that under no condition will the operation of safety or relief valves be impaired.

(i) (1) Remote valve controls which are not readily identifiable as to service shall be fitted with name plates. Remote valve controls shall always be accessible under service conditions and an indicator shall be fitted to show whether the valve is open or closed. Valve control rods shall be adequately protected and only solid reach rods shall be used in tanks containing liquids, except that tank barges having plug cocks inside cargo tanks may have reach rods of extra heavy pipe with annular space between the lubricant tube and the pipe wall sealed with a non-soluble material to prevent penetration of the cargo.

(2) Where air operated remote control valves are installed, a self-indicating air cock and a pressure gauge or other acceptable means shall be provided in the actuating line to the remote valve as close as possible to the control board to indicate whether the remote control valve is open or closed.

(j) Suitable drains shall be provided at low points of piping systems.

(k) Valves and cocks shall be located so as to be easily accessible and valves or cocks attached to the shell of the vessel or to sea chests located below the floor plating shall be operable from above the floor plates.

(l) When welded fabrication is employed, a sufficient number of detachable joints shall be provided to facilitate overhauling and maintenance of machinery and appurtenances. The joints shall be located so that adequate space is provided for welding, and the location of the welds shall be indicated on the plans.

(m) Pipes piercing the collision bulkhead shall be fitted with screw-down valves operable from above the bulkhead deck and the valve shall be secured to the bulkhead fitting inside the forepeak tank. Passenger vessels shall not have the collision bulkhead pierced below the margin line by more than one pipe conveying liquids in the forepeak tank.

(n) Valves and cocks not forming part of a piping system are not permitted in watertight subdivision bulkheads.

(o) (1) Piping systems which may be subjected to pressures exceeding that for which same are designed shall be provided with a pressure reducing valve, and on the low pressure side of the reducing station a relief valve and pressure gauge shall also be installed.

(2) The relief valves installed on reduced pressure lines shall have a relieving capacity at least equal to the capacity of the pressure reducing valve at a pressure of not more than the design pressure of the reduced pressure piping or any appurtenance thereof, whichever is the lesser.

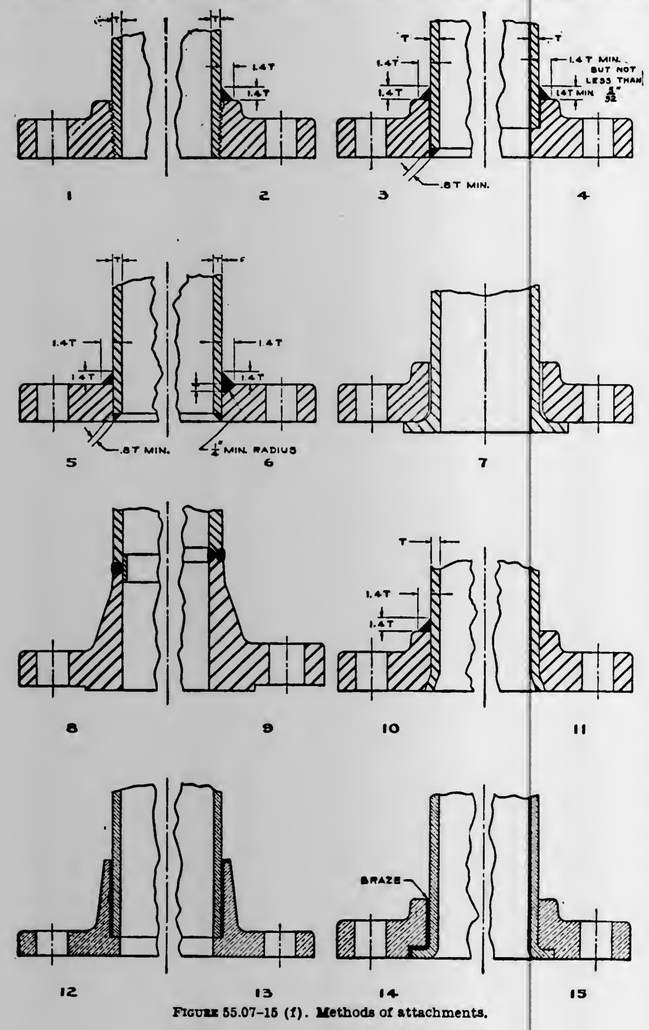

FIGURE 55.07-15 (f). Methods of attachments.

(p) Fuel oil service, cargo and fuel oil transfer and boiler feed pumps shall be provided with a pressure gauge. Relief valve shall also be installed in the discharge line provided the piping system or appurtenances are not designed for the pressure which such pumps are capable of developing when operating under shut-off head.

(q) Valves for fuel oil equalizing lines in machinery spaces shall comply with § 55.10–35 (d). Where flooding equalizing cross-connections are required for stability considerations, the arrangement shall be approved by the Commandant.

(r) Where pipes are run through cargo spaces and coal bunkers, they shall be substantially encased to protect them from mechanical injury. In coal bunkers such casings shall be made of steel.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. SUBPART 55.10—PUMPING ARRANGEMENTS AND PIPING SYSTEMS

2. Section 55.10–10 is amended to read as follows:

§ 55.10–10 *Boiler feed piping.*—(a) *General requirements.* (1) Steam vessels shall have at least two entirely separate means of supplying feed water for power boilers, except donkey boilers and installations where the unit feed system is employed. All feed pumps shall be fitted with the necessary connections for this purpose.

(2) Feed pump supply to power boilers may utilize the group feed system or the unit feed system.

(3) Feed discharge piping shall be designed for not less than either (i) 125 percent of the maximum allowable pressure of the boiler; or (ii) the feed pump relief valve setting, or shut-off head when a pump relief valve is not fitted; whichever is the greater.

(4) Feed pumps for water tube boilers shall have fresh water connections only.

(b) *Feed valves.* (1) Stop and stop-check valves shall be fitted in the main feed line and shall be attached as close as possible to the drum feed inlet nozzles or to the economizer feed inlet nozzles on boilers fitted with integral economizers.

(2) Where the installation will not permit the feed stop valve to be attached directly to the drum inlet nozzle on boilers not fitted with economizers, a distance piece may be installed between the stop valve and the inlet nozzle.

(3) Consideration will be given by the Commandant to the location of the feed stop or stop-check valves near the operating platform on boilers fitted with economizers, provided the piping between the valves and the economizer is installed without intervening flanged connections and all butt-welded joints 4 inches and above in diameter are radiographed the full circumference of the welds are required by § 56.05–5 of this subchapter.

(4) Auxiliary feed lines shall be fitted with stop valves and stop-check valves. Boilers not having auxiliary feed water nozzles, or where independent auxiliary feed lines are not installed, shall have the auxiliary feed line to the drum or economizer connected to the main feed line as close as possible to the main feed stop valves; and the valves in the auxiliary feed line shall be fitted as close as possible to the junction point.

(5) Boilers fitted with economizers shall have a check valve fitted in the economizer discharge and located as close as possible to the drum feed inlet nozzle. When economizer by-passes are fitted, a stop-check valve shall be installed in lieu of the aforementioned check valve.

(6) A sentinel valve shall be fitted to an economizer when a by-pass is installed.

(c) *Feed-water regulators, feed-water heaters and grease extractors.* (1) Feed-water regulators, feed-water heaters, and grease extractors, where installed, shall be fitted with by-passes.

(2) Feed-water regulators designed with a built-in by-pass for emergency use need not be fitted with an external by-pass when installed in a feed system provided with an auxiliary feed line. All feed-water regulators installed in a unit feed system shall be fitted with an external by-pass. Feed-water regulator by-passes shall be so arranged that the regular feed valves are in operation while the by-pass is in use.

(3) A feed-water regulator may be interposed between the stop and stop-check valves in the feed lines.

(d) *Group feed system.* Group feed systems shall be provided with pumps and piping as follows:

(1) Ocean-going and Great Lakes steam vessels, having a feed pump attached to the main propelling unit, shall be provided with at least one independently driven feed pump. Each of these pumps shall be used exclusively for feed purposes and shall be capable of supplying the operating boilers at their normal capacity. In addition, a second independently driven pump, capable of supplying such boilers at 75 percent of their normal capacity, shall be provided for emergency use. This second pump may be used for other purposes.

(2) If two independently driven pumps are provided, each capable of supplying the operating boilers at their normal capacity, and neither of which is used for other purposes, the third or emergency feed pump is not required.

(3) River or harbor steam vessels shall have at least two means for feeding the boilers; one of which shall be an independently driven pump, the other may be an attached pump, an additional independently driven pump, or an injector.

(e) *Unit feed system.* Unit feed systems shall be provided with pumps and piping as follows:

(1) The unit feed system may be used on vessels having two or more boilers. When the unit feed system is employed each boiler shall have its own independently driven main feed pump capable of supplying the boiler at its normal operating capacity. In addition there shall be an auxiliary independently driven feed pump of the same capacity which can be operated in place of and in conjunction with the main feed pump. In vessels with two boilers there shall be provided one auxiliary pump for each boiler. In vessels with three or more boilers, not more than two boilers may be served by any one auxiliary pump. The auxiliary pump may be so interconnected that any pump can feed any boiler.

(2) In the unit feed system, a separate feed line shall be provided for each boiler from its pumps. A separate auxiliary feed line is not required. The discharge from each pump and the feed supply to each boiler shall be automatically controlled by the level of the water in that boiler. In addition to the automatic control, manual control shall be provided.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

3. Section 55.10–15 (b) is amended to read as follows:

§ 55.10–15 *Blow-off piping.* • • •

(b) Blow-off piping external to the boiler shall be designed for not less than 125 percent of the maximum allowable pressure of the boiler.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

4. Sections 55.10–25 and 55.10–30 are amended to read as follows:

§ 55.10–25 *Bilge and ballast piping.*

(a) All vessels shall be provided with a satisfactory pumping plant capable of pumping from and draining any watertight compartment under all practical conditions after a casualty when the vessel is upright or listed. For this purpose wing suctions will generally be necessary except in narrow compartments at the ends of the vessel. Arrangements shall be made whereby water in the compartments will drain to the suction pipes. Efficient means shall be provided for draining water from all tank tops, other watertight flats and holds. Peak tanks, chain lockers and decks over peak tanks may be drained by eductors, ejectors or hand pumps. Where piping is led through the forepeak bulkhead, see § 55.07–25 (m).

(b) Passenger vessels shall have provision made to prevent the compartment served by any bilge suction piping from being flooded in the event the pipe is severed or otherwise damaged by collision or grounding in any other compartment. Where the piping is located within one-fifth of the beam of the side

of the vessel[1] or in a ductkeel, a nonreturn valve shall be fitted to the end of the pipe in the compartment which it serves.

(c) (1) Bilge suctions shall be led from manifolds, which shall be controlled above the floor plating in the compartment in which they are located, and shall be easily accessible at all times. Valves in the machinery space controlling bilge suctions from various compartments shall be of the stop-check type.

(2) Passenger vessels shall have the bilge manifolds arranged so that in the event of flooding, one of the bilge pumps can take suction from any compartment. If a bilge system common to all pumps is installed, the necessary valves for controlling the bilge suctions shall be operable from above the bulkhead deck. If, in addition to the main bilge pumping system, an emergency bilge pumping system is installed, it shall be so arranged that the emergency bilge pump may take suction from any flooded compartment.

(d) The internal diameter of bilge suction pipes shall be determined by the following formulas, except that the nearest commercial size not more than one-fourth inch under the required diameter may be used.

(1) For suctions to each main bilge pump:

$$d=1+\sqrt{\frac{L\ (B+D)}{2,500}} \qquad (1)$$

(2) For branch suctions to cargo and machinery spaces:

$$d=1+\sqrt{\frac{c\ (B+D)}{1,500}} \qquad (2)$$

where:

L = length of vessel, in feet on load water line.
B = breadth of vessel, in feet.
D = molded depth to bulkhead deck, in feet.
c = length of compartment, in feet.
d = required internal diameter of suction pipe, in inches.

NOTE: For tankers L may be reduced by the combined length of the cargo oil tanks.

(3) No main suction piping shall be less than 2½ inches internal diameter. No branch piping need be more than 4 inches nor less than 2 inches in diameter except for drainage of small pockets or spaces in which case 1½ inches diameter may be used.

(4) For vessels of 65 feet in length or less and not engaged on an international voyage, the bilge pipe sizes computed by formulas (1) and (2) of this paragraph are not mandatory, but in no case shall the size be less than 1 inch nominal pipe size.

(5) The number, location and size of bilge suctions in the boiler and machinery compartments shall be determined when the piping plans are submitted for approval and shall be based upon the size of the compartments and the drainage arrangements.

(e) One of the independent bilge pumps shall have a suction of a diameter not less than that given by formula (2) led directly from the engine room bilge entirely independent of the bilge main, and on passenger vessels each independent bilge pump located in the machinery spaces shall have such direct suctions from these spaces, except that not more than two pumps are required to have direct suctions from any one space. Where two direct suctions are required in any one compartment on passenger vessels, one suction shall be located on each side of the compartment. If watertight bulkheads separate the engine and boiler rooms, a direct suction or suctions shall be fitted to each compartment unless the pumps available for bilge service are distributed throughout these compartments, in which case at least one pump in each such compartment shall be fitted with direct suctions in its compartment.

(f) Main circulating pumps shall be fitted with direct suction connections provided with nonreturn valves in the machinery space. Great Lakes cargo vessels may have the emergency bilge suction connected to the largest available pump in the machinery space, provided it has a capacity not less than that of the main circulating pump. The diameter of such suction pipes shall be not less than two-thirds of the diameter of the main sea inlet. Where coal is used as fuel and no watertight bulkhead is provided between the engine and boiler rooms, a direct discharge overboard shall be fitted from at least one circulating pump, or a by-pass may be fitted to the circulating discharge.

(g) For internal-combustion engine installations, the emergency bilge suction shall be connected to the largest available pump in the engine room and shall have an area equal to the full suction inlet of the pump. This requirement is in addition to the independent bilge suction stipulated in paragraph (e) of this section.

(h) Each individual bilge suction shall be fitted with a suitable bilge strainer having an open area of not less than three times that of the suction pipe. In addition a mud box or basket strainer shall be fitted in an accessible position between the bilge suction manifold and the pump.

(i) Pipes for draining cargo or machinery spaces shall be separate from pipes which are used for filling or emptying spaces where water or oil is carried and shall be controlled by separate valves at the pumps so arranged as to preclude the entrance of water or oil into cargo or machinery spaces. The requirements of this paragraph do not apply to bilge and ballast systems on Great Lakes cargo vessels which may employ a common line for the bilge and ballast system for the cargo spaces.

(j) Bilge and ballast pumping systems shall be so arranged as to prevent water from the sea or from ballast spaces from entering cargo or machinery spaces, or from passing from one compartment to another. Blind flanges or reversible pipe fittings may be employed for blanking-off oil and ballast lines when cargo is carried in deep tanks, or for blanking-off the bilge suctions when oil is carried.

§ 55.10–30 *Bilge pumps*—(a) *Self-propelled vessels.* (1) All self-propelled vessels shall be provided with power pumps connected to the bilge main as required in table 55.10–30 (a).

TABLE 55.10-30 (a)—POWER BILGE PUMPS REQUIRED FOR SELF-PROPELLED VESSELS

Vessel length	Passenger vessels			Dry cargo vessels		Tank vessels
	International voyage [2]	Ocean, coastwise, and Great Lakes	All other	Ocean, coastwise, and Great Lakes	All other	All
180 feet or more	[3] 3	[3] 3	2	[4] 3	[4] 2	2
Below 180 feet and exceeding 65 feet	[3] 3	[3] 2	[3] 2	[4] 2	[4] 2	2
65 feet or less	[3] 3	[3] 1	[3] 1	[4] 1	[4] 1	[5] 1

[1] Not applicable to passenger vessels which do not proceed more than 20 miles from the nearest land, or which are employed in the carriage of large numbers of unberthed passengers in special trades.
[2] When the criterion numeral exceeds 30 on passenger vessels, an additional independent power driven bilge pump is required. (See Part 46 of Subchapter E (Load Lines) of this chapter for determination of criterion numeral.)
[3] Vessels operating on lakes (including Great Lakes), bays, sounds, or rivers where steam is always available, or where suitable water supply is available from a power pump of adequate pressure and capacity, syphons or eductors may be substituted for one of the required power pumps, provided a syphon or eductor is permanently installed in each hold or compartment.
[4] Two acceptable hand pumps may be substituted for one of the independent power pumps.

(2) On passenger vessels 300 feet or more in length engaged in international voyages, or passenger vessels 180 feet or more in length and operating more than 200 miles offshore, or on all passenger vessels having a criterion numeral of 30 or more, one of the power bilge pumps shall be available at all times for use under emergency conditions in which a vessel may be flooded at sea. One of the following installations will be considered as complying with the requirements of this paragraph.

(i) One of the required bilge pumps is an emergency pump of a reliable submersible type, the source of power for which shall be located above the bulkhead deck; or,

(ii) The bilge pumps and their sources of power are located throughout the ship so that under any condition of flooding which the vessel is required to withstand, at least one pump will be available in an undamaged compartment.

(3) One of the required power bilge pumps may be attached to the propelling engine.

(4) The bilges forward of the cargo tanks on tank ships may be drained by a power or hand pump, syphons, or eductors. If syphons or eductors are employed, the same shall be permanently installed in each compartment.

(5) On Great Lakes cargo vessels which do not employ a common bilge main, the pumps used for bilge suction are not required to be connected to a bilge main.

(b) *Non-self-propelled vessels.* (1) Oceangoing sailing vessels and barges shall be provided with pumps connected to the bilge main as required in table 55.10–30 (b).

TABLE 55.10-30 (b)—BILGE PUMPS REQUIRED FOR NON-SELF-PROPELLED VESSELS

Type of vessel	Waters navigated	Power [1] pumps	Hand pumps
Sailing	Ocean and coastwise	2	[2]
Manned barges	do	2	[2]
Unmanned barges	All	[2]	[2]

[1] Where power is always available, independent power bilge pumps shall be installed as required and shall be connected to the bilge main.
[2] Efficient hand pumps connected to the bilge main may be substituted for the power pumps. Where there is no common bilge main, one hand pump will be required for each compartment.
[3] Suitable hand or power pumps or syphons, portable or fixed, carried either on board the barge or on the towing vessel shall be provided.

(2) The pumps and source of power for operation on oceangoing sailing vessels and barges shall be located above the bulkhead deck or at the highest convenient level which is always accessible.

(c) *Capacity of independent power pumps.* Each independent power pump shall have a capacity developing a suction velocity of not less than 400 ft. per minute through the size of pipe required by § 55.10–25 under ordinary conditions, except that for vessels of less than 65 feet in length not engaged on international voyages the pump shall have a minimum capacity of 50 gallons per minute and need not meet the velocity requirement of this paragraph.

(d) *Priming.* Suitable means shall be provided for priming centrifugal pumps which are not of the self-priming type.

(e) *Location.* The power bilge pumps on passenger vessels shall be located in separate watertight compartments and so arranged that these compartments will not readily be flooded by the same damage. If the engines and boilers are in two or more watertight compartments, the bilge pumps shall be distributed throughout these compartments. When the location of bilge pumps in separate watertight compartments is not possible, the Commandant will consider alternate arrangements of the bilge pumps.

(f) *Other pumps.* Sanitary, ballast, and general service pumps having the required capacity may be accepted as independent power bilge pumps if fitted with the necessary connections to the bilge pumping system.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

5. Section 55.10–40 (b) is amended to read as follows:

§ 55.10–40 *Fuel oil service systems.* • • •

(b) (1) All vessels having oil fired power boilers shall have at least two fuel oil service pumps each of sufficient capacity to supply all the boilers at full power, and arranged so that one may be overhauled while the other is in service. At least two fuel oil heaters of approximately equal capacity shall be installed and so arranged that any heater may be overhauled while the other(s) are in service. Suction and discharge strainers shall be of the duplex or other type capable of being cleaned without interrupting the oil supply.

(2) Vessels having auxiliary package boilers not exceeding 3000 pounds per hour generating capacity may be equipped with a single fuel oil service pump and single fuel oil heater, and in addition such pumps need not be fitted with discharge strainers.

(3) Boilers burning fuel oils of low viscosity need not be equipped with fuel oil heaters, provided acceptable evidence is furnished to indicate that satisfactory combustion will be obtained without the use of heaters.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

6. Section 55.10–55 is amended to read as follows:

§ 55.10–55 *Lubricating oil system.* (a) The lubricating oil system shall be designed to function satisfactorily when the vessel is permanently inclined to an angle of 15 degrees athwartship and 5 degrees fore or aft.

(b) When pressure or gravity forced lubrication is employed for the main propelling machinery an independent lubricating pump shall be provided except on internal combustion engine installations where each engine is fitted with a separate oil pump and the Commandant deems an auxiliary oil pump is unnecessary.

(c) The lubricating oil piping shall be independent of other piping systems and shall be provided with necessary coolers, heaters, filters, etc., for proper operation. Main propulsion engines fitted with full-flow type filters shall be arranged so that the filters may be cleaned without interrupting the oil supply.

(d) Oil coolers shall be provided with two separate means of circulating water through the coolers and oil heaters shall be fitted with by-passes.

(e) Diesel engine lubrication systems shall be so arranged that vapors from the sump tank may not be discharged back into the engine crank case of engines of the dry sump type.

(f) Steam turbine driven propulsion and auxiliary generating machinery depending on forced lubrication shall be arranged to shut down automatically upon failure of the lubricating system.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

7. Section 55.10–65 (a) is amended to read as follows:

§ 55.10–65 *Sounding pipes.* (a) Oil tanks and water tanks shall be provided with manual means of sounding. All other tanks and hold compartments with or without bilge drain wells which are not at all times accessible under service conditions shall be fitted with sounding pipes of not less than 1½-inch pipe size which shall be led as straight as possible to within 2 inches of the lowest part of the tank or compartment to a position which is always accessible. In addition, tank liquid level indicators may be fitted as an auxiliary means of indicating the liquid level.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

SUBPART 55.13—REFRIGERATION SYSTEMS

8. Sections 55.13–1 and 55.13–5 are amended to read as follows:

§ 55.13–1 *Scope.* The regulations in this subpart apply to fixed refrigeration systems. The requirements shall not apply to small, portable self-contained units.

§ 55.13–5 *Design pressure.* The pressure vessels, compressors, piping, and controls shall be designed for the minimum pressures given in table 55.13–5.

TABLE 55.13–5—REFRIGERANT DESIGN PRESSURES

Refrigerant	Design pressure	
	High side (p. s. i.)	Low side (p. s. i.)
Ammonia (NH_3)	300	150
Carbon dioxide (CO_2)	1,500	1,000
Freon-11 (CCl_3F)	30	30
Freon-12 (CCl_2F_2)	225	150
Freon-21 ($CHCl_2F$)	50	40
Freon-22 ($CHClF_2$)	[1] 300	[1] 150
Freon-113 ($C_2Cl_3F_3$)	30	30
Freon-114 ($C_2Cl_2F_4$)	50	50

[1] Permitted for watercooled installations only.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

9. Section 55.13–20 *Small portable, self-contained units* is canceled.

PART 56—ARC WELDING, GAS WELDING, AND BRAZING

SUBPART 56.01—ARC WELDING AND GAS WELDING

1. Sections 56.01–1 and 56.01–5 are amended and Part 56 is amended by adding a new § 56.01–3, which reads as follows:

[1] Measured at right angles to the center line at the level of the deepest subdivision load line or deep load line, where subdivision load line is not assigned.

§ 56.01–1 *Scope.* This part contains detail requirements covering the welded fabrication of machinery appurtenances and pressure-containing parts such as boilers, boiler furnaces, unfired pressure vessels, piping, valves, pipe fittings, etc., subject to inspection by the Coast Guard.

§ 56.01–5 *Definitions*—(a) *Welding terms.* All references in this part or on plans, specifications, etc., to welding or allied processes shall be understood to be those of the American Welding Society's A3.0–49 "Welding Terms and Their Definitions." [1]

(b) *Fabrication.* The term "fabrication" as used in this part refers to the assembly of machinery and appurtenances by welding, cutting and other processes allied to welding.

(c) *Welding procedure.* The term "welding procedure" refers to the detailed methods and practices including joint welding procedures involved in the production of a weldment.

(d) *Welding process.* Welding process is a metal-joining process wherein coalescence is produced by heating to suitable temperatures with or without the application of pressure, and with or without the use of filler metal.

§ 56.01–8 *Plan approval.* Plans shall clearly show all essential fabrication details. Welded or brazed joints shall be clearly and completely detailed on the plans, or standard welding symbols as specified in the American Welding Society's Standard A2.0–47, "Standard Welding Symbols" [1] shall be used to designate the type and size of welds.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

2. Sections 56.01–15 and 56.01–20 are amended to read as follows:

§ 56.01–15 *Submerged arc welding procedure qualification.* (a) Fabricators desiring to use the submerged arc welding process or a combination of submerged arc and manual welding processes shall conduct a procedure qualification test to insure that they have proper equipment, trained personnel, and are using correct procedure to produce acceptable welds.

(b) The deposited weld metal may be laid in single or multiple passes. The joint design, amperage, voltage, speed of welding, size of welding wire and grade of melt or flux shall be in accordance with the recommendations of the welding equipment manufacturer.

(c) Manufacturers desiring to secure process approval to fabricate pressure vessels, pipe and pressure-containing appurtenances by the use of the submerged arc welding process shall prepare test plates in the presence of an inspector who will stamp the plates with the official stamp of the Coast Guard. Specimens as required by table 56.01–15 (c) shall be machined from the test plate.

[1] These standards included in American Welding Society Handbook.

TABLE 56.01–15 (c)—REQUIRED TESTS FOR PLATE GROOVE WELDS

Test plate thickness T	Maximum production plate thickness	Number and type of tests required				
		Reduced section tensile	Root bend	Face bend	Side bend	Macro-etch
3/16 inch to and including 3/4 inch.	2T	2	2	2		1
Over 3/4 inch	2T for multiple pass welding	2			4	1
	2T but not over 2 inches for welding 1 pass from each side.	2			4	1
	T for welding from 1 side only against a copper or melt back-up.	2			4	1

(d) The test plate material shall be of the type to be welded in production and of a thickness as shown in table 56.01–15 (c). The requirements specified in this section are applicable to materials having equivalent physical properties. If preheat is not used in production welding, it shall not be used in the preparation of the test plate. If it is desired to conduct a procedure qualification to weld metals of dissimilar physical properties, the fabricator shall so inform the Commandant who will designate the types and methods of tests.

(e) Specimens may be tested by the fabricator or at a recognized testing laboratory. Specimens shall meet the requirements of § 56.05–1 and shall be tested in the presence of an inspector. One retest will be permitted for each specimen failing to meet the requirements. Should the retest fail, the fabricator shall take suitable remedial action to insure that the procedure is correct prior to the preparation of an additional set of test plates.

(f) The macro-etch specimen with the weld reinforcement in place shall be etched with a reagent which will clearly define the weld grain structure. After the specimen is etched it shall be given a protective coating to prevent oxidation.

(g) Results of the physical tests, the etch specimen and a sketch showing joint preparation, together with the information required in paragraph (b) of this section shall be forwarded to the Commandant for consideration prior to the fabricator using the equipment in production.

(h) The fabricator shall prepare a specification covering the procedure qualification as used in preparing the test plate and shall furnish a copy to the inspector. The procedure used in qualifying shall be employed in a fabrication except that speed of welding, amperage and voltage may vary to suit different material thicknesses. If the joint design is changed or alloy steel is to be fabricated and carbon steel used in the preparation of the test plate, a new procedure qualification shall be conducted.

(i) The fabricator shall weld a test plate of the actual thickness to be used in production to demonstrate to an inspector that he is using the proper welding procedure to obtain complete penetration.

§ 56.01–20 *Arc welding electrodes.* (a) Acceptable brand names of arc welding electrodes, as published in the Equipment List for Merchant Vessels, CG–190, shall be used in the welded fabrication of machinery appurtenances and pressure-containing parts as given in § 56.01–1.

(b) Type E6012 or E6013 electrodes shall not be used in the fabrication of any item listed in paragraph (a) of this section.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

3. Section 56.01–50 (d) is amended by revising figure 56.01–50 (d) as follows:

§ 56.01–50 *Detail requirements.* • • •

(d) • • •

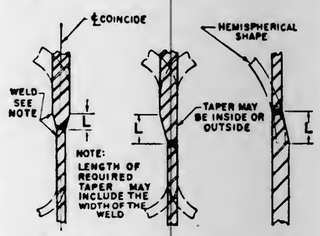

FIGURE 56.01–50 (d)—Types of joints for material of unequal thicknesses.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

4. Section 56.01–55 (b) is amended to read as follows:

§ 56.01–55 *Joints.* • • •

(b) The longitudinal joints of Class III welded pressure vessels shall be as given in § 56.01–30. The weld reinforcement shall be as required in paragraph (a) of this section. Fillet welds of lap type joints shall have a throat dimension of not less than $\frac{5}{8}$ T, where T is the thickness of the shell plate. The surface of the overlap shall be not less than $4T$.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as

amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

5. Section 56.01–60 *Welded nozzle connections* is canceled.

6. Sections 56.01–65 and 56.01–70 are amended to read as follows:

§ 56.01–65 *Seal welding and tack welding.* (a) Seal welding may be used for the purpose of securing tightness of connections where the structure is such that no strain is placed upon the weld. Seal welding consists of depositing not more than two beads of weld metal. The throat of the weld shall not exceed ¼ inch and the size of the electrode employed shall not exceed 3/16 inch diameter. Seal welds are not required to be stress-relieved.

(b) Intermittent welding may be used for attaching internal baffles, strainers, external lugs, securing lagging, etc., provided the welds are of at least two passes, do not have a throat exceeding ¼ inch, are not more than 3 inches in length and have a center to center distance of at least twice their length.

(c) Intermittent welding and seal welding shall be done by qualified welders using acceptable electrodes (see § 56.01–20). Intermittent or seal welding shall not be done when the temperature of the metal of a pressure vessel is below 50° F. unless the base metal is preheated and held at a temperature of at least 200° F.

§ 56.01–70 *Preheating and stress relieving.* (a) All Class I welded pressure vessels unless specifically exempted in other sections of this subchapter, shall be stress-relieved to dissipate the major portion of the residual stresses.

(b) Stress relieving shall be done by heating the weldment slowly and uniformly to a temperature of from 1,100° F. to 1,200° F. for carbon-steel and held at that temperature for a period of time proportioned on the basis of at least one hour per inch of thickness and allowed to remain in the furnace until 500° F. is reached at which time the weldment may be withdrawn and allowed to cool in a still atmosphere. When a weldment of various thicknesses of material is stress-relieved, the thickest section of the parts welded shall govern the length of time required for soaking. Pressure vessels fabricated of carbon-steel exceeding ½-inch in thickness shall be preheated locally to 125° F., prior to welding, when the ambient temperature is below 50° F. Alloy materials usually require different stress-relieving temperatures due to different chemical properties of the material. The heat treatment covering preheating and stress relieving to be employed on the latter types of materials shall be in accordance with the recommendations of the manufacturer of the material and as specifically approved by the Commandant.

(c) When the vessel is required to be stress-relieved, all connections attached by arc or gas welding unless specifically exempted shall also be stress-relieved as required by this part.

(d) Local stress relieving of welds shall be performed by means of electrical inductance, electrical resistance, or other acceptable means whereby the temperature is accurately controlled. When a type of stress relief is used that produces direct radiation, the thermocouple shall be insulated so that the hot junction of the thermocouple will not be subject to the heat of radiation. Pyrometric equipment shall be provided to indicate the hottest and coolest points of the weldment. If the weldment is of appreciable size, the number of thermocouples provided shall be sufficient to insure complete coverage. The temperature of the weldment shall be considered as being the average of the observed temperature.

(e) The stress relieving operations shall be indicated by pyrometric equipment. When an autographic record of local stress-relieving operations is made, this record shall be maintained by the fabricator.

(f) The weldment shall be stress-relieved by one of the methods as follows:

(1) Heating the complete structure as a unit.

(2) Heating a section containing the part or parts to be stress-relieved. In employing this method of stress relief direct flame impingement shall be avoided.

(3) Circumferential joints may be stress-relieved by uniformly heating a circumferential band having a minimum width of six times the material thickness on each side of the welded joint in such a manner that the entire band is brought up to the required temperature and held for the period specified in paragraph (b) of this section.

(4) Pipe shall be stress-relieved by heating a circumferential band having a width of at least 3 times the width of the widest part of the welding groove but not less than 6 times the maximum wall thickness at the weld with the weld at the center of the band. Where pipe is welded to a valve the heated zone may be decreased on the valve side of the joint to a minimum of one times the width of the weld reinforcement measured from the edge of the reinforcement toward the valve.

(5) Nozzles or other welded attachments which are required to be stress-relieved may be locally stress-relieved by heating a circumferential band around the entire vessel with the connection at the middle of the band to the required temperature and length of time specified for stress relieving. The band width shall be a minimum of six times the shell thickness on each side of the attachment.

(g) Except where specifically allowed in other sections in this subchapter, all nozzle connections after being attached by welding on Class I welded pressure vessels shall be stress-relieved.

(h) (1) Class II welded pressure vessels shall be stress-relieved if so required by figure 56.01–70 (h) or if fabricated of grade C or D marine steel boiler plate of a thickness exceeding 1 inch, or of

FIGURE 56.01–70 (h)—Stress relief diagram for class II pressure vessels.

grade E, F, or G marine steel boiler plate of a thickness of 0.58 inch and over.

(2) When class II welded pressure vessels are required to be stress-relieved, all nozzles or other welded attachments when joined by arc- or gas-welding shall be stress-relieved. When class II welded pressure vessels are not required to be stress-relieved, unreinforced nozzle connections and other attachments when joined by arc- or gas-welding are not required to be stress-relieved.

(3) When nozzles are reinforced with pads having a thickness greater than that of the shell or head to which they are attached, the nozzles shall be stress-relieved.

(i) Arc- or gas-welded connections may be added to class I and class II welded pressure vessels after they have been stress-relieved, without requiring stress-relief, provided:

(1) The diameter of the attachment opening in the vessel walls does not exceed that allowed for an unreinforced opening or does not exceed 2 inches, whichever is smaller; and,

(2) The inside and outside attachment welds do not exceed $\frac{3}{8}$ inch throat dimension.

(3) This paragraph does not apply to those connections so placed as to form ligaments in the shell, the efficiency of which will affect the shell thickness. Such added connections shall be stress-relieved.

(j) All connections attached by arc or gas welding to vessels fabricated by other means shall be stress-relieved in accordance with the requirements for connections on class II pressure vessels. If any such vessels are to be used for service equivalent to class I pressure vessels, arc- or gas-welded connections shall be stress-relieved.

(k) Arc- or gas-welded connections which require stress relieving and which are attached to vessels whose seams are of riveted construction shall be fabricated and stress-relieved prior to the making up or attachment of the courses by riveting. If they do not require stress relieving and are attached after riveting, the welds shall be located at a distance from the riveted seam at least equal to the diameter of the opening plus four times the plate thickness of the shell.

(l) All vessels containing lethal liquids or gases shall be stress-relieved. Any vessels containing liquids, gases or other substances which Part 38 (Subchapter D—Tank Vessels) or Part 146 or 147 (Subchapter N—Explosives or Other Dangerous Articles or Substances, and Combustible Liquids on Board Vessels) of this subchapter require to be fabricated in accordance with a class of pressure vessel requiring stress relief shall be stress-relieved.

(m) Cold weldments shall not be placed in the furnace when the temperature therein exceeds 500° F. Upon cooling, the weldment may be removed from the furnace when the temperature of same has reached 500° F. and allowed to cool in still air to assure a gradual decrease in temperature.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

6. Section 56.01–80 is amended to read as follows:

§ 56.01–80 *Welded piping.* (a) Piping materials complying with Part 51 of this subchapter may be joined by means of arc or gas welding provided the fabrication complies with the requirements of this section.

(b) The requirements of this section are applicable to class I piping (see Part 55 of this subchapter) and class II piping unless specifically exempted.

(c) Sections of pipe shall be welded insofar as possible in the fabricating shop. Prior to welding class I piping, the fabricator shall request an inspector to visit his plant to examine his fabricating equipment and to witness the qualification tests required by § 56.01–10. One test specimen shall be prepared for each process and welding position to be employed in the fabrication.

(d) (1) For class I piping, double-welded butt joints or single-welded butt joints fitted with a backing ring or its equivalent on the inside of the pipe shall be employed when the pipe diameter exceeds 2 inches, except as permitted in this paragraph. Piping of diameters not exceeding 2 inches may be joined by single-welded butt joints, with the backing ring omitted in sizes below 1 inch, or by sleeves fitted over the ends of pipes, or by socket joints attaching the ends of the pipes by strength fillet welds. Slip-on welded flanges complying with figure 55.07–15 (f3) and tables 55.07–15 (e5) and (e6) for 150-pound and 300-pound standards may be used in class I piping for temperatures not exceeding 450° F.

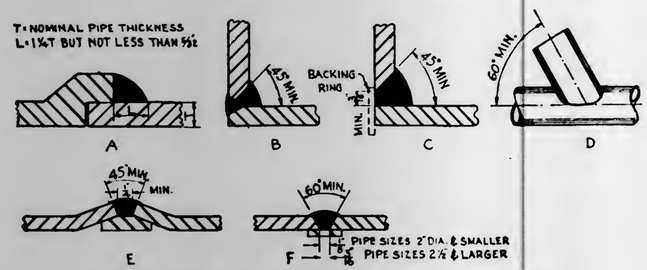

FIGURE 56.01–80 (d)—Acceptable types of welded pipe connections.

(2) Some acceptable types of weld pipe connections are shown in figure 56.01–80 (d).

(3) For carbon-steel material the backing ring for class I piping shall be of low-carbon steel and shall be of the plain type or a type with projections spaced intermittently around the outside of the periphery to establish a minimum root gap as shown in figure 56.01–80 (d), detail F. For alloy steel material the backing ring shall have heat resisting properties equivalent to that of the material being welded except carbon steel backing rings may be used when welding carbon-molybdenum material.

(e) For class II piping, the type of joints shall be similar to class I piping, with the following exceptions:

(1) Single-welded butt joints may be employed without the use of backing rings in all sizes provided that the weld is chipped or ground flush on the root side of the weld.

(2) For services such as vents, overflows, and gravity drains, the backing ring may be eliminated and the root of the weld need not be ground.

(3) Square-groove welds without edge preparation may be employed for butt joints in vents, overflows, and gravity drains where the pipe wall thickness does not exceed $\frac{3}{16}$ inch.

(4) The crimped or forged backing ring with continuous projection around the outside of the ring is acceptable only for class II piping.

(f) All butt welds shall be reinforced at the center of the weld by not less than 10 percent of the wall thickness for pipe or tubes for thicknesses not exceeding $\frac{5}{8}$ inch; pipes and tubes having a wall thickness exceeding $\frac{5}{8}$ inch shall be reinforced by at least $\frac{1}{16}$ inch. The reinforcement shall be free of grooves, valleys, or other changes in contour along the edge or upon the surface of the weld if the inspector deems such to be objectionable.

(g) Each butt-welded joint shall be stamped with the welder's identification symbol.

(h) All butt-welded joints on Class I piping exceeding 2½ inches in diameter with the exception of high pressure salt water piping systems used in tank cleaning operations shall be stress-relieved as required by § 56.01–70.

(i) All complicated connections including manifolds, shall be stress-relieved in a furnace as a whole as required by § 56.01–70 before being taken aboard ship for installation.

(j) Class I carbon-steel and alloy-steel piping exceeding 2½ inches in diameter shall be preheated as required by § 56.01–70.

(k) (1) All butt-welded joints on Class I piping exceeding 2½ inches in diameter, with the exception of high pressure salt water piping systems used in tank cleaning operations, shall be nondestructively tested as required by § 56.05–5.

(2) All welds shall be free of grooves and depressions. Surfaces of welded joints which are to be magnetic powder tested shall be made smooth of all surface irregularities so that the powder may properly indicate any fracture or defect.

(l) The base material and joint preparation for welding shall comply with the manufacturer's process record.

(m) A complete record of the manufacturer's process shall be maintained on the form shown by figure 56.01–80 (m) to establish definite limits of all essential variables involved. The manufacturer shall, after his welding process has been approved, conduct all welding in accordance with the requirements of his process record.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491 as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275)

SUBPART 56.05—TESTS AND INSPECTION

7. Part 56 is amended by adding a new § 56.05–6 reading as follows:

§ 56.05–6 *Spot examination of welded joints*—(a) *Scope.* (1) All class II welded unfired pressure vessels which are not given a complete radiographic examination as specified by § 56.05–5 of this subchapter shall have portions of the finished welded joints examined by spot radiography, except vessels meeting the requirements of subparagraph (2) of this paragraph need not be so examined.

(2) Spot examination specified by subparagraph (1) of this paragraph is not required when an allowable stress of 80 percent of the values given in table 52.05–10 (a) in Part 52 of this subchapter is used in the design of the vessel.

(b) *Number required.* At least one spot shall be examined on each vessel welded having 50 feet or less of combined longitudinal and circumferential welds. For vessels having more than 50 feet of combined longitudinal and circumferential joints at least one spot shall be examined for each 50 feet or less of welded joints. If more than one welding procedure is employed or if more than one welder does the welding on a vessel, at least one spot shall be examined for each procedure and each welder. The spot(s) examined may be considered representative of the procedure, the welder and one interval of 50 feet of welded joint. The spot(s) to be examined shall be designated by an inspector.

(c) *Spot radiographing.* Each spot required by paragraph (b) shall be examined by radiography as prescribed in § 56.05–5. The spot radiographs shall meet the standards given in § 56.05–5 (k). Retest radiographs permitted by paragraph (d) of this section shall comply with the standards given therein. Films of spot radiographs which have been examined by the inspector may be destroyed.

(d) *Retests*—(1) *Spot examination.* When a spot has been examined and the welding does not comply with the minimum quality requirements prescribed in paragraph (c) of this section, two additional spots shall be examined in the same joint at locations to be designated by the inspector, one on each side of and not far from the initial spot to determine the limits of defective welding, and if the welding at either of these spots fails to meet the minimum requirements of subparagraph (2) of this paragraph, additional nearby spots shall be examined until the limits of unacceptable welding are determined. In addition, the inspector shall require that an additional spot be examined at one location to be selected by him in each joint not previously examined on which the same welder has welded and if any additional spot fails to comply with the minimum quality requirements of paragraph (c) of this section, the limits of unacceptable welding shall be determined as described in this section. All rewelded areas shall be re-examined as required by the inspector and shall comply with the prescribed requirements in this section.

(2) *Radiographic standard for retest.* Welds in which the radiographs show any type of cracks or zones of incomplete penetration shall be unacceptable. Welds in which radiographs show elongated slag inclusions, cavities, or lack of fusion shall be unacceptable if the length of such imperfection is greater than 2/3T, where T is the thickness of the thinner plate. If several imperfections within the above limitations exist in line, the welds shall be judged acceptable if the sum of the longest dimension of all such imperfections is not more than T in length of 6T, and if the defects are separated by at least 6L of acceptable welding, when L is the length of the longest imperfection. The maximum permissible porosity shall not exceed that permitted by § 56.05–5, except that not more than twice as many cavities or slag inclusions, but of no greater size, shall be permitted within any single square inch of film area, or for the whole film area.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491 as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. PART 57—INSTALLATIONS, TESTS, INSPECTIONS, REPAIRS, AND MISCELLANEOUS REQUIREMENTS

1. Part 57 is amended by adding a new Subpart 57.25, consisting of §§ 57.25–1 to 57.25–60, reading as follows:

SUBPART 57.25—STEERING APPARATUS

Sec.
57.25–1 Steering apparatus; existing installations.
57.25–5 Steering apparatus; new installations.
57.25–10 Rudder movement.
57.25–15 Plan approval.
57.25–20 Power driven steering gear.
57.25–25 Auxiliary means of steering.
57.25–30 Steadying the rudder.
57.25–35 Controlling rudder movement.
57.25–40 Buffers.
57.25–45 Emergency steering wheel.
57.25–50 Arrangement of steering wheels.
57.25–55 Special steering apparatus.
57.25–60 Steering gear piping.

AUTHORITY: §§ 57.25–1 to 57.25–60 issued under R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275.

§ 57.25–1 *Steering apparatus; existing installations.* (a) All existing vessels subject to inspection by the Coast Guard shall be provided with suitable steering apparatus. Extra steering apparatus, consisting of relieving tackle, or of auxiliary power- or hand-steering gear attached to the rudder stock independent of the regular steering gear, shall be provided.

(b) Where reasonable and practicable, the emergency steering wheel shall be located on the after weather deck.

(c) Replacements of steering apparatus on existing vessels shall be in accordance with this subpart for new installations.

§ 57.25–5 *Steering apparatus; new installations.* All new vessels subject to inspection by the Coast Guard, except certain towed barges, shall be provided with main and auxiliary steering apparatus in accordance with §§ 57.25–10 to 57.25–60, inclusive.

§ 57.25–10 *Rudder movement.* The steering gear shall be provided with effective means for putting the rudder from 35 degrees over to 35 degrees over with the vessel running ahead at the maximum continuous rated shaft RPM. The timing may be conducted from 35 degrees on one side through 30 degrees on the other side, and the average rate of the rudder shall be not less than 2⅓ degrees per second. In addition, they shall be provided with effective auxiliary means for actuating the rudder which shall be capable of putting the rudder from 15 degrees over to 15 degrees over in 60 seconds with the vessel running ahead at half speed, or seven knots, whichever is greater.

§ 57.25–15 *Plan approval.* General arrangement plans of the main and auxiliary steering arrangements and piping systems shall be submitted to the Commandant (MMT) U. S. Coast Guard, Washington 25, D. C., for approval.

§ 57.25–20 *Power driven steering gear.* The main steering gear shall be power driven for vessels over 250 feet in length or when the required upper rudder stock diameter is over 9 inches. The auxiliary means for steering shall be power driven when the required upper rudder stock diameter is over 14 inches.

§ 57.25–25 *Auxiliary means of steering.* (a) An auxiliary means of steering will not be required where the main gear is of the dual-power hydraulic type, having two independent pumps and separate leads to the pump prime movers from the source of power. In such cases the attachment to the rudder stock shall be designed for strength in excess of that of the rudder stock.

(b) A suitable arrangement of block and tackle will be acceptable as an auxiliary steering means, and when arranged for operation by means of power driven winches or similar machinery, will be considered an auxiliary power steering gear.

(c) An auxiliary means of steering will not be required on double-ended ferryboats where independent steering gears are fitted at each end of the vessel, and two sources of power are provided where the gear is power driven.

§ 57.25–30 *Steadying the rudder.* All ocean-going vessels requiring power gears shall be provided with arrangements for steadying the rudder in the event of an emergency and when a change of gear is required. On hydraulic type steering gears a suitable arrangement of stop valves in the main piping may be considered as a means of steadying the rudder.

§ 57.25–35 *Controlling rudder movement.* Main power gears shall be provided with positive arrangements for stopping the gear before the rudder stops are reached. These arrangements shall be synchronized with the rudder stock or the position of the gear itself, rather than with the steering gear control system. The steering gear shall have a follow-up device to control rudder movements when operated from the main steering station.

§ 57.25–40 *Buffers.* On vessels in ocean, coastwise, and Great Lakes service, steering gears other than the hydraulic type shall be designed with suitable buffer arrangements to relieve the gear from shocks to the rudder.

§ 57.25–45 *Emergency steering wheel.* An emergency steering station from which the control of the steering gear can be affected by mechanical means, shall be located on the after weather deck or other suitable location acceptable to the Commandant.

§ 57.25–50 *Arrangement of steering wheels.* Steering wheels, including "trick wheels" located in the steering gear room, shall turn in a clockwise direction for "right rudder" and counterclockwise for "left rudder." The ship's heading shall be to the right, following clockwise movement of the wheel. The arrangement of steering stations shall be such that the helmsman is abaft the wheel. However, if a wheel is fitted in the steering gear room, and is intended solely for warming up and testing the gear, the helmsman need not stand abaft the wheel. The rims of the wheels shall be plainly marked with arrows and lettering for right and for left rudder, or a suitable notice indicating these directions shall be posted directly in the helmsman's line of vision.

§ 57.25–55 *Special steering apparatus.* (a) Where no regular rudder is fitted and steering action is obtained by a change of setting of the propelling unit, emergency steering is not required, nor will the requirements of this subpart be generally applicable. Special consideration will be given by the Commandant for such installations.

(b) When tiller bars instead of wheels are installed in the pilothouse, they shall be fore and aft when the rudders are amidships. A pointer shall be fitted to the forward end of the bar which shall point directly ahead when the rudders are amidships, and shall point to the right when the bow of the ship moves to the right, and shall point to the left when the bow of the ship moves to the left.

§ 57.25–60 *Steering gear piping.* The arrangement of piping for hydraulic steering gears shall be such that a change from the main to the auxiliary gear can be readily effected. A relief valve shall be provided for the protection of the hydraulic system. Pressure piping shall meet the requirements of Part 55 of this subchapter.

Subchapter G—Ocean and Coastwise; General Rules and Regulations

PART 59—BOATS, RAFTS, BULKHEADS, AND LIFESAVING APPLIANCES (OCEAN)

1. Section 59.62 *Steering apparatus; existing installations* is canceled.

2. Section 59.62a *Steering apparatus; new installations* is canceled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

PART 60—BOATS, RAFTS, BULKHEADS, AND LIFESAVING APPLIANCES (COASTWISE)

1. Section 60.55 *Steering apparatus; existing installations* is canceled.

2. Section 60.55a *Steering apparatus; new installations* is canceled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

Subchapter H—Great Lakes; General Rules and Regulations

PART 76—BOATS, RAFTS, BULKHEADS, AND LIFESAVING APPLIANCES

1. Section 76.55 *Steering apparatus; existing installations* is canceled.

2. Section 76.56 *Steering apparatus; new installations* is canceled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

Subchapter I—Bays, Sounds, and Lakes Other Than the Great Lakes; General Rules and Regulations

PART 94—BOATS, RAFTS, BULKHEADS, AND LIFESAVING APPLIANCES

1. Section 94.54 *Steering apparatus; existing installations* is canceled.

2. Section 94.55 *Steering apparatus; new installations* is canceled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

Subchapter J—Rivers; General Rules and Regulations

PART 113—BOATS, RAFTS, BULKHEADS, AND LIFESAVING APPLIANCES

1. Section 113.46a *Steering apparatus; existing installations* is canceled.

2. Section 113.47 *Steering apparatus; new installations* is canceled.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416)

Subchapter Q—Specifications

PART 162—ENGINEERING EQUIPMENT

Part 162 is amended by adding a new Subpart 162.026, consisting of §§ 162.026–1 to 162.026–17, reading as follows:

SUBPART 162.026—BOILERS, AUXILIARY, AUTOMATICALLY CONTROLLED, PACKAGED, FOR MERCHANT VESSELS

Sec.
162.026–1 Applicable regulations and specifications.
162.026–2 Scope.
162.026–3 Construction.
162.026–4 Controls.
162.026–5 Water level controls.
162.026–6 Safety combustion control.
162.026–7 Pressure controls.
162.026–8 Program control.
162.026–9 Fuel supply shut-off controls.
162.026–10 Heavy fuel oil.
162.026–11 Boiler alarms.
162.026–12 Wiring of electrical components.
162.026–13 Tests and inspection.
162.026–14 Types of approval.
162.026–15 Procedure for initial approval.
162.026–16 Procedure after initial approval.
162.026–17 Instruction booklets.

AUTHORITY: §§ 162.026–1 to 162.026–17 issued under R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interprets or applies R. S. 4400, 4417, 4417a, 4418, 4426–4434, 4453, 4491, as amended, sec. 14, 29 Stat. 690, 41 Stat. 305, secs. 1, 2, 49 Stat. 1544, sec. 3, 54 Stat. 347, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 362, 363, 366, 367, 391, 391a, 392, 404–412, 435, 489, 1333, 50 U. S. C. App. 1275.

§ 162.026–1 *Applicable regulations and specifications.* (a) The following regulations and specifications, of the issue in effect on the date the contract is awarded, forms a part of this subpart:

(1) Marine Engineering Regulations and Material Specifications (Subchapter F (Marine Engineering) of this chapter).

(2) National Electrical Code, published by National Fire Protection Association, 60 Batterymarch Street, Boston 10, Mass.

§ 162.026–2 *Scope.* (a) This specification covers requirements for the design, construction, and testing of automatically controlled packaged auxiliary boilers, intended for installation on merchant vessels subject to inspection by the Coast Guard.

(b) The term "automatically controlled packaged auxiliary boiler" means a steam boiler operating at pressures exceeding 30 p. s. i. used for all purposes on shipboard for which steam may be required other than propulsion; equipped with all necessary controls for automatic operation; and furnished complete with fuel burning equipment, mechanical draft equipment and necessary mechanical feed water equipment, thus requiring only to be connected to fuel, water, and electric supplies to be ready for use.

§ 162.026–3 *Construction.* (a) All automatic packaged boilers shall meet the applicable requirements of Subchapter F (Marine Engineering) of this chapter, for the design, construction and testing of the bare boiler, except as otherwise specified in this subpart.

(b) All electrical and mechanical control devices shall be of a type tested and approved by Underwriters' Laboratories, Inc., Factory Mutual Laboratory, or a recognized inspection board or test laboratory acceptable to the Commandant.

(c) Safety control devices shall be designed to perform satisfactorily in marine service. The boiler and control equipment shall be designed to permit normal operation with a momentary roll of 30 degrees or a permanent list of 15 degrees to either side and a permanent inclination of 5 degrees fore and aft with the boiler installed with its longitudinal axis in the fore and aft position.

(d) All electrical devices shall be of drip-proof construction, as simple and rugged as practicable and suitable for marine service.

§ 162.026–4 *Controls.* (a) Each automatic packaged boiler shall be fitted with the following controls:

(1) Operating water level control.
(2) Low-water cut-offs.
(3) Safety combustion control.
(4) Pressure controls.
(5) Program control.

(b) Wherever possible safety control devices shall be designed to "fail safe" and thus immediately prevent continued operation of the boiler in the event of mechanical failure which may cause unsafe operation of the boiler.

(c) Electrical controls shall be provided to shut down the boiler from a position outside the compartment in which it is located, so that fuel will not be supplied to the fuel burning equipment. The entire boiler shall be disconnected from all sources of potential by means of one disconnect switch located adjacent to boiler.

(d) Mercury tube actuated controls are prohibited.

§ 162.026–5 *Water level controls.*—(a) *Operating water level control.* (1) Each boiler shall be equipped with an operating level control device to automatically supply the required amount of feedwater when the surface of the water falls to a predetermined level, and to automatically shut-off the feed-water supply when the water level exceeds a predetermined level.

(b) *Low-water cut-offs.* (1) Each boiler shall be equipped with two (2) low-water cut-offs, so arranged and located as to automatically cut off the fuel supply to the burners when the surface of the water falls to a point no lower than that visible in the gauge glass.

(2) The upper low-water cut-off may be arranged to operate in conjunction with operating water level control.

(3) The lower or auxiliary low-water cut-off shall have a separate and independent connection to the boiler and shall be arranged so that the lowest point of cut-off shall be not less than 1 inch above the top boiler tubes of boilers of the fire tube type, or the lowest permissible water level of boilers of the water tube type. When low-water cut-offs are inserted in the boiler shell, separate and independent connections to the boiler are not required.

(4) The auxiliary low-water cut-off shall control a separate fuel oil valve and shall be fitted with manual reset devices which will necessitate recycling or resetting of the controls after the low-water cut-off has functioned.

(c) *Detail requirements.* (1) Operating level controls and low-water cut-offs may be of the float type, electrode probe type, thermostatic expansion tube, or thermo-hydraulic type, or such other type acceptable to the Commandant. Float chamber type low-water cut-offs using stuffing boxes to transmit the motion of the float from the chamber to the external switches are prohibited.

(2) Water level controls shall be so located as to minimize the effect of vessel roll and pitch.

(3) Water level devices shall be so constructed that the water inlet valve cannot feed water into the boiler through the float chamber.

(4) The minimum size of pipes connecting a float chamber to a boiler shall be 1 inch. Shut-off valves fitted in connecting piping shall be either outside-screw-and-yoke or lever lifting type gate valves, or stopcocks having levers permanently fastened thereto and marked in line with the passageway, or of such other through construction as to prevent stoppage by deposits of sediment and also constructed to indicate by the position of the operating mechanism whether open or closed. Where stopcocks are used they shall be of a type having the plug held in place by a guard or gland.

(5) No outlet connection except for damper regulation, pressure controls, water columns, drains or steam gauges shall be placed on the float chamber or on the pipes connecting the float chamber to the boiler on which it is mounted.

(6) Float or electrode chambers shall be equipped with suitable drain connection not less than ¾-inch pipe size.

(7) Float operated water control or cut-off devices shall be equipped with "fixed stops" of a design to prevent over-travel of control floats and rods, which would unduly stress the control mechanisms, or the control mechanism shall be designed to permit such over-travel after operation of the mechanism.

(8) Boilers designed to operate with forced circulation feed, or boilers with no fixed steam and water line, will be

given special consideration by the Commandant.

(9) The requirements in this section apply to boilers having a definite water line.

§ 162.026–6 *Safety combustion control.* (a) Each boiler shall be equipped with a safety combustion control designed to automatically shut off the fuel oil supply to the burners in the event of flame extinguishment and power failure. The safety combustion device shall be so designed that any vacuum tube or other component will cause a safety shut down, or by the employment of a safety interlock circuit, prevent recycling of the control.

(b) The safety combustion controls shall be of the electronic type, or such other type as may be approved by the Commandant. Safety combustion controls of the thermostatic type, such as stack switches and pyrostats operated by means of an open bi-metal helix, are prohibited.

(c) The safety combustion control shall be capable of shutting off the fuel oil supply to the burners within 2 to 4 seconds following flame extinguishment.

§ 162.026–7 *Pressure controls.* (a) Each boiler shall be equipped with steam operated controls designed to regulate or cut-off the fuel oil to the burners in the event the steam pressure exceeds a predetermined amount (the maximum shall not exceed the boiler safety valve setting).

(b) Operating steam pressure controls shall be designed to operate at cut-out and cut-in pressures, when arranged for automatic operation.

§ 162.026–8 *Program control.* (a) Automatically controlled boilers shall be equipped with a program control to assure a safe cycle of operation upon initial starting, and upon cycling between temperature or pressure limits.

(b) The programming control shall be designed to cycle the boiler in accordance with a predetermined sequence. The sequence of events shall include the following:

(1) A pre-purge period for a sufficient length of time to assure a minimum of 3 changes of air in the combustion chamber, passes and stack.

(2) Ignition (spark coming on) shall precede the opening of the fuel valve by not less than 5 seconds.

(3) A post-purge period of at least 30 seconds after the closing of the fuel valve.

(4) When controls are provided to modulate the air-fuel ratio, the pre-purge period shall start with the modulating control in the high-fire position, and ignition shall not be turned on until the modulating control has returned to low-fire position.

§ 162.026–9 *Fuel supply shut-off controls.* (a) Fuel supply to the burners shall be shut off automatically in the event of low water, flame extinguishment, forced draft fan failure, low voltage, or other abnormal conditions.

(b) Oil solenoid valves shall be approved as required by § 162.026–3 (b), and shall be acceptable to the Commandant.

(c) The fuel oil supply to the burners shall shut off automatically in the event of the malfunctioning of any component as a result of reduced voltage or open circuit of circuit components.

§ 162.026–10 *Heavy fuel oil.* (a) If heavy fuel oil is used, a light oil pilot shall be employed to ignite the heavy oil and a thermostatically controlled electric oil heater shall be furnished and equipped with a limit switch so that the boiler cannot be started if the oil temperature is too low for proper combustion. The aforementioned device shall automatically shut off the fuel oil to the burners if the temperature of the oil falls below the proper combustion temperature during operation of the boiler.

§ 162.026–11 *Boiler alarms.* (a) The lower or auxiliary low-water cut-off shall be fitted with audible alarm.

(b) Safety combustion control circuit shall be fitted with an audio alarm to provide audible warning in the event of safety shutdown of the device.

(c) Means shall be provided to silence the audible alarms by transferring signal to visible indicator. The alarm circuits shall be reset manually on return to normal operating conditions.

§ 162.026–12 *Wiring of electrical components.* (a) All insulated wire shall be of a moisture resistant type and rated for the maximum temperature that will be encountered in the location installed.

(b) Wiring between equipment enclosures shall be protected by rigid metal conduit, except that short runs of wire may be protected by flexible conduit where the use of rigid conduit would be impracticable.

(c) All conduit shall be securely supported and shall enter enclosures from the bottom where practicable.

(d) All conduit runs shall be adequately drained at low points.

(e) Wire sizes and overcurrent protection shall be in accordance with the applicable requirements of National Electrical Code.

§ 162.026–13 *Tests and inspections—*(a) *Performance test.* (1) A performance test shall be conducted for a continuous period of not less than 48 hours, at the following rated loads:

16 hours at full rated capacity;
16 hours at 50 percent rated capacity;
8 hours at variable loads between full capacity and 50 percent of full capacity; and,
8 hours at variable loads between 50 percent and 25 percent of full capacity.

(2) Capacity changes shall be made abruptly requiring controls to respond automatically with safe performance. The controls and safety devices shall be tested as prescribed in this subpart for each load test.

(3) All wiring, junction boxes, connections and control components shall be examined to determine compliance with good marine practice.

(4) The boiler shall be started cold and the functioning of all controls shall be observed.

(5) After the unit is delivering steam at the rated output, the water level controls shall be tested by slowly lowering the water level in the boiler. This test shall simulate actual operating conditions as closely as possible. A low water condition may be obtained by either (i) opening the electrical circuit to the boiler feed pump with the boiler carrying full steam load, or (ii) cracking the main blow-off valves. The water level controls shall not be tested by blowing down water column. The operating water level controls and the upper and lower auxiliary low-water cut-offs shall be tested individually. Test audible alarm in the lower auxiliary low-water cut-off circuit. The manual reset device shall be tested after operation of the auxiliary low-water cut-off.

(6) The safety combustion control shall be tested to determine that the device will shut off the fuel oil supply to the burners under conditions of flame extinguishment and power failure, or open or short circuit of circuit components. The audible alarm shall be tested in the safety combustion control circuit.

(7) A low voltage test shall be conducted to satisfactorily demonstrate that the fuel supply to the burners will be automatically shut off before any control component malfunctions as a result of the reduced voltage.

(8) The operating steam pressure controls shall be tested by regulating the steam pressure to determine that the device will automatically cut off the fuel supply to the burners at the high pressure limit and restart the burners when the boiler pressure drops to the low limit.

(9) The program control shall be tested through a sufficient number of cycles of operation to determine that the controls are satisfactorily arranged for automatic operation of the boiler.

(10) Interrupt the power supply and the ignition transformer supply and observe operating function of the safety controls.

(11) Measure all temperatures of generators, motors, relays and solenoid coils to determine if units are operating at safe temperatures.

(12) Test all emergency disconnect switches to observe proper functioning.

(b) *Installation tests—*(1) *Operating test.* An operating test after installation shall be conducted for a period of at least two (2) hours to insure that all the control components have been properly installed and that all parts of the boiler, including controls and safety devices, are in satisfactory operating condition.

(2) *Hydrostatic tests and inspection.* The hydrostatic test and inspection of the boiler after installation shall conform to the requirements for new boilers as prescribed in Subchapter F (Marine Engineering), of this chapter.

(c) All tests shall be witnessed by an inspector.

§ 162.026–14 *Types of approval.* (a) Type approval may be granted by the Commandant for a prototype design of stock units which are completely packaged and assembled in the boiler manufacturer's shop. Wherever possible the boiler shall be designed and shipped as a packaged unit.

(b) If the component parts of the boiler are received from one or more sources and are initially assembled aboard the vessel without being subjected to a satisfactory performance test, approval shall be limited to the specific installation only.

§ 162.026–15 *Procedure for initial approval—*(a) *Plan submittal.* (1) Before approval action is taken on any new design of automatic packaged boilers, the manufacturer shall submit for approval the following plans and descriptive data, in quadruplicate, to the Commandant (MMT), U. S. Coast Guard, Washington 25, D. C.:

(i) Plans showing the pressure parts and piping components.

(ii) Equipment wiring and elementary schematic wiring diagram.

(iii) Master plans for electrical equipment.

(iv) Drawings of electrical control components and safety devices.

(v) Manufacturer's descriptive literature or assembly drawings of all individual control components, such as oil solenoid valves, pressure switches, air solenoid switches, program controls, water level controls, and combustion safety equipment, etc.

(2) If such drawings and descriptive data are satisfactory, the manufacturer will be advised to proceed with the fabrication of the boiler.

(b) *Pre-approval tests.* (1) Upon completion of the packaged unit, the manufacturer shall notify the Officer in Charge, Marine Inspection, in the district in which the boiler is fabricated or assembled, when the boiler is ready for the required performance test.

(2) When the boilers are completely packaged and assembled in the boiler manufacturer's shop, one complete unit of a prototype design shall be subjected to the performance test prescribed in § 162.026–13 (a). Upon satisfactory completion of this test, type approval may be granted by the Commandant.

(3) If the component parts of the boiler are received from one or more sources and are initially assembled aboard the vessel without being subjected to a satisfactory performance test, individual performance tests prescribed in § 162.026–13 (a) will be required for each installation. Upon satisfactory completion of the performance test, specific approval of each packaged boiler may be granted by the Commandant, and such approval shall be limited to the specific installation.

§ 162.026–16 *Procedure after initial approval.* (a) Packaged units manufactured from an approved prototype design without change need not be subjected to the performance test, but shall be tested after each installation as prescribed in § 162.026–13 (b).

(b) All boilers approved for a specific installation only are required to be subjected to the performance and hydrostatic tests after each installation as prescribed in § 162.026–13.

(c) When the performance test is conducted after installation aboard the vessel, the boilers need not be subjected to the operating test.

§ 162.026–17 *Instruction booklets.* (a) The boiler manufacturer shall furnish with each boiler, instruction booklets providing a full description of the boiler and all auxiliaries, and complete instructions for installation and operation of the packaged unit.

Dated: August 15, 1952.

[SEAL] MERLIN O'NEILL,
Vice Admiral, U. S. Coast Guard,
Commandant.

[F. R. Doc. 52–9233; Filed, Aug. 20, 1952; 8:49 a. m.]

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Supp. 9]

PART 43—GENERAL OPERATION RULES

ANNUAL AND PERIODIC INSPECTIONS

This supplement alters the existing provisions of §§ 43.22–1 and 43.22–2 by providing that annual inspections of aircraft may be conducted not only by representatives of the Administrator but also by appropriately rated certificated repair stations, as authorized in recently revised Part 52 of this subchapter. The supplement further provides that periodic inspections of aircraft, and inspections required prior to annual inspections, may continue to be recorded on Form ACA–319, or may be recorded on forms prepared by the aircraft manufacturer or the operator which reflect in detail the items inspected. Inasmuch as the use of Form ACA–319 will not be mandatory, the scope of the periodic inspection which has been a part of such form is included in this supplement.

The supplement does not impose additional burdens upon interested persons. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be unnecessary, and therefore is not required. Sections 43.22–1 and 43.22–2, published on December 28, 1951, in 16 F. R. 13035, are revised to read:

§ 43.22 *Inspections—*(a) *Annual inspection.* An aircraft shall not be flown, except for airworthiness flight tests, unless within the preceding 12 calendar months it has been given an annual inspection as prescribed by the Administrator and has been found to be airworthy by a person designated by the Administrator.

(b) *Periodic inspection.* An aircraft shall not be flown for hire, unless within the preceding 100 hours of flight time it has been given a periodic inspection by an appropriately rated mechanic in accordance with the periodic inspection report form prescribed by the Administrator, has been found to be airworthy, and a notation to that effect has been entered by such mechanic in the aircraft log. The annual inspection required by paragraph (a) of this section will be accepted as one such periodic inspection.

(c) *Air carrier exemption.* Air carrier aircraft are exempted from paragraphs (a) and (b) of this section when such aircraft are maintained and inspected in accordance with a continuous maintenance and inspection system as provided for by Part 41, 42, or 61 of this subchapter.

§ 43.22–1 *Annual inspections (CAA rules which apply to § 43.22 (a)).* The purpose of this section is to prescribe the scope of the annual inspection required by § 43.22 (a) and to set forth the procedure to be followed by an aircraft owner when making application for an annual inspection.

(a) *Inspection requirement prior to presenting application.* Immediately prior to submitting an application for annual inspection, the aircraft shall be inspected and found airworthy by a certificated aircraft and engine mechanic(s) or by an appropriately rated and certificated repair station. The mechanic(s) or the appropriately rated certificated repair station shall conduct and record the airworthiness inspection in accordance with § 43.22–2 (a) and (b). All items found unairworthy, as a result of the inspection, shall be corrected prior to presenting the aircraft for annual inspection.

(b) *Application procedure.* (1) After the aircraft has been found airworthy in accordance with paragraph (a) of this section, the aircraft owner (or his agent) shall make application for annual inspection by completing Form ACA–305 entitled, "Application for Airworthiness Certificate and/or Annual Inspection of Aircraft,"[1] and present it and the aircraft to a CAA representative for consideration. The aircraft shall be presented in condition for inspection, i. e., all inspection plates, access doors, fairing and cowling shall be open or removed and the aircraft and engine thoroughly cleaned to properly reflect the actual condition of all the parts and components being inspected.

(2) The following official documents shall be available in the aircraft at the time it is presented for inspection:

(i) Current registration certificate as required by § 43.10 (a).

(ii) If the aircraft is flown to the point where the annual inspection is to be conducted, the aircraft shall display a current Certificate of Airworthiness, Form ACA–1362, issued in accordance with § 1.67 of this subchapter, or carry a special flight authorization (Form ACA–1779) entitled, "Application and Authorization for Ferry Permit," issued in accordance with § 43.10 (a).

(iii) The aircraft and engine records required by § 43.23.

(iv) A visual reference form of the operations limitations, as required by § 43.10–1.

(v) The Inspection Report, required by paragraph (a) of this section.

(c) *Renewal of airworthiness certificate.* Section 1.64 (a) (3) of this subchapter provides for renewing an airworthiness certificate upon satisfactory completion of the annual inspection described in paragraphs (a) and (b) of this section. The CAA will issue a new Certificate of Airworthiness, Form ACA–1362, each time the aircraft passes the annual inspection requirements. The CAA representative conducting the an-

[1] The reporting requirements of this form have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

nual inspection will, upon completion of the inspection, issue the new Certificate of Airworthiness to expire one year from the date the annual inspection was completed. This procedure will be applied without reference to whether the former Certificate of Airworthiness has expired or is still current.

(d) *Application and inspection forms.* The inspection and application forms mentioned in paragraphs (b) and (c) of this section are available at all CAA regional and Aviation Safety district offices, all Designated Aircraft Maintenance Inspectors, and those Certificated Repair Stations holding a class type airframe rating.

§ 43.22–2 *Periodic inspection (CAA rules which apply to § 43.22 (b)).* The purpose of this section is to prescribe the scope of the periodic inspection required by § 43.22 (b) and to identify the form and method of recording the findings of this inspection.

(a) *Scope of periodic aircraft inspection.* The inspection required by § 43.22–1 (a) shall be conducted as follows:

(1) Prior to inspection, all inspection plates, access doors, fairing and cowling shall be opened or removed and the aircraft and engine thoroughly cleaned to properly reflect the actual condition of the parts being inspected. Airworthiness of the aircraft shall be determined by thoroughly inspecting the pertinent items in subdivisions (i) through (ix) of this subparagraph in accordance with instructions contained in the aforementioned subdivisions, manufacturer's inspection procedures, supplemental service information, and standard inspection practices. Each item shall conform with CAA Aircraft Specifications and Airworthiness Directives before being checked as airworthy.

(i) *Fuselage and hull group.* Carefully inspect the fuselage and/or hull for general condition; fabric or skin for deterioration, distortion, pulled rivets, fabric attachment, other evidence of failure, and security of attachment fittings. The various systems and components installed in this group should be checked to assure that they are properly installed with no apparent defects and are operating satisfactorily. When applicable, the same general inspection procedures will apply to lighter-than-air craft and a determination made of the condition of the envelope, gas bags, ballast tanks, etc. Rotary-wing-type aircraft or other craft utilizing rotor or other propellant drive shafts should have the shafts inspected in accordance with the manufacturer's maintenance manual. Lubricate items as required.

(ii) *Cabin and cockpit group.* Check the cabin and cockpit for cleanliness and loose equipment which might foul the controls; seats and safety belts for condition and apparent defects; windows and windshields for deterioration or breakage; instruments for proper operation, mounting, and marking; flight and engine controls for installation and operation; batteries for installation and proper charge; the various systems for installation, general condition, apparent and obvious defects and security of attachment. The above inspection procedure will also apply to the control car of lighter-than-air craft. Lubricate items as required.

(iii) *Engine and nacelle group.* Remove all engine cowling and make a visual inspection of the entire engine section for evidence of excessive oil, fuel, or hydraulic leaks. Trace any and all leaks to their origin so that they may be corrected. Check all studs and nuts for tightness or obvious defects. Inspect the engine mount for cracks, tightness of mounting, and security of engine attachment to mount. Insure that flexible vibration dampeners are in good condition. Examine the engine controls for defects, proper travel, and safetying; lines for leaks and hoses and clamps for condition and tightness. Check exhaust stacks for cracks or other defects and satisfactory attachment. Examine accessories for apparent defects and security of mounting. Inspect the various systems for proper installation, general condition, defects, and attachment. Inspect cowling for cracks or other defects. On rotary-wing-type aircraft inspect the main rotor transmission gear box for obvious defects as outlined in the manufacturer's maintenance manual. Properly lubricate items so requiring.

(iv) *Landing gear group.* Examine the landing gear for general condition and security of attachment of all units. Make certain the oleo fluid level is at proper height or other shock-absorbing devices are in good condition. Inspect all linkage, trusses, and members for evidence of undue or excessive wear, fatigue, distortion, and security of attachment. Assure that the retracting and locking mechanisms, when installed, are operating satisfactorily. Check hydraulic lines for leakage and electrical system for chafing and proper operation of switches. Remove the wheels and examine for cracks or other defects, tires for wear or cuts, brakes for proper adjustment. Lubricate entire landing gear assembly. If floats or skis are installed, inspect for security of attachment, general condition, and any obvious or apparent defects.

(v) *Wing and center-section group.* Determine the airworthiness of the wing and center-section group by thoroughly inspecting the complete assemblies for general condition, fabric or skin for deterioration, distortion, pulled rivets, fabric attachment, other evidences of failure, and for security of attachment. This inspection is to include the various systems installed which make up a complete wing assembly. Rotary-wing-type aircraft are to be inspected in accordance with the manufacturer's maintenance manual. Lubricate items as required.

(vi) *Empennage group.* Inspect the complete empennage assembly for general condition; fabric or skin for deterioration, distortion, fabric or skin attachment, other evidences of failure, and for security of attachment. Components and systems which make up the complete assembly should receive the same attention and it should be determined that they are installed properly and operating satisfactorily. Lighter-than-air craft should be inspected in the same manner. Helicopters should have the tail rotors inspected in accordance with the manufacturer's maintenance manual. Lubricate items as required.

(vii) *Propeller group.* Carefully examine all parts of the propeller for cracks, nicks, bends, or oil leakage, if hydraulically controlled. Assure that all bolts are tight and properly safetied. Check the propeller anti-icing devices for proper operation or obvious defects. Assure that control mechanism operates satisfactorily, is securely mounted, and controls operate through full range of travel. Lubricate as required.

(viii) *Radio group.* Inspect radio and electronic equipment for installation and security of mounting. Assure that wiring and conduits are properly routed to prevent short-circuiting and that there are no obvious defects. Determine that bonding and shielding is properly installed and in good condition. If installed, inspect trailing antenna mechanism for security and proper functioning.

(ix) *Miscellaneous group.* When installed, inspect the miscellaneous items of equipment to determine that the component or assembly is installed in accordance with accepted standard practices, and that the items are operating satisfactorily.

(b) *Periodic inspection report form.* (1) The results of the inspection called for in § 43.22–1 (a) shall be recorded on any of the following forms, and a signed copy given to the aircraft owner upon completion of the inspection:

(i) The Periodic Aircraft Inspection Report, Form ACA–319,[1] furnished by the CAA, or

(ii) An aircraft manufacturer's form, which reflects in detail the condition of the items of inspection set forth in paragraph (a) of this section, as appropriate to the particular model aircraft;

(iii) Any other form similar to the example given in Fig. 1.[2]

(2) On all forms, excepting the Form ACA–319, the following statement must be imprinted:

> This form is authorized by the CAA. The inspection recorded herein was conducted in accordance with the Civil Air Regulations.

(3) In addition, the forms must contain instructions for their use.

(c) *Entries in aircraft and engine records.* The aircraft owner shall make available to the mechanic(s) the aircraft and engine records in order that the mechanic(s) may record the inspection as required by this part and Part 18 of this subchapter. After conducting the inspection of an aircraft and upon finding it airworthy, the mechanic(s) will enter in the logbook over his name, certificate number and rating(s), the following statement:

> It is certified that this aircraft has been thoroughly inspected, as required by Civil Air Regulations, and found to be airworthy.

(d) *Annual inspection acceptable in lieu of periodic inspection.* When an aircraft has satisfactorily passed the annual inspection required by § 43.22 (a), it is also considered to have passed the periodic inspection required by § 43.22 (b). In such cases, accumulation of flight time toward the next periodic inspection will start immediately after the inspecion specified in § 43.22–1 (a).

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply secs. 601, 603, 605, 608, 52 Stat. 1007, 1009, 1010, 1011; 49 U. S. C. 551, 553, 555, 558)

This supplement shall become effective August 25, 1952.

[SEAL] F. B. LEE,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 52–9206; Filed, Aug. 20, 1952; 8:45 a. m.]

[1] The reporting requirements of this form have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

[2] Not submitted for publication in the FEDERAL REGISTER.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

[Circular 1830]

PART 295—WITHDRAWALS AND RESTORATIONS

EDITORIAL NOTE: Federal Register Document 52–8900, appearing at page 7368 of the issue for Wednesday, August 13, 1952, has been corrected as follows:

In the second sentence of § 295.11 (a), "(Form 4–1493)" has been changed to read "(Form 4–1193)".

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Bureau of Entomology and Plant Quarantine

[7 CFR Parts 319, 321]

FOREIGN QUARANTINE NOTICES; RESTRICTED ENTRY ORDERS

PINK BOLLWORM OF COTTON, FOREIGN COTTON LINT, COTTONSEED PRODUCTS FROM ALL FOREIGN COUNTRIES; EXTENSION OF TIME

Notice is hereby given of an extension, until September 16, 1952, of the period of time within which any interested person may submit written data, views, or arguments concerning the proposal to revoke the order restricting the entry of cottonseed oil from Mexico into the United States (7 CFR 321.202), and to revise and combine into one quarantine, with supplementary regulations, under a new subpart heading "Foreign Cotton," the foreign pink bollworm of cotton quarantine and regulations (7 CFR 319.8, 319.8–1 et seq.), the order regulating the admission into the United States of foreign cotton lint (7 CFR 321.101), the regulations governing the importation of cotton and cotton wrappings into the United States (7 CFR 321.102 et seq.), the order restricting the admission into the United States of cottonseed cake, cottonseed meal, and all other cottonseed products except cottonseed oil (7 CFR 321.201), and the regulations governing the importation into the United States of cottonseed cake, cottonseed meal, and other cottonseed products (7 CFR 321.203 et seq.).

Notice of rule making concerning the proposed revocation, revision, and combination was published in the FEDERAL REGISTER on July 16, 1952 (17 F. R. 6434).

Done at Washington, D. C., this 15th day of August 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

[F. R. Doc. 52–9220; Filed, Aug. 20, 1952; 8:47 a. m.]

NOTICES

DEPARTMENT OF DEFENSE

Department of the Navy

ORGANIZATION STATEMENT

BUREAU OF SUPPLIES AND ACCOUNTS

In Organization Statement of the Department of the Navy, published at 16 F. R. 12573–12590, delete Subsection F, *Bureau of Supplies and Accounts*, appearing at 16 F. R. 12583–12584, as amended, 17 F. R. 2093–2094, and insert the following subsection in lieu thereof:

F. *Bureau of Supplies and Accounts.* 1. The duties of the Bureau of Supplies and Accounts are performed under the authority of the Secretary of the Navy, and its orders are considered as emanating from him and have full force and effect as such. The bureau is directed by a Chief who has the additional title of Paymaster General. The Chief of the Bureau is appointed by the President by and with the advice and consent of the Senate for a term of four years. The Deputy and Assistant Chief of Bureau performs the duties of the Chief of Bureau in the latter's absence.

2. The bureau develops plans, conducts research, formulates policies, and specifies procedures to be followed in the performance of supply and specified fiscal functions afloat and ashore.

3. Except as otherwise prescribed by the Secretary of the Navy, the bureau exercises management control over the following types of organizations and/or activities of the Shore Establishment: naval supply centers; naval supply depots; supply demand control points (offices); Navy purchasing offices; supply annexes; naval storehouses; naval fuel supply depots; Navy central freight control offices; Navy market offices; Navy overseas air cargo terminals; naval clothing factory; Navy exchanges; Navy commissary stores; the Navy Ship's Store Office, New York; the Naval Supply Research and Development Facility, Bayonne, New Jersey; Navy Material Catalog Office, New York; cost inspection offices; Navy regional accounts offices; Navy accounts disbursing offices; and naval supply facilities.

4. The functions of the bureau and its field activities are as follows:

a. Supervises the procurement, receipt, custody, warehousing, and issuance of Navy supplies and materials, exclusive of ammunition, projectiles, mines, and explosives.

b. Supervises and directs the operation of the supply phases of the Navy Supply System, and administers the redistribution program of excess personal property within the Department of Defense and the sale of Navy surplus property.

c. Administers a centralized storage program for the control of all storage facilities of the Naval Shore Establishment.

d. Administers the Navy's participation in the storage phase of the National Stockpile Program; provides storage space at Navy activities for the storage of strategic and critical materials of the program, and establishes operating procedures.

e. Authorizes and supervises the transportation of Navy property and the household goods of naval personnel, both military and civilian, and administers the functions relating to the disposition of private personal property and effects.

f. Loads and unloads cargo ships; and procures, operates, and administers cargo terminal facilities, including the

procurement and assignment of stevedores.

g. Controls and administers the Navy Stock Fund, the Naval Working Fund, designated parts of the Navy Management Fund and the Navy Industrial Fund, and the stocks of material and supplies procured with these funds.

h. Establishes operating procedures and furnishes technical direction to naval activities on matters concerning handling, warehousing, shipping, and stevedoring to the end that naval materials may be expeditiously handled into and through naval activities at a minimum cost and with the least expenditure of manpower, storage, and shipping space.

i. Recommends to the Bureau of Yards and Docks action relative to the location, design, construction, and equipment of storehouses and other facilities or parts thereof, whose principal purpose is a function over which the Bureau of Supplies and Accounts has technical and management control.

j. Recommends to the Bureau of Ships action relative to the space and equipment requirements of disbursing, clothing, resale, messing, and supply activities afloat.

k. Coordinates the assembly of the materials required for the initial establishment of supply components of advance bases, and determines storage and space requirements in connection with the movement of such materials.

l. Develops and implements the industrial mobilization planning program with respect to the material under the bureau's control.

m. Prepares budget estimates and administers funds for the Supply Distribution System, the Accounting and Disbursing System, Transportation, Fuel, and Subsistence of Navy Personnel.

n. Exercises material control over all food products, including the processing of coffee, their development and use in the Navy, and exercises technical control over general messes of the Navy (except naval hospital messes).

o. Determines accounting accuracy of contractors' cost representations where such costs are the basis for contract price negotiations and/or reimbursement, including Army and Air Force Contracts where assigned. Directs naval cost inspection; and renders the essential periodic and special reports as required by law.

p. Supervises disbursement for all articles and services procured for the Navy and for payrolls, military and civilian; pays allotments including those in substantiation of Basic Allowance for Quarters for all Navy military personnel and for civilians employed at naval activities outside Continental United States; pays retired and fleet reserve personnel of the Navy; pays repatriated military and civilian personnel of the Navy; pays death gratuities; arranges for funds required by Navy disbursing officers and administratively examines their accounts.

q. Prepares information and instructions regarding federal income tax, and disseminates throughout the Naval Establishment.

r. Supervises the issuance of United States Savings Bonds purchased by Naval personnel through payroll deductions and allotments.

s. Maintains the official Fidelity Accounts for public funds and property entrusted to the custody of accountable officers, and certifies to the Comptroller General of the United States all charges against an officer or agent of the Navy entrusted with public property arising from loss occurring through fault or negligence.

t. Develops fiscal procedures and practices in consonance with policies established by higher authority and maintains and issues instructions on the operational detail of specified fiscal procedures.

u. Performs audits of property accounts and the administrative examination of the money accounts of the Naval Establishment; and keeps inventory records relating to the plant properties, facilities and capital equipment owned in whole or in part by the Navy and Marine Corps.

v. Renders an annual report to the Congress of money value of supplies on hand at the various stations at the beginning of each fiscal year; disposition thereof; purchases and expenditures of supplies for the year, and balance on hand.

w. Performs research and development in the supply, fiscal, and logistics fields, both to fulfill bureau obligations under directives from the Chief of Naval Operations and to improve the peacetime efficiency and wartime potential of bureau and related Navy-wide operations.

x. Recommends to the Bureau of Naval Personnel action relative to the entire personnel program for officers of the Supply Corps and pay clerks, and for the development of programs for training of related enlisted rates.

y. Coordinates the compilation and arranges for the printing of the Catalog of Navy Material. Coordinates and prepares the supply requirements of all federal and military coordinated specifications used by the Department of the Navy; budgets for and establishes the stocks of, and supervises the distribution of the specifications.

z. Prepares and revises Navy Travel Instructions jointly with the Bureau of Naval Personnel and the Headquarters, U. S. Marine Corps.

Dated: August 11, 1952.

DAN A. KIMBALL,
Secretary of the Navy.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

SHORESPACE RESTORATION ORDER NO. 486 AND SMALL TRACT CLASSIFICATION NO. 63

AUGUST 13, 1952.

By virtue of the authority contained in the act of June 5, 1920 (41 Stat. 1059, 48 U. S. C. 372), and pursuant to sections 2.21 and 2.22 (a) (3), of Order No. 1, Bureau of Land Management, Region VII, approved by the Acting Secretary of the Interior August 20, 1951 (16 F. R. 8625), it is ordered as follows:

Subject to valid existing rights, the 80-rod shorespace reserve which may now or hereafter be created under the act of May 14, 1898 (30 Stat. 409), as amended by the act of March 3, 1903 (32 Stat. 1028; 48 U. S. C. 371), is hereby revoked as to the public lands hereinafter described in the Anchorage, Alaska Land District, which are hereby classified as chiefly valuable for lease and sale under the Small Tract Act of June 1, 1938 (52 Stat. 609; 43 U. S. C. 682a), as amended:

U. S. Survey 2321—Lots D, K, M, V, W, Y, 3, 4.
U. S. Survey 2589—Lots 1-10, inclusive and Lots 12, 13, 14, and 16.

For Cabin Sites

U. S. Survey 2321—Lot G.

The above-described area comprises 23 tracts aggregating approximately 78.34 acres.

2. The lands lie within an elimination from the Tongass National Forest effected by Public Land Order 842 of June 19, 1952, and are located near the cities indicated above. The lands are accessible for the most part from the above mentioned cities by primary and secondary roads, or in some instances only by boat. The terrain is generally rocky, covered in most places with a thin mantle of soil. The vegetative cover consists mainly of a dense growth of hemlock, Sitka spruce, and cedar. The climate is typical of the southeastern Alaska coastal type, characterized by cool summers and mild winters, with heavy precipitation experienced throughout most of the year. A large part of the lands are presently served by public utilities. Adequate water supply for domestic uses may be obtained from water systems supplied by nearby streams, and sewage disposal may be made through use of cesspools and septic tanks. Commercial, school, and church facilities are available in the nearby cities, and in some places within immediate access of the lands.

3. This classification order shall not become effective to change the status of the land or to permit the leasing thereof under the Small Tract Act of June 1, 1938, cited above, until 10:00 a. m. on September 3, 1952. At that time the land shall, subject to valid existing rights and the provisions of existing withdrawals and section 24 of the Federal Power Act of June 10, 1920 (41 Stat. 1075; 16 U. S. C. 818), as amended, as to the lands lying within 50 feet of the center line of the transmission line right-of-way of Federal Power Project No. 201, of the Town of Petersburg, Alaska, become subject to application as follows:

(a) *Ninety-one day period for preference right filings.* For a period of 91 days from 10 a. m. on September 3, 1952, to close of business December 2, 1952, inclusive, to (1) application under the Small Tract Act of June 1, 1938, by qualified veterans of World War II, for whose service recognition is granted by the act of September 27, 1944 (58 Stat. 747, 43 U. S. C. Secs. 279, 282), as amended, and by other qualified persons entitled to credit for service under the said act, subject to the requirements of applicable law, and (2) applications under any applicable public land laws, based on prior existing valid settlement and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Application by such veterans and by other persons entitled to credit for service shall be subject to claims of the classes described in subdivision (2).

(b) *Advance period for simultaneous preference right filings.* All applications by such veterans and persons claiming preference rights superior to those of such veterans and filed on August 13, 1952, or thereafter, up to and including 10 a. m. on September 3, 1952, shall be treated as simultaneously filed.

(c) *Date for non-preference right filings authorized by the public land laws.* Commencing at 10 a. m. on December 3, 1952, any of the land remaining unappropriated shall become subject to application under the Small Tract Act by the public generally.

(d) *Advance period for simultaneous non-preference right filings.* Applications under the Small Tract Act by the general public filed on November 13, 1952, or thereafter, up to and including 10 a. m. on December 3, 1952, shall be treated as simultaneously filed.

4. A veteran shall accompany his application with a complete photostatic, or other copy (both sides) of his certificate of honorable discharge, or of an official document of his branch of service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claim. Persons asserting preference rights, through settlement or otherwise, and those having equitable claim, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

5. All applications referred to in paragraphs 3 and 4, which shall be filed in the Land Office at Anchorage, Alaska, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations to the extent that such regulations are applicable. Applications under the Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Part 257 of Title 43 of the Code of Federal Regulations.

6. Lessees under the Small Tract Act of June 1, 1938, will be required, within a reasonable time after execution of the lease, to construct upon the leased land, to the satisfaction of the appropriate officer of the Bureau of Land Management authorized to sign the lease, improvements which, in the circumstances, are presentable, substantial, and appropriate for the use for which the lease is issued. Leases will be for a period of not more than three years, at an annual rental of $5 for cabin sites and homesites, payable in advance for the entire lease period. The rental for business sites will be in accordance with a schedule of graduated charges based on gross income, with a minimum charge of $20 payable yearly in advance, the remainder, if any, to be paid within 30 days after each yearly anniversary of the lease. Every lease will contain an option to purchase clause and every lessee may file an application to purchase at the sale price as provided in the lease.

7. All of the land will be leased in tracts varying in size from approximately 0.07 to 7.17 acres, in accordance with the plats of survey on file in the Land Office, Anchorage, Alaska.

8. Lessees must locate any well, water supply system, or sewage disposal facility according to the regulations and laws of the Territory of Alaska.

9. As to the lands lying within the rectangular system of survey, leases will be made subject to rights-of-way for road purposes and public utilities, of 50 feet in width, along section and/or quarter section lines and 33 feet in width along other tract boundaries, as shown on the classification maps on file in the Land Office, Anchorage, Alaska. Such rights-of-way may be utilized by the Federal Government, State, Territory, county, or municipality, or any agency thereof. The rights-of-way may, in the discretion of the authorized officer of the Bureau of Land Management, be definitely located prior to the issuance of the patent. If not so located, they may be subject to location after patent is issued.

10. All inquiries relating to these lands shall be addressed to the Manager, Land Office, Anchorage, Alaska.

FRED J. WEILER, *Chief,*
Division of Land Planning.

[F. R. Doc. 52-9209; Filed, Aug. 20, 1952; 8:45 a. m.]

WYOMING

CLASSIFICATION ORDER NO. 12

AUGUST 12, 1952.

1. Pursuant to the authority delegated to me by the Director, Bureau of Land Management, by Order No. 427, dated August 16, 1950, 15 F. R. 5639, I hereby classify under the Small Tract Act of June 1, 1938 (52 Stat. 609), as amended July 14, 1945 (59 Stat. 467, 43 U. S. C. 682a), as hereinafter indicated, the following described land in the Cheyenne, Wyoming land district, embracing approximately 51.67 acres.

WYOMING SMALL TRACT CLASSIFICATION NO. 12

For lease and sale for home and business sites:

T. 52 N., R. 93 W., 6th P. M. Wyoming
Section 17, Lots 11 through 23 and Lot 25, as indicated on legal plat of survey by the Bureau of Land Management approved March 26, 1952, copies of which are on file and may be viewed at the office of the Manager, Land and Survey Office, Cheyenne, Wyoming, and also at the office of the Area Manager, Bureau of Land Management, Worland, Wyoming.

Lot 24, Section 17 is not available for lease or sale for the reason that this lot has already been classified for lease and sale under the provisions of the small tract act.

These lots lie adjacent to the city of Greybull, Wyoming. Year around access is provided to all of the tracts by U. S. Highway No. 20 and a county road. The Chicago, Burlington & Quincy Railroad passes through Lot 11 in a north-south direction. All of the lots, with the exception of Lot 11 have frontage on the county road or U. S. Highway No. 20. Electricity is available or can be obtained. Lot 24 which has already been classified for lease and sale for business purposes under the small tract act has been developed for business purposes and contains improvements necessary for the operation of a small oil refinery and a filling station. The land is level to rough but all of the lots contain a sufficient area of level ground for home or business sites.

2. As to applications regularly filed prior to 10 a. m., August 1, 1952, and are for the type of site for which the land is classified, this order shall become effective upon the date it is signed.

3. This order shall not otherwise become effective to change the status of such lands until 10 a. m. on the 35th day after the date of this order. At that time the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to applications under the Small Tract Act as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the public lands affected by this order shall be subject only to application under the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II, subject to the requirements of applicable law. All applications filed under this paragraph either at or before 10 a. m. on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10 a. m. on the 126th day after the date of this order, any lands remaining unappropriated shall become subject to disposal under the Small Tract Act only. All such applications filed either at or before 10 a. m. on the 126th day after the date of this order, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

4. A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their application by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

5. All of the land will be leased in individual tracts as shown on the approved plat of survey dated March 26, 1952, on file in the Land & Survey Office at Cheyenne, Wyoming.

6. Leases for homesites will be for a period of three years at an annual rental of $5.00 payable for the entire lease period in advance of the issuance of the lease. Leases for business purposes will be for a period of five years at a minimum annual rental of $20.00, payable for the entire lease period in advance of the issuance of the lease. Rentals on business sites will be in accordance with the schedule of rentals for business sites where such rental is in excess of the minimum rental of $20.00 per year.

(a) Leases for business sites shall contain a provision requiring an annual report from each lessee who has taken a tract for such purposes as to whether or not he has conducted a business thereon and if so, an accounting of the gross income derived therefrom. Such lease will also contain a clause reserving to the duly appointed, qualified and acting representative of the Department of the Interior the right to enter upon and inspect the premises and to examine the books and accounts pertaining to any business conducted thereon at any time during regular business hours.

Leases will contain an option to purchase clause at the appraised value of the tracts as follows:

T. 52 N., R. 93 W. Sec. 17	Per tract
Lot 11	$75.00
Lot 12	235.00
Lot 13	210.00
Lot 14	175.00
Lot 15	190.00
Lot 16	225.00
Lot 17	225.00
Lot 18	195.00
Lot 19	165.00
Lot 20	190.00
Lot 21	150.00
Lot 22	115.00
Lot 23	255.00
Lot 25	300.00

Application to purchase may be filed during the term of the lease but not more than 30 days prior to the expiration of one year from the date of the lease issuance.

7. Lessees under the Small Tract Act of June 1, 1938, will be required within a reasonable time after execution of the lease, to construct upon the leased land, to the satisfaction of the appropriate officer of the Bureau of Land Management authorized to sign the lease, improvements which in the circumstances are presentable, substantial and appropriate for the use for which the lease is issued.

8. Leases will be subject to existing rights-of-way for road and railroad purposes as follows:

100 ft. right-of-way along the south boundary of Lots 13, 14, 15, 16, 17, 18, 21, and 22.

150 ft. right-of-way along the west boundary of Lots 12 and 25.

100 ft. right-of-way on each side of the center line of the Chicago, Burlington & Quincy Railroad through Lot 11.

9. Lessees will be required to comply with the Wyoming State Highway Commission concerning road approaches, borrow pits and other requirements.

10. Lessees and/or their successors in interest shall comply with all Federal, State, county, and municipal laws and ordinances, especially those governing health and sanitation, and failure or refusal to do so may be cause for cancellation of the lease in the discretion of the authorized official of the Bureau of Land Management.

11. All inquiries relating to these lands should be addressed to the Manager, Land and Survey Office, Cheyenne, Wyoming.

PAUL W. HOWARD,
Acting Regional Administrator.

CIVIL AERONAUTICS BOARD

[Serial No. E-6619; Docket No. 1705 et al., Consolidated]

AIR FREIGHT RATE INVESTIGATION; DIRECTIONAL RATES

CERTIFICATED AND NON-CERTIFICATED AIR CARRIERS

Eighth supplemental order modifying minimum rates (Serial No. E-6698). In the matter of rates and charges for the transportation of freight by air established, demanded, and charged by certificated and non-certificated air carriers, known as air freight rate investigation (directional rates); Docket No. 1705 et al., Consolidated.

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 18th day of August 1952.

The Board on July 21, 1952, adopted an Order (Order Serial No. E-6619), incorporating a Statement of Tentative Findings and Conclusions (Statement), directing all interested parties to show cause why the Board should not adopt the findings and conclusions specified in the statement and indefinitely extend the directional rates authorized by Orders Serial Nos. E-4048, E-4890, and E-5648.

The time designated for filing notice of objection has elapsed and no notice of objection to the show cause order has been filed by any person.

All parties have therefore waived all other procedural steps short of the final decision of the Board.

The Board, hereby reaffirming and making final all the findings and conclusions in the order and statement: *It is ordered*, That:

1. The directional rates authorized by Orders Serial Nos. E-4048, E-4890, and E-5948 are extended indefinitely.

2. The record in this proceeding will be held open and any party in interest may petition for reconsideration and modification of the directional rates authorized by this order as to any commodity or groups of commodities between any points, such petition to be filed and further proceedings in connection therewith to be conducted as follows:

a. Each petition shall conform to §§ 302.3 and 302.200 (b) of the rules of practice in Economic Proceedings and in addition two copies of such petition shall be served by the petitioner upon all parties or their attorneys of record;

b. Within 10 days after service of any such petition any party may file an answer thereto, such answer to be executed and copies thereof to be filed and served in the same manner as provided herein for petitions;

c. Further proceedings in connection with any such petition shall be conducted in such manner as the Board may deem appropriate.

3. The Board may on its own motion modify the directional rates established herein in any such manner as it may deem proper.

4. This order be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[Docket No. 4603, et al.]

NORTH CENTRAL ROUTE INVESTIGATION CASE; REOPENED

NOTICE OF POSTPONEMENT OF HEARING

In the matter of the Reopened North Central Route Investigation Case.

Notice is hereby given, pursuant to the provisions of the Civil Aeronautics Act of 1938, as amended, that hearing in the above-entitled proceeding, now assigned for September 3, 1952, is postponed indefinitely and that announcement of the new hearing date will be made at a later time.

Dated at Washington, D. C., this 18th day of August 1952.

By the Civil Aeronautics Board.

[SEAL] FRANCIS W. BROWN,
Chief Examiner.

[F. R. Doc. 52-9236; Filed, Aug. 20, 1952; 8:50 a. m.]

[Docket No. 5647]

PROVINCE OF SASKATCHEWAN, DOMINION OF CANADA; DEPARTMENT OF PUBLIC HEALTH AIR AMBULANCE SERVICE

NOTICE OF HEARING

In the matter of the application of the Department of Public Health, Province of Saskatchewan, Dominion of Canada for a foreign air carrier permit pursuant to section 402 of the Civil Aeronautics Act of 1938, as amended.

Notice is hereby given pursuant to the Civil Aeronautics Act of 1938, as amended, particularly sections 402 and 1001 of the said act, that hearing in the above-entitled proceeding is assigned to be held on August 26, 1952 at 10:00 a. m., e. d. t., in Room 5040 Commerce Building, Fourteenth and E Streets, NW., Washington, D. C., before Examiner Barron Fredricks.

Without limiting the scope of the issues presented by the application, particular attention will be directed to the questions whether it will be in the public interest to authorize the Province of Saskatchewan to operate air ambulance service in foreign air transportation between points in the Province and points in the United States, and whether the requested authorization will be consistent with the obligations assumed by the United States in any treaty, convention or agreement that may be in force between the United States and the Dominion of Canada or any other foreign country.

For further details as to the requested authorization and the issues in connection therewith, reference is made to the application and the report of the prehearing conference on file in the Board's Docket Section.

Notice is further given that any person, other than a party of record, desiring to be heard in this proceeding must file with the Board on or before August 26, 1952, a statement setting forth the pertinent issues of fact or law that he desires to controvert or support, and such person then may appear and participate at the hearing in accordance with the Board's rules of practice.

Dated at Washington, D. C., August 18, 1952.

By the Civil Aeronautics Board.

[SEAL] FRANCIS W. BROWN,
Chief Examiner.

ECONOMIC STABILIZATION AGENCY

Office of Price Stabilization

[Delegation of Authority 6, Supplement 8, Revision 1]

CHIEFS OF BRANCHES, CONSUMER GOODS DIVISION

REDELEGATION OF AUTHORITY TO REQUEST FURTHER INFORMATION CONCERNING PROPOSED CEILING PRICES

By virtue of the authority vested in me as Director of the Consumer Goods Division of the Office of Price Operations, Office of Price Stabilization, by Delegation of Authority No. 6, Supplement 1, Revised (16 F. R. 3672; 17 F. R. 2105), this delegation of authority is hereby issued.

Delegation of Authority No. 6, Supplement 3, effective May 4, 1951 (16 F. R. 4153) is revised to read as follows:

1. Authority is hereby redelegated to the Chiefs of the Branches of the Consumer Goods Division of the Office of Price Operations, Office of Price Stabilization to request further information from a seller who has submitted a proposed ceiling price for approval.

2. This redelegation of authority supersedes Delegation of Authority 6, Supplement 7 (16 F. R. 4628).

This redelegation of authority shall take effect on August 20, 1952.

THOMAS L. KARSTEN,
Director, Consumer Goods Division, Office of Price Operations.

[F. R. Doc. 52-9213; Filed, Aug. 20, 1952; 8:46 a. m.]

[Docket Nos. G-1810, G-1938, G-1939]

TEXAS-OHIO GAS CO.

ORDER RECONVENING HEARING

AUGUST 14, 1952.

On October 10, 1951, Texas-Ohio Gas Company (Applicant) filed, in Docket No. G-1810, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of a natural-gas pipeline system from a point in Hidalgo County, Texas, to a point in the State of West Virginia.

On November 6, 1951, the Commission notified Applicant that the data and exhibits in support of the application were lacking and directed that such data be filed by December 1, 1951. At the request of Applicant, this period was extended 60 days to February 1, 1952. On January 31, 1952, Applicant filed a request that it be granted an additional 90 days to file such data, although Applicant stated in its request that it would be prepared to proceed on April 1, 1952, or in 60 days from February 1, 1952. In response to such request the Commission, by order of February 20, 1952, found that it would be in the public interest to grant Applicant an extension of not more than 60 days within which to file the necessary supporting data and exhibits, and set the application for hearing to commence on April 15, 1952. Paragraph (B) of the Commission's February 20, 1952, order provided as follows:

> Failure on the part of Applicant to be fully prepared on said hearing date to prosecute its application with all supporting data, exhibits and evidence shall be ground for dismissal.

Hearings on the application in Docket No. G-1810 commenced on April 15 and continued until April 17, 1952, on which date the Commission, by order, recessed the hearings to permit its consideration of a motion made by Commission Staff Counsel for the dismissal of the application without prejudice. Thereafter, on May 13, 1952, the Commission, by order, provided for oral argument before the Commission on June 6, 1952, concerning the matters involved and the issues presented by said motion to dismiss and the answer which had been filed by the Applicant opposing such motion.

Upon consideration of the matters presented at the oral argument on June 6, 1952, the Commission on June 17, 1952, entered an order reserving decision on the Staff's motion to dismiss the proceeding in Docket No. G-1810 pending Applicant's presentation of the supporting evidence that it was then prepared to offer, and setting the G-1810 application for further hearings to commence on July 7, 1952. By that order the Commission consolidated the proceedings in Docket Nos. G-1938 and G-1939 with the proceeding in Docket No. G-1810. This order, by providing for further hearings, afforded the Applicant a further opportunity to discharge its obligation to show in Docket No. G-1810 that it is entitled to a certificate. Paragraph (D) of that order provided as follows:

> After Applicant has presented all of its evidence in support of the applications at Docket Nos. G-1810, G-1938, and G-1939, other parties, including Staff counsel, may conduct so much of their cross-examination as they are then prepared to undertake. Thereupon, the Presiding Examiner shall recess the hearing pending further order of the Commission.

The hearings resumed on July 7, 1952, and continued until July 14, 1952, when the same were recessed at the request of the Applicant to reconvene on August 4, 1952. The hearing reconvened on August 4, 1952, and near the close of the proceedings on that date, Applicant moved for a 30-day continuance of the hearings in the above-entitled dockets. This motion was made orally on the record and reads as follows:

> Now, if the Court please, I move that this case stand in recess for 30 days, during which time it shall be the privilege of the Texas-Ohio Gas Company to present to the staff of the Commission geological data and further contracts in support of this petition, that when the case be reconvened we be ready for cross-examination and at the same time that we be permitted to introduce such contracts and data as may already at that time have been presented to the staff for its study and examination.

Commission Staff Counsel and counsel for interveners, National Coal Association, et al., opposed the motion. After argument thereon the Presiding Examiner recessed the hearing subject to further order of the Commission.

The Commission finds: Applicant has been afforded abundant opportunity to complete the presentation of evidence in support of its applications in the above-entitled proceedings, but has failed to do so. However, it may be appropriate and in the public interest to afford applicant a further and final opportunity to complete its case, and, accordingly, the hearing should be reconvened as hereinafter ordered.

The Commission orders:

(A) The public hearing in the above-entitled proceedings shall reconvene on September 2, 1952, at 10 a. m., e. d. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C.

(B) At such public hearing Applicant shall present all of its evidence in support of its applications in Docket Nos. G-1810, G-1938 and G-1939 and complete its entire direct case without further continuance. Upon conclusion of such presentation by Applicant, other parties, including Staff counsel, may conduct so much of their cross-examination as they are then prepared to undertake. Thereupon, the Presiding Examiner shall recess the hearing pending further order of the Commission.

Date of issuance: August 15, 1952.

By the Commission.

[SEAL] J. H. GUTRIDE, *Acting Secretary.*

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-2903]

SOUTHWESTERN DEVELOPMENT CO. ET AL.

ORDER AUTHORIZING ISSUE AND SALE OF TWO YEAR NOTES

AUGUST 15, 1952.

In the matter of Southwestern Development Company, Amarillo Gas Company, West Texas Gas Company; File No. 70-2903.

Southwestern Development Company ("Southwestern"), a registered holding company, and two of its wholly-owned subsidiaries, Amarillo Gas Company ("Amarillo Gas") and West Texas Gas Company ("West Texas"), having filed a joint application-declaration and amendments thereto, pursuant to sections 7, 10 and 12 (b) of the Public Utility Holding Company Act of 1935 ("act"), and Rule U-50 (a) (2) and (3) promulgated under the act, with respect to the following proposed transactions:

Pursuant to a supplemental loan agreement dated July 15, 1952, Southwestern proposes to borrow from Guaranty Trust Company of New York ("Bank") $2,700,000, and to issue and sell to the Bank, as evidence of said loan, a two year 3¼ percent unsecured note, in the same principal amount.

Southwestern proposes to advance the total proceeds of said loan ($2,700,000) to Amarillo Gas and West Texas in the principal amounts of $300,000 and $2,400,000, respectively. Amarillo Gas and West Texas propose to issue and sell, and Southwestern proposes to acquire, the separate two-year 3¼ percent unsecured notes of such subsidiaries in the foregoing respective amounts. It is stated that Amarillo Gas and West Texas will use the proceeds of said loans to pay the cost of necessary additional facilities, to provide working capital, and for other proper corporate purposes.

It is represented that no State Commission approval of the proposed transactions is required, and that no other Federal Commission has jurisdiction over such transactions. Applicants-declarants request that the Commission's order herein become effective upon its issuance.

Notice of the filing of the application-declaration having been given in the form and manner provided by Rule U-23 promulgated under the act, and a hearing not having been requested of or ordered by the Commission, and the Commission finding that the applicable provisions of the act and the rules and regulations promulgated thereunder are satisfied, that no adverse findings are necessary, observing no basis for imposing terms and conditions other than those specified by Rule U-24, and deeming it appropriate in the public interest and in the interest of investors and consumers that said application-declaration be granted and permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act and the rules and regulations promulgated under the act, that said application-declaration, as amended, be, and it hereby is granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

It is further ordered, That this order shall become effective upon its issuance.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F R. Doc. 52-9216; Filed, Aug. 20, 1952; 8:47 a. m.]

[File No. 70-2907]

UNITED GAS CORP. ET AL.

ORDER REGARDING PURCHASE OF DEBT SECURITIES OF SUBSIDIARY COMPANIES

AUGUST 14, 1952.

In the matter of United Gas Corporation, United Gas Pipe Line Company, Union Producing Company; File No. 70-2907.

United Gas Corporation ("United"), a gas utility subsidiary of Electric Bond and Share Company, a registered holding company, and United's two wholly owned subsidiaries, United Gas Pipe Line Company ("Pipe Line") and Union Producing Company ("Union"), having filed a joint application-declaration, and amendment thereto, pursuant to the Public Utility Holding Company Act of 1935, particularly sections 6 (a), 7, 9 (a) (1), 10 and 12 thereof with respect to the following transactions:

United proposes to purchase from Pipe Line and Pipe Line proposes to issue and sell to United for cash at the face amount of $12,000,000 principal amount of Pipe Line's 4½ percent Sinking Fund Debentures due 1971. The proceeds from said sale will be used by Pipe Line for its general corporate purposes, including the financing of its construction program.

United proposes to lend to Union and the latter proposes to borrow from United the sum of $1,000,000. The proposed loan will be evidenced by an unsecured promissory note issued by Union to United or order, payable on or before six years from the date of issuance, and bearing interest at the rate of 4 percent per annum. The proceeds from the loan will be used by Union to increase its working capital.

Under the terms of United's Mortgage and Deed of Trust, as supplemented, securing United's outstanding First Mortgage and Collateral Trust Bonds, the note evidencing the proposed loan to Union is required to be pledged with the Corporate Trustee, and the Debentures which Pipe Line proposes to sell to United must include a statement that they are non-negotiable and cannot be transferred, assigned or pledged except to a successor of United.

United will obtain the funds necessary to acquire the above-mentioned debt securities of Pipe Line and Union from aggregate borrowings of $15,000,000 from commercial banks, such borrowings to be evidenced by United's 3 percent Promissory Notes payable on or before December 31, 1952.

The application-declaration states that the proposed transactions have been adopted by the companies for the purpose of securing needed capital funds on an interim basis. The borrowings which will be made by United in the aggregate amount of $15,000,000 from commercial banks will be refinanced on a permanent basis by the later issuance and sale of securities. The nature and amounts of such securities will be the subject of an application to be filed at a later date with this Commission.

The application-declaration also states that the proposed transactions are initial steps in an over-all financing program designed to provide the companies with funds to finance on a permanent basis their estimated construction requirements for the years 1952 and 1953, including the repayment by United of the bank borrowings described above and the presently outstanding bank loans of United maturing on July 1, 1953 in the aggregate amount of $35,000,000. United's management anticipates that, in order to finance the 1952 and 1953 construction requirements and to repay the above-described bank loans, United will be required to raise, on a permanent basis, approximately $100,000,000.

The joint application-declaration having been filed on July 28, 1952, an amendment thereto having been filed on August 11, 1952, notice of said filing having been given in the form and manner required by Rule U-23 promulgated pursuant to said act, the Commission not having received a request for a hearing within the time specified in said notice, or otherwise, and the Commission not having ordered a hearing thereon; and

The Commission finding that the proposed transactions are in accordance with the applicable standards of the act and that no adverse findings are necessary thereunder, and the Commission deeming it appropriate that said joint application-declaration, as amended, should be granted and permitted to become effective without the imposition of terms or conditions:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act and subject to the terms and conditions contained in Rule U-24, that said joint application-declaration, as amended, be, and the same hereby is, granted and permitted to become effective, forthwith.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 52-9215; Filed, Aug. 20, 1952; 8:47 a. m.]

[File No. 812-788]

FIDUCIARY MANAGEMENT, INC., AND R. PAUL WEESNER

NOTICE OF APPLICATION

AUGUST 15, 1952.

Notice is hereby given that Fiduciary Management, Inc. (hereinafter called Fiduciary), 55 Green Village Road, Madison, New Jersey, an investment company registered under the Investment Company Act of 1940, has filed an application pursuant to section 17 (b) of the act on behalf of R. Paul Weesner, 9632 Northeast Fifth Avenue Road, Miami Shores, Florida (hereinafter called Weesner), for an order of the Commission exempting from the provisions of section 17 (a) of the act the proposed sale by Weesner to Fiduciary of all of the outstanding shares of the capital stock of Nationwide Air Transport Service, Inc. (hereinafter called Nationwide), in consideration of 104,412 shares of the authorized but unissued common stock of Fiduciary.

The agreement of sale, dated June 2, 1952, provides that on the closing date the assets of Nationwide will consist solely of 1,953,000 shares of the common stock of Resort Airlines, Inc. (hereinafter called Resort), and not less than $147,461.89 in cash plus any and all dividends and distributions paid to Nationwide on the common stock of Resort between the date of the agreement and the closing date, and that the total liabilities of Nationwide will not exceed $12,323.34. As security against any further liabilities of Nationwide, and any expenses in connection therewith, the agreement provided for the deposit with Fiduciary by Weesner for a period of three years of 20,000 of the shares of Fiduciary to be received by Weesner. The contract is expressly subject to a favorable order under section 17 (b) of the act.

Fiduciary presently owns 5,553,866, or 62 percent, of the outstanding 8,956,240 common shares of Resort. Following the consummation of the proposed sale, Fiduciary intends to liquidate Nationwide.

Nationwide was organized by Weesner for the purpose of running a non-schedule airline. On January 15, 1951, it sold substantially all of its assets to Resort for 2,000,000 shares of Resort stock. It was made a condition of the agreement of sale that prior to the closing date Resort and Weesner should have entered into an agreement for the employment of Weesner as an officer of Resort.

There is no active market in the stock of either company and Resort has had an insufficient earnings record upon which to base a valuation. It is urged in the application that the exchange is justified by management's appraisal of the net asset value of $4.10 per share for Fiduciary's stock as of May 26, 1952 (using 15 cents a share for the Resort stock owned by Fiduciary) and the book value of 15 cents a share for the Resort stock as shown by its balance sheet as at December 31, 1951. Fiduciary acquired all of its shares of Resort at 10 cents per share.

By reason of his employment as president of Resort and his indirect owner-

ship of approximately 22 percent of the stock of Resort, Weesner is an affiliate of an affiliate of Fiduciary. The proposed transaction therefore appears to be prohibited by section 17 (a) of the act. Accordingly, the application requests an order pursuant to section 17 (b) exempting the transaction from the prohibitions of section 17 (a).

Notice is further given that an order granting the application, in whole or in part and upon such conditions as the Commission may deem necessary or appropriate, may be issued by the Commission at any time after September 4, 1952, unless prior thereto a hearing upon the application is ordered by the Commission, as provided in Rule N–5 of the rules and regulations promulgated under the act. Any interested person may, not later than September 2, 1952, at 5:30 p. m., submit to the Commission in writing his views or any additional facts bearing upon this application or the desirability of a hearing thereon or request the Commission in writing that a hearing be held thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., and should state briefly the nature of the interest of the person submitting such information or requesting a hearing, the reasons for such request, and the issues of fact or law raised by the application which he desires to controvert.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

INTERSTATE COMMERCE COMMISSION

[Fourth Sec. Application 27315]

SAND AND GRAVEL FROM DICKASON PIT, IND., TO WELLINGTON, ILL.

APPLICATION FOR RELIEF

AUGUST 18, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: W. S. Mercer, Alternate Agent, for the Chicago & Eastern Illinois Railroad Company.

Commodities involved: Sand and gravel, carloads.

From: Dickason Pit, Ind.

To: Wellington, Ill.

Grounds for relief: Market competition and wayside pit competition.

Schedules filed containing proposed rates: C&EI RR. tariff I. C. C. No. 144, Supp. 18.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[Fourth Sec. Application 27316]

FERTILIZER FROM POINTS IN ARKANSAS, LOUISIANA, AND TEXAS TO VIRGINIA

APPLICATION FOR RELIEF

AUGUST 18, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to his tariff I. C. C. No. 3746.

Commodities involved: Fertilizer and fertilizer materials, carloads.

From: Points in Arkansas, Louisiana, and Texas.

To: Points in Virginia.

Grounds for relief: Competition with rail carriers, circuitous routes, and additional routes.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3746, Supp. 91.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] W. P. BARTEL, *Secretary.*

VOLUME 17 1934 NUMBER 165

Washington, Friday, August 22, 1952

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10386

INSPECTION OF FILES COVERING COMPROMISE SETTLEMENTS OF TAX LIABILITY

By virtue of the authority vested in me by sections 55 (a), 508, 603, 729 (a), and 1204 of the Internal Revenue Code (53 Stat. 29, 111, 171; 54 Stat. 989, 1008; 55 Stat. 722; 26 U. S. C. 55 (a), 508, 603, 729 (a), and 1204), it is hereby ordered that income, excess profits, declared value excess profits, capital stock, estate or gift tax returns for any taxable year shall be open to inspection to the extent necessary to permit the inspection of any accepted offer in compromise under section 3761 of such code relative to liability for any such tax and of any schedules or other papers relevant thereto. Such inspection shall be subject to the conditions stated in the related Treasury decision approved by me this date.[1]

TITLE 5—ADMINISTRATIVE PERSONNEL

Chapter I—Civil Service Commission

PART 20—RETENTION PREFERENCE REGULATIONS FOR USE IN REDUCTIONS IN FORCE

REAPPOINTMENT PRIORITY; STATUS AFTER REAPPOINTMENT

A new paragraph (d) is added to § 20.11 as set out below. This amendment, which is effective August 15, 1952, affords a permanent employee who is separated by reduction in force the same retention preference upon reemployment that he would have if furloughed instead of separated. Section 20.11 (d) reads as follows:

§ 20.11 *Reappointment priority.*

* * *

(d) *Status after reappointment.* Any employee whose name has been entered on a reappointment reserve list and who is reemployed in a competitive position, in the same or a different agency within the one-year period following the date of the notice under which he was separated, shall have retention preference as a permanent employee to the same extent as though he had been furloughed instead of separated by reduction in force: *Provided*, That any such employee in the competitive service on the effective date of this paragraph who was reemployed after September 1, 1950, under the same conditions as prescribed in this paragraph, shall be placed in the appropriate retention group as a permanent employee.

amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (hereinafter referred to as the "act"), and the rules of practice and procedure governing the formulation of marketing agreements and orders (7 CFR, supps., 900.1 et seq.), a public hearing was held at Minneapolis, Minnesota, on July 16, 1952, upon a proposed amendment to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Minneapolis-St. Paul, Minnesota, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is hereby found that:

(1) The said order, as hereby amended, and all of the terms and conditions of said order as hereby amended, will tend to effectuate the declared policy of the act.

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for such milk and the minimum prices specified in the order, as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as hereby amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order, as amended, effective not later than September 1, 1952. Any delay beyond September 1, 1952, in the effective date of this order amending the order, as amended, will seriously disrupt the orderly marketing of milk for the Minneapolis-St. Paul, Minnesota, marketing area. The changes effected by this order amending the order, as amended, do not require of persons affected, substantial or extensive preparation prior to the effective date. In view of the foregoing, it is hereby found that good cause exists for making this order effective September 1, 1952 (see sec. 4 (c) Administrative Procedure Act, 5 U. S. C. 1003 (c)).

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping the milk covered by this order, which is marketed within the Minneapolis-St. Paul, Minnesota, marketing area) refused or failed to sign the proposed marketing agreement regulating the handling of milk in the Minneapolis-St. Paul, Minnesota, marketing area, and it is hereby further determined that: (1) The refusal or failure of such handlers to sign said proposed marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practicable means pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the Minneapolis-St. Paul, Minnesota, marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers, who during the determined representative period (May 1952) were engaged in the production of milk for the Minneapolis-St. Paul, Minnesota, marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Minneapolis-St. Paul, Minnesota, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

Delete § 973.50 (a) and substitute therefor the following:

(a) *For Class I milk.* The price shall be the basic price determined pursuant to § 973.51 plus 70 cents during the delivery periods of January to April, inclusive; plus 60 cents during May and June; plus $1.10 during the delivery periods of July to November, inclusive; and plus 80 cents during December.

(Sec. 5, 40 Stat. 753, as amended; 7 U. S. C. and sup. 608c)

Issued at Washington, D. C., this 19th day of August 1952, to be effective on and after the 1st day of September 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

[F. R. Doc. 52-9259; Filed, Aug. 21, 1952; 8:49 a. m.]

TITLE 22—FOREIGN RELATIONS

Chapter I—Department of State

[Dept. Reg. 108.161]

PART 127—SHIPPING AND SEAMEN: VESSELS OF THE UNITED STATES IN FOREIGN PORTS

DISCHARGE OF SEAMEN; MEDIUM FOR PAYMENT OF WAGES

Part 127 is amended as follows:

1. Section 127.16 (a) is amended to read as follows:

§ 127.16 *Discharge of seamen.* (a) The master of a vessel of the United States cannot lawfully discharge a seaman in a foreign port without the intervention of the United States consular officer if the seaman signed the shipping agreement before a United States Shipping Commissioner or consular officer; and it is not material in such case that the discharge is made with the seaman's consent or that he has been guilty of misconduct, or is not a citizen of the United States. [7 Op. Att. Gen. 349.]

• • • • •

2. Section 127.18 (b) is amended to read as follows:

§ 127.18 *Medium for payment of wages.* • • •

(b) *Voucher.* A seaman discharged at a foreign port shall be given, if he so elects, instead of full or partial payment of his wages at the time of discharge, a wage voucher signed by the master, evidencing the amount owed the seaman to be paid in future settlement.

• • • • • •

(Sec. 302, 60 Stat. 1001; 22 U. S. C. 842)

Date issued: August 14, 1952.

This amendment shall be effective on September 1, 1952.

SAMUEL D. BOYKIN,
Director, Office of Security and Consular Affairs.

[F. R. Doc. 52-9253; Filed, Aug. 21, 1952; 8:49 a. m.]

TITLE 26—INTERNAL REVENUE

Chapter I—Bureau of Internal Revenue, Department of the Treasury

Subchapter C—Miscellaneous Excise Taxes

[Regs. 113, T. D. 5926]

PART 143—TAX WITH RESPECT TO THE TRANSPORTATION OF PROPERTY

CHANGES IN PROCEDURE FOR ESTABLISHING EXEMPTION FROM TAX IN CASE OF EXPORT SHIPMENTS

In order to conform Regulations 113 (26 CFR Part 143), relating to the tax on the amount paid for the transportation of property, to a change in procedure for establishing exemption from the tax in the case of property shipped for export and actually exported, such regulations are amended as follows:

PARAGRAPH 1. Section 143.31 is amended by changing the last sentence of paragraph (c) to read as follows: "The amount paid for transportation from the point of diversion or reconsignment to the foreign destination will be considered as exempt from tax provided an export exemption certificate is filed. (See §§ 143.33 and 143.34.)"

PAR. 2. Section 143.32 is amended to read as follows:

§ 143.32 *Export shipments not requiring exemption certificate.* An amount paid for the transportation of property shipped direct from a point within the United States to a point outside the United States under a through bill of lading, a through export bill of lading, or a domestic bill of lading showing the name of the foreign consignee and the ultimate foreign destination will be treated as exempt from the transportation tax, without further evidence of actual exportation. In case a through bill of lading is not issued at the point of origin, but the shipper intends to obtain a through bill of lading, there should be stamped across the original shipping papers the words: "To be exchanged for through bill of lading." The original shipping papers in such case must show a consignee and destination outside the United States.

PAR. 3. Section 143.33 is amended to read as follows:

§ 143.33 *Export shipments requiring exemption certificate.* (a) An amount paid for an export shipment not made on a through bill of lading, a through export bill of lading, or a domestic bill of lading showing the name of the foreign consignee and the ultimate foreign destination, will be exempt from the transportation tax, provided (1) the shipment is covered by an Export Exemption Certificate, Form 1363, and (2) proof of exportation is obtained as required by § 143.34. The certificate shall be executed, in triplicate, by the shipper or other person who pays the transportation charge. Such person shall retain the triplicate with the shipping papers and file the original and duplicate with the agent of the carrier at the time of payment of the transportation charge. The carrier receiving an Export Exemption Certificate shall retain the duplicate with the paid transportation document, and forward the original with its monthly return, Form 727, Revised, to the collector of internal revenue for the district in which the carrier's principal place of business is located.

(b) If a break for a business purpose occurs in the transportation movement covered by an Export Exemption Certificate, the amount paid for the transportation from the point of origin to the point where the break occurs is taxable and the shipper or other person who paid the transportation charge shall furnish information to the Commissioner similar to that set forth in § 143.34 in order that the tax due may be assessed and collected.

PAR. 4. Section 143.34 *Proof of exportation* is amended as follows:

(A) By substituting for paragraph (a) thereof the following:

(a) The Export Exemption Certificate, Form 1363, suspends liability for the payment of the tax for a period of 6 months from the date of shipment from the point of origin. If within such period the shipper or other person who paid the transportation charge has not received evidence of the actual exportation of a shipment, covering which an Export Exemption Certificate, Form 1363, has been filed, then the temporary suspension of the liability for the payment of the tax ceases. Within 30 days after termination of the temporary suspension period the shipper or other person who paid the transportation charge shall forward to the Commissioner of Internal Revenue, Washington 25, D. C., attention: Ext: M, a statement setting forth with respect to each certificate involved (1) the date the shipment covered thereby was made from the point of origin, (2) the amount paid for the transportation, and (3) the date such payment was made, in order that the tax due may be assessed and collected. If proof of exportation is subsequently received, the person who paid the tax may file a claim for refund on Form 843, but such action must be taken within the 4-year period of limitation prescribed by section 3313.

(B) By substituting for paragraph (c) thereof the following:

(c) If the shipper or other person who paid the transportation charge is not the actual exporter and is unable to obtain the documentary evidence of exportation specified in paragraph (b) of this section, such person shall obtain from the person having custody of the documentary evidence a statement (1) certifying that the property covered by the Export Exemption Certificate, Form 1363, was in fact exported, (2) identifying the evidence of exportation, (3) specifying the foreign destination or the possession of the United States to which the property was shipped, or in lieu thereof, certifying that the property was not shipped to the Territories of Alaska or Hawaii, and (4) showing where the evidence of exportation will be available for inspection by internal revenue officers for a period of 4 years.

PAR. 5. Section 143.35 is amended as follows:

(A) By striking from paragraph (b) the words "a Temporary Exemption Certificate, Form 798," and inserting in lieu thereof the words "an Export Exemption Certificate, Form 1363,".

(B) By substituting the following new paragraph (c) for paragraph (c) and (d) thereof:

(c) Where a person has been designated to direct the exporting operations of a pool with authority to control its accounting practice, an additional copy of the Export Exemption Certificate, Form 1363, filed with the carrier covering each shipment entering the pool, shall be furnished to such person by the person who pays the transportation charge. The director of the pool may, in behalf of the shipper or other person who paid the transportation charge, make the statement to the Commissioner prescribed in the first paragraph of § 143.34 with respect to any transportation of property entering the pool in excess of the quantity of the same grade and kind actually exported therefrom.

Because this Treasury decision makes only a procedural change in net effect reducing the burden on persons subject to the regulations, it is found that it is unnecessary to issue such Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4 (c) of said act.

The amendments made by this Treasury decision shall be effective on the first day of the first month which begins more than thirty days after the date such Treasury decision is published in the FEDERAL REGISTER.

(53 Stat. 423 as amended, 467; 26 U. S. C. 3472, 3791)

[SEAL] NORMAN A. SUGARMAN,
Acting Commissioner of Internal Revenue.

Approved: August 19, 1952.

THOMAS J. LYNCH,
Acting Secretary of the Treasury.

[F. R. Doc. 52-9281; Filed, Aug. 21, 1952; 8:55 a. m.]

Subchapter E—Administrative Provisions Common to Various Taxes

[T. D. 5927]

PART 458—INSPECTION OF RETURNS

INSPECTION OF RETURNS AND OTHER RELEVANT PAPERS IN COMPROMISE CASES

AUGUST 19, 1952.

§ 458.313 *Inspection of returns and other relevant papers in compromise cases.* (a) Pursuant to the provisions of section 55 (a), 508, 603, 729 (a), and 1204 of the Internal Revenue Code (53 Stat. 29, 111, 171; 54 Stat. 989, 1008; 55 Stat. 722; 26 U. S. C. 55 (a), 508, 603, 729 (a), and 1204), and of the Executive order issued thereunder,[1] income, excess-profits, declared valve excess-profits, capital stock, estate, or gift tax returns for any taxable year shall be open to inspection to the extent necessary to permit the inspection of any accepted offer in compromise under section 3761 of such code relative to the liability for any such tax and of any schedules or other papers relevant thereto.

(b) The inspection authorized by paragraph (a) of this section shall be subject to such rules, and shall be made only under such circumstances, as the Secretary of the Treasury, or such official as he may designate, shall determine to be in the public interest.

(c) Because this Treasury decision constitutes a general statement of policy and establishes a rule of Department practice, it is found that it is unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4 (c) of that act.

This Treasury decision shall be effective upon its filing for publication in the FEDERAL REGISTER.

JOHN W. SNYDER,
Secretary of the Treasury.

Approved: August 20, 1952.

HARRY S. TRUMAN,
The White House.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 24, Amdt. 17]

CPR 24—CEILING PRICES OF BEEF SOLD AT WHOLESALE

BEEF IMPORTED FROM NEW ZEALAND

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, Economic Stabilization Agency General Order 2, Delegation of Authority by the Secretary of Agriculture with respect to meat, as amended, and Economic Stabilization Agency General Order 5, Revision, this Amendment 17 to Ceiling Price Regulation 24 is hereby issued.

STATEMENT OF CONSIDERATIONS

Amendment 16 to CPR–24 permitted the sale of beef imported from New Zealand which was cut with three ribs on the hindquarter and ten ribs on the forequarter. In discussions with the Canadian Embassy concerning the New Zealand beef, it was indicated that the beef would be shipped to this country either in quarters or in the form of boneless processing beef. The Embassy agreed that it would be possible to dispose of the beef by limiting the sales to whole quarters of beef.

However, when the meat arrived in this country it was found that some of the meat was shipped in quarters but that some of it was shipped in the form of wholesale cuts. Furthermore, some of the agents who were handling this meat for the Canadian Embassy indicated that they were unable to market the meat in whole quarters but found it necessary to sell wholesale cuts in order to dispose of this meat.

Accordingly, this amendment authorizes the sale of New Zealand beef in the form of wholesale cuts. It provides a list of discounts for each of the various wholesale cuts which will be miscut as a result of the New Zealand style of cutting. All wholesale cuts priced in Schedule I of CPR–24 may be sold at the regular price contained in that schedule except those covered by Special Adjustment 5 which was added in Amendment 16 and which is revised in this amendment.

It was originally represented that the boneless beef would be shipped in containers which will, after passing through Customs, bear a custom's seal. However, it appears that a custom's seal is not being affixed to the containers of boneless beef but, in lieu thereof, a seal of the Bureau of Animal Inspection is being affixed to each container of boneless beef. Consequently, the regulation is being amended to permit the sale of New Zealand boneless beef where the meat has been inspected and approved by the B. A. I.

In formulating this amendment, the Director of Price Stabilization has consulted so far as practicable with industry representatives, including trade association representatives, and has given full consideration to their recommendations. In his judgment the provisions of this regulation are generally fair and equitable, are necessary to effectuate the purposes of Titles I and IV of the Defense Production Act of 1950, as amended, are necessary and appropriate to promote the national defense, and comply with all the applicable standards of the act.

All standards prescribed in this amendment were, prior to the issuance of Ceiling Price Regulation 24, in general use in the meat industry. Such standards as are prescribed are indispensable to price control of beef, since no practicable alternative to such standardization exists for securing effective price control of this commodity. It is not believed that this amendment will cause any substantial changes in business practices, cost practices or methods, or means or aids to distribution; however, to the extent that such changes may be compelled, they are necessary to prevent circumvention or evasion of Ceiling Price Regulation 24, as amended.

AMENDATORY PROVISIONS

Ceiling Price Regulation 24 is amended in the following respects:

1. The last sentence of section 11 (b) (1), which was added by Amendment 16, is amended to read as follows: "You are not prohibited from selling a beef hindquarter, forequarter or cuts therefrom which are derived from beef imported from New Zealand and which have been cut in a manner other than that specified in Appendix 2."

2. Special Adjustment (5) to Schedule I, section 20, which was added by Amendment 16, is amended to read as follows:

(5) Your ceiling price for beef imported from New Zealand shall be the ceiling prices specified above except the following cuts which shall be discounted as follows:

	Per hundredweight
Forequarters	$0.50
Hindquarters	.50
Back	.50
Trimmed Loin	1.50
Untrimmed Short Loin	2.00
Trimmed Short Loin	2.50
Rib	3.50

3. The last sentence of section 29 (b), which was added by Amendment 16, is amended to read as follows: "However, notwithstanding any provisions of this regulation or of Distribution Regulation 2, you may sell imported boneless New Zealand beef provided such boneless beef is sold in its original shipping container which bears the inspection stamp of the B. A. I. and which is sold at prices not exceeding those prescribed in section 23 of this regulation."

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment shall become effective August 21, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 21, 1952.

[F. R. Doc. 52-9340; Filed, Aug. 21, 1952; 11:03 a. m.]

[Ceiling Price Regulation 30, Amdt. 36]

CPR 30—MACHINERY AND RELATED MANUFACTURED GOODS

DEFINITION OF MANUFACTURER

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 36 to Ceiling Price Regulation 30 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment changes the definition of the term "manufacturer", in two respects. The first of these changes, which is made for the purpose of clarification, modifies the subparagraph of the definition which deals with persons who sell a commodity under their own brand or trade name where they produce the same or a similar commodity to make it clear that the word "similar" means alike with respect to both physical properties and functions performed.

The second change, which is more substantive in nature, modifies the subparagraph of the definition which deals with persons who sell a commodity under their own brand or trade name where they own the tools or dies used to produce the commodity. The subparagraph is rephrased to make it clear that such persons must not only own special purpose tools, special purpose dies, moulds or patterns used to produce the commodity, but also must own the patents for the commodity or participate in the engineering of the commodity. However,

an exception to the entire subparagraph is included which explicitly states that no person is to be considered a manufacturer thereunder if he does not take physical possession of the commodity. It is to be noted that this exception is limited to this single subparagraph and has no effect on the other parts of the definition. The reason for this change is that it has been found that certain sellers who have historically been classified as "resellers" rather than "manufacturers" have been brought within the coverage of the definition of the term manufacturer merely because, for example, they owned a single die which was used by the actual producer to stamp their name upon a commodity purchased for resale and for which they owned no patents and in whose engineering they had no part. This result was not intended by this subparagraph. Accordingly, the purpose of this change is to remove such sellers from the coverage of the definition of the term "manufacturer".

In the formulation of this amendment there has been consultation with industry representatives to the extent practicable, and consideration has been given to their recommendations.

AMENDATORY PROVISIONS

Ceiling Price Regulation 30 is amended in the following respects:

Section 45 (k) subparagraphs (3) and (4), is amended to read as follows:

(3) Any person who sells a commodity under his own brand or trade name where he produces the same commodity or a commodity which is similar with respect to both physical properties and functions performed.

(4) Any person who sells a commodity under his own brand or trade name, where he owns any of the special purpose tools, special purpose dies, moulds or patterns used to produce the commodity; and in addition he owns, or is a licensee under, any of the patents for the commodity, or he has participated in the engineering with respect to design or production of the commodity. In no event, however, shall any person be considered a manufacturer under this subparagraph if he does not take physical possession of the commodity after its manufacture.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective August 26, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 21, 1952.

[F. R. Doc. 52-9346; Filed, Aug. 21, 1952; 4:00 p. m.]

[Ceiling Price Regulation 30, Amdt. 37]

CPR 30—MACHINERY AND RELATED MANUFACTURED GOODS

OPTION TO DISREGARD CORPORATE IDENTITY

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this amendment to Ceiling Price Regulation 30 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment permits manufacturing corporations who own 95 percent of the outstanding stock of subsidiary corporations to elect to disregard, for the purposes of determining ceiling prices under Ceiling Price Regulation 30 and its supplementary regulations, the separate legal identity of their subsidiaries upon approval of the Director of Price Stabilization.

Section 26 of Ceiling Price Regulation 30 establishes procedures whereby multi-unit organizations may calculate the change in net cost of a manufacturing material which is produced in one unit of the business and transferred to another. Several manufacturers have been unable to avail themselves of these procedures, however, because of the separate corporate existence of the several subdivisions of their organization. It has been found by the Director that it is often inequitable not to allow such multi-unit organizations to use these provisions because their internal organization is such that a corporate subsidiary has been established instead of a divisional organization.

This amendment permits a single report or set of reports to be filed, pursuant to Ceiling Price Regulation 30 or its supplementary regulations, by a parent corporation on behalf of itself and all its corporate components even though the parent or some of the subsidiaries are not manufacturing corporations. The commodity for which reports are being filed, however, must be manufactured within some unit of the organization. This action will permit multi-corporate organizations whose customary accounting practice is to treat the entire organization as a single unit to continue such practice. It is believed that a disruption of such accounting practices would be unnecessarily burdensome to the companies and would create undue administrative problems for the Office of Price Stabilization.

In the formulation of this amendment there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

AMENDATORY PROVISIONS

A new section 41 is added to read as follows:

SEC. 41. *Disregarding separate corporate identity upon written approval of the Director of Price Stabilization.* (a) You may upon filing the application required by paragraph (c) of this section obtain permission to disregard for the purposes of determining ceiling prices under this regulation and the supplementary regulations thereto, the separate legal identity of any corporation which is a subsidiary of your own and file a single report or set of reports pursuant to this regulation for the entire organization. If you use this section, you must apply it to all subsidiary corporations owned by you.

(b) A corporation is considered to be a subsidiary where 95 percent or more of its outstanding stock is owned by another corporation. The subsidiary must either manufacture commodities all of which are the same or similar to those manufactured by the parent, be a manufacturing subsidiary corporation of a non-manufacturing parent, act as sales agent or distributor for the product of the parent, or perform some operation related to the promotion, distribution, or sale except at retail of the parent's finished product, or the finished product of any other subsidiary of the parent.

(c) Your application must contain the following information:

(1) The names and addresses of all the corporations to be included in a single report, or set of reports, made pursuant to this regulation or any supplementary regulation thereto.

(2) A description of the business activities of each corporation, the relationship of each subsidiary to the parent and a statement that 95 percent of all the stock of each subsidiary corporation is owned by the parent corporation.

You may not act under this section until you receive written approval of your application by the Director of Price Stabilization. Upon receipt of your application, the Director may approve, disapprove, or request further information concerning your application. Upon receipt of approval of your application you may file a single report or set of reports pursuant to section 41 of this regulation and the reporting section of any supplementary regulation thereto for all the corporations covered by your application.

(Sec. 704, 64 Stat. 816, as amended, 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective August 26, 1952.

NOTE: The reporting requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 21, 1952.

[Ceiling Price Regulation 31, Amdt. 13]

CPR 31—IMPORTS

REMOVAL OF TIN FROM APPENDIX A (3)

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 13 to Ceiling Price Regulation 31 is hereby issued.

STATEMENT OF CONSIDERATIONS

At the time that Ceiling Price Regulation (CPR) 31 was issued, imports of tin were covered by a United States Government purchase program under which the Government could be the only importer of tin. For this reason, tin (including the metal, ore, concentrates, powder, scrap, and alloys) was excluded

by Appendix A (3) from the coverage of CPR 31. As is apparent from the language of the exclusion, it was intended that tin would automatically become covered by CPR 31 at such time that it was no longer under a Government purchase program.

Effective August 1, 1952, the United States Government has permitted private importation of tin. Therefore, ceiling prices for tin must now be established under CPR 31. This action is being taken simply to delete tin from the list of commodities excluded from the coverage of CPR 31.

In view of the nature of this amendment, special circumstances have rendered consultation with industry representatives, including trade association representatives impracticable.

AMENDATORY PROVISIONS

Appendix A (3) is amended by deleting the following entry:

Tin-metal, ore, concentrates, powder, scrap alloys	88, 383, 392, 1785, 1786

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This Amendment 13 to Ceiling Price Regulation 31 shall become effective August 21, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 21, 1952.

[F. R. Doc. 52-9341; Filed, Aug. 21, 1952; 11:03 a. m.]

[Ceiling Price Regulation 50, Amdt. 3]

CPR 50—CEILING PRICES FOR PETROLEUM PRODUCTS SOLD IN THE VIRGIN ISLANDS

CEILING PRICES FOR KEROSENE

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 3 to Ceiling Price Regulation 50 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment to Ceiling Price Regulation 50 provides for an increase in the retail ceiling prices established for kerosene sold in the Virgin Islands of the United States in order to compensate for an increase at the wholesale level.

By Amendment 6 to Ceiling Price Regulation 17, the sale of petroleum products at wholesale in the territories and possessions was removed from that regulation and reverted to Ceiling Price Regulation 9. Since CPR 9 provides for maintenance of customary markups, this action resulted in immediate increases in the prices at wholesale charged by suppliers to the Virgin Islands due to fluctuating costs and expenses incurred since the base period of the General Ceiling Price Regulation. Most of the kerosene used in this area is imported from foreign countries by means of foreign-owned transportation facilities. Rates charged by these carriers have increased appreciably over the past year, and constitute the principal element in rising costs. In the case of kerosene, the increase at wholesale amounts to eight-tenths of one cent per gallon, and has resulted in impairment of the customary pre-Korea margin enjoyed by retailers. This amendment, therefore, increases ceiling prices of kerosene by one cent per gallon over the previously established ceiling prices, thus permitting retailers the same margin they received in the period May 24 to June 24, 1950.

In view of the nature of this action, consultation with the industry, including trade association representatives, was neither necessary nor practicable. In the judgment of the Director of Price Stabilization, the provisions of this amendment are generally fair and equitable, and are necessary to effectuate the purposes of the Defense Production Act of 1950, as amended.

AMENDATORY PROVISIONS

Ceiling Price Regulation 50 is amended as follows:

1. Section 11 of Ceiling Price Regulation 50 is amended to read as follows:

SEC. 11. *Ceiling prices for kerosene imported in steel drums.* Ceiling prices for kerosene sold at retail in the Virgin Islands of the United States shall be as follows:

Commodity and quantity	St. Croix	St. Thomas	St. John
Kerosene:			
Gallon	$0.30	$0.31	$0.35
Quart	.08	.08	.09
⅘ quart	.07	.07	.08
2 ⅘ quart	.14	.14	.15

2. A new section 15 is added as follows:

SEC. 15. *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Price Procedural Regulation No. 1, Revision 2.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This Amendment 3 to Ceiling Price Regulation 50 is effective August 26, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 21, 1952.

[F. R. Doc. 52-9342; Filed, Aug. 21, 1952; 11:04 a. m.]

[Ceiling Price Regulation 67, Amdt. 12]

CPR 67—RESELLER'S CEILING PRICES FOR MACHINERY AND RELATED MANUFACTURED GOODS

DEFINITION OF MANUFACTURER

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 12 to Ceiling Price Regulation 67 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment is issued for the same reasons and accomplishes the same results as Amendment 36 to Ceiling Price Regulation 30 (Machinery and Related Manufactured Goods). Accordingly, the statement of considerations involved in the issuance of that amendment is equally applicable to this amendment.

In the formulation of this amendment there has been consultation with industry representatives to the extent practicable, and consideration has been given to their recommendations.

AMENDATORY PROVISIONS

Ceiling Price Regulation 67 is amended in the following respects:

Section 17 (i), subparagraphs (3) and (4), is amended to read as follows:

(3) Any person who sells a commodity under his own brand or trade name where he produces the same commodity or a commodity which is similar with respect to both physical properties and functions performed.

(4) Any person who sells a commodity under his own brand or trade name, where he owns any of the special purpose tools, special purpose dies, moulds or patterns used to produce the commodity; and in addition he owns, or is a licensee under, any of the patents for the commodity, or he has participated in the engineering with respect to design or production of the commodity. In no event, however, shall any person be considered a manufacturer under this subparagraph if he does not take physical possession of the commodity after its manufacture.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment is effective August 26, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 21, 1952.

[F. R. Doc. 52-9348; Filed, Aug. 21, 1952; 4:00 p. m.]

[Ceiling Price Regulation 120, Admt. 4]

CPR 120—CEILING PRICES FOR TERRITORIAL RESTAURANTS AND EATING AND DRINKING ESTABLISHMENTS

CORRECTION OF DEFINITION

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 4 to Ceiling Price Regulation 120 is hereby issued.

STATEMENT OF CONSIDERATIONS

Due to a clerical error, "adjustment base period" contained in section 20 (n) of Ceiling Price Regulation 120 was erroneously defined. This base period was intended to have been the same as the base period for Ceiling Price Regulation 11. This amendment, therefore, provides that the term "adjustment base period" as used in the regulation means the same base period as that established under CPR 11. In addition, a minor clerical error is corrected in section 13 (a).

Because of the nature of this amendment, consultation with industry repre-

sentatives, including trade association representatives, has been impracticable.

AMENDATORY PROVISIONS

Ceiling Price Regulation 120, as amended, is amended as follows:

1. Reference to "section 20 (a)" contained in the parentheses in the first sentence of section 13 (a) is changed to read "section 20 (n)."

2. Section 20 (n) of Ceiling Price Regulation 120 is amended to read as follows:

(n) "Adjustment base period" means your base period established under Ceiling Price Regulation 11.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This Amendment 4 to Ceiling Price Regulation 120 is effective August 21, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 21, 1952.

[F. R. Doc. 52-9344; Filed, Aug. 21, 1952; 11:04 a. m.]

[Ceiling Price Regulation 142, Amdt. 1]

CPR 142—SOUTHERN CALIFORNIA USED WOODEN AGRICULTURAL CONTAINERS

INCLUSION OF ARMY AND NAVY INSTALLATIONS IN DEFINITION OF RETAILER

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161 and Economic Stabilization Agency General Order No. 2, this Amendment 1 to Ceiling Price Regulation 142 is hereby issued.

STATEMENT OF CONSIDERATIONS

This amendment changes the definition of "retailer" set forth in CPR 142 by specifically deleting a sentence which excluded Army and Navy installations from the enumeration of sellers covered by the term "retailer". As issued the regulation exempted Army and Navy establishments located in the affected area from the regulation's coverage. Such exemption created a situation where some sellers had dollars and cents ceiling prices established by CPR 142, and other sellers were left with their GCPR ceiling prices. This amendment, accordingly, is issued so that all resellers in the affected area can sell the covered commodities on the same basis.

In view of the nature of this amendment, it was deemed unnecessary and impracticable to consult with members of the industry in its formulation.

AMENDATORY PROVISIONS

Ceiling Price Regulation 142 is hereby amended as follows:

1. Paragraph (g) of section 12 is amended by deleting the last sentence thereof so that section 12 (g) reads as follows:

(g) *Retailer.* This term means a person who purchases fresh, canned or dried fruits, vegetables, or other farm products in agricultural containers, empties the contents, and thereafter sells the containers. It includes, but is not limited to, grocery stores, canneries, restaurants, hotels, markets, and institutions.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. The effective date of this amendment is August 21, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 21, 1952.

[F. R. Doc. 52-9345; Filed, Aug. 21, 1952; 11:04 a. m.]

Chapter VI—National Production Authority, Department of Commerce

[CMP Regulation 3, Direction 4 as Amended Aug. 20, 1952]

CMP REG. 3—PREFERENCE STATUS OF DELIVERY ORDERS UNDER THE CONTROLLED MATERIALS PLAN

DIR. 4—SPECIAL PREFERENCE STATUS OF CERTAIN DO RATED ORDERS

This amended direction under CMP Regulation No. 3 is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this direction as amended, consultation with industry representatives has been rendered impracticable due to the need for immediate action and because the direction affects many different industries.

EXPLANATORY

Direction 4 to CMP Regulation No. 3, as amended July 29, 1952, is further amended by adding a new sentence at the end of section 3. As so amended, Direction 4 to CMP Regulation No. 3 reads as follows:

REGULATORY PROVISIONS

Sec.
1. What this direction does.
2. Status of certain DO rated orders.
3. Applicability of other regulations and orders.

AUTHORITY: Sections 1 to 3 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this direction does.* The purpose of this direction is to channel into defense programs, so far as practicable, Class A and B products containing steel. This will be accomplished by according special preference status to DO rated orders for such products, calling for delivery on or before December 31, 1952, placed in support of military, atomic energy, and machine tool programs.

SEC. 2. *Status of certain DO rated orders.* Any DO rated order for a Class A product containing steel or a Class B product containing steel, bearing a program identification A, B, C, or E, and a digit (including the suffix B-5), or Z-2, calling for delivery on or before December 31, 1952, must be accepted and filled in preference to all other DO rated orders for Class A products containing steel or Class B products containing steel, previously or subsequently received, but which do not bear a program identification A, B, C, or E, and a digit (including the suffix B-5), or Z-2: *Provided, however,* That such a DO rated order need not be accepted if filling it would stop or interrupt the supplier's operations during the next 15 days in a way which would cause a substantial loss of total production or a substantial delay in operations. All DO rated orders (including those previously placed) for Class A products containing steel or Class B products containing steel, which bear a program identification A, B, C, or E, and a digit (including the suffix B-5), or Z-2, shall have equal preferential status.

SEC. 3. *Applicability of other regulations and orders.* The provisions of CMP Regulation No. 3, NPA Reg. 2, including the directions and amendments thereto, and of any other NPA regulation and order heretofore issued, are superseded to the extent to which they are inconsistent with the provisions of this direction, but in all other respects the provisions of such regulations and orders shall remain in full force and effect. This direction shall not be construed, however, to apply to any product subject to NPA Order M-41, M-43, M-44, or M-95, or to electron tubes subject to NPA Order M-17.

This direction, as amended, shall take effect August 20, 1952.

NATIONAL PRODUCTION AUTHORITY,
By GEORGE W. AUXIER,
Executive Secretary.

[F. R. Doc. 52-9306; Filed, Aug. 20, 1952; 3:04 p. m.]

[NPA Order M-6A, Schedule 1 as Amended Aug. 21, 1952]

M-6A—STEEL DISTRIBUTORS

SCHEDULE 1—EARMARKED STOCKS—AIRCRAFT QUALITY ALLOY STEEL PRODUCTS

This schedule as amended is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this schedule as amended, consultation with industry representatives has been rendered impracticable because of the need for immediate action and because the schedule affects a large number of different trades and industries.

EXPLANATORY

Schedule 1 as amended July 30, 1952, to NPA Order M-6A, is further amended by revising paragraphs (b) and (c) of section 4 for purposes of clarification.

REGULATORY PROVISIONS

Sec.
1. What this schedule does.
2. Definitions.
3. Allotments of aircraft quality alloy steel products by producers to distributors.
4. Distributor sales.
5. Certification of orders.
6. Canadian distributor sales.
7. Communications.

AUTHORITY: Sections 1 to 7 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this schedule does.* This schedule requires steel producers to make monthly shipments of aircraft quality alloy steel products to steel distributors on the basis set out herein. It restricts sales of aircraft quality alloy steel products by steel distributors.

SEC. 2. *Definitions.* All definitions contained in NPA Order M-6A, except the definition of "base period," are applicable to this schedule. For the purposes of this schedule, "base period" means the period commencing April 1, 1951, and ending June 30, 1951.

SEC. 3. *Allotments of aircraft quality alloy steel products by producers to distributors.* Each steel producer is hereby required to accept purchase orders from his steel distributor customers for shipments of aircraft quality alloy steel products in January 1952, and in each succeeding month up to a minimum of not less than 100 percent of the base tonnage of each aircraft quality alloy steel product shipped to each steel distributor customer during the base period.

SEC. 4. *Distributor sales.* No steel distributor (except steel distributors located in the Dominion of Canada) shall deliver, nor shall any person accept delivery of, any aircraft quality alloy steel products unless:

(a) Such aircraft quality alloy steel product is required by specification and will be incorporated into aircraft, military catapults, aircraft arresting gear, guided missiles, or airborne equipment, in connection with the development, production, repair, or maintenance thereof; or

(b) Such aircraft quality alloy steel product is required by specification and will be incorporated into orders placed pursuant to a military program bearing the allotment symbol A-4, A-5, or A-7; or

(c) Such aircraft quality alloy steel product is required under a program bearing the allotment symbol E-2 or required for use in gas turbine and aircraft-type internal combustion engines for use in naval vessels.

SEC. 5. *Certification of orders.* Any person placing an order for an aircraft quality alloy steel product with a steel distributor located in the United States shall endorse on his purchase order, or deliver with such purchase order, the following certification which shall be signed as provided in section 8 of NPA Reg. 2:

Certified under Schedule 1 to NPA Order M-6A

This certification constitutes a representation by the purchaser to the steel distributor and to NPA that the purchase order so certified calls for delivery of an aircraft quality alloy steel product to be used only as permitted in section 4 of this schedule.

SEC. 6. *Canadian distributor sales.* Sales of aircraft quality alloy steel products will be made by Canadian steel distributors pursuant to instructions issued by the Canadian Government through its Department of Defence Production.

SEC. 7. *Communications.* All communications concerning this schedule shall be addressed to the National Production Authority, Washington 25, D. C., Ref: M-6A, Schedule 1.

This schedule as amended shall take effect August 21, 1952.

M-6A—STEEL DISTRIBUTORS

SCHEDULE 2—EARMARKED STOCKS—OIL COUNTRY CASING, OIL COUNTRY TUBING, AND OIL COUNTRY DRILL PIPE

DIR. 1—ADDITIONAL RESTRICTIONS OF DELIVERY OF OIL COUNTRY CASING AND TUBING

REVOCATION

Direction 1 (17 F. R. 6558) to Schedule 2 to NPA Order M-6A is hereby revoked. This revocation does not relieve any person of any obligation or liability incurred under Direction 1 to Schedule 2 to NPA Order M-6A, nor deprive any person of any rights received or accrued under said direction prior to the effective date of this revocation.

(64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154)

This revocation is effective August 21, 1952.

[NPA Order M-82, Direction 1 of Aug. 20, 1952]

M-82—DISTRIBUTION OF BRASS MILL PRODUCTS TO DISTRIBUTORS

DIR. 1—PLACEMENT OF ORDERS BY DISTRIBUTORS FOR ADDITIONAL BRASS MILL PRODUCTS PRIOR TO OCTOBER 1, 1952

This direction to NPA Order M-82 is found necessary and appropriate to promote the national defense and is issued pursuant to the authority granted by the Defense Production Act of 1950, as amended. In the formulation of this direction, consultation with industry representatives has been rendered impracticable due to the need for immediate action.

REGULATORY PROVISIONS

Sec.
1. What this direction does.
2. Temporary increase in quotas of X-6 orders placed by distributors of brass mill products.

AUTHORITY: Sections 1 and 2 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this direction does.* In order to make certain that distributors of brass mill products will be able to acquire increased quantities of such products to meet increased demands, this direction permits distributors of brass mill products, prior to October 1, 1952, to place authorized controlled material orders for a quantity of material in addition to the quantity they are permitted to order pursuant to section 4 of NPA Order M-82.

SEC. 2. *Temporary increase in quotas of X-6 orders placed by distributors of brass mill products.* (a) In addition to the total quantity of brass mill products for which a distributor may place orders pursuant to section 4 of NPA Order M-82 during the months of August and September 1952, a distributor whose inventory (by weight) of brass mill products on July 31, 1952, was less than his average monthly inventory (by weight) during the base period, may at any time after the effective date of this direction and prior to October 1, 1952, place orders with a brass mill or another distributor for a quantity of brass mill products by weight the total of which does not exceed the difference between the weight of his average monthly inventory of such products during the base period and the weight of his inventory of brass mill products on July 31, 1952.

(b) The allotment symbol X-6 may be applied to any order placed pursuant to paragraph (a) of this section. All such orders are designated authorized controlled material orders and shall be certified in accordance with section 8 of NPA Order M-82.

(c) The receipt by a distributor of any material ordered pursuant to paragraph (a) of this section is excepted from the limitations on the acceptance of delivery of brass mill products imposed by sections 4 and 7 of NPA Order M-82.

This direction shall take effect August 20, 1952.

NATIONAL PRODUCTION AUTHORITY,

[NPA Reg. 3, as amended August 20, 1952]

NPA REG. 3—OPERATIONS OF THE PRIORITIES AND ALLOCATIONS SYSTEMS BETWEEN CANADA AND THE UNITED STATES

This regulation as amended is found necessary and appropriate to promote

the national defense and to implement the provisions of The Statement of Principles for Economic Cooperation issued by the Governments of the United States and Canada, dated October 26, 1950, and is issued pursuant to the authority granted by the Defense Production Act of 1950 as amended. Consultation with industry representatives, including trade association representatives, in advance of the issuance of this regulation as amended has been rendered impracticable by the fact that this regulation as amended applies to all trades and industries.

EXPLANATORY

The amendment is necessary in order to delete references to obsolete NPA regulations, deadline dates, and past quarters; to eliminate procedures which are inoperative; to recognize procedures established by operational experience; and to provide sufficient elasticity so that Canadian procedures may conform to possible future changes in the U. S. priorities and allocation system.

NPA Reg. 3, as amended June 29, 1951, is hereby revised to read as follows:

REGULATORY PROVISIONS

Sec.
1. What this regulation does.
2. Definitions.
3. Orders from the United States placed with Canadian suppliers.
4. Canadian orders for materials placed with United States suppliers.
5. Certifications by Canadian purchasers to suppliers in the United States.
6. Maintenance, repair, and operating supplies, and minor capital additions and installation assistance to persons located in Canada.
7. Relation to other regulations and orders of NPA.
8. Communications.
9. Violations.

AUTHORITY: Sections 1 to 9 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this regulation does.* In order that the control, priorities, and allocations systems of the two countries may be comparable in effect, and in order to coordinate the defense economies of the two countries, this regulation describes how and to what extent persons located in Canada may have the benefits of the priorities and allocations systems of the United States, and how persons located in the United States may receive assistance in obtaining Canadian materials and services.

SEC. 2. *Definitions.* For the purposes of this regulation:

(a) "Person" means any individual, partnership, corporation, association, or any other organized group of persons, and includes specifically Canadian distributors and importers as well as any agency of the United States Government or the Canadian Government.

(b) "MRO" means "Maintenance, repair, and operating supplies" as defined in CMP Regulation No. 5.

(c) "Minor capital additions" means minor capital additions as defined in CMP Regulation No. 5.

(d) "Installation" means installation as defined in CMP Regulation No. 5.

(e) "Controlled materials" means steel, copper, and aluminum in the forms and shapes specified in Schedule I of CMP Regulation No. 1.

(f) "Materials" means any raw, in-process, or manufactured commodity, equipment, component, accessory, part, or product of any kind.

(g) "NPA" means the National Production Authority.

SEC. 3. *Orders from the United States placed with Canadian suppliers.* Any person located in the United States who places an order with a Canadian supplier for Canadian materials, and who requires assistance to obtain delivery of such materials, may apply through the Canadian Division of NPA to the Canadian Department of Defence Production, Ottawa, Canada, for the required assistance. Such requests shall be made by letter in triplicate and shall set forth all pertinent facts, the nature of the assistance required, and the justification therefor, and these requests shall be processed in accordance with procedures agreed upon by NPA and the Canadian Department of Defence Production.

SEC. 4. *Canadian orders for materials placed with United States suppliers.* (a) Any person located in Canada who needs priority or allocation assistance to obtain materials in the United States may make application through the Canadian Department of Defence Production, Ottawa, Canada, to the National Production Authority for the required assistance. Such applications shall be made in accordance with the procedures agreed upon by NPA and the Canadian Department of Defence Production and implemented by forms, instructions, and regulations issued by the Canadian Department of Defence Production. All delivery orders to which allotment symbols or DO ratings are applied under the provisions of this regulation shall have equal standing with delivery orders placed by persons in the United States to which comparable allotment symbols or ratings have been applied under NPA Reg. 2 or any CMP regulation.

(b) Any person authorized pursuant to section 4 (a) of this regulation to apply allotment symbols or DO ratings to delivery orders shall use the allotment symbols or the ratings which are specified by the authorization. Such delivery orders shall also contain a certification in the following form:

Certified under NPA Reg. 3

Such certification shall be signed in the manner prescribed in section 8 of NPA Reg. 2.

SEC. 5. *Certifications by Canadian purchasers to suppliers in the United States.* Certifications under sections 4 (b) and 6 of this regulation constitute a representation to the supplier in the United States, to NPA, and to the Canadian Department of Defence Production, that the person signing such certification has been authorized by NPA to use the allotment symbol or the DO rating under this regulation, and that such allotment symbol or DO rating is being used for the purpose authorized.

SEC. 6. *Maintenance, repair, and operating supplies, and minor capital additions and installation assistance to persons located in Canada.* Any person located in Canada who needs priority or allocation assistance to obtain MRO and minor capital additions and installation material from United States sources may make application through the Canadian Department of Defence Production, Ottawa, Canada, to the National Production Authority for quarterly quotas and the right to apply an allotment symbol or rating to such requirements. Any person who has been authorized pursuant to this section to apply allotment symbols or DO ratings to delivery orders shall use the allotment symbols or the ratings which are specified by the authorization. In either case the delivery order shall also contain the certification specified in section 4 (b) of this regulation.

SEC. 7. *Relation to other regulations and orders of NPA.* All of the provisions of NPA Reg. 2 (including all directions and amendments thereto) apply to all persons affected by the provisions of this regulation except to the extent that such provisions are inconsistent, in which event the provisions of this regulation prevail. All of the provisions of CMP Regulation No. 3 as to status of delivery orders shall apply to orders bearing an allotment number or DO rating pursuant to this regulation.

SEC. 8. *Communications.* All communciations from persons located in the United States concerning this regulation shall be addressed to the National Production Authority, Washington 25, D. C., Ref: NPA Reg. 3. All communications from persons located in Canada concerning this regulation shall be addressed to the Canadian Department of Defence Production, Ottawa, Canada (and, where necessary, forwarded by that Department to the National Production Authority).

SEC. 9. *Violations.* Violation of this regulation is punishable under the Defense Production Act of 1950, as amended, and under the Canadian Defence Production Act and the Canadian Emergency Powers Act, as they may be applicable.

This regulation as amended shall take effect August 20, 1952.

NATIONAL PRODUCTION AUTHORITY,
By GEORGE W. AUXIER,
Executive Secretary.

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

Chapter II—Corps of Engineers, Department of the Army

PART 202—ANCHORAGE REGULATIONS

PORT OF NEW YORK AND VICINITY; NEWARK BAY

Pursuant to section 7 of the River and Harbor Act of March 4, 1915 (38 Stat. 1053; 33 U. S. C. 471), and the provisions of the act of Congress approved April 22, 1940 (54 Stat. 150; 33 U. S. C. 180), § 202.155 (h) (4) is amended by the insertion of a cross-reference note and § 202.60 (q) is hereby prescribed designating a special anchorage area within General Anchorage No. 37, on the southeasterly side of Newark Bay, as follows:

§ 202.60 *Port of New York and vicinity.* • • •

(q) *Newark Bay.* That portion of the waters on the southeasterly side of Newark Bay, north of a line ranging from the offshore end of the breakwater north of the former Elco Boat Works through Newark Bay Channel Buoy 6; east of a line ranging from a point 200 yards east of the east pier of the lift span of the Central Railroad Company of New Jersey bridge to a point 200 yards east of the east end of the lift span of the Pennsylvania-Lehigh Valley Railroad bridge; and south of a line ranging from the southwest corner of the bulkhead at Bayonne City Park through Newark Bay Channel Buoy 11.

NOTE: This special anchorage is within the limits of General Anchorage No. 37, described in § 202.155 (h) (4).

• • • • • •

§ 202.155 *Port of New York.* • • •
(h) *Newark Bay.* • • •
(4) *Anchorage No. 37.* • • •

NOTE: A portion of this general anchorage is described as a special anchorage in § 202.60 (q).

• • • • • •

[Regs., July 30, 1952, 800.212-ENGWO] (38 Stat. 1053, 54 Stat. 150; 33 U. S. C. 180, 471)

[SEAL] WM. E. BERGIN,
Major General, U. S. Army,
The Adjutant General.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

SUBPART B—EDUCATION AND TRAINING

MISCELLANEOUS AMENDMENTS

1. In § 21.206, paragraphs (b) (2), (c) (2), and (d) (2) are amended to read as follows:

§ 21.206 *Limitations on training in excess of 4 years.* • • •

(b) *Training on the job in excess of 4 years.* • • •

(2) That where the veteran has not acquired knowledge, skills, or experience which may be credited toward completion of the course or where the knowledge, skills, or experience acquired by a veteran are insufficient for the veteran to be allowed enough credit to enable him to complete the course in 4 years or less, there is clear indication that he will be employable after completing a period of training not exceeding 4 years under Part VII or under Part VII and Part VIII: *Provided,* That the veteran shall have signed a statement on certificate B to that effect and also indicated that he has a definite understanding of the statement. Any veteran inducted into training under this paragraph will be declared rehabilitated after the veteran shall have completed the prescribed period of training (not exceeding 4 years).

(c) *Medical internship.* • • •

(2) If the 1-year medical internship can be completed without exceeding the 4-year statutory limitation, it will be authorized for the objectives physician 0–26.10 and physician, osteopathic, 0–39.96.

• • • • • •

(d) *Authority for approval of courses in excess of 4 years.* • • •

(2) Subject to other applicable provisions of the law, any training which is afforded in excess of 4 years as provided in this paragraph will be at the expense of the Government, and subsistence allowance is payable.

2. In § 21.212, a new paragraph (d) is added as follows:

§ 21.212 *Preparation and content.* • • •

(d) For professional objectives other than physician 0–26.10 and physician, osteopathic, 0–39.96, successful completion of the professional curriculum at an approved professional school ordinarily qualifies an individual to practice the profession for which the school has trained him subject, in some instances, to State licensure requirements. Accordingly, the professions physician and physician, osteopathic, are the only ones where, as authorized in § 21.206 (c) (2), internship may be included in the training program. In those instances where the graduate of a professional school is required to have had a period of experience in the practice of the profession as a prerequisite to licensure in certain of the professions, as for example pharmacy, which period is sometimes referred to as an internship or apprenticeship, actually the situation is one of employment, not training on the job, and may not be included in the veteran's training program.

3. A new § 21.237b is added as follows:

§ 21.237b *Furnishing supplies to veterans pursuing training on the job for combination objectives.* Where a veteran's course consists of training on the job for a combination objective which requires the attainment of skills in more than one recognized occupation, subject to the limitations in §§ 21.230 through 21.242, supplies may be furnished under one of the following alternatives:

(a) Where there is an approved list in vocational rehabilitation procedures for each of the component objectives of the combination objective, an assortment of supplies required by the employer-trainer may be selected from each of the approved lists for those objectives: *Provided,* That the total cost of the supplies shall not exceed the cost of the list having the higher cost on the current market or does not exceed $100, whichever is greater.

(b) Where there is an approved list in vocational rehabilitation procedures for one but not all of the component objectives of the combination objective, an assortment of supplies required by the employer-trainer may be selected from any approved list for the component objectives, adding such other items as are required by the employer-trainer for training in the component objective or objectives for which there is no approved list: *Provided,* That the total cost of the supplies shall not exceed the cost of the approved list having the higher cost on the current market or does not exceed $100, whichever is greater.

(c) When there is no approved list for any component objective of the combination objective, § 21.236 (a) (2) will apply—i. e. the aggregate cost of supplies furnished may not exceed $100.

4. Section 21.263 is revised to read as follows:

§ 21.263 *Maximum leave allowable.* Leave in excess of that authorized under §§ 21.261, 21.261a, and 21.262 will not be approved. Whenever, in an individual case, it becomes evident to the manager that the veteran will not be able to resume his training course upon the expiration of the period of leave he is authorized to approve under this section, the veteran will be removed from training status.

5. Section 21.265 is revised to read as follows:

§ 21.265 *Unauthorized absences.* Trainees should be instructed that they will be expected to apply for and obtain approval for leave of absence in advance. However, when a veteran has absented himself from his place of training under conditions which would make his obtaining advance approval from the Veterans' Administration impracticable and when the responsible officials of the training establishment and the manager agree that the absence has not materially interfered with the course of training, the manager is authorized to excuse the absence and to make charges against the veteran's leave in accordance with the policy stated in §§ 21.261, 21.261a, and 21.262. When such absence from training is not satisfactorily explained, the manager will take such action as is deemed necessary, including forfeiture of subsistence allowance for the period of absence.

6. In § 21.266, paragraphs (a), (b), and (c) are amended and a new paragraph (f) is added as follows:

§ 21.266 *Intraregional travel of trainees.* • • •

(a) To report to the chosen training facility for the purpose of starting training, or to report to a prospective employer-trainer for an interview prior to induction into training where, and only

aunt, niece or nephew, by blood or mar-

Engineers Council for Professional Develop-

training of Part VII veterans. If such

where there is definite assurance in advance of approving the travel that, upon interview, the veteran will be started in training if he is found by the employer-trainer to be acceptable.

(b) To return to his bona fide home from the place of training when training cannot be provided for a period of 30 calendar days or more, provided transportation from his home to the place of training was at Government expense (see paragraph (f) of this section); this will include summer vacation periods when training is not available but will not include periods when suitable training is available but the veteran elects to interrupt training to return to his home (see § 21.282). Where a trainee is authorized to travel at Veterans' Administration expense under the authority of this paragraph, return transportation from the trainee's home to the place of training for the purpose of continuing training also may be authorized.

(c) To return from the place of training, upon being placed in status "discontinued" for any reason except fraud on the part of the veteran, to the point from which the veteran was transported at Veterans' Administration expense (see paragraph (f) of this section): *Provided*, That where a veteran is placed in status "discontinued" because he abandoned training, travel at Veterans' Administration expense to return from the place of training to the point from which the veteran was transported may not be authorized except where it is determined that the veteran abandoned training for reasons beyond his control.

• • • • •

(f) To return from the place of training to the place and under the conditions indicated in paragraph (b) or (c) of this section where:

(1) Travel to the place of training at Government expense was approvable but the necessary travel authorization was not issued, or

(2) The veteran is continuing pursuit of training under Part VII which he commenced under Part VIII (as an approved combination of courses), and the veteran would have been entitled to transportation at Government expense to the place of training had he commenced the training under Part VII rather than under Part VIII.

7. In § 21.267, paragraph (a) is amended to read as follows:

§ 21.267 *Interregional transfers for training—*(a) *Induction into a facility outside the regional area.* Managers are authorized to effect the transfer of veterans for training under Part VII Veterans' Regulation 1 (a), as amended (38 U. S. C. ch. 12), to the jurisdiction of other regional offices within the limits of the continental United States at Government expense when any such transfer is necessary for the purposes of the Veterans' Administration in accomplishing vocational rehabilitation in the chosen employment objective. Such transfer at Government expense will be limited to the nearest satisfactory training facility, except that where regional territorial lines do not coincide with State border lines, transfers may be effected at Government expense to induct the veteran into training in any satisfactory training facility located within the State of the veteran's residence, despite the existence of satisfactory training facilities within the regional territory. Interregional transfers which involve travel at Government expense between points within the continental limits of the United States and points within the insular possessions and territories will be effected only upon the prior approval of central office. Interregional transfers to or from the Republic of the Philippines at Government expense will be effected only upon the prior approval of central office.

• • • • •

8. In § 21.268, paragraph (a) is amended to read as follows:

§ 21.268 *Interregional transfers when training cannot be provided for 30 calendar days or more.* (a) When training cannot be provided for a period of 30 calendar days or more, managers are authorized to effect the transfer, at Government expense, of a trainee from the place of training to the trainee's bona fide home within the regional office territory from which he was transported at Government expense for the purpose of pursuing training; this will include summer vacation periods when training is not available but will not include periods when suitable training is available but the veteran elects to interrupt training to return to his home. (See § 21.282.)

• • • • •

9. Section 21.269 is revised to read as follows:

§ 21.269 *Interregional transfers of veterans to return to points from which transported.* Managers are authorized to effect the transfer of veterans from the place of training, upon placing the veteran in status "discontinued" for any reason except fraud on the part of the veteran, to the point from which the veteran was transported at Veterans' Administration expense to pursue training (see § 21.272a): *Provided*, That where a veteran is placed in status "discontinued" because he abandoned training, travel at Veterans' Administration expense to return from the place of training to the point from which the veteran was transported may not be authorized except where it is determined that the veteran abandoned training for reasons beyond his control.

10. Section 21.272 is revised to read as follows:

§ 21.272 *Travel for a qualifying examination.* Managers are authorized to effect the transportation at Government expense of a veteran from the place of training to, and return from, a place at which an examination is administered in the trade or profession for which he has been trained, when the passing of such an examination is necessary to practice the trade or profession for which he has been trained: *Provided*, That the transportation shall be limited to points within the State in which the veteran has pursued his training or, if the veteran returns to the State from which he was sent to pursue training, he may be sent at Government expense to a place within that State to take the examination, and, if there is more than one place at which the examination may be taken, the transportation shall be limited to the nearest place.

11. A new § 21.272a is added as follows:

§ 21.272a *Travel to return the veteran from place of training where travel to place of training was not authorized.* Managers are authorized to approve the necessary travel of a veteran at Government expense for the purpose of returning the veteran from the place of training to the place and under the conditions indicated in §§ 21.268 (a) and 21.269 where:

(a) Travel to the place of training at Government expense was approvable but the necessary travel authorization was not issued, or

(b) The veteran is continuing pursuit of training under Part VII which he commenced under Part VIII (as approved combination of courses) and the veteran would have been entitled to transportation at Government expense to the place of training had he commenced the training under Part VII rather than under Part VIII.

12. Section 21.273 is revised to read as follows:

§ 21.273 *Authority to approve travel.* Managers are authorized to approve necessary travel at Government expense and to issue transportation, meal, and lodging requests in accordance with the provisions of Veterans' Administration Regulations for the purpose of carrying out the provisions of §§ 21.266, 21.267 (a), and 21.268 through 21.273, inclusive. The chief, vocational rehabilitation and education division, is authorized to act for the manager in exercising any authorities stated in this section.

13. In § 21.274, paragraphs (a) and (c) are amended and paragraph (e) is deleted.

§ 21.274 *Authorization for travel of attendants for claimants and beneficiaries under Part VII, Veterans' Regulation 1 (a), as amended (38 U. S. C. ch. 12).* (a) Regional managers are authorized to provide the services of an attendant to accompany a claimant or beneficiary while such claimant or beneficiary is traveling for the purposes set forth in §§ 21.266, 21.267 (a), and 21.268 through 21.273, when, and only when, in the judgment of the chief, vocational rehabilitation and education division such services are necessitated by the severity of the disability of the claimant or beneficiary.

• • • • •

(c) Persons not in regular civilian employment of the Federal Government may be authorized to act as such attendants and will be furnished common-carrier transportation, meal, and lodging requests, or, in lieu thereof, will be granted a mileage allowance. Such persons will be paid a fee, except when they are relatives of the claimant or beneficiary. (A relative, for this purpose, will comprehend a spouse, parent, son or daughter, brother or sister, uncle or aunt, niece or nephew, by blood or marriage.) Persons in the regular civilian employment of the Federal Government may be authorized to act as such attendants and, when so assigned, will be entitled to transportation and expenses incident thereto. They may be allowed per diem in lieu of subsistence in accordance with the provisions of Standardized Government Travel Regulations, upon issuance of authorization therefor, and will not be supplied meal and lodging requests. No fee will be paid to civilian employees of the Federal Government who act as attendants under authority of this paragraph.

• • • • • •

14. In § 21.279, paragraph (a) is amended to read as follows:

§ 21.279 *Reader service under Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), for veterans with visual impairment.* (a) When reader service is necessary for the successful pursuit of a course of vocational rehabilitation by a veteran with visual impairment, such service may be furnished in accordance with the policy and procedure set forth in this section.

• • • • • •

(Sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9, sec. 2, 57 Stat. 43, as amended, sec. 400, 58 Stat. 287, as amended; 38 U. S. C. 11a, 701, 707, ch. 12 note. Interprets or applies secs. 3, 4, 57 Stat. 43, as amended, secs. 300, 1500-1504, 1506, 1507, 58 Stat. 286, 300, as amended; 38 U. S. C. 693g, 697-697d, 697f, g, ch. 12 note)

This regulation effective August 22, 1952.

[SEAL] H. V. STIRLING,
Deputy Administrator.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

SUBPART C—TRAINING FACILITIES

MISCELLANEOUS AMENDMENTS

1. In § 21.400 (a), subparagraph (2) is amended to read as follows:

§ 21.400 *Manager, regional office, authorized to approve institutions.* • • •

(a) *Inspection and accreditation.* • • •

(2) If an educational institution is accredited by one of the following recognized national or regional educational accrediting associations, such accreditation may be accepted, if desired, in lieu of a personal inspection:

Accrediting Association of Bible Institutes and Bible Colleges (Collegiate Division).
American Association of Teachers' Colleges.
American Association of Theological Schools.
American Bar Association.
American Council on Pharmaceutical Education.
American Osteopathic Association.
Association of American Universities.
Council on Dental Education, American Dental Association.
Council on Education and Professional Guidance of the American Optometric Association, Inc.
Council on Medical Education and Hospitals, American Medical Association.
Engineers Council for Professional Development.
Middle States Association of Colleges and Secondary Schools.
National Association of Chiropodists.
National Association of Schools of Music.
National League of Nursing Education.
New England Association of Colleges and Secondary Schools.
North Central Association of Colleges and Secondary Schools.
Northwest Association of Secondary and Higher Schools.
Southern Association of Colleges and Secondary Schools.
Western College Association.

• • • • • •

2. In § 21.418 (d), the introduction and subparagraph (3) are amended and a new subparagraph (4) is added as follows:

§ 21.418 *Approval and disapproval of educational institutions and business or industrial establishments by State approving agency or Administrator.* • • •

(d) *Disapproval by State approving agency.* Where the State approving agency determines that an educational institution, or a course of instruction in an educational institution or an establishment, in which veterans are enrolled under Part VIII is disapproved, and therefore, is removed from the approved list by the State approving agency, appropriate notice, in duplicate, will be provided to the manager of the regional office concerned. Upon receiving such a notice, the training facilities section of the regional office will request a statement from the State approving agency, through the Veterans' Administration liaison representative, as to the reason or reasons for such action, if not already provided.

• • • • • •

(3) Where the State approving agency disapproves an educational institution, the chief, training facilities section, will provide copies of the notice and the reasons for disapproval received from the State approving agency as follows: One copy to the director, training facilities service, central office, and one copy to the special assistant to director, training facilities service, for the area concerned. (Where the approval of the institution is canceled and the institution is later reapproved, a copy of each such reapproval notice will be provided to the director, training facilities service, and the special assistant concerned.)

(4) In the event that an institution or establishment which has been disapproved for Part VIII by the State approving agency is also approved for training under Part VII and, despite the action of the State approving agency, the manager is of the opinion that it would be advisable to continue the approval of the institution or establishment for Part VII training, he will request authority of the assistant administrator for vocational rehabilitation and education for such approval. Such request for approval should be accompanied by a complete statement as to why the institution or establishment was withdrawn from the list of approved Part VIII facilities and the circumstances which in the opinion of the manager warrant continued approval of the institution or establishment for training of Part VII veterans. If such authority is not granted by the assistant administrator for vocational rehabilitation and education, each Part VII veteran in training in such facility will be notified promptly of the withdrawal of Part VII approval, and every effort will be made by the regional office to effect a prompt transfer of each such veteran to another institution or establishment offering the same course of training, so that each such Part VII veteran may be continued in a training status without interruption.

• • • • • •

3. In § 21.520, the headnote, paragraphs (c) (1) (i) and (iii) and the introduction of paragraph (d) are amended to read as follows:

§ 21.520 *Payment of tuition to profit educational or training institutions operating on a clock-hour basis for Part VII and Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), trainees where the trainee is absent from scheduled instructional periods.* • • •

(c) *Profit schools which are required to meet the criteria set forth in section 5, Public Law 610, 81st Congress.* The following policy with respect to payment for absences shall apply for veteran training:

(1) • • •

(i) Not to exceed a total of 30 days, or the equivalent expressed in clock-hours of absence (i. e., the number of daily instructional hours times 30) in a full-time course in a 12-month period of required attendance or a pro rata part of 30 days, or of the appropriate number of clock-hours, for periods of required attendance of less than 12 months. (For part-time courses, see subdivision (iv) of this subparagraph.)

• • • • • •

(iii) Emergency absence not in excess of 10 days during a period of required attendance of 12 calendar months, but the total of absences, under this subdivision and subdivision (ii) of this subparagraph, will not be in excess of the limitations as prescribed in subdivision (i) of this subparagraph.

• • • • • •

(d) *Profit schools which are not required to meet the criteria set forth in section 5, Public Law 610, 81st Congress.* Where the enrollment in an educational institution operating on a clock-hour basis consists of more than 25 students or one-fourth of the students enrolled, whichever is greater, paying their own tuition and the institution publishes a catalog, bulletin, circular, or otherwise makes a certification to the Veterans' Administration, setting forth the tuition charges, the length of the course will be expressed in the usual terms used by the educational institution in such publications or certifications. The Veterans' Administration will accept the policies of such educational institutions regarding absences: *Provided*, That the Veterans' Administration regional office manager in his judgment considers such policies as reasonable and they are approved by the appropriate State approving agency. The basis of payment by the Veterans' Administration for holidays in such edu-

cational institutions will be either as stated in subparagraph (1) or (2) of this paragraph.

* * * * *

4. In § 21.530 (a) (5) (iii), paragraph (2) of article 1 (f) Revision of Rates is amended to read as follows:

§ 21.530 *Determination of fair and reasonable compensation.* (a) * * *

(5) *Establishment of customary cost of tuition under section 2, Public Law 610, 81st Congress, and adjustment for surplus or deficit.*

* * * * *

(iii) *Where surplus or deficit exists, school may elect to continue regulatory formula.* If a surplus or deficit still exists at the end of the contract period which occurs on or after the end of the 24 months period, the rates in all succeeding contracts may be adjusted to absorb the surplus or return the deficit by continued application of the formula set forth in this paragraph. Where the school elects to continue the regulatory formula, the contract will contain a clause for adjusting the tuition rates from time to time as desired by either party as follows:

Article 1 (f) *Revision of Rates.* * * *

(2) Within 30 days after the expiration of four or more calendar months, the contractor will advise the Veterans' Administration, in writing, if the contractor desires any revision of the existing rates of compensation. If the Veterans' Administration desires any revision of the existing rates, written notice to that effect will be given to the contractor within 30 days after the expiration of four or more months. At such time as the contractor or the Veterans' Administration desires a revision of rates, the contractor will furnish to the Veterans' Administration statements of the actual cost of operation on VA Form 7–1969 for the period beginning with the effective date of the current contract rate and ending with the last day of the most recent month immediately preceding the date of the request for revision. The contractor will permit such inspections of its books and records as the Veterans' Administration may request.

* * * * *

5. A new § 21.580 is added as follows:

§ 21.580 *Contract provision where appeal to Veterans' Education Appeals Board is pending.* Where, at the time of execution of a contract for a current period which will include a tuition rate deemed a customary cost of tuition by reason of section 2, Public Law 610, 81st Congress, there is pending before the Veterans' Education Appeals Board or before a court of proper jurisdiction an appeal of the prior contract establishing such rate which is deemed to be the customary rate, the contract being executed will contain the following provision:

It is mutually understood and agreed that the tuition rate(s) set forth above is (are) based upon the tuition rate(s) stipulated in contract numbered ----------, effective for the period ---------- to ----------, in respect to which an appeal has been filed with the Veterans' Education Appeals Board and is pending before that Board. It is further understood and agreed that this contract shall be without prejudice to adjustment of payments, prospectively and retrospectively, pursuant to a valid final order of the Veterans' Education Appeals Board or subsequent judgment of a court of competent jurisdiction.

It is further mutually understood and agreed that no new right of appeal is created under this provision and that this provision is not a reservation of the right to appeal the amended contract rate(s) or any other determination set forth in contract ---------.

6. A new centerhead immediately following § 21.672 is added as follows: "Authorization for Payment or Recovery of Payment Based Upon Decisions of the Veterans' Education Appeals Board or a Court Order".

7. A new § 21.680 is added as follows:

§ 21.680 *Authorization for payment or recovery of payment based upon decisions of the Veterans' Education Appeals Board or a court order.* (a) Upon issuance of a final decision of the Veterans' Education Appeals Board with respect to an appeal made by an educational institution to the Board, the director, training facilities service for vocational rehabilitation and education, will issue instructions by letter to the regional office concerned as to the actions to be taken. Accordingly, payment or recovery of payment based upon any such decision will be withheld, pending receipt of instructions from the director, training facilities service. Present or past contracts will not be amended or supplemented to accord with such decisions. Authority for greater or lesser payments will be the decision itself. In any case wherein the central office directs that action be taken based upon a Board decision, two copies of such decision will be provided by memorandum from the chief, vocational rehabilitation and education division, to the finance officer. If because of such decision money is due the institution, payments will be made in accordance with Veterans' Administration Regulations upon the submission of appropriate vouchers by the educational institution. If by virtue of such decision money is due the Government, appropriate action to effect recovery will be taken by the regional office.

(b) In the event of a court order concerning a decision of the Veterans' Education Appeals Board, appropriate instructions will be issued by letter from central office in each individual case.

(Sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9, sec. 2, 57 Stat. 43, as amended, sec. 400, 58 Stat. 287, as amended; 38 U. S. C. 11a, 701, 707, ch. 12 note. Interprets or applies secs. 3, 4, 57 Stat. 43, as amended, secs. 300, 1500–1504, 1506, 1507, 58 Stat. 286, 300, as amended; 38 U. S. C. 693g, 697–697d, 697f, g, ch. 12 note)

This regulation effective August 22, 1952.

[SEAL] H. V. STIRLING,
Deputy Administrator.

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 127—INTERNATIONAL POSTAL SERVICE: POSTAGE RATES, SERVICE AVAILABLE, AND INSTRUCTIONS FOR MAILING

MISCELLANEOUS AMENDMENTS

a. In § 127.101 *Special provisions applicable to international registry service* make the following changes:

1. Redesignate paragraphs (k) and (l) as (l) and (m), respectively.

2. Add new paragraph (k) to read as follows:

(k) *Restricted delivery by senders.* (1) Senders in this country may restrict the delivery of registered Postal Union (regular) mail articles addressed to the following countries on condition that the articles are accompanied with a return receipt and are endorsed by the sender in the manner indicated:

Country	Endorsement required
Afghanistan	"A remettre en main propre."
Albania	"A remettre en main propre," or "Per T'u dorezvar ne doren e vet."
Austria	"A remettre en main propre," or "Zu eigenen Handen."
Belgium	"A remettre en main propre." or the equivalent in the Flemish language.
Bulgaria	"Lieno."
China (Taiwan only)	"A remettre en main propre."
Czechoslovakia	"A remettre en main propre."
Denmark	"Personlig."
Dominica	"To be delivered to the addressee in person."
Falkland Islands	"To be delivered to the addressee in person."
Finland	"A remettre en main propre."
French Somaliland	"A remettre en main propre."
Germany (all zones)	"A remettre en main propre," or "Eigenhandig."
Greece	"A remettre en main propre."
Hungary	"A remettre en main propre."
Iceland	"A remettre en main propre," or Afhendist vidtakanda sjalfum."
Italy	"A remettre en main propre."
Lebanon	"A remettre en main propre."
Luxemburg	"A remettre en main propre."
Montserrat	"To be delivered to the addressee in person."
Morocco (French Zone)	"A remettre en main propre."
Poland	"A remettre en main propre."
Portugal	"A remettre en main propre."
Rumania	"A remettre en main propre."
Sweden	"A remettre en main propre," or "Far utlamnas endast till adressaten personligen."
Switzerland	"A remettre en main propre."
Turkey	"Alicinin kendine verilecek."
Union of Soviet Socialist Republics	"A remettre en main propre."
Uruguay	"A livrer en main propre."

(2) The endorsements shown in the second column shall be placed above and near the address and must be underlined in red. The country of destination will make two attempts to effect delivery and if unsuccessful the article will be returned as undeliverable.

(3) Only the usual registry fee of 25 cents, plus the registry return receipt fee of 5 cents, is chargeable in connection with registered regular mail articles of which the delivery has been restricted in accordance with the foregoing provisions.

(4) Registered regular mail articles from foreign countries which are accompanied with a return receipt and bear the notation (underlined in red) "Deliver to addressee only," or a similar notation, shall be delivered only to the addressee. Two attempts must be made to deliver such articles. If delivery cannot be effected by the second attempt, the articles shall be returned to the sender as undeliverable.

b. In § 127.264 *Germany*, make the following changes in paragraph (b):

1. Amend subdivision (i) of subparagraph (1) to read as follows:

(i) The surface parcel rate for the American, British, and French Zones of Western Germany, the Soviet Zone, and all of Berlin, is $0.14 per pound.

2. Amend subdivision (ii) of subparagraph (1) to read as follows:

(ii) Air parcels for all of Germany.

Rates: $0.95 first 4 oz.; $0.45 each additional 4 oz.

3. In the tabulated information appearing under subdivision (ii) of subparagraph (1), change "Weight limit: 22 pounds." to read "Weight limit: 22,[1] 44 pounds."

4. The footnote relating to the item "Insurance" in the tabulated information shown under subdivision (ii) of subparagraph (1) is amended to read as follows:

[1] Parcels weighing in excess of 22 pounds, and insured parcels, may be accepted only for the American, British and French Zones (Western Zone) of Germany, including the corresponding sectors of Berlin. Service to the Soviet Zone, including the Soviet sector of Berlin, is limited to uninsured parcels not exceeding 22 pounds in weight.

5. Amend subparagraph (3) to read as follows:

(3) *Dimensions.* Greatest length 42 inches. Greatest length and girth combined 72 inches.

(R. S. 161, 396, 398; secs. 304, 309, 42 Stat. 24, 25, 48 Stat. 943; 5 U. S. C. 22, 369, 372)

[SEAL] V. C. BURKE,
Acting Postmaster General.

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

PART 56—ISSUANCE OF SECURITIES, ASSUMPTION OF OBLIGATIONS, AND FILING OF CERTIFICATES AND REPORTS

SPECIAL APPLICATIONS FOR EXEMPTION FROM REQUIREMENT THAT CERTAIN RAILROAD SECURITIES BE OFFERED FOR SALE AT COMPETITIVE BIDDING

At a session of the Interstate Commerce Commission, Division 4, held at its office in Washington, D. C., on the 23d day of July A. D. 1952.

The conclusions and requirement of the Commission stated in its report of May 8, 1944, in Ex Parte 158, "In the Matter of Competitive Bidding in the Sale of Securities under section 20a of the Interstate Commerce Act", being under consideration, and the matter of special applications for exemption from the requirement there stated that certain securities issued under authority granted pursuant to said section be offered for sale at competitive bidding being also under consideration, and good cause appearing therefor:

It is ordered, That the following special instructions be, and they are hereby, approved, and that from and after September 1, 1952, said instructions shall be observed by carriers by railroad, corporations organized for the purpose of engaging in transportation by railroad, and persons considered carriers by railroad subject to section 20a of the Interstate Commerce Act under the provisions of any order of the Commission under paragraphs (2) and (3) of section 5 of said act:

§ 56.25 *Applications for authority to sell securities without competitive bidding*—(a) *Circumstances requiring special application.* Special application for exemption from the requirement that securities issued under authority granted pursuant to the provisions of section 20a of the Interstate Commerce Act be offered for sale at competitive bidding should be filed only when for any reason it is not practicable to include the request for such exemption in an application filed pursuant to the instructions promulgated by order of the Commission, by Division 4, under date of August 9, 1946, (§§ 56.1 to 56.6) respecting applications filed under that section.

(b) *Information required.* Special application for exemption from the competitive bidding requirement shall set forth, in the order indicated, the following information:

(1) Exact corporate name of applicant.

(2) Government, State, or Territory under laws of which the applicant was organized and received its present charter.

(3) The name of each State in which applicant operates or proposes to operate.

(4) General description and amount of securities in respect of which exemption is sought.

(5) Purpose and uses of the proposed issue and the proceeds thereof.

(6) The facts and circumstances relied upon by applicant to show that competitive bidding should not be required in the sale or other disposition of the proposed securities, including a statement that applicant has not entered into any discussions or any negotiations with respect to the terms of sale with any prospective purchaser of its securities. (If request for exemption from the competitive bidding requirement is made in an application filed under section 20a pursuant to the instructions promulgated by the order of August 9, 1946, the information required by this paragraph should be furnished in such application.)

(7) Why the special application is necessary.

(8) The name, title, and post office address of the officer or officers to whom correspondence in respect of the application should be addressed.

(c) *Form and style.* The application shall conform with Rule 15 of the Commission's general rules of practice.

(d) *Execution.* The original application and supporting statements or exhibits shall be signed on behalf of the applicant by its president, a vice president, auditor, comptroller, or other executive officer having knowledge of the matters therein set forth and duly designated for that purpose by the applicant, shall be made under oath, and shall show, among other things, that the affiant is duly authorized to verify and file the application.

(e) *Filing.* The original application and supporting papers, and six copies thereof for the use of the Commission, shall be filed with the Secretary of the Interstate Commerce Commission, Washington, D. C. Each copy shall bear the dates and signatures that appear in the original and shall be complete in itself, but the signatures in the copies may be stamped or typed and the notarial seal may be omitted.

(f) *Notice.* Upon receipt of notice from the Commission that the application has been received and assigned a stated docket number, the applicant shall by regular mail serve notice of the filing of such application upon, and file a copy of such application with, the Governor of each State in which it operates or is authorized to do business, or in the case of holding companies, the Governor of each State in which the applicant is incorporated or authorized to do business. A copy of such notice of filing shall also be served upon the Public Service Commission or other appropriate authority of such State. Such notice shall include a request that the Governor, or other appropriate authority of the State, notify the Commission within 15 days after the date upon which the application was filed with the Commission, if it is desired to make any representation or to be heard in the matter.

[1] See Appendix to this document.

A certificate of such notice and filing shall be filed promptly with the Commission.

(g) *Procedure upon application.* Public hearing will not be held in connection with the application unless good cause therefor is shown or unless the Commission deems a hearing desirable. In case a hearing is not held, the proceeding will be disposed of on the basis of representations made in the application and in any supplement thereto. Any interested person desiring to make representation to the Commission as to the granting or denying of the application may submit such representation in writing within 10 days from the date of such notice. Such representation shall set forth clearly the interest of such person in the application and all facts relied upon, shall be made under oath, and shall show that a copy has been served upon the applicant. An original and six copies thereof shall be filed with the Interstate Commerce Commission, Washington, D. C. (Sec. 439, 41 Stat. 495; 49 U. S. C. 20a).

And it is further ordered, That this order shall and it does hereby, supersede the order of June 1, 1944, (49 CFR 56.25); that a copy of these special instructions be served upon each carrier by railroad, each corporation organized for the purpose of engaging in transportation by railroad, and each person considered a carrier by railroad subject to the provisions of section 20a of the Interstate Commerce Act; and that notice of this order be given to the general public by depositing a copy thereof in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register, The National Archives.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interprets or applies 41 Stat. 494, as amended; 49 U. S. C. 20a)

By the Commission, Division 4.

[SEAL] W. P. BARTEL, *Secretary.*

APPENDIX TO § 56.25

Pertinent conclusions and the requirement of the Commission in its report of May 8, 1944, in Ex Parte 158, "In the Matter of Competitive Bidding in the Sale of Securities under section 20a of the Interstate Commerce Act," are as follows:

We find that for the proper administration, execution, and enforcement of section 20a of the Interstate Commerce Act we should require as a condition to our approval of the sale of railroad securities issued under the provisions of that section that such securities be offered for sale at competitive bidding or at what we have heretofore considered tantamount thereto, viz, upon invitation of bids for the purchase thereof. Proposals received in response to such invitation should be opened only at such time and place as is specified in the invitation, and the duly authorized representative of any person making any such proposal should be permitted to be present at the opening of such proposals, and to examine each proposal submitted. If the right be reserved in the advertisement or invitation for bids, the railroad proposing the issue may properly reject all bids and call for new bids or seek such relief as the facts and circumstances may warrant.

We further find that such requirement should apply to all classes of railroad securities other than equipment, as to which no change in the present practice is contemplated, except the following:

(1) Common and preferred stocks;

(2) Securities sold or otherwise issued pro rata to existing holders of securities of the issuing company pursuant to any preemptive right or privilege or in exchange for or extension of outstanding securities, or in connection with any liquidation, reorganization, or financial adjustment;

(3) Any note or other security maturing in not more than 3 years;

(4) Securities sold or otherwise issued when the total issue does not exceed $1,000,000, principal amount;

(5) Securities of any railroad company issued in exchange for the securities or properties of any other railroad company acquired pursuant to authority granted under the provisions of section 5 (2) of the act, and any securities of such other company to be acquired by any other person pursuant to such authority.

(6) Securities sold or otherwise issued to a railroad company by any of its subsidiary companies pursuant to authority granted under section 20a of the Act where such securities are not to be sold by the parent company, but are to be held subject to our further order; and

(7) Any securities as to which we shall find, upon due showing by a railroad company, either upon application under the provisions of section 20a or upon special application preliminary to the filing of such application under section 20a, that sale at competitive bidding should not be required.

Applications under section 20a to sell securities without competitive bidding on the ground that such securities come within one of the foregoing specific exemptions should include a statement of facts relied upon to show that the exemption applies. Special applications for exemption from the competitive bidding requirement may be made pursuant to such special instructions as may hereafter be issued.

We further find that for the present no formal rule or regulations requiring the sale of railroad securities at competitive bidding should be promulgated. Railroads applying after June 30, 1944, for authority to issue securities under the provisions of section 20a will be expected to observe these findings.

The foregoing requirement was modified by the Commission's report of June 18, 1952, in Finance Docket No. 17748, Atlantic Coast Line R. Co. Competitive Bidding Exemption, 282 I. C. C. 265, as follows:

It will hereafter be our policy to deny any application for exemption from our competitive bidding requirement where competitive bidding is prima facie required and the applicant has, before obtaining the required exemption from us, entered into any discussions or any negotiations with respect to the terms of sale with any prospective purchaser of its securities. Our competitive bidding requirement is modified to this extent.[1]

[F. R. Doc. 52-9274; Filed, Aug. 21, 1952; 8:52 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Bureau of Animal Industry

[9 CFR Parts 91, 93]

INSPECTION AND HANDLING OF LIVESTOCK FOR EXPORTATION

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given in accordance with section 4 (a) of the Administrative Procedure Act (5 U. S. C. 1003 (a)) that the Secretary of Agriculture, pursuant to the authority vested in him by sections 4 and 5 of the act of Congress approved May 29, 1884, as amended (secs. 4, 5, 23 Stat. 32, as amended; 21 U. S. C. 112, 113), section 10 of the act of Congress approved August 30, 1890 (sec. 10, 26 Stat. 417; 21 U. S. C. 105), section 1 of the act of Congress approved May 3, 1891, as amended (sec. 1, 26 Stat. 833, as amended; 46 U. S. C. 466a), section 1 of the act of Congress approved February 2, 1903, as amended (sec. 1, 32 Stat. 791, as amended; 21 U. S. C. 112, 113, 120, 121), the act of Congress approved March 4, 1907 (34 Stat. 1263; 21 U. S. C. 80, 81, 82, 86), and the act of Congress approved July 24, 1919 (41 Stat. 241; 21 U. S. C. 96), proposes to revoke the special regulations governing the exportation of livestock to Mexico now contained in §§ 93.13 to 93.17, Part 93, Subchapter D, Chapter I, Title 9, Code of Federal Regulations, and to amend Part 91 of said Title 9 in the following respects:

1. The headnote of Part 91 would be amended to read: "Part 91—Inspection and Handling of Livestock for Exportation."

2. Section 91.1 would be amended to read:

§ 91.1 *Definitions.* Whenever in the regulations in this part the following words, names, or terms are used they shall be construed as follows:

(a) *Department.* The United States Department of Agriculture.

(b) *Bureau.* The Bureau of Animal Industry of the Department.

(c) *Chief of Bureau.* Chief of the Bureau.

(d) *Inspector.* An inspector of the Bureau.

(e) *Animals.* Horses, cattle, sheep, swine, and goats.

[1] This is not to be construed as prohibiting preliminary discussion of an exploratory nature with prospective purchasers dealing with the availability of money, the general condition of the market for railroad securities and similar matters, or the making of such inquiries or investigation as may be required to determine the probability that two or more bids will be received if a proposed issue is offered at competitive bidding.

(f) *Horses.* Horses, mules, and asses.

(g) *Roofing paper.* Any saturated roofing paper of a grade known to the trade as 30-pound roofing paper.

(h) *Stanchion.* Post or other fixed upright support.

3. Section 91.3 would be amended to read:

§ 91.3 *Ports of export.* The following are designated ports of export for animals at which inspection will be maintained: Portland, Maine; Boston, Massachusetts; New York, New York; Philadelphia, Pennsylvania; Baltimore, Maryland; Newport News and Norfolk, Virginia; Jacksonville, Port Everglades, and Miami Florida; Mobile, Alabama; New Orleans, Louisiana; Galveston and Houston, Texas; San Diego, Los Angeles, and San Francisco, California; Portland, Oregon; Seattle and Tacoma, Washington; Brownsville, Hidalgo, Rio Grande, Roma, Laredo, Eagle Pass, Del Rio, and El Paso, Texas; Douglas, Naco, and Nogales, Arizona; and Calexico and San Ysidro, California. Other ports may be designated in special cases by the Chief of Bureau.

4. Section 91.5 would be amended to read:

§ 91.5 *Diagnostic tests for dairy and breeding cattle.* No dairy or breeding cattle shall be exported to a foreign country unless they are shown by proper certificate to have passed a negative test for tuberculosis and, if they are more than 6 months old, a negative blood test for brucellosis (Bang's disease) within 30 days of the date of shipment: *Provided, however,* That the test for brucellosis may be waived in respect to animals that have been officially vaccinated as calves within the previous 12 months: *And provided further,* That either or both of these tests may be waived upon presentation by the exporter to the inspector at the port of embarkation of a written permit by an authorized representative of the foreign government to ship a specified lot of cattle to that particular country without said tests.

The tuberculin test may be applied by a Bureau inspector or by a veterinarian accredited by the Bureau, in which case the certificate shall be endorsed by the inspector in charge of disease-eradication work in the State of origin. Blood tests for brucellosis shall be made in laboratories recognized by the Bureau and State authorities for that purpose, and the certificate shall be issued or endorsed by the inspector in charge of disease-eradication work in the State of origin. Test charts and certificates shall include descriptions of the cattle with ages and markings.

The primary purposes of the foregoing proposed action are to revoke the special regulations governing the exportation of livestock to Mexico (9 CFR 93.13 to 93.17), to make the provisions of 9 CFR Part 91 applicable to such exportation to Mexico, and to require that the test charts and certificates required by 9 CFR 91.5 include descriptions of the cattle with ages and markings.

Any person who wishes to submit written data, views, or arguments concerning the foregoing proposed action may do so by filing them with the Chief of the Bureau of Animal Industry, Agricultural Research Administration, United States Department of Agriculture, Washington 25, D. C., on or before August 29, 1952.

Done at Washington, D. C., this 19th day of August 1952.

[SEAL] CHARLES F. BRANNAN, *Secretary of Agriculture.*

Production and Marketing Administration

[7 CFR Part 949]

[Docket No. AO 232-A1]

HANDLING OF MILK IN SAN ANTONIO, TEXAS, MARKETING AREA

PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER

Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of a public hearing to be held in the Grand Jury Room, U. S. Court House and Post Office, San Antonio, Texas, beginning at 10:00 a. m., c. s. t., August 26, 1952, for the purpose of receiving evidence with respect to emergency and other economic conditions which relate to the handling of milk in the San Antonio, Texas, marketing area, and to the proposed amendments hereinafter set forth, or appropriate modifications thereof, to the tentative marketing agreement heretofore approved by the Secretary of Agriculture and to the order regulating the handling of milk in the San Antonio, Texas, marketing area. These proposed amendments have not received the approval of the Secretary of Agriculture.

Amendments to the order for the San Antonio, Texas, marketing area have been proposed as follows:

By the Producers Association of San Antonio, Inc.:

1. That for the months of September 1952 through March 1953, the Class I price shall not be less than $7.38 per hundredweight.

By the Dairy Branch, Production and Marketing Administration:

2. Make such other changes as may be required to make the entire marketing agreement and the order conform with any amendments thereto which may result from this hearing.

Copies of this notice of hearing, and the order now in effect, may be procured from the Market Administrator, 1204 North Main Street, San Antonio, Texas, or from the Hearing Clerk, United States Department of Agriculture, Room 1353 South Building, Washington 25, D. C., or may be there inspected.

[SEAL] ROY W. LENNARTSON, *Assistant Administrator.*

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 230]

GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

REGULATION D; EXEMPTION FOR CANADIAN SECURITIES

Notice is hereby given that the Securities and Exchange Commission has under consideration a proposal to adopt a conditional exemption from the registration requirements of the Securities Act of 1933 for offerings, not exceeding $300,000 in any one year, made by Canadian issuers or by domestic issuers with their principal place of business in Canada.

Section 3 (b) of the Securities Act authorizes the Commission to exempt from registration, on appropriate terms and conditions, issues of securities not in excess of $300,000. Although the Commission has adopted several exemptive rules under this authority so as to permit the sale of various types of small issues without registration, in the past it has not felt that there was warrant for extending the exemptive grant to Canadian issues in view of the lack of suitable sanctions for enforcement of the civil and criminal provisions of the act in such cases. However, the recently ratified amendments to the extradition treaty between the United States and Canada, which are designed to cover fraud offenses of the type indictable in this country under section 17 (a) of the Securities Act of 1933 or the Mail Fraud Statute, has made possible consideration of the promulgation, under the section 3 (b) authority, of an exemptive regulation adapted to the circumstances of small exploratory Canadian enterprises.

The proposed regulation contains certain specified conditions designed to safeguard the investing public. These conditions, which must be complied with in order that the exemption may be applicable, include a requirement that an offering circular containing certain basic information to be used in offering securities under the regulation. The proposed exemption will be available only where all non-residents responsible for the offering furnish consents to service of process in civil suits or actions brought in this country in connection with the purchase or sale of the securities to be offered under the regulation. Provision also is made for denying or suspending the exemption where the terms and conditions of the regulation have not been met or where fraud or deceit is practiced in connection with the offering or sale of securities.

The principal features of the proposed regulation are as follows:

Filing requirements; use of offering circular. To avail itself of the exemption, the issuer (or other person on whose behalf the offering is to be made) would file, at least 15 days (exclusive of Saturdays, Sundays, and United States holidays) before any offering is made under the regulation, copies of a letter of notification on Form S-3b-2 and of the offering circular required by Rule 504 with the Commission's principal office at Washington, D. C. If the offering circular is revised or amended after

commencement of the offering, copies thereof will have to be filed with the Commission 15 days prior to its use; however, the Commission may shorten such period upon a showing of good cause. This requirement would also apply to copies of any other sales literature to be used in the offering.

Moreover, no offering could be made, orally or otherwise, in reliance on the exemption until the prospective investor had been furnished with the offering circular. The only exception to this requirement is made in the case of the limited advertisements provided for in Rule 505, which could be used only for the purpose of locating persons who are interested in receiving a copy of the offering circular.

Prescribed in an effort to balance the interests of investors on the one hand and of small business on the other, the information required to be included in the proposed Regulation B offering circular is minimal information, designed only to highlight certain basic aspects of the offering. The circular here required is in no wise considered to be a substitute for the disclosures which would be obtained by virtue of registration under the act. While a major purpose of the new regulation is to obtain salient information for investors, the administrative emphasis of the regulation of necessity will be based largely on the fraud prevention provisions of the law. Of course, the civil and criminal penalties for fraud provided for in the Act will be applicable in all cases where securities are offered under the proposed regulation.

As a mechanical convenience, the regulation provides that the information required to be furnished investors under Rule 504 may be included in or combined with any prospectus required by applicable Canadian law. Thus, in many cases, it would be possible to meet the offering circular requirements by filing with the Commission, and furnishing to investors, copies of the Canadian prospectus together with a rider sheet setting forth such additional data or legends as are necessary under the rule. This would be permitted, however, only where the provisions of Rule 504 (c) relating to the type used in printing such documents are met in all respects.

Any statement or implication in sales literature or otherwise that the Commission has approved the offering, passed on its merits or found the statements made to be accurate would be prohibited and in violation of the conditions of the exemption. It will be required that every offering circular contain a prescribed statement in this respect.

Exclusions from the exemption. Rule 501 (b) of the proposed regulation would exclude from the exemption certain securities not deemed to be of a type that could feasibly be offered thereunder. Also, in order to guard against use of the exemption for offerings with which persons are connected who in the past have been held to have engaged in fradulent activities or otherwise have had a history of securities law violation, the regulation would not be available for any offerings where persons suffering from the broad disqualifications prescribed therein are affiliated with the issuer or underwriter. The exemption also would be inapplicable unless all persons whose activities in connection with the offering render them subject to section 15 (a) of the Securities Exchange Act of 1934 have registered as broker-dealers in accordance with section 15 (b) of that act. Provision is made for the automatic termination or suspension of the exemption in certain cases by Rules 501 (c) and (d) respectively.

Maximum offering price. The exemption could be availed of by an issuer only to the extent of $300,000 during any single year. In the case of a secondary distribution by an affiliate, the maximum permissible amount is $100,000. The maximum which could be offered under the regulation by the issuer and its affiliates in the aggregate could not exceed $300,000.

In computing the amount for which the exemption is available, the regulation provides that the maximum must be reduced by the total offering price of any securities of the issuer, its predecessors or affiliates offered in violation of the registration requirements of the Securities Act during the period. A similar deduction would have to be made for securities offered for cash outside of the United States concurrently with the offering made or proposed to be made under the regulation. The latter deduction would not have to be made, however, in the case of offerings which relate to warrants or rights granted to security holders on a pro rata basis.

The requirement that deduction be made for securities offered concurrently outside of the United States is based on the fact that section 3 (b) of the act, the authorizing section, is meant to facilitate only small offerings. While the Securities and Exchange Commission has no jurisdiction over offerings made entirely outside this country, it is not deemed appropriate to adopt a section 3 (b) exemption which would exempt the domestic portion of a single offering which, in total, exceeds the maximum amount permitted by the statute. Moreover, cases involving offerings made partly in the United States and partly outside the country at or about the same time would create serious administrative difficulties which would impede the proper enforcement of the regulation.

The provision noted above is not intended to prevent a company which had raised $300,000 for exploratory purposes under the regulation from thereafter raising additional funds in Canada on the basis of new discoveries. The limitation would be applicable only in the case of offerings made at or about the same time. And, of course, a company would in no event be prevented from raising such additional funds in the United States through the registration procedure prescribed in the Securities Act of 1933.

Consent to service of process. The Securities Act authorizes the Commission to institute injunctive actions in cases involving violations of the act, and provision is made in section 12 thereof for civil suits for damages by purchasers of securities in such cases. In order to give full effect to these provisions the proposed regulation would require that all nonresidents connected with any offering made thereunder file a written irrevocable consent and power of attorney which would authorize the commencement of any civil actions or suits, in connection with the purchase or sale of securities under the exemption, by the service of process upon the Secretary of the Commission, who would be authorized to receive service of all papers in such litigation. The Secretary in turn would be obliged to forward copies of any such process or pleadings to the appropriate persons by registered mail.

The required consents and powers of attorney would be filed with the letter of notification on a form to be prescribed by the Commission.

Denial and suspension of the exemption. The exemption provided for in this regulation would in no case be available or, where originally available, would not continue to apply unless all of the specified terms and conditions of the regulation are met. In order that investors may be provided with notice of such facts in appropriate cases, Rule 509 establishes a procedure for the temporary or permanent suspension or denial of the exemption for a particular offering, where the Commission finds that the terms and conditions of the regulation have not been met, or that the offering circular or sales literature is fraudulent, or that fraud or deceit is otherwise being perpetrated in connection with the offering or sale of the securities. Of course, the failure of the Commission to institute any such proceeding to formalize and record the facts would in no way affect the right of investors to institute appropriate actions for damages; nor would such failure be the basis for any inference that the terms and conditions of the regulation have been complied with or that the offering is free from fraud or deceit.

Under the prescribed procedure, the Commission could enter a temporary denial or suspension order and thereupon notify the persons on whose behalf the letter of notification was filed of their right to request a hearing. If no hearing is requested and none is ordered by the Commission, the order would remain in effect until modified or vacated by the Commission. Where a hearing is requested, it will be held in compliance with the Administrative Procedure Act and thereafter the Commission will either vacate the order or enter an order permanently denying or suspending the exemption. All notices required under the rule will be published in the FEDERAL REGISTER and, in addition, will be served upon the interested persons by personal service, registered mail or confirmed telegraphic notice.

It will be noted further that by virtue of Rule 501 (b) (7) persons who are connected with any offering subject to a suspension or denial order would be disqualified from thereafter participating in any other offering under the regulation, whether of the same or of a different issuer. Provision is made in such cases, however, for showing cause to the Commission for relaxing this proscription in cases where the circumstances do not require denial of the exemption in t.

public interest or for the protection of investors.

The regulation also would provide for the filing with the Commission of reports showing the progress and results of offerings made thereunder.

Copies of all materials filed with the Commission under this regulation by Canadian offerors will be furnished to the appropriate Canadian provincial securities authorities and it is expected that the Commission will have their full cooperation in administering the regulation.

It is believed that the conditional exemption here proposed will provide American investors with basic information regarding small Canadian exploratory ventures, generally not available in the past. The proposal is designed as a realistic and constructive step toward meeting the problems that have existed in this area in years past and as a measure which should contribute toward the healthy flow of capital between the two countries into legitimate developmental enterprises.

The Commission invites comments and suggestions on the proposed regulation from all interested persons. Comments and suggestions should be submitted in writing to the Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., on or before September 15, 1952.

A copy of the proposed regulation is set forth below.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

AUGUST 15, 1952.

REGULATION D: EXEMPTION FOR CANADIAN SECURITIES

§ 230.500 *Definitions of terms used in §§ 230.500 to 230.510.* As used in §§ 230.500 to 230.510, the following terms shall have the meanings indicated:

(a) An "affiliate" of an issuer is a person controlling, controlled by or under common control with such issuer. An individual who controls an issuer is an affiliate of such issuer.

(b) A "predecessor" of an issuer is a person from which such issuer has acquired, directly or indirectly, a substantial portion of its assets.

(c) A "promoter" of an issuer is a person who took an important part in the organization of such issuer, the acquisition of its assets or the distribution of its securities.

(d) A "resident" of a specified country is an individual resident of such country, or a corporation or other organization which is incorporated or organized under the laws of such country or any of its political subdivisions.

(e) The term "underwriter" shall have the meaning given in section 2 (11) of the act.

§ 230.501 *Securities exempted.* (a) Except as hereinafter provided in this section, securities offered in accordance with the terms and conditions of §§ 230.500 to 230.510 shall be exempt from registration under the Securities Act of 1933: *Provided:*

(1) Such securities are issued by a resident of Canada, or of the United States, having his or its principal place of business in Canada;

(2) The offering is made for the benefit of one or more residents of Canada or of the United States;

(3) The securities are offered for cash; and

(4) Each underwriter of the securities is registered as a broker or dealer pursuant to section 15 (b) of the Securities Exchange Act of 1934, unless such registration is not required.

(b) No exemption under §§ 230.500 to 230.510 shall be available for any of the following securities:

(1) Fractional undivided interests in oil or gas rights as defined in § 230.300, or similar interests in other mineral rights.

(2) Certificates of interest as defined in § 230.360.

(3) Assessable securities.

(4) Securities of any investment company.

(5) Securities of any issuer if such issuer or any of its predecessors or affiliates:

(i) Has filed a registration statement which is the subject of pending proceedings under section 8 (b), 8 (d) or 8 (e) of the act or is subject to an order entered under any such section; or

(ii) Is subject to pending proceedings under § 230.509 or to an order entered thereunder.

(6) Securities of any issuer if such issuer or any of its directors, officers, affiliates or predecessors, any of its promoters presently connected with it in any capacity, or any underwriter of the securities to be offered hereunder:

(i) Has been convicted within five years preceding the filing of the letter of notification required by § 230.503 of any crime or offense involving the purchase or sale of any security or arising out of the conduct of the business of a broker or dealer;

(ii) Is subject to any order, judgment or decree of any court entered within five years prior to the date of such filing, enjoining or restraining such person from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security; or

(iii) Is subject to a United States Post Office fraud order.

(7) Securities of any issuer, if any of its directors, officers or affiliates, any of its promoters presently connected with it in any capacity, or any underwriter of the securities to be offered hereunder, participated in or was connected with any offering of securities of any other issuer which has at any time been subject to:

(i) An order under section 8 (b) or 8 (d) of the act;

(ii) An order under § 230.509; or

(iii) A United States Post Office fraud order,

unless cause be shown as to why it is not necessary or appropriate in the public interest or for the protection of investors that the exemption be denied in the particular case.

(c) The exemption provided by §§ 230.500 to 230.510 shall terminate, as to any securities remaining unsold, if the issuer or any of its directors, officers or affiliates, any promoter presently connected with it in any capacity, any security holder on whose behalf any of the securities are being offered hereunder, or any underwriter of the securities (1) shall be convicted of any crime or offense involving the purchase or sale of any security or arising out of the conduct of the business of a broker or dealer, or (2) shall be enjoined by any court from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security.

(d) The exemption provided by §§ 230.500 to 230.510 shall be suspended, and no securities may be offered hereunder, during the pendency of (1) any indictment of any person specified in paragraph (c) of this section for any crime or offense involving the purchase or sale of any security or arising out of the conduct of the business of a broker or dealer, (2) any proceeding initiated by the Commission, or by any Canadian authority for the purpose of enjoining any such person from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security, or (3) any proceeding under section 8 (b), 8 (d) or 8 (e) of the act.

§ 230.502 *Amount of securities exempted.* (a) The aggregate offering price of all securities of the issuer which may be offered under §§ 230.500 to 230.510 shall not exceed $300,000 during any period of one year: *Provided,* That the aggregate offering price of all such securities offered on behalf of persons other than the issuer shall not exceed $100,000 during any such period. However, the foregoing amounts shall be reduced by the aggregate offering price of the following securities offered or sold during such period:

(1) All securities of the issuer's predecessors and affiliates offered under §§ 230.500 to 230.510;

(2) All securities of the issuer, its predecessors and affiliates sold in violation of section 5 (a) of the act; and

(3) All securities of the issuer, its predecessors and affiliates offered for cash outside the United States concurrently with an offering under this regulation, except that in case of an offering by the issuer to existing security holders on a pro rata basis pursuant to warrants or rights that portion of the offering made outside the United States need not be deducted.

(b) The aggregate offering price of securities which have a determinable market value shall be computed upon the basis of such market value as determined from transactions or quotations on a specified date within 15 days prior to the date of filing the letter of notification, or the offering price to the public, whichever is higher: *Provided,* That the aggregate gross proceeds actually received from the public shall not exceed the maximum aggregate offering price permitted, in the particular case, by paragraph (a) of this section.

(c) Unsold securities the offering of which has been withdrawn, by amending the letter of notification required by § 230.503 to reduce the amount stated therein as proposed to be offered, need not be included in computing the amount of securities which may be offered under

§§ 230.500 to 230.510 subsequent to such withdrawal.

§ 230.503 *Letter of notification.* At least 15 days (Saturdays, Sundays and holidays excluded) prior to the date on which the initial offering of any securities is to be made under §§ 230.500 to 230.510, there shall be filed with the principal office of the Commission in Washington, D. C., four copies of a letter of notification on Form S–3B–2. The letter of notification shall be signed by the issuer, each underwriter of the securities to be offered hereunder and by each person, other than the issuer, on whose behalf any of the securities are to be offered. If the letter of notification is signed by any person on behalf of any other person except the issuer, evidence of authority to sign on behalf of such other person shall be filed with the letter.

§ 230.504 *Filing and use of offering circular.* (a) No securities shall be offered orally or otherwise under §§ 230.500 to 230.510 unless an offering circular containing the information specified in paragraph (b) of this section is concurrently given or has previously been given to the person to whom the offer is made, or has been sent to such person under such circumstances that it would normally have been received by him at or prior to the time of the offering: *Provided*, That in the case of transactions effected on a national securities exchange, a copy of such circular shall be delivered to the purchaser not later than the time of delivery of confirmation of the sale to such purchaser.

(b) The offering circular required by paragraph (a) of this section shall be dated and shall contain the following information, which may be included in or combined with any prospectus required by applicable Canadian law:

(1) The following statement on the outside front cover page of the offering circular in capital letters in type as large as that used generally in the body of the circular:

These securities are offered pursuant to an exemption from registration with the Securities and Exchange Commission. The Commission does not pass upon the merits of any securities nor does it pass upon the accuracy or completeness of any selling literature.

(2) The name and address of the issuer, the name of the Province or other jurisdiction in which it was incorporated or organized and the date of its incorporation or organization.

(3) The type and amount of securities to be offered pursuant to §§ 230.500 to 230.510 and if any of such securities are to be offered for the account of security holders, the name and address of each such security holder, the total amount owned and the amount to be offered.

NOTE: See Supplemental Instructions to Regulation D, attached to Form S–3B–2, which indicate more specifically the information required.

(4) A brief description of the method by which the securities are to be offered and if the offering is to be made through underwriters, the name and address of each underwriter and the amount of the participation of each such underwriter, indicating the nature of any material relationship between the issuer and any such underwriter.

(5) The price at which the securities are to be offered to the public, the underwriting discounts or commissions and the proceeds to the issuer or other person on whose behalf the securities are offered. This information shall be furnished both on a per-share basis and in the aggregate and shall also be given with respect to any concurrent offering of the same securities or securities of the same class in Canada. This information shall be set forth on the outside cover page of the offering circular in tabular form.

(6) The purposes for which the net cash proceeds to the issuer from the sale of the securities are to be used and the amount to be used for each such purpose, indicating how the actual proceeds will be used if they are insufficient for all of the purposes stated.

(7) A brief description of the business and property of the issuer.

NOTE: See Supplemental Instructions to Regulation D, attached to Form S–3B–2, which indicate more specifically the information required.

(8) The full names and addresses of all directors, officers and promoters of the issuer, their remuneration from and their direct or indirect interests in the issuer and its affiliates and in any material transactions within the past two years or any material proposed transactions to which the issuer or any of its affiliates was or is to be a party.

(9) A brief description of all options or warrants presently outstanding or proposed to be granted to purchase securities of the issuer, including the names of the principal holders of such options, or warrants, the terms and conditions upon which the options may be exercised and the price at which the securities may be acquired pursuant to such options or warrants.

(10) Appropriate financial statements showing the issuer's financial condition as of a date within ninety days prior to filing the letter of notification, and its income and expenses, or receipts and disbursements as appropriate, for a period of at least two years prior to the statement of financial condition, or for the period of the issuer's existence if less than two years.

NOTE: See Supplemental Instructions to Regulation D, attached to Form S–3B–2, which indicate more specifically the financial statements required.

(c) All printed offering circulars shall be set in roman type at least as large as ten-point modern type. All type shall be leaded at least two points.

(d) Four copies of the offering circular required by this section, which is to be used at the commencement of the offering, shall be filed with, and shall be deemed a part of, the letter of notification required by § 230.503 at the time such letter is filed. If the offering circular is revised or amended subsequent to the commencement of the offering, four copies of such revised or amended circular shall be filed with the Commission at least 15 days prior to its use, or such shorter period as the Commission may authorize upon a showing of good cause therefor.

§ 230.505 *Use of limited written communications.* Notwithstanding § 230.504, any written advertisement or other written communication which contains only the information specified in this section may be published or distributed to any person prior to the sending or giving to such person of an offering circular containing the information required by § 230.504.

(a) The name of the issuer;

(b) The title of the securities; and

(c) The name and address of the person or persons from whom an offering circular meeting the requirements of § 230.504 may be obtained.

(d) A detachable form, substantially as follows, for use in requesting a copy of the offering circular:

Please send me a copy of the offering circular relating to ----------
Name ----------
Address ----------

§ 230.506 *Other material to be filed.* Four copies of every written or other communication prepared or authorized by the issuer or any of its affiliates or any underwriter of the securities to be offered hereunder which is proposed to be used, in addition to the offering circular, at the commencement of the public offering of such securities or intended to be sent or given thereafter to more than ten persons shall be filed with the principal office of the Commission at least 15 days prior to any use thereof, or such shorter period as the Commission may authorize upon a showing of good cause therefor.

§ 230.507 *Consent to service of process.* (a) The issuer, each of its officers and directors, each person on whose behalf any of the securities are to be offered, and each underwriter of the securities to be offered, who is not a resident of the United States, shall, at the time of filing the letter of notification required by § 230.503, furnish to the Commission, in a form acceptable to it, a written irrevocable consent and power of attorney which (1) designates the Secretary of the Securities and Exchange Commission as his or its agent upon whom may be served any process, pleadings or other papers in any civil suit or action brought after the effective date of this section in connection with the purchase or sale of any security offered under §§ 230.500 to 230.510 against the person executing the power of attorney, and (2) stipulates and agrees that any such civil suit or action may be commenced against the person executing the power of attorney in the appropriate courts of the United States, Federal or State, by the service of process upon the Secretary of the Commission, and that the service of any such process, pleadings and other papers upon the Secretary of the Commission shall be taken and held in all courts to be as valid and binding as if due personal service thereof had been made upon the person executing such power of attorney.

(b) Whenever any process, pleading or paper as aforesaid is served upon the Secretary of the Commission, he shall at once forward a copy of the same by registered mail to the appropriate defendants at their last address of record filed with the Commission. The Secretary shall be furnished a sufficient number of copies for such purpose and one copy for his file.

§ 230.508 *Prohibition of certain statements.* No written or oral communication used in connection with any offering under §§ 230.500 to 230.510 shall contain any language stating or implying that the Commission has in any way passed upon the merits of, or given approval to, the securities offered or the terms of the offering, or has determined that the securities are exempt from registration, or has made any finding that the statements in any such communication are accurate or complete.

§ 230.509 *Denial and suspension of exemption.* (a) The Commission may, at any time after the filing of a letter of notification, enter an order temporarily denying the exemption, or if the public offering has commenced, it may enter an order temporarily suspending the exemption, if it has reason to believe that:

(1) No exemption is available under §§ 230.500 to 230.510 for the securities purported to be offered hereunder;

(2) The letter of notification, the offering circular or any other sales literature contains any untrue statement of a material fact or omits to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading;

(3) Any device, scheme or artifice to defraud is being or would be employed in connection with the offering or sale of the securities, or the offering is being or would be made in such manner as to operate as a fraud or deceit upon the purchaser; or

(4) The person on whose behalf the letter of notification was filed has otherwise failed to comply with any of the terms and conditions of §§ 230.500 to 230.510.

(b) Upon the entry of an order under paragraph (a) of this section, the Commission will promptly give notice to the persons on whose behalf the letter of notification was filed (1) that such order has been entered, together with a brief statement of the reasons for the entry of the order, and (2) that the Commission will, upon receipt of a written request, set the matter down for hearing within 20 days after the receipt of such a request at a place to be designated by the Commission. If no hearing is requested and none is ordered by the Commission, the order shall remain in effect until it is modified or vacated by the Commission. Where a hearing is requested or is ordered by the Commission, the Commission will, after notice of and opportunity for such hearing, either vacate the order or enter an order permanently denying or suspending the exemption.

(c) The Commission may at any time after notice of and opportunity for hearing, enter an order permanently suspending the exemption for any reason upon which it could have entered a temporary suspension order under paragraph (a) of this section. Any such order shall remain in effect until vacated by the Commission.

(d) All notices required by this section shall be given to the person or persons on whose behalf the letter of notification was filed by personal service, registered mail or confirmed telegraphic notice at the addresses of such persons given in the letter of notification. In addition, all such notices will be published in the FEDERAL REGISTER.

§ 230.510 *Reports of sales under §§ 230.500 to 230.510.* Within 30 days after the end of each six-month period following the commencement of the offering of the securities under §§ 230.500 to 230.510, the issuer or other person on whose behalf the securities are offered shall file with the Commission four copies of a report on Form S–3B–2A containing the information called for by such form. A final report may be made upon completion or termination of the offering prior to the end of the period in which the last sale is made.

FORM S–3B–2

The following information is given with respect to an offering of securities proposed to be made pursuant to §§ 230.500 to 230.510 (Regulation D) of the general rules and regulations under the Securities Act of 1933.[1] The offering circular required by § 230.504 (Rule 504) is filed with, and is to be deemed a part of, this letter of notification.

Item 1. Province from which offering is to be made. State the name of the Province from which the offering is to be made in the United States and attach four copies of any official prospectus filed with such Province covering the securities proposed to be offered hereunder.

Item 2. Jurisdictions in which securities are to be offered. State the names of the jurisdictions (State, Territories, District of Columbia and foreign countries) in which it is proposed to offer the securities covered by this letter of notification. If all or any part of the offering is to be made by use of the facilities of a national securities exchange, it will be sufficient as to the securities to be so offered to name the exchange. No securities shall be offered or sold in any jurisdiction not mentioned until an amendment to the letter of notification has been filed stating the name of the additional jurisdiction or jurisdictions.

Item 3. Unregistered securities sold in the United States within one year. As to all unregistered securities of the issuer or any of its predecessors or affiliates sold in the United States within one year prior to the date of filing this letter of notification, state the following:

(a) Name and complete address of the issuer of such securities.

(b) Name and complete address of each person on whose behalf any of such securities were sold.

(c) Title and amount of securities sold on behalf of each such person, the aggregate offering price thereof, and the method of computing such price.

(d) Indicate the section of the act or the rule of the Commission under which exemption from registration was claimed and state briefly the facts relied upon to make the exemption available.

Item 4. Present or proposed offerings in Canada. State whether or not the issuer or any of its affiliates is presently offering or presently contemplates the offering of any securities in Canada in addition to those covered by this letter of notification. If so, describe fully the present or proposed offering.

Item 5. Predecessors and affiliates of issuer. List the full name and complete address of each predecessor and each affiliate of the issuer. As to any predecessor which is no longer in existence, give its full name and last address prior to its dissolution.

Item 6. Judicial action within five years. State whether the issuer or any of its predecessors or affiliates or any of its promoters, directors or officers presently connected with it in any capacity, or any underwriter of the securities proposed to be offered under Regulation D:

(a) Has been convicted within five years preceding the filing of the letter of notification of any crime or offense involving the purchase or sale of any security; or

(b) Is subject to any order, judgment or decree of any court entered within five years preceding the date of such filing enjoining or restraining it or him from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security; or

(c) Is subject to any United States Post Office Fraud Order.

SUPPLEMENTAL INSTRUCTIONS AS TO THE PREPARATION OF THE OFFERING CIRCULAR REQUIRED BY § 230.504 (RULE 504)

Instructions to paragraph (b) (3). In stating the type of the securities to be offered, there shall be given such information as will indicate the general character of the securities, including the following:

(a) In the case of shares, the par or stated value, if any; the rate of dividends, if fixed, and whether cumulative or non-cumulative; a brief indication of the preference, if any; and if convertible, a statement to that effect.

(b) In the case of debt securities, the rate of interest; the date of maturity, or if the issue matures serially, a brief indication of the serial maturities such as "maturing serially from 1955 to 1965;" if the payment of principal or interest is contingent, an appropriate indication of such contingency; a brief indication of the priority of the issue; and if convertible, a statement to that effect.

(c) In the case of any other kind of securities, appropriate information of a comparable character.

Instructions to paragraph (b) (7). In furnishing the information called for by paragraph (b) (7), the following instructions shall be observed:

A. For issuers engaged in mining or exploratory mining operations:

1. The location and means of access to the mining properties now held or presently intended to be acquired and the nature of the title under which such properties are held or proposed to be held.

2. State the mineral produced or the nature of the deposit to be explored, indicating whether surface or ground operations are to be involved.

3. No claim shall be made as to the existence of a body of commercial ore which has not been sufficiently tested to be classified

[1] The letter of notification shall contain the item numbers and captions of all items, but the text of the items may be omitted if all of the information required by each item is clearly set forth under the respective item number and caption.

[2] The letter of notification shall be signed in accordance with § 230.503 (Rule 503).

properly as proven ore or probable ore. For the purpose of this rule, the term "proven ore" means a body of ore so extensively surrounded by sampled faces that the risk of failure in continuity is reduced to a minimum, and the term "probable ore" means ore as to which the risk of failure in continuity is greater than for proven ore, but as to which there is sufficient warrant for assuming continuity of the ore.

4. If statements are made as to the existence of proven or probable ore, furnish for the information of the Commission copies of the pertinent reports and other supporting data with respect to such ore.

B. For issuers engaged in the oil and gas industry:

1. State the area, location of and means of access to the various properties proposed to be developed or exploited by the issuer and the nature of the issuer's interest therein.

2. State the development which has occurred to date on or near the properties held.

3. State (in tabular form) for such properties which are productive, net production of oil and gas to issuer's interest from each of the properties by years prior to the latest year, and by months for the latest year, as well as the number of net producing wells owned by the issuer which contributed to the production during each of the time periods involved.

4. State the estimated future reserves net to issuer's interest in such properties which are proved.

5. If statements concerning geology or engineering are made, furnish for the information of the Commission copies of the pertinent reports and other supporting data.

C. For issuers engaged or intending to engage in general commercial, financial or industrial businesses.

1. Nature of issuer's present or proposed products or services.

2. Length of time issuer has been in commercial production.

3. Methods of production and distribution and nature of market for products or services.

4. Location and general character of the plants or other physical properties now held or presently intended to be acquired and the nature of the title under which such properties are held or proposed to be held.

5. If the issuer intends to exploit or develop any new invention or process, set forth how such invention or process is to be applied commercially and whether or not it is covered by any patent, issued or pending. Identify by serial number and date any applicable patents or patent applications.

Instructions to paragraph (b) (10). 1. The financial statements required shall be prepared in accordance with generally accepted accounting principles and practices but need not be certified by independent public or certified public accountants.

2. If the issuer is a commercial, industrial or mining company in the promotional, exploratory or development state the financial statements shall include separate statements of assets and unrecovered promotional exploratory and development costs; liabilities; and capital shares and a statement of cash receipts and disbursements itemized as appropriate to the nature of the enterprise. In these statements dollar amounts shall be extended only for cash transactions. Amounts due to or from, or paid to or received from, underwriters, promoters, directors, officers, employees, and principal holders of equity securities other than affiliates shall be stated separately for each such class of persons, if significant in amount.

Instructions as to exhibits. Four copies of each of the following documents shall be filed as exhibits to the letter of notification:

1. The issuer's charter.
2. The issuer's by-laws.
3. Any indenture or other constituent instrument defining the rights of holders of the securities to be offered hereunder.
4. All underwriting contracts relating to the securities to be offered hereunder.

NOTICES

DEPARTMENT OF THE TREASURY

Bureau of Customs

[481.39]

CHINESE CHOPPING BLOCKS

TARIFF CLASSIFICATION

AUGUST 19, 1952.

It appears probable that a correct interpretation of paragraph 412, Tariff Act of 1930, requires that Chinese chopping blocks be classified thereunder as manufactures of wood, not specially provided for. Under an established and uniform practice such articles now are classified under the provision in paragraph 406 for last blocks, wagon blocks, oar blocks, heading blocks, and all like blocks, rough-hewn, or rough-shaped, sawed or bored.

The merchandise in question consists of boards or blocks in various sizes ranging from 12½ by 12½ by 2 inches to 23½ by 23½ by 6 inches. They are surfaced on all four sides, the edges are beveled, and they are completely ready for use in their condition as imported, without further manufacturing operations.

Pursuant to § 16.10 a (d), Customs Regulations of 1943 (19 CFR 16.10a (d)), notice is hereby given that the existing uniform practice of classifying such merchandise under paragraph 406 is under review in the Bureau of Customs.

Consideration will be given to any relevant data, views, or arguments pertaining to the correct tariff classification of Chinese chopping blocks which are submitted in writing to the Bureau of Customs, Washington 25, D. C. To assure consideration, such communications must be received in the Bureau not later than 30 days from the date of publication of this notice.

No hearings will be held.

[SEAL] FRANK DOW,
Commissioner of Customs.

[F. R. Doc. 52-9282; Filed, Aug. 21, 1952; 8:55 a. m.]

DEPARTMENT OF LABOR

Wage and Hour and Public Contracts Divisions

EMPLOYMENT OF HANDICAPPED CLIENTS BY SHELTERED WORKSHOPS

ISSUANCE OF SPECIAL CERTIFICATES

Notice is hereby given that special certificates authorizing the employment of handicapped clients at hourly wage rates lower than the minimum wage rates applicable under section 6 of the Fair Labor Standards Act of 1938, as amended, and section 1 (b) of the Walsh-Healey Public Contracts Act, as amended, have been issued to the sheltered workshops hereinafter mentioned, under section 14 of the Fair Labor Standards Act of 1938, as amended (sec. 14, 52 Stat. 1068; 29 U. S. C. 214; as amended 63 Stat. 910), and Part 525 of the regulations issued thereunder, as amended (29 CFR Part 525), and under sections 4 and 6 of the Walsh-Healey Public Contracts Act (secs. 4, 6, 49 Stat. 2038; 41 U. S. C. 38, 40) and Article 1102 of the regulations issued pursuant thereto (41 CFR 201.1102).

The names and addresses of the sheltered workshops to which certificates were issued, wage rates, and the effective and expiration dates of the certificates are as follows:

The Merrimack Valley Goodwill Industries, Inc., 99 Willie Street, Lowell, Massachusetts; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 25 cents per hour for a training period of 40 hours, and 40 cents thereafter, whichever is higher. Certificate is effective August 1, 1952, and expires July 31, 1953.

Morgan Memorial Co-operative Industries & Stores, Inc., 89 Shawmut Avenue, Boston 16, Massachusetts; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 40 cents per hour for a training period of 40 hours, and 45 cents thereafter, whichever is higher. Certificate is effective August 1, 1952, and expires August 31, 1953.

The New Haven Goodwill Industries, Inc., 238 State Street, New Haven 10, Connecticut; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 25 cents per hour for a training period of 40 hours and 40 cents thereafter, whichever is higher. Certificate is effective August 1, 1952, and expires August 31, 1953.

Springfield Goodwill Industries, Inc., 139 Lyman Street, Springfield, Massachusetts; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 25 cents per hour for a training period of 40 hours, and 50 cents thereafter, whichever is higher. Certificate is effective August 1, 1952, and expires August 31, 1953.

Community Workshops operated by Co-operative Workrooms, Inc., 36 Washington Street, Boston, Massachusetts; at a wage rate of not less than the piece rate paid nonhandicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 17 cents per hour, whichever is higher. Certificate is effective August 1, 1952, and expires July 31, 1953.

Buffalo Goodwill Industries, Inc., 153 North Division Street, Buffalo 3, New York; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 20 cents per hour for an evaluation period of 120 hours for the entire shop, 30 cents thereafter in the Contract Department, and 50 cents thereafter in the Waste Material Division, Sorting Department, whichever is higher. Certificate is effective August 1, 1952, and expires July 31, 1953.

The National Society of Volunteers of America, 59–61 Eldredge Street, Binghamton, New York; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 45 cents per hour, whichever is higher. Certificate is effective July 21, 1952, and expires June 30, 1953.

The National Society of Volunteers of America, 297 Clinton Street, Binghamton, New York; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 45 cents per hour, whichever is higher. Certificate is effective July 21, 1952, and expires June 30, 1953.

The Volunteers of America, 37–11 Twenty-second Street, Long Island City, New York; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 40 cents per hour, whichever is higher. Certificate is effective August 1, 1952, and expires July 31, 1953.

The Volunteers of America, 36–30 Thirteenth Street, Long Island City, New York; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 40 cents per hour, whichever is higher. Certificate is effective August 1, 1952, and expires July 31, 1953.

Phila. Society for Crippled Children and Adults, 2000 South College Avenue, Philadelphia, Pennsylvania; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or not less than the applicable hourly rates during the periods hereinafter specified, whichever is higher: 15 cents per hour for an evaluation period of 40 hours for the entire shop with the following rates and periods applicable for the various departments listed: Clerical Division, 15 cents for a training period of 40 hours and 45 cents thereafter; Machine Division, 15 cents for a training period of 80 hours and 60 cents thereafter; Inserting Division, 15 cents for a training period of 40 hours and 35 cents thereafter. Certificate is effective August 1, 1952, and expires July 31, 1953.

The Goodwill Industries, Inc., of Muskegon County, 794 Pine Street, Muskegon, Michigan; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 20 cents per hour for a training period of 40 hours, and 40 cents thereafter, whichever is higher. Certificate is effective July 31, 1952, and expires June 30, 1953.

Columbus Post Volunteers of America, 377–379 West Broad Street, Columbus 8, Ohio; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 15 cents per hour for a training period of 40 hours, and 30 cents thereafter, whichever is higher. Certificate is effective August 1, 1952, and expires July 31, 1953.

Goodwill Union Mission and Industries, Inc., 713 East Tuscarawas Street, Canton, Ohio; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 43 cents per hour, whichever is higher. Certificate is effective August 1, 1952, and expires July 31, 1953.

The Columbus Goodwill Industries, 94 North Sixth Street, Columbus 15, Ohio; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 20 cents per hour, whichever is higher. Certificate is effective July 29, 1952, and expires June 30, 1953.

Workshop for the Blind, 509 Sibley Street, St. Paul 1, Minnesota; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 65 cents per hour, whichever is higher. Certificate is effective August 1, 1952, and expires July 31, 1953.

Goodwill Industries of Denver, Inc., 1130 Thirty-first Street, Denver 5, Colorado; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 50 cents per hour in the Salvage and Building Maintenance Divisions, and 55 cents per hour in the Office Division; whichever is higher. Certificate is effective July 14, 1952, and expires January 31, 1953.

Goodwill Industries, Inc., 210 Chartres, New Orleans 16, Louisiana; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 50 cents per hour, whichever is higher. Certificate is effective July 28, 1952, and expires June 30, 1953.

Goodwill Industries of Central California, 707 Q Street, Sacramento, California; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 65 cents per hour for an evaluation period of 160 hours, and 75 cents thereafter, whichever is higher. Certificate is effective July 24, 1952, and expires July 23, 1953.

Lutheran Welfare Council of Northern California (The Good Shepherd Society), 1159 Valencia Street, San Francisco 10, California; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 50 cents per hour, whichever is higher. Certificate is effective July 21, 1952, and expires July 20, 1953.

Goodwill Industries of Kentucky, 214 South Eighth Street, Louisville, Kentucky; at a wage rate of not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards or not less than 50 cents per hour, whichever is higher. Certificate is effective August 1, 1952, and expires July 31, 1953.

The employment of handicapped clients in the above-mentioned sheltered workshops under these certificates is limited to the terms and conditions therein contained and is subject to the provi-

sions of Part 525 of the regulations, as amended. These certificates have been issued on the applicants' representation that they are sheltered workshops as defined in the regulations and that special services are provided their handicapped clients. A sheltered workshop is defined as, "A charitable organization or institution conducted not for profit, but for the purpose of carrying out a recognized program of rehabilitation for individuals whose earning capacity is impaired by age or physical or mental deficiency or injury, and to provide such individuals with remunerative employment or other occupational rehabilitating activity of an educational or therapeutic nature."

These certificates may be canceled in the manner provided by the regulations, as amended. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within 15 days after publication of this notice in the FEDERAL REGISTER.

Signed at Washington, D. C., this 8th day of August 1952.

JACOB I. BELLOW,
Assistant Chief of Field Operations.

FEDERAL POWER COMMISSION

[Docket No. G-1391]

NEW YORK STATE NATURAL GAS CORP. AND TEXAS EASTERN TRANSMISSION CORP.

NOTICE OF APPLICATION

AUGUST 18, 1952.

Take notice that on June 20, 1952, New York State Natural Gas Corporation (New York State Natural), a New York corporation, address, New York, New York, and Texas Eastern Transmission Corporation (Texas Eastern), a Delaware corporation, address, Shreveport, Louisiana, hereinafter sometimes referred to as "Applicants", filed a joint Supplement to application and Petition for Modification of the Commission's Order of November 1, 1952, issuing a certificate of public convenience and necessity to said Applicants.

Applicants request modification of the Commission's order to permit drilling, plugging, and reconditioning of gas wells, not heretofore authorized, in order to insure the safe and efficient operation of the Oakford Storage Pool in Westmoreland County, Pennsylvania.

Applicants state that they are in the process of completion of constructing the facilities outlined in their Plan of Development of said Oakford Storage Pool, and that experience in such development indicates that storage capacity of said pool is larger than had been anticipated, and that the possibility of gas migration between the two pools in the storage area requires the drilling of one less well than originally planned, the addition of 32 wells to be reworked, and the abandonment of 20 additional wells and reconditioning of 111 abandoned wells over and above the 76 originally planned.

Applicants estimate that upon the completion of the proposed additional well work the size of the storage area will have increased over original estimates, and the potential deliverability for said area will have increased from 25 to 35 percent over original estimates.

The estimated cost of the proposed project is $2,600,000.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10), on or before the 5th day of September 1952. The application is on file with the Commission for public inspection.

[SEAL] J. H. GUTRIDE,
Acting Secretary.

[F. R. Doc. 52-9246; Filed, Aug. 21, 1952; 8:47 a. m.]

[Docket No. G-1946]

HOPE NATURAL GAS CO.

ORDER FIXING DATE OF HEARING

AUGUST 19, 1952.

Notice is hereby given of a typographical error appearing in the Comission's order of July 31, 1952, in the above-entitled matter.

The date of the hearing is August 26, 1952, instead of August 22, 1952, as originally published (17 F. R. 7373).

[SEAL] J. H. GUTRIDE,
Acting Secretary.

[Docket No. G-1951]

UNITED GAS PIPE LINE CO.

ORDER DENYING REQUEST THAT APPLICATION BE HEARD UNDER SHORTENED PROCEDURE AND FIXING DATE OF HEARING

AUGUST 14, 1952.

On May 1, 1952, United Gas Pipe Line Company (Applicant), a Delaware corporation having its principal place of business at Shreveport, Louisiana, filed an application, as supplemented on June 30, 1952, for a certificate of public convenience and necessity authorizing the construction and operation of approximately 31.1 miles of 20-inch pipeline extending from a point in the Gulf of Mexico designated as Block 28, Ship Shoal area, northerly to the State of Louisiana and a point of connection with Applicant's 20-inch line presently being constructed to connect Kent and Turtle Bayou gas fields with its existing system. Notice of the filing of the application has been given, including publication in the FEDERAL REGISTER on May 21, 1952 (17 F. R. 4627).

Applicant has requested that its application be heard under the shortened procedure provided by § 1.32 (b) of the Commission's rules of practice and procedure (18 CFR 1.32 (b)).

The Commission finds: Good cause has not been shown for granting Applicant's request that its application herein be heard under the shortened procedure as provided by the Commission's rules of practice and procedure and said request should be denied as hereinafter ordered.

The Commission orders:

(A) The request by Applicant that its application herein be heard under the shortened procedure provided by § 1.32 (b) of the Commission's rules of practice and procedure be and the same is hereby denied.

(B) Pursuant to the authority contained in and by virtue of the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a public hearing be held commencing on September 8, 1952, at 10:00 a. m., e. d. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by said application, as supplemented.

(C) Interested State Commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Date of issuance: August 18, 1952.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 52-9243; Filed, Aug. 21, 1952; 8:46 a. m.]

[Docket No. G-2001]

PHILADELPHIA ELECTRIC CO.

ORDER GRANTING REQUEST FOR SHORTENED PROCEDURE AND FIXING DATE OF HEARING

AUGUST 14, 1952.

On July 14, 1952, Philadelphia Electric Company (Applicant), a Pennsylvania corporation having its principal place of business at Philadelphia, Pennsylvania, filed an application and an amendment thereto on August 11, 1952, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain natural-gas pipeline facilities, all as more fully described in its application on file with the Commission and open to public inspection.

Applicant in its application filed July 14, 1952, requested that certain of the facilities which were the subject matter therein be determined as not within "the scope of Commission jurisdiction under the Natural Gas Act" * * *. The amendment of August 11, 1952 above referred to abondoned such request.

Due notice of filing of such application has been given, including publication in the FEDERAL REGISTER on August 9, 1952 (17 F. R. 7317-7318).

The Commission finds: Applicant has requested this application be heard under the shortened procedure provided by § 1.32 (b) of the Commission's rules of practice and procedure for noncontested proceedings (18 CFR 1.32 (b)). This proceeding is a proper one for disposition under the aforesaid rule: *Provided*, That no request to be heard, protest or petition raising an issue of substance, is filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing be held on September 2, 1952, at 9:45 a. m., e. d. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by such application as amended: *Provided, however*, That the Commission may, after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Date of issuance: August 18, 1952.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. G-2003]

MOUNTAIN FUEL SUPPLY CO.

ORDER FIXING DATE OF HEARING

AUGUST 14, 1952.

On July 14, 1952, Mountain Fuel Supply Company (Applicant), a Utah corporation having its principal place of business at 36 South State Street, Salt Lake City, Utah, filed an application, as supplemented on July 18, 1952, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of a compressor station of 2,640 horsepower on Applicant's main transmission line in Wyoming, as more fully described in said application on file with the Commission and open to public inspection.

Applicant has requested that its application be heard under the shortened procedure provided by § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, and no request to be heard, protest, or petition has been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on July 30, 1952 (17 F. R. 6993).

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's Rules of Practice and Procedure, a hearing be held on September 11, 1952, at 9:30 a. m., e. d. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the matters involved and the issues presented by such applications, as supplemented: *Provided, however*, That the Commission may, after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Date of issuance: August 18, 1952.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 52-9245; Filed, Aug. 21, 1952; 8:47 a. m.]

[Docket No. G-2020]

LONE STAR GAS CO.

NOTICE OF APPLICATION

AUGUST 18, 1952.

Take notice that on August 1, 1952, Lone Star Gas Company (Applicant), a Texas corporation having its principal place of business at Dallas, Texas, filed an application pursuant to section 7 (b) of the Natural Gas Act, for authority to abandon and reclaim for use elsewhere on its system approximately 14.67 miles of 16-inch pipeline and 20.74 miles of 12-inch pipeline constituting segments of pipeline acquired by Applicant from Martin Wunderlich and Lee Aiken by virtue of authorization granted in Docket Nos. G-1878 and G-1889.

Applicant states that because of the decline in the available supply of gas from East Panhandle gas field in Wheeler County, Texas, it can no longer effectively use the segments of pipeline proposed to be abandoned to maintain service to the communities supplied by it in the Wichita Falls area. Applicant states that it will continue to provide unimpaired service to such communities through its existing system.

Estimated cost of removal is $129,272.15. Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the applicable rules and regulations of the Commission, on or before the 5th day of September 1952. The application is on file with the Commission and open to public inspection.

[SEAL] J. H. GUTRIDE,
Acting Secretary.

[F. R. Doc. 52-9247; Filed, Aug. 21, 1952; 8:47 a. m.]

[Docket No. G-2026]

WEST TEXAS GAS CO.

NOTICE OF APPLICATION

AUGUST 18, 1952.

Take notice that West Texas Gas Company (Applicant), a Delaware corporation, having its principal place of business at Tenth and Texas Avenue, Lubbock, Texas, filed on August 7, 1952, an application for authority pursuant to section 7 (b) of the Natural Gas Act to abandon by sale to El Paso Natural Gas Company certain transmission pipeline facilities, and to abandon service of natural gas to Southern Union Gas Company rendered by means of such facilities, such service to be assumed by El Paso Natural Gas Company.

The facilities Applicant proposes to sell to El Paso Natural Gas Company consist of (1) 361,233 feet of 8⅝" pipeline between Umbarger, Texas, and the Texas-New Mexico State Line and appurtenances thereto; (2) 22,055 feet of 8⅝" pipeline, 213,018 feet of 6⅝" pipeline, and 1,053 feet of 4½" pipeline between Amherst and Farwell, Texas and appurtenances thereto; and the Hereford (Texas) Compressor Station consisting of two 300 horsepower compressor units together with auxiliary equipment and one residence. The calculated delivery capacity of these facilities is approximately 22,700 Mcf per day.

Applicant states that the gas now being served from the facilities proposed to be sold is being furnished by El Paso Natural Gas Company and the sale of facilities will eliminate Applicant as a "middle man" in the operation.

The price to be paid for the facilities is their net book cost of approximately $293,400.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 5th day of September 1952. The application is on file with the Commission for public inspection.

[SEAL] J. H. GUTRIDE,
Acting Secretary.

SECURITIES AND EXCHANGE COMMISSION

[File No. 7-1458]

DOW CHEMICAL CO.

NOTICE OF APPLICATION FOR UNLISTED TRADING PRIVILEGES, AND OF OPPORTUNITY FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Washington, D. C., on the 18th day of August A. D. 1952.

In the matter of application by the Philadelphia-Baltimore Stock Exchange for unlisted trading privileges in Dow Chemical Company, Common Stock, $15 Par Value, File No. 7-1458.

The Philadelphia-Baltimore Stock Exchange, pursuant to section 12 (f) (2) of the Securities Exchange Act of 1934 and Rule X-12F-1 thereunder, has made application for unlisted trading privileges in the Common Stock, $15 Par Value, of Dow Chemical Company, a security listed and registered on the New York Stock Exchange, on the Midwest Stock Exchange, and on the San Francisco Stock Exchange.

Rule X-12F-1 provides that the applicant shall furnish a copy of the application to the issuer and to every exchange on which the security is listed or already admitted to unlisted trading privileges. The application is available for public inspection at the Commission's principal office in Washington, D. C.

Notice is hereby given that, upon request of any interested person received prior to September 9, 1952, the Commission will set this matter down for hearing. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application, and other information contained in the official file of the Commission pertaining to this matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 27317]

MIXED CARLOADS MERCHANDISE FROM AND TO THE SOUTH

APPLICATION FOR RELIEF

AUGUST 19, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: J. G. Kerr, Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1305.

Commodities involved: Merchandise, in mixed carloads.

Territory: (a) From Memphis and Millington, Tenn., to St. Louis, Mo., and East St. Louis, Ill., (b) from Memphis, Tenn., to Brooklyn, N. Y., (c) from Norfolk and Richmond, Va., to Jacksonville, Fla., and Albany, Ga., (d) from Cincinnati, Ohio, to Jacksonville, Fla., and (e) from Washington, D. C., to Albany, Ga.

Grounds for relief: Competition with rail and motor carriers.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1305, Supp. 5.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] W. P. BARTEL,
Secretary.

[4th Sec. Application 27318]

SULPHUR FROM MONTGOMERY, ALA., TO WACO (EAST WACO), TEX.

APPLICATION FOR RELIEF

AUGUST 19, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to his tariff I. C. C. No. 3912.

Commodities involved: Sulphur (brimstone), ground or refined, and dusting sulphur, carloads.

From: Montgomery, Ala.

To: Waco (East Waco), Tex.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3912, Supp. 134.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[Vesting Order 16987]

ANNA DE VISSER

In re: Debts owing to Anna de Visser. F-28-31081.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That Anna de Visser, who on or since December 11, 1941, and prior to January 1, 1947, was a resident of Germany, is and prior to January 1, 1947, was, a national of a designated enemy country (Germany);

2. That the property described as follows:

a. That certain debt or other obligation of Joseph Walker & Sons, 120 Broadway, New York 5, New York, arising out of accumulations and income on three (3) shares of preferred stock of the Illinois Central Railroad Company, 135 E. 11th Place, Chicago 5, Illinois, said certificates numbered B9763/5 of one share each and heretofore vested by Vesting Order 17126, dated January 17, 1951, together with any and all accruals to the aforesaid debt or other obligation and any and all rights to demand, enforce and collect the same, and

b. That certain debt or other obligation of Joseph Walker & Sons, 120 Broadway, New York 5, New York, arising out of accumulations and income on ten (10) shares of common stock of the Illinois Central Railroad Company, 135 East 11th Place, Chicago 5, Illinois, said certificate numbered T195827 and heretofore vested by Vesting Order 17126, dated January 17, 1951, together with any and all accruals to the aforesaid debt or other obligation and any and all rights to demand, enforce and collect the same,

is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by Anna de Visser, the aforesaid national of a designated enemy country (Germany);

and it is hereby determined:

3. That the national interest of the United States requires that the person referred to in subparagraph 1 hereof, be treated as a person who is and prior to January 1, 1947, was a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise

The terms "national" and "designated

dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on August 19, 1952.

For the Attorney General.

[SEAL] ROWLAND F. KIRKS,

TITLE 7—AGRICULTURE

Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

SUBPART—LEMON ADMINISTRATIVE COMMITTEE RULES AND REGULATIONS

Notice was published in the FEDERAL REGISTER issue (17 F. R. 6747) of July 23, 1952, that the Department was giving consideration to the proposed revision of the rules and regulations (7 CFR 953.110 et seq.; Subpart—Lemon Administrative Committee rules and regulations) currently in effect pursuant to the applicable provisions of the marketing agreement, as amended, and Order No. 53, as amended (7 CFR 953), regulating the handling of lemons grown in California and Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice which were submitted by the Lemon Administrative Committee (established pursuant to the said amended marketing agreement and order), it is hereby found and determined that the revision, as hereinafter set forth, of the said rules and regulations is in accordance with the provisions of the said amended marketing agreement and order and it is hereby approved:

§ 953.102 *Order.* "Order" means Order No. 53, as amended (7 CFR Part 953; 16 F. R. 5525), regulating the handling of lemons grown in the States of California and Arizona.

§ 953.103 *Central points.* "Central points" shall mean the handler's packing house and such other facilities for the assembly of lemons as may be approved by the Manager of the Lemon Administrative Committee.

§ 953.104 *Storage facilities.* "Storage facilities" shall mean those facilities available to a handler for the purpose of curing and storing lemons, as outlined and defined on blueprints prepared under the direction of the Lemon Administrative Committee for each handler on the Prorate base having such facilities.

COMMUNICATIONS

§ 953.110 *Communications.* Unless otherwise prescribed in this subpart, or in the marketing agreement and order, or required by the Lemon Administrative Committee, all reports, applications, requests, and communications in connection with the marketing agreement and order shall be submitted to:

Lemon Administrative Committee, 111 West Seventh Street, Los Angeles, Calif.

NOMINATION PROCEDURE

§ 953.115 *Time of nomination.* The time of nominating members and alternate members of the Lemon Administrative Committee shall be not later than 20 days preceding the date of expiration of the terms of the members and alternate members of the said committee.

§ 953.116 *Manner of nomination.* The manner of nominating members and alternate members of said committee shall be as follows:

(a) Sunkist Growers, Inc., a California nonprofit cooperative marketing association with its principal place of business at Los Angeles, California, so long as it continues to market more than 60 percent of the total volume of lemons marketed in fresh form, as provided in the marketing agreement and order, shall by resolution adopted by its board of directors, nominate not less than 6 growers for 3 members and 6 growers for 3 alternate members of the committee.

(b) A meeting shall be held, at such time and place as may be designated by the agent of the Secretary, at which all cooperative marketing organizations, other than Sunkist Growers, Inc. (which includes its affiliated district exchanges and local associations), shall nominate not less than 2 growers for a member and 2 growers for an alternate member of the committee. The vote of each such organization shall be weighted by the quantity of lemons which is marketed in fresh form during the fiscal year (as defined in the marketing agreement and order), the end of which is nearest the date on which the meeting is held. Any person who votes at any such meeting shall submit to the agent of the Secretary written evidence of his authority to vote for such an organization.

(c) Not less than 5 and not more than 10 meetings shall be held, at such times and places, throughout the lemon-producing areas in California and Arizona, as may be designated by the agent of the Secretary, at which growers who are not members of, or affiliated with, the organizations included in paragraphs (a) and (b) of this section may vote. At each such meeting, the growers present shall nominate 1 grower. The number of ballots to be cast in selecting the nominee for each meeting shall be determined at the respective meeting. All growers voting at any such meeting shall submit their names and addresses to the agent of the Secretary.

(d) The name and address of the grower who has been selected at each of the grower meetings to be held pursuant to paragraph (c) of this section shall be placed on a ballot which shall be mailed to all growers of record, and otherwise made available to growers, who are not members of, or affiliated with, a cooperative marketing organization which markets lemons, with instruction to vote for only 1 grower whose name appears on the ballot, and to sign the ballot and return it within such reasonable time as may be determined by the agent of the Secretary.

(e) The agent of the Secretary shall give adequate notice of any meeting to be held pursuant to this section and of the voting for nominees by growers who are not members of, or affiliated with, a cooperative marketing organization, as provided in paragraph (d) of this section.

PRORATE BASE AND ALLOTMENTS

§ 953.120 *Application.* Each handler shall submit an application for a prorate base and allotment to the Lemon Administrative Committee at the beginning of each season. Each such application shall contain the following information on LAC Form 101, "Application for a prorate base and allotments":

(a) Name and address of applicant handler.

(b) The net cubical content of each box or container used by the applicant for the assembling or storage of lemons.

(c) Total acreage of lemons, bearing and nonbearing, which the applicant owns or has authority to market under written contract and estimated production of lemons therefrom for the current season.

(d) Location of the applicant's packing and storage facilities for lemons.

(e) Signature of the applicant.

§ 953.121 *Advance credit count.* Advance credit count computed under § 953.53 (d) on lemons to be exported other than to Canada shall be issued subject to the following conditions:

(a) Except on shipments to Mexico, advance credit count on export shipments may be computed but shall not be credited to the handler until after each box of lemons is packed in a container which is marked for export.

(b) With respect to each export shipment of lemons to Mexico, the handler shall obtain from the purchaser, at time of delivery of such lemons, a certification on LAC Form 11, to the United States Department of Agriculture and the Lemon Administrative Committee that such lemons are to be exported to Mexico and will not re-enter the United States or be re-shipped to Canada.

Such certificate shall state the date of shipment, the quantity of lemons included in such shipment, the truck license number or other identification of the carrier of such lemons, and the signature and address of the purchaser. The certificate shall also be signed by the handler or his authorized representative and shall be submitted to the committee with the handler's next weekly report (§ 953.130 (c)).

(c) With respect to each sale of lemons to the Armed Forces for export, the handler shall complete LAC Form 12 "Certificate of Sale of Lemons for Export to the Armed Forces" showing the date of shipment, the quantity of lemons included in such shipment, their destination or port of departure, and the purchase order number. Such certificate shall be signed by the handler or his authorized representative and shall be submitted to the committee with the handler's next weekly report (§ 953.130 (c)).

(d) Except as provided in paragraphs (b) and (c) of this section, each handler shall submit to the committee, as soon as possible following each export shipment of lemons by such handler, a copy of the "on-board" bill of lading, or other shipping document acceptable to the committee, covering such shipment.

§ 953.122 *Computation of available lemons.* (a) Any handler requesting a computation of available lemons in accordance with § 953.53 (e) shall submit a written application to the Lemon Administrative Committee. This application shall be submitted not less than 5 days prior to the date as of which the computation of available lemons is to be made and shall include the following information on LAC Form 102:

(1) The lemon acreage and number of trees under control of the applicant during the current season, and for the two preceding seasons.

(2) An estimate of the current crop of lemons on the trees which are under control of the applicant.

(3) Description of facilities owned or controlled by the applicant for the assembling of lemons.

(4) Description of facilities suitable for the purpose of assembling lemons, which are available to the handler within the area of production.

(5) Record of the quantity of lemons picked, by weeks, during the current season and during the two preceding seasons.

(6) Record of the quantity of lemons disposed of, by weeks, in the following channels during the current season and during the two preceding seasons:

(i) Interstate commerce or Canada.

(ii) Intrastate commerce.

(iii) Exported.

(iv) Diverted to by-products uses.

(v) Disposed of otherwise.

(7) Description of marketing methods and policy followed by the applicant in the handling of lemons.

(8) Record of the quantity of lemons the applicant has in storage.

(9) Certification to the United States Department of Agriculture and the Lemon Administrative Committee that, except as set forth in the application, there are no facilities for the assembling and storage of lemons available to the handler.

(b) Each applicant shall submit to the Lemon Administrative Committee, upon request, such additional data and information as the committee may require in order to determine whether the applicant is entitled to a computation of available lemons under § 953.53 (e).

(c) The committee shall consider the evidence submitted by a handler pursuant to paragraphs (a) and (b) of this section to determine whether such evidence establishes unavailability of facilities.

(d) In the event such handler has no storage facilities, the unavailability of facilities is established.

(e) In the event such handler has storage facilities, the committee in making its determination shall consider such evidence to establish unavailability of facilities only if:

(1) The proportion of such handler's total tree crop which can be stored in his storage facilities is at least 33⅓ percent less than the proportion of the total tree crops of all handlers within his district that can be stored in the total storage facilities within such district;

(2) Such handler has diverted to by-products channels at least as large a percentage of his total volume marketed during the then current season to date as the average of such volume so diverted by all handlers within his district;

(3) Storage boxes of lemons are well filled;

(4) Storage boxes of lemons are stacked as high as is consistent with good industry practice (i. e., eleven boxes high or within one storage box of the ceiling);

(5) Aisles and all other temporary space are fully utilized; and

(6) The handler has certified to the United States Department of Agriculture and the Lemon Administrative Committee that, except as stated in his application, there are no facilities for the assembling and storage of lemons available to him.

(f) If the committee from the available information determines that the handler is entitled to a computation of his available lemons under § 953.53 (e), it shall compute for such handler the quantity of lemons available for current shipment during the applicable 2-week period which such handler would have picked and assembled if facilities were available to him; for handlers referred to in paragraph (e) of this section, the quantity of unharvested lemons included in said computation shall not exceed the total number of field boxes picked during the two weeks prior to the available lemon count date.

(g) In the event a handler previously has submitted an application for a computation of available lemons in accordance with paragraph (a) of this section, and desires to re-apply for such a computation, he may make such reapplication by submitting the following information with respect to the current season on LAC Form 103:

(1) The lemon acreage and number of trees controlled by the applicant.

(2) Estimated crop of lemons so controlled.

(3) Lemon picks, by weeks, since the last week shown on previous application.

(4) Disposition of lemons, by weeks, since the last week shown on previous application.

(5) Quantity of lemons which the applicant has assembled.

(6) Certification to the United States Department of Agriculture and the Lemon Administrative Committee that, except as set forth in the previous application, there are no facilities for the assembling and storage of lemons available to him.

§ 953.123 *Allotment loans.* Allotment loans shall be deemed repaid if such loans fall due in a week during which there is no limitation on shipments of lemons.

§ 953.124 *Overshipment tolerances.* The overshipment tolerance provided in § 953.57 is not available to a handler during any week or weeks in which such handler is required to reduce the quantity of lemons which he may handle by reason of prior shipments of lemons in excess of his allotments therefor: *Provided*, That repayments of borrowed allotments shall not preclude a handler from claiming and using overshipment tolerances in cases where otherwise appropriate.

§ 953.125 *Agreement with by-products manufacturers.* By-products manufacturers may apply to the Lemon Administrative Committee on LAC Form 104, to be placed upon the committee's list of approved by-products manufacturers. Such application shall include:

(a) Name and address of applicant.

(b) An agreement that all lemons purchased by the applicant, on which the committee has issued advance credit count, will be used solely for manufacturing purposes.

(c) A statement indicating that it is understood that failure of the applicant to comply with the agreement prescribed in paragraph (b) of this section will cause removal of the manufacturer's name from the list of approved by-products manufacturers.

(d) Signature of the applicant.

REPORTS

§ 953.130 *Reports.* Handlers shall submit to the Lemon Administrative Committee the reports prescribed in this section. Unless otherwise prescribed on the report form, all lemons shall be reported in terms of packed "boxes" as defined in § 953.9. Where shipment is made in any manner other than in packed boxes, the lemons shall be converted to packed boxes on the basis of 79 pounds per packed box: *Provided*, That the following conversion factors may be used:

One box of fresh loose lemons (market pack) equals 81 percent of one packed box.
One box of by-products lemons equals 63.3 percent of one packed box.

Copies of report forms may be obtained from the committee.

(a) *Lemon diversion report (LAC Form 5).* Name and address of approved by-products plant or charitable organizations, or other diversion of lemons from fresh fruit channels; number of loose gross boxes and the advance credit count number of juice grade or non-juice grade lemons; net weights of juice grade and non-juice grade lemons, respectively, and total net weight of such lemons; and certification of handler and of receiver of such lemons. This report shall be submitted within 5 days following such diversion of lemons.

(b) *Certificate of assignment of allotment (LAC Form 6).* Certificates of assignment of allotment as provided for in § 953.63 shall be issued by the first handler at the time of each sale or transfer of any lemons which move by truck and which require prorate allotment. Each such certificate shall cover the total quantity of lemons so shipped and shall contain the following information: Date lemons are shipped; handler's invoice number when and if available; name of consignee (purchaser or receiver); destination (address of consignee); truck driver's name; truck driver's address; number of packed boxes of lemons covered by the assignment. Each such certificate shall be signed by the handler or his authorized agent and shall show the address of the handler issuing it. This report shall be submitted daily.

(c) *Weekly report (LAC Form 8).* The weekly report required by § 953.70 shall be submitted to the Lemon Administrative Committee on or before 12:01 p. m., P. s. t., Monday of each week, and shall contain the following information with respect to shipments of lemons during the preceding week:

(1) The total movement of fresh lemons subject to prorate in interstate commerce and intrastate commerce; quantities exported other than to Canada; quantities sold or disposed of to canners or by-products manufacturers; quantities shipped for distribution to persons on relief or donated for charitable institutions; and

(2) Detailed information concerning each shipment of lemons showing the number of packed boxes; whether shipped in interstate commerce or intrastate commerce or exported to destinations other than to Canada; and identification of the carrier (railroad car number or, if shipment is made by truck, the date and number of the certificate of assignment of allotment or, if exported to destinations other than Canada, the name of the steamship if known). This report shall be signed by the handler submitting it or his authorized agent.

Done at Washington, D. C., this 20th day of August 1952, to become effective 30 days after publication in the FEDERAL REGISTER.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

[F. R. Doc. 52-9290; Filed, Aug. 22, 1952; 8:47 a. m.]

[Lemon Reg. 449]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

§ 953.556 *Lemon Regulation 449*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 14 F. R. 3612), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on August 20, 1952; such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., August 24, 1952, and ending at 12:01 a. m., P. s. t., August 31, 1952, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 250 carloads;

(iii) District 3: Unlimited movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is set forth below and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "carloads," "prorate base," "District 1," "District 2" and "District 3," shall have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 21st day of August 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

TITLE 15—COMMERCE AND FOREIGN TRADE

Chapter III—Bureau of Foreign and Domestic Commerce, Department of Commerce

Subchapter C—Office of International Trade

[6th Gen. Rev. of Export Regs., Amdt. 10 [1]]

PART 370—SCOPE OF EXPORT CONTROL BY DEPARTMENT OF COMMERCE

PART 371—GENERAL LICENSES

PART 372—PROVISIONS FOR INDIVIDUAL AND OTHER VALIDATED LICENSES

PART 373—LICENSING POLICIES AND RELATED SPECIAL PROVISIONS

PART 374—PROJECT LICENSES

MISCELLANEOUS AMENDMENTS

1. Section 370.10 *Shipments entering foreign trade zones* is amended by adding thereto a new paragraph (c) to read as follows:

(c) *Shipments originating in Canada.* Shipments of commodities originating in Canada and moving through the United States may be exported from a foreign trade zone without a license from the Department of Commerce provided such exportation meets the conditions set forth in § 371.9 (b) (1) of this subchapter, General In-Transit License GIT; or when exported to an ultimate destination to which the same commodity could be exported under General License GO.

2. Section 371.9 *General in-transit license GIT* is amended in the following particulars:

a. A note is added at the end of paragraph (a) *General provisions* to read as follows:

NOTE: 1. Commodities are not considered as "moving in transit" within the meaning of General License GIT if they are covered by a warehouse entry and withdrawn from warehouse under a withdrawal-for-exportation customs entry or if their transit is broken by a warehousing or processing operation under another type of customs entry.

2. General License GIT cannot be used to export commodities originating in any foreign country (except Canada) and moving in transit through the United States to Subgroup A destinations, Hong Kong, and Macao, as provided in Part 384 of this subchapter. The use of General License GIT for shipments of commodities moving in transit from Canada and Japan are subject to the additional conditions and limitations set forth in paragraph (b) of this section.

3. Regardless of origin of the in-transit shipment—whether Canada, Japan, or any other foreign country—General License GIT cannot be used to export any commodity if it is on the Excepted Commodity List as provided in paragraph (c) of this section.

4. As used in paragraph (b) of this section, commodities or shipments of commodities which originate in any foreign country means commodities exported from that country whether or not grown, produced, or manufactured there.

5. This General License GIT is not applicable to exportations of commodities licensed by agencies of the United States Government other than the Department of Commerce.

6. See § 370.9 of this subchapter, and note following that section, regarding shipments moving in transit via the United States without unloading from the carrier.

b. Subparagraph (1) *Shipments originating in Canada,* of paragraph (b) *Special provisions,* is amended to read as follows:

(1) *Shipments originating in Canada.* (i) The provisions of General License GIT are applicable, as modified herein, to all shipments (except as provided in paragraph (c) of this section) originating in Canada and moving in transit through the United States to any foreign ultimate destination, including Hong Kong, Macao and Subgroup A countries. The United States collector of customs at the United States port of entry shall require, and the shipper shall submit to him, a copy of Canadian Customs Entry, Form B13, certified or stamped by the Canadian customs authorities, for each such shipment. Positive List commodities may be exported from the United States under this general license only to the ultimate destination named in the certified or stamped Canadian Customs Entry, Form B13. Where the ultimate destination of such shipment is not the same as that shown on the Canadian Customs Entry, Form B13, a validated United States export license is required. However, non-Positive List commodities may be exported under any general license applicable to the exportation of the same commodities of domestic origin whether or not there is a change of ultimate destination while the shipment is in transit. Non-Postive List commodities authorized by the Canadian Customs Entry, Form B-13, for export to Hong Kong, Macao, or a Subgroup A country may proceed in transit through the United States under General License GIT according to that authorization. Other shipments of non-Positive List commodities to Hong Kong, Macao, or a Subgroup A country require a validated United States export license.

(ii) The U. S. collector of customs at the United States port of entry shall notify the U. S. collector of customs at the U. S. port of exit by appropriate notation on the U. S. customs entry (Transportation Entry and Manifest, Customs Form 7512), if the information on the certified or stamped Canadian Customs Entry, Form B13, is in full accord with the information set forth in the U. S. customs entry form. The Canadian Form B13 and the United States customs entry form must agree with respect to country of ultimate destination, description of the shipment, and in all other pertinent details. Where the shipment does not comply with United States regulations the U. S. collector of customs will notify the Canadian exporter or his agent in the United States of that fact.

(iii) Any parties to the exportation shall submit any further proof which the collector of customs at the United States port of entry or at the port of exit may require to enable him to determine that the shipment is properly exportable under General License GIT, including the fact that the destination of the shipment is properly authorized by the Canadian authorities. Exportations shall not be cleared for shipment by the collector of customs at the United States port of exit under General License GIT unless all provisions of this general license have been complied with.

c. The note at the end of paragraph (b) *Special provisions* is amended to read as follows:

NOTE: Shipments of Positive List commodities which originate in Japan require a validated license for export from the United States unless exportable under the provisions of this General License GIT or of General License GO. (See § 373.14 of this subchapter). For exportations of such commodities from foreign trade zones, see § 370.10 of this subchapter.

3. Part 371—General Licenses is amended by adding thereto a new § 371.23 to read as follows:

§ 371.28 *General license GHS, goods exported as trade samples*—(a) *Scope.* A general license, GHS, is hereby established authorizing the exportation of trade samples of non-Positive List commodities to Hong Kong: *Provided,* That such exportations are made in accordance with the following provisions of this section:

(1) *Commodity limitations.* Commodities which may be included under this general license are restricted to those normally sent as samples, such as swatches of fabric, canned food, raw cotton and tobacco, to ultimate consignees known by the exporter to be bona fide prospective buyers. Exportation of commodities under this general license, however, is not to be interpreted as a commitment on the part of the Office of International Trade to permit shipments of similar commodities on a validated license at any subsequent date.

(2) *Dollar-value limitations.* The value of all commodities included in a shipment of trade samples shall not exceed twenty-five dollars ($25).

(3) *Other limitations.* This general license may be used only once by the same exporter with respect to shipment of the same kind of sample to the same consignee.

[1] This amendment was published in Current Export Bulletin No. 676, dated August 14, 1952.

(b) *General license designation.* Shipments under this general license must have the notation "Sample—Export License Not Required" written on the addressee side of the package, and the word "Sample" written on the required shipper's export declaration.

4. Section 372.3 *How to file an application for export license,* paragraph (c) *Information required* is amended in the following particulars:

Item 11 of Note 2 *Preparation of Form IT-419 (Revised August 1949 and August 1950)* and Item 11 of Note 3 *Preparation of Form IT-419 (Revised September 10, 1951)* following paragraph (c) are both amended to read as follows:

Item 11. Availability of material to be exported. All applicable parts of item must be answered, showing the exact status of the applicant's procurement of the commodities to be exported. In the case of a producer, the approximate delivery date is the date on which the commodities will be available for export. If more than one delivery date is required for the commodities covered by the application, each date should be given, using a supplementary sheet, if necessary.

Applications for licenses to export certain commodities will be considered only when answers to item 11 indicate that the commodities will be available to the applicant within the normal validity period of licenses for such commodities, as set forth in § 372.11 (e), and other provisions shown in § 373.16 of this subchapter.

5. Section 373.1 *Export licensing general policy* is amended in the following particulars:

Subparagraph (2) of paragraph (h) *Commodities subject to this export licensing policy,* is amended by deleting therefrom the following Positive List commodities:

Commodity:	Schedule B No.
Cattle hides, dry	020102
Calf skins, dry	020602
Kip skins, dry	020702

6. Section 373.7 *Special provisions for machinery and parts* is amended in the following particulars:

Subparagraph (3) *Additional application requirements,* of paragraph (d) *Automotive replacement parts,* is amended to read as follows:

(3) *Additional application requirements.* (i) In addition to the provisions of paragraph (a) of this section and other applicable requirements, applications for licenses to export automotive replacement parts listed in subparagraph (1) of this paragraph to the destinations set forth in subparagraph (2) of this paragraph must be accompanied by a statement containing the following information:

(*a*) The total dollar value of all the commodities (in the aggregate) listed in subparagraph (1) of this paragraph exported by the applicant to the named ultimate consignee (or purchaser, if different) during the years 1950 and 1951; if none, so state.

(*b*) Whether a letter of credit has been established for the proposed shipment; if so, give the number, dollar value, expiration date, and name and address of person by whom established. If no letter of credit has been established, state what method of financing will be used for the proposed shipment.

(ii) Whenever an order or inquiry relating to an order for commodities listed in subparagraph (1) of this paragraph for export to a destination listed in subparagraph (2) of this paragraph is received from a consignee with whom the exporter has not done business and who has not been approved as an ultimate consignee on export licenses, the exporter, prior to filing a license application, shall request the ultimate consignee to communicate with the nearest United States embassy or consulate in his area and provide information for a World Trade Directory report, if he has not done so within the last 12 months.

(*a*) When an application is submitted involving such a consignee described in this subdivision, the exporter shall attach thereto a letter stating whether he has requested the ultimate consignee to provide the information specified in this subdivision.

(*b*) The filing of World Trade Directory report information with a United States embassy or consulate is essential in order to facilitate final action on the application for a validated license. Licenses will not be issued in such cases until the related reports are received from the embassies or consulates, or unless such reports are on file in the Department of Commerce. Applications will be returned without action in any instance where the World Trade Directory report is not received by the Department of Commerce within 90 days from the date of filing the application.

7. Section 373.16. *Special provisions for certain commodities: evidence of availability* is amended to read as follows:

§ 373.16 *Special provisions for certain commodities: Evidence of availability*—(a) *General provisions.* Applications for licenses to export the commodities identified on the Positive List of Commodities (§ 399.1 of this subchapter) by the letter "D" in the column headed "Commodity Lists" will be considered for approval only when such applications contain, or are accompanied by, evidence that the commodities will be available to the applicant for export within the normal validity period applicable to licenses covering such commodities, as set forth in § 372.11 (e) of this subchapter. The nature of the evidence required of applicants who are producers and applicants who are not producers of the commodities subject to the provisions of this section is set forth in paragraphs (b) and (c) of this section.

NOTE: As set forth in § 372.11 (e) of this subchapter, the normal validity period for export licenses is 6 months unless otherwise stated on the license. A longer period may be granted for licenses covering commodities requiring long-term production periods (e. g., certain heavy machinery and fabricated steel items) if a validity period exceeding 6 months is requested and justified at the time the application is filed. (See § 373.7 with respect to applications covering heavy machinery.)

(b) *Nature of evidence of availability required from producers.* An applicant who indicates in item 11 of Form IT-419 that he is a producer of the commodities for which an export license is requested should also enter in item 11 (as the approximate delivery date) the date on which the commodities will be available for export. The evidence of availability requirements of this section will be met if the date shown is within the validity period of licenses covering such commodities, as set forth in § 372.11 (e) of this subchapter. If more than one delivery date is required, each date must be within the validity period. (See Notes 2 and 3 following § 372.3 (c) of this subchapter with respect to item 11 of Form IT-419.)

(c) *Nature of evidence of availability required from non-producers*—(1) *Commodities with processing code other than STEE.* An applicant for exportation of those commodities subject to these provisions whose processing code (as shown in § 399.1 of this subchapter) is other than STEE, who indicates in item 11 of Form IT-419 that he is not a producer of the commodities for which an export license is requested, may meet the evidence of availability requirements of this section by supplying additional evidence of availability in one of the following documentary forms:

(i) *Evidence of ownership.* Evidence of ownership may consist of a bill of sale or invoice, or other documentary proof that the commodities covered by the application, in the amounts stated, are in fact in the applicant's possession or are available to him.

(ii) *Letter of commitment.* A letter of commitment from a producer of the commodity which must be dated, and must show (*a*) the quantity accepted or committed, and (*b*) the approximate delivery dates. All delivery dates must be within the validity period of licenses covering the particular commodities. Letters of commitment which are more than 90 days old when the application is received by the Department of Commerce (or, where applicable, letters for commodities subject to time-table licensing which will be more than 90 days old on the last day for filing applications for the calendar quarter) will not be accepted.

NOTE: Where a document described in subdivision (i) or (ii) of this subparagraph is used in support of more than one application, a true copy (as set forth in § 372.9 of this subchapter), must be attached to each application to which the document applies. Each application shall contain a reference to the case number (or applicant's reference number, if the case number is unknown) and date of all other applications submitted at any time against the same document.

(2) *Commodities with processing code STEE (other than Controlled Materials).* An applicant for exportation of those commodities subject to these provisions whose processing code, as shown in § 399.1 of this subchapter, is STEE, who indicates in item 11 of Form IT-419 that he is not a producer of the commodities for which an export license is requested, may meet the evidence of availability requirements of this section by showing certain information, pertaining to a supplier acceptable to the Office of International Trade, in item 11 of Form IT-419:

(i) That the commodities covered by the application have been purchased from the named supplier; or that an order for such commodities has been

placed with and accepted by the named supplier; and

(ii) That the approximate delivery date for such commodities is within the validity period of licenses covering these commodities, as set forth in § 372.11 (e) of this subchapter. In order to be acceptable to the Office of International Trade, the applicant's supplier must be a producer, or, if the applicant's supplier is other than a producer, he must meet the requirements indicated in subdivisions (*a*), (*b*), and (*c*) of this subparagraph with respect to the commodities listed in the application for export license:

(*a*) He must be a warehouseman, jobber, dealer, or retailer engaged in the business of stocking the commodities at one or more locations regularly maintained by him for such purpose, for sale or resale, in the form or shape as received, or after performing minor nonmanufacturing operations thereon, and who, in connection with any purchase of the product or products for resale, takes physical delivery of them into his own stock at a location regularly maintained by him for such purpose.

(*b*) He must maintain a minimum inventory at least equal to the quantity covered by the application.

(*c*) He must make monthly sales at least equal to the quantity covered by the application.

NOTE: Applicants whose non-producer suppliers have not heretofore been accepted by the Office of International Trade shall accompany their applications for export license with a letter from their supplier stating their qualifications in the above respects.

8. Section 373.51 *Supplement 1: Time schedules for submission of applications for licenses to export certain Positive List commodities* is amended by adding thereto the following entry and related submission date for the Fourth Quarter, 1952:

Dept. of Commerce Schedule B No.	Commodity	Submission dates (fourth quarter 1952)
618857	Copper-base alloy (including brass and bronze) plumbing fixtures and fittings (~~including pipe valves with working pressure not exceeding 125 P.S.I. W. O. G.~~ ratings), and specially fabricated parts, n. e. c. (specify by name).	Sept. 8–Sept. 22, 1952.

9. Section 374.3 *SP (Special) Project licenses*, is amended in the following particulars:

a. Subdivision (ii) of subparagraph (2) *Firm requirements by calendar quarters*, of paragraph (d) *Commodity requirements for other than petroleum projects or programs, Form IT–375*, is amended to read as follows:

(ii) The estimated date on which the commodities listed on each Form IT–375 will become available to the applicant. Where required, the applicant must attach a signed statement to the Form IT–375 setting forth the evidence of availability information, provided by § 373.16 of this subchapter.

b. The second unnumbered paragraph of subdivision (iii) *Firm requirements by calendar quarters* of subparagraph (2) *All other foreign petroleum projects and programs*, of paragraph (e) *Commodity requirements for petroleum projects and programs*, is amended to read as follows:

In addition to furnishing all the other information requested, Form IT–824 must include the estimated date on which the commodities listed on each Form IT–824 will become available to the applicant. Further, for commodities identified on the Positive List of Commodities (§ 399.1 of this subchapter) with a "D" in the column headed "Commodity Lists," the applicant must attach a signed statement to the Form IT–824 setting forth the applicable required evidence of availability information provided by § 373.16 of this subchapter.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245; 3 CFR 1945 Supp.; E. O. 9919, Jan. 3, 1948, 13 F. R. 59; 3 CFR 1948 Supp.)

This amendment shall become effective as of August 14, 1952, with the exception of Part 6 which shall become effective as of October 13, 1952.

LORING K. MACY,
Director,
Office of International Trade.

[F. R. Doc. 52–9331; Filed, Aug. 22, 1952; 8:58 a. m.]

[6th Gen. Rev. of Export Regs, Amdt. P. L. 6 [1]]

PART 399—POSITIVE LIST OF COMMODITIES AND RELATED MATTERS

MISCELLANEOUS AMENDMENTS

Section 399.1 *Appendix A—Positive List of Commodities* is amended in the following particulars:

1. Under center heading *General Notes to Appendix A*, paragraph (g) *Definitions* is amended in the following particular:

The fourth unnumbered paragraph of the note following paragraph (g) is amended to read as follows:

The column headed "Commodity Lists" is used to identify, by code letters, commodities for which license applications are subject to special requirements. The letter "A" in this column, for example, indicates that applications covering commodities in the entry so identified must conform with the requirements of § 373.34 of this subchapter regarding import certificate and delivery verification. The letter "B" in the column indicates that the commodities so identified are restricted for shipment under a Dollar-Limit (DL) license without prior approval (see § 374.2 (e) of this subchapter). The letter "C" indicates that the commodities so identified are controlled materials (see § 398.5 of this subchapter). The letter "D" indicates that the commodities so identified are subject to the evidence of availability requirements set forth in § 373.16 of this subchapter.

2. The following commodities are deleted from the Positive List:

Dept. of Commerce Schedule B No.	Commodity
020102	Cattle hides, dry.
020502	Calf skins, dry.
020702	Kip skins, dry.
460200	Wood pulp (air-dry weight): Sulfite wood pulp, bleached and semibleached, n.e.c. (report special alpha and dissolving grades in 460110).
460400	Sulfite wood pulp, unbleached.
460800	Sulfate wood pulp, unbleached.
461000	Sulfate wood pulp, bleached and semibleached, n.e.c. (formerly 461000 and 461100), (report special alpha and dissolving grades in 460110).
461900	Wood pulp and screenings, n.e.c. (specify by name) (formerly 460600, 461800 and 461900).
484550	Copper-armored sisalkraft (formerly 643998).
619920	Tools (all metals) n. e. c.: Diestocks, brass and bronze; and bushings, brass and bronze, specially fabricated for hand-operated tools (formerly 647901). (Report brass or bronze bushings not specially fabricated for particular machines or equipment under Schedule B No. 619950.)

3. The following revisions are made in commodity descriptions to reflect the current CMP controls applicable to stainless steel:

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required
601708	Alloy steel including stainless: Billets, blooms, slabs, and sheet bars, nickel-bearing stainless steel.[1 2]	S. ton	STEE	100	RO
601708	Billets, blooms, slabs, and sheet bars, non-nickel-bearing stainless steel.[1 2]	S. ton	STEE	100	RO
602050	Steel bars, including bar size shapes: Bars, cold finished (all cold drawn or cold rolled flats, rounds, or special sections in coils or cut lengths): Nickel-bearing stainless steel.[3 3]	Lb.	STEE 10	100	RO
602050	Non-nickel-bearing stainless steel.[3 3]	Lb.	STEE 10	100	RO
602500	Bars, hot-rolled, except tool and hollow drill steel bars (all regular bars and special sections and bar shapes under 3 inches) (report tool steel bars in 602650 and hollow drill steel bars in 602670): Nickel-bearing stainless steel.[3 4]	Lb.	STEE	100	RO
602500	Non-nickel-bearing stainless steel.[3 4]	Lb.	STEE	100	RO

See footnotes at end of table.

[1] This amendment was published in Current Export Bulletin No. 676, dated August 14, 1952.

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required
603135	Steel plates, including boiler plate (hot or cold-rolled), not fabricated: Nickel-bearing stainless steel (include stainless-clad plates).[2 3]	Lb.	STEE 9	100	RO
603135	Non-nickel-bearing stainless steel (include stainless-clad plates).[2 3]	Lb.	STEE 9	100	RO
603540	Steel sheets, black, ungalvanized (including painted): Stainless steel: Hot-rolled, nickel-bearing.[2 6]	Lb.	STEE 3	100	RO
603540	Hot-rolled, non-nickel-bearing.[2 6]	Lb.	STEE 3	100	RO
603540	Cold-rolled, nickel-bearing.[2 7]	Lb.	STEE 3	100	RO
603540	Cold-rolled, non-nickle-bearing.[2 7]	Lb.	STEE 3	100	RO
603750	Steel strip, coated or uncoated, except electrical (report electrical in 603505): Cold-rolled nickel-bearing stainless steel.[2 8]	Lb.	STEE	100	RO
603750	Cold-rolled non-nickel-bearing stainless steel.[2 8]	Lb.	STEE	100	RO
603850	Hot-rolled nickel-bearing stainless steel.[2 9]	Lb.	STEE	100	RO
603850	Hot-rolled non-nickel-bearing stainless steel.[2 9]	Lb.	STEE	100	RO
607500	Pipe and tubing, nickel-bearing stainless steel.[2 10]	Lb.	STEE 17	100	RO
607500	Pipe and tubing, non-nickel-bearing stainless steel.[2 10]	Lb.	STEE 17	100	RO
608150	Steel wire, n. e. c. (all round, shaped, and flat wire regardless of use) (report electrical insulated wire and cable in 709810–709885): Uncoated wire, nickel-bearing stainless steel.[2 11]	Lb.	STEE	100	RO
608150	Uncoated wire, non-nickel-bearing stainless steel.[2 11]	Lb.	STEE	100	RO
608210	Coated wire, except galvanized (all steel grades): Nickel-bearing stainless steel.[2 12]	Lb.	STEE	100	RO
608210	Non-nickel-bearing stainless steel.[2 12]	Lb.	STEE	100	RO
610492	Castings, iron and steel, rough and semi-finished: Other castings, nickel-bearing stainless steel.[2 13]	Lb.	STEE	100	RO
610492	Other castings, non-nickel-bearing stainless steel.[2 13]	Lb.	STEE	100	RO
619910	Metal manufactures, n. e. c., not specially fabricated for particular machines or equipment: Iron and steel (specify by name): Packing, nickel-bearing stainless steel.[2 14]	----------	STEE	100	RO
619910	Packing, non-nickel-bearing stainless steel.[2 14]	----------	STEE	100	RO

[1] The above two revised entries are substituted for the second entry presently on the Positive List under Schedule B No. 601708.

[2] The commodities included in the first revised entry only are controlled materials (see § 398.4 of this subchapter). The commodities included in both entries are subject to IC/DV procedure (see § 374.31 of this subchapter) and dollar-limit (DL) restrictions (see § 374.2 (e) of this subchapter).

[3] The above two revised entries are substituted for the entry presently on the Positive List under Schedule B No. 602050.

[4] The above two revised entries are substituted for the entry presently on the Positive List under Schedule B No. 602500.

[5] The above two revised entries are substituted for the entry presently on the Positive List under Schedule B No. 603135.

[6] The above two revised entries are substituted for the entry presently on the Positive List under Schedule B No. 603540.

[7] The above two revised entries are substituted for the entry presently on the Positive List under Schedule B No. 603590.

[8] The above two revised entries are substituted for the entry presently on the Positive List under Schedule B No. 603750.

[9] The above two revised entries are substituted for the entry presently on the Positive List under Schedule B No. 603850.

[10] The above two revised entries are substituted for the entry presently on the Positive List under Schedule B No. 607500.

[11] The above two revised entries are substituted for the entry presently on the Positive List under Schedule B No. 608150.

[12] The above two revised entries are substituted for the third entry presently on the Positive List under Schedule B No. 608210.

[13] The above two revised entries are substituted for the second entry presently on the Positive List under Schedule B No. 610492.

[14] The above two revised entries are substituted for the fourth entry presently on the Positive List under Schedule B No. 619910.

[15] The commodities included in the first revised entry only are controlled materials (see § 398.4 of this subchapter). The commodities included in both entries are subject to dollar-limit (DL) restrictions (see § 374.2 (e) of this subchapter).

4. The following revisions are made in commodity descriptions to identify by separate listings the commodities subject to evidence of availability requirements (see § 373.16 of this subchapter).

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar value limits	Validated license required
601110	Tin mill products: Hot dipped (production plate)	Lb.	TNPL	1,000	RO
601110	Other hot dipped	Lb.	TNPL	1,000	RO
601150	Electrolytic coated (production plate)	Lb.	TNPL	1,000	RO
601150	Other electrolytic coated	Lb.	TNPL	1,000	RO
601170	Lithographic misprints	Lb.	TNPL	1,000	RO
601170	Other tinplate, decorated, embossed, lithographed, lacquered, or otherwise advanced.	Lb.	TNPL	1,000	RO
664561 ★	Tantalum metals and alloys in crude form and scrap	Lb.	MINL	None	RO
664561 ★	Tantalum ores and concentrates	Lb.	MINL	None	RO
722027	Rear dump trucks, off-the-road, rubber-tired, 10 cubic yards struck load capacity and over (report tractors separately under appropriate Schedule B number).	No.	CONS	100	RO
722027	Other off-the-road haulage vehicles (report tractors separately under appropriate Schedule B number).	No.	CONS	100	RO
722030	Attachments, n. e. c., for track-laying or wheel type tractors, or trucks (specify by name): Angle dozers, bulldozers and tree dozers for tracklaying tractors of 50 drawbar horsepower and over.[1]	No.	CONS 1	None	R
722030	Other angle dozers, bulldozers and treedozers; brush cutters; brushrakes; ripper attachments; rooter attachments; snowplow attachments; and trail builders.[1]	No.	CONS 1	None	R
722030	Hydraulic and cable controls for tracklaying tractors of 50 drawbar horsepower and over.[1]	No.	CONS 1	None	R
722030	Other hydraulic and cable controls for track-laying tractors; clamshell attachments; conveying attachments; excavating attachments; loading attachments; pipe layers; trenching attachments; and winches for tracklaying tractors.[1]	No.	CONS 1	None	R
740607	Power-driven metalworking machine tools (non-portable), and parts: Pipe and/or nipple-threading machines capable of threading 4 in. diameter pipe and under.[2]	No.	TOOL	None	RO
740607	Other pipe and/or nipple-threading machines [2]	No.	TOOL	None	RO
744410	Metalworking presses, except hand-powered presses	----------	TOOL	None	RO
744410	Specially fabricated parts, n.e.c., for metal-working presses except hand-powered presses.	----------	TOOL	None	RO
744450	Sheet and plate metalworking machines (except presses).	----------	TOOL	100	RO
744450	Specially fabricated parts, n.e.c., for sheet and plate metal-working machines (except presses).	----------	TOOL	100	RO

★ The commodities described in this Positive List entry are excepted from the provisions of General In-Transit License GIT. See § 371.9 (c) of this subchapter.

[1] The two entries above are substituted for the first entry presently on the Positive List under Schedule B No. 722030.

[2] These two entries are substituted for the second entry presently appearing on the Positive List under Schedule B No. 722030.

[3] These two entries are substituted for the first entry presently on the Positive List under Schedule B No. 740607.

5. The title of the column entitled "Commodity Lists A=Import Certif. B=DL Restrictions. C=Controlled Matl." is amended to read as follows:

COMMODITY LISTS

[For explanation of symbols in this column see "General Notes to Appendix A," Part 399]

In this column a letter "D" is added opposite the commodity entries listed below for the purpose of indicating that the commodities so identified are those for which evidence of availability is required (see § 373.16 of this subchapter). Where only certain entries on the Positive List under a single Schedule B number are thus identified, these entries are specifically listed below; when all entries on the Positive List under a single Schedule B number are thus identified, the entries are not specifically listed be-

This amendment shall become effective anticipate any comfort therefrom, in to prevent said initial decision becoming

low, but only the Schedule B number related thereto.

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 5881]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

KNOX CO.

Subpart—*Advertising falsely or misleadingly:* § 3.90 *History of product or offering;* § 3.170 *Qualities or properties of product or service.* In connection with the offering for sale, sale or distribution in commerce of the drug preparations designated as "Chinaroid" and "Romind", or any preparations of substantially similar composition or possessing substantially similar properties, whether sold under the same names or under any other names, disseminating, etc., by means of the United States mails, or by radio broadcasts, or by any means in commerce, or by any means to induce, etc., directly or indirectly, the purchase in commerce, of said preparations, any advertisements which represent, directly or by implication, (a) that "Chinaroid" constitutes a competent or adequate treatment for piles or hemorrhoids or would be of any benefit to the underlying causes thereof; (b) that said preparation could exert any influence upon the severity or duration of piles or hemorrhoids, beyond that of an astringent and local anesthetic in affording temporary relief to such symptoms as pain, itching, burning and irritation which accompany simple, uncomplicated cases of piles or hemorrhoids; (c) that said preparation, however used, will result in any shrinkage of sore, swollen tissues, or will assist nature in healing irritated membranes, or will have any effect upon nervousness, irrespective of the cause; (d) that "Romind" constitutes an adequate or competent treatment for arthritis, rheumatism, swollen joints, neuritis, neuralgia, sciatica or lumbago, or will permanently relieve pain accompanying said conditions and ailments; (e) that "Romind" is a pain killer, or possesses any therapeutic value in treating the nerve-racking, stabbing, throbbing pains of arthritis, rheumatism, neuritis, sciatica, neuralgia, swollen joints or lumbago, regardless of their duration, or is of any therapeutic value in these conditions, in excess of such temporary and partial relief of minor pains and fever accompanying said ailments and conditions as may be afforded by its analgesic and antipyretic action; (f) that "Romind" possesses any therapeutic properties which could hold out hope of cure or happiness to persons afflicted with arthritis, rheumatism, neuritis, sciatica, lumbago or kindred ailments; (g) that "Romind" is fast acting in its effects, or that one taking said preparation could anticipate any comfort therefrom, in excess of such temporary relief of minor aches, pains and fever accompanying the diseases above mentioned as its analgesic and antipyretic properties may afford; (h) that said preparation constitutes an effective remedy or treatment for soreness in excess of the temporary symptomatic relief due to its analgesic action; (i) that said preparation constitutes an effective remedy or competent treatment for stiff muscles, or will help in any manner to remove uric acid from the system; (j) that taking said preparation will be of any value or benefit in enabling a person to work or sleep more comfortably aside from its temporary analgesic effects; (k) that "Romind" will serve to cleanse the body or blood of waste, poisons or acids, or otherwise stimulate the cleansing action of the kidneys, or exercise any beneficial effect upon the kidneys or their activities, or will exert any beneficial influence upon the underlying causes of arthritis or kindred ailments; or, (l) that the ingredients compounded in "Romind" constitute a new formula or a new kind of treatment; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Warren W. Burgess et al. d. b. a. The Knox Company, Los Angeles, Calif., Docket 5881, April 18, 1952]

In the Matter of Warren W. Burgess, Linn D. Johnson, and Richard T. Aldworth, Co-partners Doing Business as the Knox Company

This proceeding was heard by Everett F. Haycraft, hearing examiner, upon the complaint of the Commission, respondents' answer, a hearing at which evidence in support of the allegations of said complaint was introduced before said examiner, theretofore duly designated by the Commission, and a subsequent partial stipulation of the facts, whereby it was stipulated and agreed that said partial stipulation, signed and executed by counsel for respondents and the attorney supporting the complaint, was to supply the scientific facts in the proceeding, and was supplemental to and to be considered in connection with the evidence incorporated in the record at the aforesaid hearing.

Thereafter the proceeding regularly came on for final consideration by said examiner on the complaint, the answer thereto, and the evidence, including said partial stipulation of facts, which was duly recorded and filed in the office of the Commission (counsel having waived the filing of proposed findings as to the facts, and conclusions and oral argument not having been requested), and said examiner, having duly considered the record in the matter and having found that the proceeding was in the interest of the public, made his initial decision, comprising certain findings as to the facts,[1] conclusion[1] drawn therefrom, and order to cease and desist.

No appeal having been filed from said initial decision of said hearing examiner as provided for in Rule XXII, nor any other action taken as thereby provided to prevent said initial decision becoming the decision of the Commission thirty days from service thereof upon the parties, said initial decision, including said order to cease and desist, accordingly, under the provisions of said Rule XXII became the decision of the Commission on April 18, 1952.

[1] Filed as part of original document.

The said order to cease and desist is as follows:

It is ordered, That respondents Warren W. Burgess, Linn D. Johnson and Richard T. Aldworth, individually and as copartners doing business in the name of The Knox Company or in any other name, their agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution in commerce of the drug preparations designated as "Chinaroid" and "Romind," or any preparations of substantially similar compositions or possessing substantially similar properties, whether sold under the said names or any other names, do forthwith cease and desist from:

1. Disseminating or causing to be disseminated, by means of the United States mails, by radio broadcasts or by any means in commerce, as "commerce" is defined in the Federal Trade Commission Act, any advertisement which represents, directly or by implication:

(a) That "Chinaroid" constitutes a competent or adequate treatment for piles or hemorrhoids or would be of any benefit to the underlying causes thereof.

(b) That said preparation could exert any influence upon the severity or duration of piles or hemorrhoids, beyond that of an astringent and local anesthetic in affording temporary relief to such symptoms as pain, itching, burning, and irritation which accompany simple, uncomplicated cases of piles or hemorrhoids.

(c) That said preparation, however used, will result in any shrinkage of sore, swollen tissues, or will assist nature in healing irritated membranes, or will have any effect upon nervousness, irrespective of the cause.

(d) That "Romind" constitutes an adequate or competent treatment for arthritis, rheumatism, swollen joints, neuritis, neuralgia, sciatica or lumbago, or will permanently relieve pain accompanying said conditions and ailments.

(e) That "Romind" is a pain killer, or possesses any therapeutic value in treating the nerve-racking, stabbing, throbbing pains of arthritis, rheumatism, neuritis, sciatica, neuralgia, swollen joints or lumbago, regardless of their duration, or is of any therapeutic value in these conditions, in excess of such temporary and partial relief of minor pains and fever accompanying said ailments and conditions as may be afforded by its analgesic and antipyretic action.

(f) That "Romind" possesses any therapeutic properties which could hold out hope of cure or happiness to persons afflicted with arthritis, rheumatism, neuritis, sciatica, lumbago or kindred ailments.

(g) That "Romind" is fast acting in its effects, or that one taking said preparation could anticipate any comfort

therefrom, in excess of such temporary relief of minor aches, pains and fever accompanying the diseases above mentioned as its analgesic and antipyretic properties may afford.

(h) That said preparation constitutes an effective remedy or treatment for soreness in excess of the temporary symptomatic relief due to its analgesic action.

(i) That said preparation constitutes an effective remedy or competent treatment for stiff muscles, or will help in any manner to remove uric acid from the system.

(j) That taking said preparation will be of any value or benefit in enabling a person to work or sleep more comfortably aside from its temporary analgesic effects.

(k) That "Romind" will serve to cleanse the body or blood of waste, poisons or acids, or otherwise stimulate the cleansing action of the kidneys, or exercise any beneficial effect upon the kidneys or their activities, or will exert any beneficial influence upon the underlying causes of arthritis or kindred ailments.

(l) That the ingredients compounded in "Romind" constitute a new formula or a new kind of treatment.

2. Disseminating or causing to be disseminated by any means for the purpose of inducing, or which is likely to induce, directly or indirectly, the purchase in commerce, as "commerce" is defined in the Federal Trade Commission Act, of the drug preparations "Chinaroid" and "Romind," any advertisement which contains any of the representations prohibited in Paragraph 1 of this order.

By "Decision of the Commission and order to file report of compliance," Docket 5881, April 18, 1952, which announced and decreed fruition of said initial decision, report of compliance with the said order was required as follows:

It is ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: April 18, 1952.

By the Commission.

[SEAL] D. C. DANIEL,
Secretary.

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter B—Claims and Accounts

PART 533—GRATUITY UPON DEATH

MISCELLANEOUS AMENDMENTS

Section 533.4 is revoked, and in § 533.8 (a), subparagraph (2) is changed and subparagraph (3) is added as follows:

§ 533.8 *Special determination*—(a) *Absent without leave.* • • •

(2) In each case where an individual dies after having been dropped from the rolls as a deserter, an administrative determination as to whether the service member was in a desertion or absent without leave status at date of death will be obtained from The Adjutant General by the Commanding General, Finance Center, U. S. Army. Payment of the 6 months' death gratuity will be dependent upon the determination as to status of such service member. See MS Comp. Gen. B 109305, June 4, 1952.

(3) Six months' death gratuity is not payable if death occurred when the deceased was in an absent without leave status and the date of death was subsequent to date of the expiration of the deceased's normal period of enlistment.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 98, Amdt. 5]

CPR 98—RESELLERS OF IRON AND STEEL PRODUCTS

RE-USABLE BOILER AND PRESSURE TUBES

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 5 to Ceiling Price Regulation 98, is hereby issued.

STATEMENT OF CONSIDERATIONS

This fifth Amendment to Ceiling Price Regulation 98 expands the scope of section 34 by the addition of a new paragraph (b), which provides a pricing method for reconditioned quality reusable boiler and pressure tubes (including locomotive flues) which have undergone certain additional special tests and reconditioning services. The cost of furnishing those services, namely, hydrostatic testing to a minimum pressure resistance of 1000 pounds per square inch, crop ending as described in section 34 (b) (1) (iii), and turbinizing is not provided for in section 34 (a) (2). Section 34 (a) (2) now permits the reseller of reconditioned quality boiler and pressure tubes meeting certain requirements to charge as his ceiling price 80 percent of the jobber warehouse price per 100 feet that would apply for new seamless line pipe of the most comparable size and wall thickness. He may charge this ceiling price without furnishing the services covered by this amendment.

At least one reseller of reconditioned quality reusable boiler and presure tubes furnishes and did furnish prior to June 24, 1950 the services of hydrostatic testing to a minimum pressure resistance of 1000 pounds per square inch, crop ending as described in section 34 (b) (1) (iii), and turbinizing in connection with the sale of reconditioned quality reusable boiler and pressure tubes for purposes such as high pressure gas, oil and water lines.

This amendment provides a pricing method whereby the reconditioner who provides these special services may add the same differential which he realized during the period April 1 to June 24, 1950.

The other item dealt with in this amendment is that relating to the basis to be used in calculating the ceiling jobber price of new prime quality plain end seamless line pipe under section 34 (a) (2). This basis is corrected to accord with historical industry practice.

In the judgment of the Director of Price Stabilization the provisions of this amendment are generally fair and equitable and are necessary to effectuate the purposes of the Defense Production Act of 1950, as amended.

So far as practicable, the Director has given due consideration to the national effort to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950, as amended, and to relevant factors of general applicability.

In formulating this amendment, the Director consulted with industry representatives, including trade association representatives, to the extent practicable and has given full consideration to their recommendations.

Every effort has been made to conform these amendments to existing business practices or means or aids to distribution. Insofar as any provisions of this regulation may operate to compel changes in the business practices, or means or aids to distribution, such provisions are found by the Director of Price Stabilization to be necessary to prevent circumvention or evasion of the regulation and to effectuate the purposes of the Defense Production Act of 1950, as amended.

AMENDATORY PROVISIONS

Ceiling Price Regulation 98 is amended in the following respects:

1. The second sentence of section 34 (a) (2) is amended to read as follows: "Whether or not you are a jobber or distributor of the new price quality product you must determine the ceiling jobber price, to which the 80 percent figure is to be applied, in the manner set forth in section 21, using as the basis of your calculations a list price computed in the customary way at 10 cents (10¢) per pound on the nominal weight per foot of the tubes involved in the transaction, subject to the current mill discounts for new prime quality plain end seamless line pipe published by the National Tube Division of the United States Steel Company, and the current minimum rail carload freight rate (including transportation taxes) from their nearest producing point to the rail station or siding nearest your point of shipment."

2. Paragraph (b) of section 34 is redesignated paragraph (c) and a new paragraph (b) is added to read as follows:

(b) *Reconditioned quality reusable boiler and pressure tubes which have been subjected to certain special services.* (1) If you perform the following special services with respect to reconditioned quality reusable boiler and pressure tubes so that such tubes possess qualities in addition to those described in paragraph (a) (2) of this section, you may add your customary differential, if any, determined in accordance with subparagraph (2) of this paragraph to the ceiling price set forth in paragraph (a) (2) of this section:

(i) Hydrostatic testing of each pipe joint by machine which indicates that the reusable boiler and pressure tubes being tested are capable of conducting, without leakage, liquids and gases at a pressure of at least 1000 pounds per square inch and you warrant the capacity of each pipe joint to withstand such pressure;

(ii) Turbinizing so that all scale and metal residue are removed from the interior of the wall of the reusable boiler and pressure tubes, resulting in an interior wall of bare metal;

(iii) Crop ending, so that each piece of tubing is capable of use as high pressure (1000 pounds per square inch minimum) line pipe and contains no welds known as "safe end" welds. Crop ending includes beveling of each end for purposes of welding; and

(iv) Each joint stamped with a steel die or otherwise indelibly marked with the reconditioner's identification mark.

(2) Your customary differential which you may add in determining your ceiling price for any size and wall thickness or reconditioned quality reusable boiler and pressure tube meeting the specifications of this paragraph is determined in the following manner:

(i) First, you determine the percentage figure by which your average shipping point price which you charged for each size and wall thickness of reconditioned quality reusable boiler and pressure tube meeting the specifications of this paragraph during the period April 1 through June 24, 1950, or the last preceding calendar month for which your written records show sales having been made, exceeded 80 percent of the jobber warehouse price per 100 feet for new prime seamless line pipe of the most comparable size and wall thickness determined in the same manner as set forth in paragraph (a) (2) of this section using in lieu of the current mill net prices and freight rates the mill net prices of the specified mills and the freight rates which were in effect on June 1, 1950. In determining your average shipping point price for each size and wall thickness during this base period, you must use a weighted average;

(ii) Secondly, you determine the weighted average of the differentials determined for each size and wall thickness under subdivision (i) of this subparagraph and this figure is the uniform differential which you may add in accordance with subparagraph (1) of this paragraph irrespective of size or wall thickness.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This amendment to Ceiling Price Regulation 98 shall become effective August 21, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 21, 1952.

[F. R. Doc. 52-9359; Filed, Aug. 21, 1952; 4:37 p. m.]

[Ceiling Price Regulation 165]

CPR 165—IMPORTS OF LUMBER, LOGS AND ALLIED WOOD PRODUCTS.

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Order No. 2, this Ceiling Price Regulation 165 is hereby issued.

STATEMENT OF CONSIDERATIONS

This regulation provides a method to be used by importers of logs, lumber and allied wood products in the computation of ceiling prices at which they may sell the items of import listed in Appendix A of this regulation.

According to reports of the Bureau of the Census, United States lumber imports during 1950 reached an unprecedented volume of almost 3¼ billion board feet, with a total value of approximately 264 million dollars. For the same period, our imports of logs were at the rate of 268 million board feet. Although part of this volume is made up of exotic woods which are not indigenous to the forests of this country—for example, mahogany, teak, lignum vitae, and balsa—about 90 percent of our lumber imports and 65 percent of the imported logs came from Canada to supplement domestic production. Moreover, in addition to lumber and logs, the United States imports a substantial quantity of veneer, plywood, millwork and other wood products.

Since January 26, 1951, United States importers of lumber and logs have determined their ceilings under the provisions of the General Ceiling Price Regulation, under which selling prices can be no higher than the highest price in effect during the base period established by that regulation. However, prices charged by foreign sellers as well as other costs of importation are not covered by OPS regulations.

Consequently, importers have been faced with increased acquisition costs with no corresponding increase in selling prices.

Importers of wood products other than logs and lumber have enjoyed some relief from the "squeeze" of rising costs under the provisions of Ceiling Price Regulation No. 31, which permits them to take a base period dollar-and-cents markup on the landed costs of the imported commodity.

The nature of this regulation. This regulation brings sales of imported logs, lumber, and allied wood products under a single regulation. It adopts the period from January 1 through June 30, 1950, as a base period. It provides that importers must compute a weighted average percentage markup on the basis of at least 25 percent of the dollar value of their base period sales and deliveries before August 26, 1952, made under base period contracts to sell. That markup is then applied to current landed costs in order to determine ceiling prices. The base period percentage markup may be calculated on the basis of a product line or on an item basis, whichever was the importer's base period practice. If, however, an importer cannot ascertain a markup on the basis of his base period sales and his deliveries under base period contracts to sell, the regulation permits the use of his 1949 sales and his deliveries under 1949 base period contracts to sell. The regulation further provides for the establishment, upon application, of a maximum markup which may be used when an importer is unable to compute a markup in the foregoing manner.

The regulation specifies that ceiling prices must be recalculated to reflect decreases in current landed costs. However, in accordance with customary industry practice, it also permits importers maintaining an inventory to average their landed costs.

January 1, 1950, to June 30, 1950, inclusive, was selected as a period which is generally representative as reflecting "the customary percentage margins over costs of goods sold", a requirement of section 402 (k) of the Act, the so-called Herlong Amendment. A six-month period was selected in order to provide a base period long enough to provide adequate data with respect to sales by the majority of importers. The calendar year 1949 was provided, however, as a limited alternative period for the computation of percentage markups because imports of some species are irregular in shipment and variable in quantity, making it difficult for some importers to compute their customary markup for every item of import during a six-month base period. The calendar year 1949 is also a representative period within the meaning of the Herlong Amendment.

In computing selling prices, the application of a percentage markup to the landed cost of imported logs, lumber, and allied wood products is a customary industry practice.

FINDINGS OF THE DIRECTOR OF PRICE STABILIZATION

In the judgment of the Director of Price Stabilization the provisions of this regulation are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended.

So far as practicable, the Director of Price Stabilization gave due consideration to the national effort to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950, as amended; to prices prevailing during the period from May 24 to June 24, 1950, inclusive; and to prices prevailing just before the issuance of this regulation; and to relevant factors of general applicability.

In the formulation of this regulation there has been consultation with industry representatives, including trade association representatives, and considera-

tion has been given to their recommendations.

Every effort has been made to conform this regulation to existing business practices, cost practices or methods, or means or aids to distribution. Insofar as any provisions of this regulation may operate to compel changes in business practices, cost practices or methods, or means or aids to distribution, such provisions are found by the Director of Price Stabilization to be necessary to prevent circumvention or evasion of this regulation.

REGULATORY PROVISIONS

Sec.

1. What this regulation does.
2. Geographical applicability.
3. Base period.
4. Method for ascertaining ceiling prices.
5. Calculation of base period percentage markup.
6. Percentage markups calculated on pre-base period sales.
7. Kiln-drying and milling-in-transit charges.
8. Recalculation of ceiling prices.
9. Application for approval of a maximum markup.
10. Adjustable pricing.
11. Records.
12. Invoices.
13. Petitions for amendment.
14. Excise, sales and similar taxes.
15. Transfer of business or stock in trade.
16. Interpretations.
17. Prohibitions and violations.
18. Evasions.
19. Definitions.

AUTHORITY. Sections 1 to 19 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101–2110, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.

SECTION 1. *What this regulation does.* (a) This regulation provides a method to be used by importers in the computation of ceiling prices for the imported logs, lumber, and allied wood products listed in Appendix "A" of this regulation.

(b) The General Ceiling Price Regulation and Ceiling Price Regulation 31 are superseded with respect to transactions covered by this regulation.

(c) This regulation does not apply to the sale of products subject to this regulation transported to the continental United States for transshipment abroad, which do not enter into the domestic commerce of the United States, and which are either:

(1) Entered at Customs in transit on a "Transportation and Exportation (TE) entry" or on an "Exportation (Exp.) entry", or

(2) Stored in transit in a bonded warehouse or stored in a foreign trade zone.

SEC. 2. *Geographical applicability.* The provisions of this regulation are applicable in the 48 States of the United States and in the District of Columbia.

SEC. 3. *Base period.* The base period of this regulation is the period from January 1, 1950, to June 30, 1950, inclusive.

SEC. 4. *Method for ascertaining ceiling prices*—(a) *General explanation.* Your ceiling price for the sale of an item covered by this regulation to each class of buyer shall be determined by applying a percentage markup to the current landed cost (as defined in section 19) of the item. The percentage mark-up to be used in determining your ceiling prices shall be calculated as provided in sections 5 and 6 of this regulation. If you cannot calculate a percentage mark-up under section 5 or 6, you must apply under section 9 for a mark-up to be used in determining your ceiling prices.

(b) *Estimated landed cost.* Where an item for which you are determining a ceiling price has not arrived in the United States, you may estimate your current landed cost of the item. In the event such estimated current landed cost exceeds your actual landed cost, as finally determined, and as a consequence your selling price has exceeded your ceiling price as computed under the provisions of this regulation, you shall, at the option of the buyer, either remit or credit the difference to your buyer within 60 days after ascertaining your actual landed cost.

SEC. 5. *Calculation of base period percentage markup*—(a) *General explanation.* Your base period percentage markup shall be calculated under this regulation in accordance with your base period practice. If during the base period you used different percentage markups in determining your selling prices to different classes of buyers, you must now continue that practice. You may use either a product line basis (for example, lumber, logs, millwork, or plywood), or an item basis (for example, boards, dimension, planks, or timbers; a species of logs; or items of millwork, such as doors, or window-sash) in calculating percentage markups. If during the base period you used a particular product line as the basis for calculating a uniform percentage markup with respect to items in that product line, you must now use that particular product line as the basis for calculating your percentage markup with respect to all items within that product line, and you must apply the same percentage markup to all such items. If, however, during the base period you calculated your percentage markup on an item basis, you must now continue to calculate your percentage markup on an item by item basis with respect to all such items.

(b) *Item basis.* To calculate your base period percentage markup on an item basis, you:

(1) Determine the total dollar value of all sales of an item made during the base period to the same class of buyer, and of all deliveries made before August 26, 1952, under contracts to sell the item made during the base period to the same class of buyer.

(2) Beginning with the most recent of the sales or deliveries involved in your subparagraph (1) calculation, total the dollar value of such sale or delivery and each preceding sale and delivery until you have reached a total which is not less than, but is not limited to, 25 percent of the total dollar sales value as determined in subparagraph (1).

(3) Determine the total landed costs of the sales and deliveries involved in your subparagraph (2) calculation.

(4) Subtract the total determined in subparagraph (3) from the total determined in subparagraph (2).

(5) Divide the remainder obtained in subparagraph (4) by the total determined in subparagraph (3). The result is your base period percentage markup for the item.

For example:

Assume that you are computing your percentage markup for an item that you sold to retailers, a separate class of your buyers. Assume further that during the base period you made the five sales of the item to retailers on the dates shown below:

Date	Landed cost	Selling price
Jan. 5, 1950	$70,000	$77,000
Feb. 20, 1950	80,000	86,400
Mar. 2, 1950	50,000	54,500
May 15, 1950	10,000	11,100
June 27, 1950	20,000	22,000

The total selling prices of the last three listed sales amount to $67,600, which is 35.13 percent of $249,000, the total dollar value of all your sales. 35.13 percent is "not less than 25 percent" of the total dollar value of all your sales, and you may therefore use these three sales as the basis for your computation. You then:

1. Add the landed cost of these three sales = $80,000.
2. Subtract $80,000 from $87,600 = $7,600.
3. Divide $7,600 by $80,000 = 9.50 percent.

9.50 percent is therefore the percentage markup which you may use under this regulation in determining your ceiling price for sales of the item to retailers.

(c) *Product line basis.* To calculate your base period percentage markup on a product line basis, you:

(1) Determine the total dollar value of all sales of all items within a product line made during the base period to the same class of buyer, and of all deliveries made before August 26, 1952, under contracts to sell the items within the product line made during the base period to the class of buyer.

(2) Calculate your percentage markup for your product line in the same manner as is provided for calculating percentage markups on an item basis in paragraph (b) above.

For example:

Assume that you have a product line in which there are three items to which you applied a uniform percentage markup in your base period sales to wholesalers, a separate class of your buyers. Assume further that during the base period you made the following sales of these items:

Item	Date of sale	Landed cost	Selling price	Percent markup
A	Feb. 17, 1950	$28,000	$30,800	10
B	do	32,650	35,915	10
C	do	25,750	28,325	10
A	May 5, 1950	12,000	13,020	13
B	do	11,000	13,166	19
C	do	10,200	11,577	13
A	June 21, 1950	7,250	8,120	12
B	do	10,400	11,648	12
C	do	5,858	6,552	12

The selling prices of the last six listed sales amount to $64,683, which is 40.5 percent of $159,723, the total dollar value of all sales made. 40.5 percent is "not less than 25 percent" of the total dollar value of all your sales, and you may therefore use these six sales as the basis for your computation. You then:

1. Add the landed costs of these six sales = $57,300.

2. Subtract $57,300 from $64,683 = $7,383.
3. Divide $7,383 by $57,300 = 12.88 percent.

12.88 percent is therefore the percentage markup which you may use under this regulation in determining your ceiling price for sales of items in this product line to wholesalers.

SEC. 6. *Percentage markups calculated on pre-base period sales*—(a) *Base.* If you are determining your ceiling prices on an item by item basis, and you wish to ascertain a percentage markup to apply in computing the ceiling price of an item which you did not sell to a buyer of the same class during the base period, or which you did not deliver before August 26, 1952, to a buyer of the same class under a contract to sell made during the base period, you shall use the calendar year 1949, instead of the base period, as the period for computing your percentage markup, and you shall compute your percentage markup in the same manner as is set forth in section 5 (b) of this regulation. If you use the calendar year 1949 instead of the base period, you shall use, as the basis of your calculations, sales of the item made during the calendar year 1949 to the same class of buyer and deliveries of the item before August 26, 1952, to the same class of buyer under contracts to sell the item made during the calendar year 1949.

SEC. 7. *Kiln-drying and milling-in-transit charges.* Where a buyer requests kiln-drying or milling-in-transit, or both, and such special service is performed by another person within one of the 48 states of the United States or the District of Columbia, you may add the actual cost of such special service as a net extra to your ceiling price otherwise established under this regulation. If the kiln-drying or milling-in-transit is performed by you, you may not charge more than your applicable OPS ceiling price for such service. In either case, a percentage markup may not be applied to the cost or charge for the kiln-drying or milling-in-transit.

SEC. 8. *Recalculation of ceiling prices.* (a) Except as provided in paragraph (b) of this section:

(1) You must recalculate your ceiling price on an item to reflect a decrease in your current landed cost of each new import of that item. Your ceiling price as thus recalculated shall be applicable only on sales of such new import of the item.

(2) You may whenever you wish recalculate your ceiling prices on an item to reflect an increase in your current landed cost of a new import of that item. Your ceiling price as recalculated shall be applicable only on sales of such new import of the item.

(b) When you have an inventory of an item, and you make a new import of that item at a landed cost different from the landed cost or costs at which you previously imported the item in your inventory, you may use an average landed cost in computing a single ceiling price for the item. As used in this paragraph, the term "average landed cost" means the total landed costs of your inventory of the imported item, together with the total landed costs of a new import of that item, divided by the sum of the quantity of the item in inventory and of the import.

SEC. 9. *Application for approval of a maximum markup.*—(a) *Contents of application.* If you are unable to compute a markup under the provisions of sections 5 and 6 of this regulation, you must apply in writing, by registered mail, return receipt requested, to the Office of Price Stabilization, Forest Products Division, Washington 25, D. C., for the establishment of a markup to be used in determining your ceiling price. Your application shall be signed and shall contain:

(1) An explanation of why you are unable to compute your ceiling markup under other provisions of this regulation.

(2) A description of the product line or the item involved. This should include the species, grade, condition, measurements, and quantity, together with a description of the workings, specifications, services, or other extras involved.

(3) Your proposed markup for the product line or item, together with a statement indicating why you believe it is in line with the level of markups otherwise established under this regulation.

(b) *Quotation of proposed prices.* After an application has been filed under this section, and before action by the Director of Price Stabilization, you may use your proposed markup in calculating a ceiling price for the product line or the item that is the subject of your application: *Provided*, That you agree to, and later refund to the buyer the amount, if any, by which your selling price exceeds your ceiling price as the result of the application of the maximum markup established by the Director of Price Stabilization.

(c) *Action by the Director of Price Stabilization.* (1) After receipt of an application made under this section, the Director of Price Stabilization will approve or disapprove your proposed markup, will request additional information about it, or will establish a different maximum markup for the product line or item that is the subject of your application.

(2) If the Director does not notify you to the contrary or request additional information from you within 20 days after the receipt of the application, or within 15 days after the receipt of requested additional information, your proposed markup shall be deemed to have been approved, subject to nonretroactive disapproval or adjustment at a later date.

SEC. 10. *Adjustable pricing.* Nothing in this regulation prohibits you from making a contract or offer to sell at (a) the ceiling price in effect at the time of delivery, or (b) the lower of a fixed price or the ceiling price in effect at the time of delivery. You may not, however, deliver, or agree to deliver, at a price to be adjusted upward in accordance with any increase in ceiling prices after delivery.

SEC. 11. *Records*—(a) *Existing records.* On and after the effective date of this regulation, for so long as the Defense Production Act of 1950, as amended, shall remain in effect, and for two years thereafter, you shall keep and preserve for examination by the Director of Price Stabilization, all your existing records relating to: (1) Your base period sales and contracts to sell products subject to this regulation; (2) deliveries made under base period contracts; (3) the landed costs of items involved in base period sales or deliveries under base period contracts to sell; and (4) if used to compute percentage markups, records pertaining to your sales and contracts to sell products subject to this regulation made during the calendar year 1949, together with records pertaining to deliveries under such contracts and the landed costs of items involved in such sales and deliveries. You shall also keep and preserve, for the period indicated above, all your existing records which you were required to make, keep, and preserve under the provisions of the General Ceiling Price Regulation and Ceiling Price Regulation 31.

(b) *Current records.* You shall make and keep for inspection by representatives of the Office of Price Stabilization, for a period of two years after each sale, accurate records pertaining to your sales of products subject to this regulation. These records must show the date of each sale, the name and address of the buyer, the item sold and the prices charged by you. You shall also prepare and keep available for the same period records showing the landed costs of these products. You shall further keep available for so long as the Defense Production Act of 1950, as amended, shall remain in effect, and for two years thereafter, whatever calculations you may have made in determining your percentage markups under sections 5 and 6 of this regulation.

SEC. 12. *Invoices.* If you are a seller who has customarily given a buyer an invoice, sales slip, receipt, or similar evidence of purchase, you shall continue to do so; however, at the request of a buyer, regardless of your previous custom, you shall furnish the buyer with an invoice. An invoice, receipt, or other such document shall show the date of sale, the name and address of the buyer, the items sold and the prices received. Any charge for a special service, such as a charge for kiln-drying or milling-in-transit as allowed in section 7, must be shown separately.

SEC. 13. *Petitions for amendment.* If you wish to have this regulation amended, you may file a petition for amendment in accordance with the provisions of Price Procedural Regulation 1, Revision 2.

SEC. 14. *Excise, sales or similar taxes*—(a) *Where the tax is included in your selling price.* (1) If the selling price of an item used by you in computing your percentage markup under this regulation includes any excise, sales or similar tax which is not separately stated, you must ascertain the amount of such tax and exclude it from the selling price used by you in that computation. Your selling price, with such tax so excluded, may then be used in making any appropriate computations for determining your percentage markup. After completing the

computations, and after applying your percentage markup to your current landed cost, you may then add on, for inclusion as part of your ceiling price, the amount of such tax, if any, which you are paying at the time of your computation.

(2) If subsequent to the establishment of any ceiling price which includes any excise, sales or similar tax, the amount of such tax is reduced or eliminated, you must recompute and reduce your ceiling price to reflect the appropriate amount of the reduction in or elimination of such tax.

(3) If subsequent to the establishment of any ceiling price any excise, sales or similar tax is first imposed, or any such tax which had been included in your ceiling price, is increased, you may recompute and increase your ceiling price to reflect the appropriate amount of such new tax or of the increase in such tax.

(b) *Where the tax is separately stated and collected.* If the selling price of an item used by you in computing your percentage markup under this regulation includes any excise, sales or similar tax which is separately stated, you may not include the amount of such tax in the selling price used by you in that computation. If it has been your practice to state and collect any excise, sales or similar tax separately from your selling price, you may, in addition to your ceiling price determined under this regulation, collect the amount of any such tax paid as such by you. In the case of an increase in any excise, sales or similar tax or any new such tax which is not effective until after this regulation becomes effective as to you, you may, in addition to your ceiling price, if not prohibited by the tax law, state separately and collect the amount of such increases or new tax actually paid as such by you. A tax once stated separately from your ceiling price may not thereafter be included in your ceiling price under this regulation.

SEC. 15. *Transfer of business or stock in trade.* If the business, assets, or stock in trade of any business are sold or otherwise transferred after the effective date of this regulation, and the transferee carries on the business, or continues to deal in the same products, in an establishment separate from any other establishment previously owned or operated by him, the maximum markups and ceiling prices of the transferee shall be the same as those to which his transferor would have been subject if no such transfer had taken place, and his obligation to keep records sufficient to verify such prices and markups shall be the same. The transferor shall either preserve and make available, or turn over, to the transferee all records of transactions prior to the transfer which are necessary to enable the transferee to comply with the provisions of this regulation.

SEC. 16. *Interpretations.* If you wish an official interpretation of this regulation, you should write to the District Counsel of your local OPS District Office. Any action taken by you in reliance upon and in conformity with a written official interpretation will constitute action in good faith pursuant to this regulation. Further information on obtaining official interpretations is contained in Price Procedural Regulation 1.

SEC. 17. *Prohibitions and violations.* (a) You shall not do any act prohibited or omit to do any act required by this regulation, nor shall you offer, solicit, attempt or agree to do or omit to do any such acts. Specifically (but not in limitation of the above), except as expressly provided in section 1 (d), you shall not regardless of any contract or other obligation, sell and no person in the regular course of trade or business shall buy from you at a price higher than the ceiling price established by this regulation, and you shall keep, make and preserve true and accurate records and reports required by this regulation. Prices lower than the ceiling prices may, of course, be charged and paid.

(b) If you violate any provisions of this regulation, you are subject to criminal penalties, enforcement action, and action for damages.

(c) If any person subject to this regulation fails to prepare or keep any record or file any report required by this regulation in connection with the establishment of his ceiling price, or, if any person subject to this regulation fails to establish a ceiling price or apply to the Office of Price Stabilization for the establishment of a ceiling markup, if he is required to do so, the Director of Price Stabilization may issue an order fixing his ceiling markup and ceiling prices. Any ceiling markup or ceiling price fixed in this manner will be in line with the ceiling markup and ceiling prices generally established by this regulation. The order fixing the ceiling markup or ceiling price may apply to all deliveries or transfers completed prior to the date of issuance of the order. The issuance of such an order will not relieve the seller of his obligation to comply with the requirements of this regulation or of the various penalties for failure to do so.

SEC. 18. *Evasions.* Any means or device which results in obtaining indirectly a higher price than is permitted by this regulation or in concealing or falsely representing information as to which this regulation requires records to be kept is a violation of this regulation. This prohibition includes, but is not limited to, means or devices making use of commissions, services, cross sales, tranportation arrangements, premiums, discounts, special privileges, up-grading, tie-in agreements and trade understandings, as well as the omission from records of true data and the inclusion in records of false data.

SEC. 19. *Definitions.* This regulation and the terms which appear in it shall be construed in the following manner:

Class of buyer. The meaning of this term is determined by reference to your own practice of setting different prices for sales to different buyers or groups of buyers. The practice may, but need not be, based on the characteristics of distributive level of the buyer, for example, railroads, retailers, contractors, industrials, utilities, municipalities, or government agencies. It may, but need not, be based on the location of the buyer or the quantity of the item purchased by him. It may, but need not, be based on differing terms or conditions of sale or delivery. If you have followed the practice of giving an individual customer a price differing from that charged others, that customer is a separate class of buyer.

Costs of importation. This term means those costs actually incurred or to be incurred by an importer in moving a commodity from the place of foreign origin to the place of destination, and include, but are not necessarily limited to, foreign export and other taxes directly related to the transaction, foreign ocean and incoming domestic transportation costs, custom duties, dock charges, clearance, insurance costs, letter of credit, or other importation finance charges, and any customary buying commission paid to a purchasing agent outside the continental limits of the United States.

Foreign invoice cost. This term means the amount stated on your foreign invoice less any discount or allowances.

Imported. A product is imported which is transported from a foreign country into any of the 48 States of the United States or the District of Columbia for sale within such area. However, a product shipped into this area from outside thereof and entered in a foreign trade zone or under general order or in a bonded warehouse for transshipment and actually transshipped to a destination outside the continental limits of the United States shall not be deemed to be "imported".

Importer. An importer is a person who imports from a foreign country a product subject to this regulation and first sells the product after importation without materially altering its form. An agent of a foreign seller who does not take title to a product that is imported and who is paid for his services on a commission basis is not an importer within the meaning of this regulation.

Inventory. This term means the sum total of stocks or goods owned by the importer, which are in the 48 States of the United States and the District of Columbia, or which are in transit and destined for the United States.

Item. This term as used in this regulation means an individual unit of a "product line".

Landed cost. This term includes the foreign invoice cost plus the costs of importation. It may also include, but is not necessarily limited to, the costs of kiln-drying and milling-in-transit in a foreign country, yard storage, sticking, stacking, inspecting, tallying, unloading and loading onto carrier.

Person. This term includes any individual, corporation, partnership, association, or any other organized group of persons, or the legal successor or representative of any of the foregoing, and the United States or any other government or their political subdivisions or agencies.

Product line. This term means and shall include all items of the same general character and use which are normally classed together in your business for purposes of accounting or sales.

Records. This term includes but is not limited to books of account, sales lists, sales slips, orders, vouchers, contracts, receipts, invoices, bills of lading, and other papers and documents.

Sell. This term includes sell, supply, deliver, barter, and contracts and offers to do any of the foregoing. The terms "sale" and "purchase" shall be construed accordingly.

You. The pronoun "you" as used in this regulation indicates an importer who imports products subject to this regulation. The term "your" shall be construed accordingly.

Effective date. This Ceiling Price Regulation 165 is effective August 26, 1952.

NOTE: The reporting and record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 21, 1952.

APPENDIX A TO CEILING PRICE REGULATION No. 165

The products subject to this regulation are as follows:

Commodity	*Schedule A[1] Nos.*
Wood, unmanufactured.	4007 100 to 4029 500, inclusive; 4032 000 to 4080 500, inclusive.
Sawmill Products	4103 100 to 4202 000, inclusive; 4202 200 to 4202 890, inclusive; 4204 300 to 4207 555, inclusive.
Wood Manufactures	4208 000 to 4223 000, inclusive; 4280 010 to 4280 360, inclusive; 4280 460, 4280 500 and 4280 950.
Cork and Manufactures.	4300 000, 4301 000, 4303 000, 4321 100, 4321 300, and 4321 700.

[Ceiling Price Regulation 34, Supplementary Regulation 24]

CPR 34—SERVICES

SR 24—LINEN SUPPLIERS LOCATED IN NEW YORK CITY AREA: SALES OF CERTAIN LINEN SUPPLY SERVICES TO SMALL COMMERCIAL USERS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161 (15 F. R. 6105), and Economic Stabilization Agency General Order No. 2 (16 F. R. 738), this Supplementary Regulation 24 to Ceiling Price Regulation 34 is hereby issued.

STATEMENT OF CONSIDERATIONS

This Supplementary Regulation 24 to Ceiling Price Regulation 34 (CPR 34) applies to sellers of linen supply services located in the New York City metropolitan area. It establishes dollars and cents ceiling prices for sales to small commercial purchasers of the linen supply services as specified in Appendix A.

Previously, ceiling prices for sales of these services had been established by CPR 34, as amended.

While CPR 34 remains the regulation applicable to most service industries and to certain sales by sellers subject to this supplementary regulation, this action is taken in line with OPS policy of providing price controls better adapted to the specific nature and needs of particular service industries and to requirements for more effective administration and enforcement.

Generally, CPR 34 fixes a seller's ceiling price for sale of a service to a purchaser at the highest price at which he delivered the service or offered it for delivery to a purchaser of the same class during the base period (December 19, 1950, to January 25, 1951, inclusive). A purchaser of the same class is defined in the regulation as a purchaser belonging to a price class, i. e. group of purchasers to whom it was the seller's established practice in the base period to supply the service at a particular price different from that customarily charged other groups of purchasers. This definition further provides that a single purchaser constitutes a price class if that purchaser was customarily treated differently price-wise by the seller from all other purchasers. Section 12 (c) generally provides that a seller who customarily charged different purchasers different prices without regard to standards but on an individually negotiated basis must treat each purchaser as a separate class of purchaser. Such a seller was required to establish almost as many ceiling prices as he had customers in the base period. Section 12 (d) generally required this type of seller to compute the ceiling price for sale of a service to a new purchaser at the arithmetic average of his ceiling prices to purchasers in the same category as derived from his base period experience. It also imposed upon this seller the requirement that if he discontinued supplying a service to an old purchaser within one month before or after beginning to supply that service to a new purchaser, he was required to sell to the new purchaser at a price no higher than the ceiling price to the old purchaser he discontinued if the purchaser had been supplied the service during the base period at a price below the seller's average price to purchasers in the same category. Sections 12 (c) and (d) were designed to meet exceptional cases and as applied to the service trades generally have not constituted a burden upon sellers in computing ceiling prices.

Two central facts make departure from the freeze technique of CPR 34 appropriate and desirable in the case of sales by linen suppliers located in the New York City metropolitan area to small commercial purchasers of linen supply services. In the first place, the dollars and cents pricing technique is appropriate and desirable where a service industry furnishes a service which is generally uniform in nature from seller to seller. This technique is desirable also from the standpoint of simplicity and certainty of administration both for sellers subject to the regulation and for the OPS. The services covered by this supplementary regulation are generally uniform in their nature irrespective of which linen supplier furnishes it. In the second place, the peculiar nature of the linen supply industry in the New York City metropolitan area makes the application of CPR 34 to their pricing problems a difficult and burdensome task.

There are approximately 80 linen supply firms in the New York City metropolitan area. It has been estimated that they furnish linen supply services to approximately one hundred seventy-five thousand purchasers with a dollar sales volume of nearly $500,000 per week. Most of the contracts for sale of these services to smaller accounts have customarily been negotiated in this industry on an individual basis without regard to objective standards such as quantity of purchases or nature of the business or location of the purchaser. The basic reason for this type of sales pattern is the highly competitive nature of the industry. A consequence of this industry characteristic is the frequent movement from seller to seller of individual small purchasers. Another characteristic of this industry is the frequent purchase by one linen supplier from his competitor of existing customer routes. The result of this practice is to cause a movement from seller to seller of whole groups of purchasers. Generally the linen supply trade considers as a small account the restaurant which currently buys less than $75 a week of linen supply services or other buyers that currently buy less than $20 per week of the linen supply services. These smaller accounts include roughly 150,000 buyers whose purchases in dollars represent 50 percent of total dollar volume of the New York City linen suppliers. There are roughly 25,000 of larger accounts which represent the other 50 percent of dollar volume.

CPR 34, although well adapted for the bulk of the services industries, does not solve adequately the ceiling price problems of the linen supply industry in the New York City metropolitan area. Each seller in this industry must compute almost as many ceiling prices as the seller had customers in the base period, which often runs into the thousands. In addition, each seller is faced with the problem of determining ceiling prices for new purchasers acquired either through competitively lower prices offered them or through purchase of existing routes of competitors. To compute these ceiling prices the seller who customarily negotiates individual prices must find the arithmetic average of his ceiling prices derived from his base period sales experience. If, at the time of beginning to sell a new purchaser, the seller has within one month discontinued selling an old purchaser, he must make an individual analysis of his prices to the discontinued purchaser in the base period and may be required to use the latter's ceiling price instead of the arithmetic average of all ceiling prices derived from base period sales experience as the ceiling price to the new purchaser. Due to the multiplicity of customers which each seller has the amount of computations required becomes not only

a difficult operation but a time-consuming one as well.

The dollars and cents technique adopted by this supplementary regulation will not only simplify greatly the determination of ceiling prices by sellers subject to this regulation but will eliminate many of the difficulties of enforcement previously encountered in the administration of CPR 34.

This supplementary regulation applies only to sales of linen supply services to small commercial purchasers. Section 4 sets forth the technique for determining which commercial purchasers are large accounts and provides that all others are small accounts. Generally, a commercial purchaser is a large account if it purchased for use in other than restaurant facilities a volume of twenty or more dollars in the base calendar week or if it purchased for use in restaurant facilities a volume of seventy-five or more dollars in that week. This line of demarcation is supported generally by the practices of the New York City linen supply trade. On the basis of ceiling price adjustments previously granted under section 20 (a) of CPR 34 to sellers subject to this supplementary regulation it appears that the ceiling prices established by this regulation represent the present ceiling prices under CPR 34 for approximately half of the sales to small commercial purchasers. Sales of these services to large commercial purchasers remain subject to CPR 34 due to the relatively smaller number of purchasers involved and to differences in treatment of larger purchasers as recognized generally by the New York City linen supply industry. The establishment of uniform dollars and cents ceiling prices for large commercial purchasers of linen supply services from suppliers located in New York City is not feasible at this time because of very wide variations in the prices charged them.

In determining the level of ceiling prices established in this supplementary regulation, as well as the need for this regulation, the Director has considered the availability of price relief to individual members of this industry under the provisions of section 20 (a) of CPR 34. This section permits a seller of services to apply for an upward adjustment of his ceiling prices for sales of his services when his present ceiling prices impair his normal earnings, for a representative pre-Korean period, to such an extent that the effective operation of his service business is threatened. Among the factors which the Director considers in acting on an application under this section are the seller's post-Korean increases and decreases in cost, the earnings of the seller's services' business as well as the earnings of his entire business operation, change in sales volume, and the nature and size of the seller's business. Based upon data submitted by nine linen supply houses in the New York City metropolitan area, the Director found that each company was entitled to upward adjustment of their ceiling prices. The amount of the adjustment of ceiling prices granted varied from three to six percent. Study of other data indicates that many of the other sellers in this area would be entitled to price relief under the provisions of section 20 (a) of CPR 34. The issuance of this supplementary regulation on an area basis should substantially ease the administrative burden and avoid the otherwise necessary time lag involved in processing many individual applications under this section by sellers subject to this regulation and will generally give these sellers the price relief which, on the average, they would be entitled under section 20 (a) of CPR 34. Accordingly, section 2 (b) of this supplementary regulation provides that no seller subject to this regulation can obtain an adjustment of ceiling prices under section 20 (a) after its effective date; and it also revokes any adjustment orders previously issued by OPS under this section with respect to sales covered by this supplementary regulation.

The dollars and cents ceiling prices set forth for linen supply services listed in Appendix A have been determined basically upon the customary past prices for different sellers in the New York City metropolitan area for the same services rendered. In preference to weighted average prices of the different sellers, the modal price has been used as the basis for determination of the ceiling prices established by this supplementary regulation. The modal price is that price charged by these sellers to the greatest number of purchasers for each particular service item supplied. Although this supplementary regulation is not issued as an adjustment action, the dollars and cents ceiling prices established by it are on the average slightly above the modal prices so as to take into account fairly recent wage and other cost increases of the New York City linen supply industry and the impairment of normal pre-Korean earnings resulting from such cost increases. The ceiling prices established will result in some rollbacks of some service items for some suppliers. At any uniform ceiling price level established certain rollbacks are necessary unless the criterion of the highest price for a service item of a single supplier were followed which, of course, is not feasible for purposes of sound price control by a dollars and cents technique. Excluded from the scope of this linen supply services regulation are certain related services supplied to professional purchasers, linen supply services furnished to seasonal purchasers, related services purchased for home use, office towel services and commercial flat work services. These exclusions are designed to limit the scope of linen supply services covered by this regulation to a well defined segment of linen supply services in accordance with the industry pattern of the linen supply trade in New York City.

FINDINGS OF THE DIRECTOR OF PRICE STABILIZATION

In the judgment of the Director of Price Stabilization the ceiling prices established by this regulation are generally fair and equitable and are necessary to effectuate the purpose of Title IV of the Defense Production Act of 1950, as amended.

As far as practical, in the formulation of this regulation, the Director of Price Stabilization has given due consideration to the national effort to achieve maximum production in furtherance of the objectives of the Defense Production Act of 1950, as amended; to the prices prevailing during the period January 25 through February 24, 1951, as well as to the level of prices prevailing just before the issuance of this regulation; and to all relevant factors of general applicability.

In formulating this regulation, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations.

Every effort has been made to conform this regulation to business practices existing with respect to the linen supply services covered in the regulation. Insofar as any provisions of this regulation may operate to compel changes in those business practices, such provisions are found by the Director of Price Stabilization to be necessary to prevent circumvention or evasion of this regulation.

AUTHORITY: Section 1 to 8 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101–2110. E. O. 10161, Sept. 9, 1950, 15 F. R. 6105, 3 CFR 1950 Supp.

SECTION 1. *What this supplementary regulation does.* This supplementary regulation applies to you if you are a seller of linen supply services located in the New York City area. It establishes dollars and cents ceiling prices for your sales of linen supply services listed in Appendix A to all commercial purchasers which are small accounts. Ceiling prices for these sales were previously established by Ceiling Price Regulation 34 (CPR 34). The terms "linen supply services", "New York City Area", and "commercial purchasers" are defined in section 8 of this regulation. Section 4 of this regulation tells you how to determine whether a commercial purchaser is a small or a large account. This regulation does not apply to sales of linen supply services to commercial purchasers which are large accounts, to professional or seasonal purchasers, or to purchasers for home use, as the foregoing terms are defined in section 8 of this regulation. This regulation also does not apply to sales of office towel or commercial flatwork services as these terms are defined in section 8 of this regulation.

SEC. 2. *Relationship of this supplementary regulation to Ceiling Price Regulation 34.* (a) Except to the extent they are modified by or are inconsistent with the provisions of this supplementary regulation, all provisions of CPR 34, as amended, shall continue to apply to you.

(b) You may not, after the effective date of this supplementary regulation, obtain an adjustment of ceiling prices under paragraphs (a) (1) and (2), (b), or (c) of section 20 of CPR 34 for your sales of linen supply services listed in Appendix A to commercial purchasers which are small accounts. Any order previously issued by the Office of Price Stabilization under these paragraphs and applicable to you is hereby revoked, upon the effective date of this regulation, as to your sales of linen supply services listed in Appendix A to commercial purchasers which are small accounts.

(c) The requirement contained in section 18 (c) of CPR 34, as amended, with respect to filing of supplemental statements of ceiling prices does not apply, as of the effective date of this supplementary regulation, to your sales of linen supply services listed in Appendix A to commercial purchasers which are small accounts.

SEC. 3. *Ceiling prices.* If you sell a linen supply service listed in Appendix A from an establishment located in the New York City Area, your ceiling price for a sale of that service to any commercial purchaser which is a small account as determined under section 4 of this regulation, shall be the price specified for that service in Appendix A. If you sell that service to a commercial purchaser which is a large account, your ceiling price for a sale of that service is the one previously established under the provisions of CPR 34, as amended.

SEC. 4. *How to determine whether a commercial purchaser is a small or a large account.* (a) (1) A commercial purchaser of linen supply services listed in Appendix A is a large account if it purchased for use in other than restaurant facilities a volume of twenty or more dollars of these services during the period specified in paragraph (b) of this section, or if it purchased for use in restaurant facilities, as defined in section 8 of this regulation, a volume of seventy-five or more dollars of these services during the period specified in paragraph (b) of this section, or if it is redesignated as a large account by order of the Director of the New York Regional Office of the Office of Price Stabilization in accordance with the provisions of section 5 of this regulation. All other commercial purchasers of these services are deemed to be small accounts.

(2) If a commercial purchaser purchased linen supply services for use in both restaurant facilities and other facilities during the period specified in paragraph (b) of this section, that buyer is a large account for all of those purchases if it would constitute a large account based upon its purchases for either type of facilities as described in subparagraph (1) of this paragraph.

(3) If a commercial purchaser operates more than one establishment, all of these establishments for which linen supply services listed in Appendix A were purchased during the period specified in paragraph (b) of this section shall, for the purposes of this supplementary regulation, be considered a single purchaser for the purpose of determining whether the commercial purchaser is a large account.

(b) For the purpose of making the status determination required in paragraph (a) of this section, you must select whichever of the following periods is applicable to you: the base week from Monday, July 28, 1952, to Sunday, August 3, 1952, inclusive, or of any seven consecutive days the first of which falls within that week if you customarily maintain your weekly records on the latter basis. If, however, a commercial purchaser did not purchase linen supply services listed in Appendix A from any seller during the base week applicable to you, the determination of whether that purchaser is a large account must be based upon its volume of these purchases during the first comparable full week, following the base week, in which you did supply these services to that purchaser. Until you have so determined the status of such a purchaser but in no event for more than 14 days after you first furnish linen supply services to such purchaser, your ceiling prices to such purchaser shall be those established by this supplementary regulation. After such time, your ceiling prices to that purchaser must be determined under either this supplementary regulation or CPR 34, whichever is applicable.

(c) If a commercial purchaser did not purchase linen supply services listed in Appendix A from you during the base week specified under paragraph (b) of this section but did purchase these services during that period from another seller subject to this supplementary regulation, you must determine from these purchases whether that purchaser is a large account. You may rely upon the statements of the purchaser concerning the dollar volume of his purchases of linen supply services from others during the base week.

SEC. 5. *Application for redesignation of nature of account.* (a) A seller subject to this supplementary regulation must, or a purchaser of linen supply services listed in Appendix A from that seller may apply in writing to the Director of the New York Regional Office of the Office of Price Stabilization for an order redesignating that purchaser as a large account or as a small account, whichever is applicable, if the applicant knows and can demonstrate that the purchaser has changed, as described in paragraph (b) of this section, the volume of his purchases of the linen supply services listed in Appendix A. The applicant must give in his application the information specified in paragraph (c) of this section. If the Director finds that the facts warrant a redesignation of the purchaser, either as a large account or as a small account, whichever is applicable, he will issue an order in writing establishing the new designation for the purchaser. Until the Director notifies an applicant in writing of the redesignation of a purchaser as a large account or as a small account, whichever is applicable, a seller subject to this regulation may not charge that purchaser prices higher than the ceiling prices previously applicable for sales of the linen supply services listed in Appendix A to that purchaser.

(b) Either of the persons referred to in paragraph (a) of this section should apply for an order redesignating the status of a purchaser from a seller subject to this regulation under the following circumstances:

(1) When that purchaser is presently classified as a small account under section 4 of this regulation and his purchases of linen supply services listed in Appendix A during any four consecutive weeks would for each of these weeks constitute that purchaser a large account according to the standards set forth in section 4 of this regulation; or

(2) When that purchaser is presently classified as a large account under section 4 of this regulation and his purchases of linen supply services listed in Appendix A during any four consecutive weeks would not for each of those weeks constitute that purchaser a large account according to the standards set forth in section 4 of this regulation.

(c) An application under this section must include the following information:

(1) Name and address of the seller and the purchaser;

(2) The period which constitutes the seller's base week, the dollar amount of the purchaser's purchases of linen supply services during that week, and the type of facilities for which the purchases were made, together with the present status of that purchaser (i. e. whether it is a large or a small account) if the status has changed since the base week;

(3) The four consecutive weeks upon which the applicant relies as the basis for seeking a redetermination of status of that purchaser;

(4) The dollar volume of purchases of linen supply services listed in Appendix A by that purchaser from the seller for each week referred to in subparagraph 3 of this paragraph.

SEC. 6. *Invoices.* In complying with the provisions of section 17 of CPR 34, as amended, you must supply sales slips, receipts, or invoices to purchasers which describe linen supply services furnished to such purchasers in the terms as used to describe those services in Appendix A of this supplementary regulation.

SEC. 7. *Interpretations.* If you want an official interpretation of this regulation, you should write to the Regional Counsel of the New York Regional Office of the Office of Price Stabilization. Any action taken by you in reliance upon and in conformity with a written official interpretation will constitute action in good faith pursuant to this supplementary regulation. Further information on obtaining official interpretations is contained in Price Procedural Regulation 1, revised.

SEC. 8. *Definitions.* When used in this supplementary regulation, the term:

(a) "Linen supply services" means the supplying to others on a rental basis of clean laundered linens or garments listed in Appendix A by the owner of these items. The term "linen" as used in this definition, is not confined to articles made of linen textiles, but includes articles consisting of any fabric which are commonly laundered as distinguished from being dry cleaned.

(b) "Commercial purchaser" means a person who buys linen supply services in connection with the operation of his business, such as a restaurant, hotel, hospital, barber shop, or other similar businesses.

(c) "New York City Area" means the following counties of the State of New York: New York, Kings, Queens, Bronx, Richmond, Nassau, Suffolk and Westchester.

(d) "Small account" means a commercial purchaser of linen supply services listed in Appendix A which is not a large account as described in section 4 of this regulation.

(e) "Large account". Section 4 of this regulation tells you how to determine whether a commercial purchaser of linen supply services listed in Appendix A is a large account.

(f) "Professional purchaser" means a member of the medical or dental profession who purchases linen supply services for use in his professional office.

(g) "Seasonal purchaser" means a commercial purchaser who normally and in the regular course of business purchases linen supply services listed in Appendix A during less than six consecutive months of each year.

(h) "Purchaser for home use" means a person who purchases linen supply services for a use in his home unconnected with the operation of a business.

(i) "Office towel service" means the supplying to others for use in offices on a rental basis of clean laundered towels, owned by the supplier, which are delivered at regular intervals and normally at a specified price per month based upon the quantity of towels used.

(j) "Commercial flatwork service" means laundry services supplied by a seller on linens, flatwork or garments owned by the purchaser of the services.

(k) "Restaurant facilities" means the facilities normally provided by a public or private eating place serving food or beverages operated either as a separate business or as a department of a business, such as a hotel or department store.

Effective date. This supplementary regulation is effective August 27, 1952.

NOTE: The record-keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 22, 1952.

APPENDIX A—CEILING PRICES FOR LINEN SUPPLY SERVICE ITEMS

The terms used below to describe linen supply service items shall have the meaning customary to the linen supply service trade in the New York City Area. You must follow the customary practice of the trade in replacing at normal intervals and under customary conditions the items of linen supply service furnished to purchasers. The term "special", as used in this Appendix, means an item which has a special trim or embroidery or an item which is not plain white.

Item	Per piece	Per hundred pieces
1. Aprons, plain	$0.105	
2. Aprons, bib	.11	
3. Aprons, industrial	.20	
4. Coats, plain	.42	
5. Coats, special	.47	
6. Dresses, smocks, and Hoover	.55	
7. Dresses, bungalows	.40	
8. Dresses, special	.60

[Ceiling Price Regulation 126, Interpretation 1]

CPR 126—CEILING PRICES FOR PACIFIC NORTHWEST DOUGLAS FIR AND PONDEROSA PINE POLES AND PILING

INT. 1—SR 87 (GCPR) MARKUPS MAY NOT BE ADDED TO CPR 126 CEILINGS (SEC. 1)

Ceiling Price Regulation 126 establishes ceiling prices for Pacific Northwest Douglas Fir and Ponderosa Pine Poles and Piling. The question has arisen whether a reseller may add to the ceiling prices of an item within the coverage of CPR 126 the markup provided for in Supplementary Regulation 87 to the General Ceiling Price Regulation.

Such an addition to the ceiling price is not permissible.

Section 3 (b) (1) of SR 87 to the GCPR excludes from the coverage of SR 87 "resellers to whom a specific regulation has been or shall be made to apply". CPR 126 is such a specific regulation. Section 1 of CPR 126 states that the ceiling prices established by CPR 126 are for "all sales" or "the sales" of the items covered therein. The words "all sales" or "the sales" include sales by resellers. Therefore, SR 87 to the GCPR does not apply to resellers selling items subject to CPR 126.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

WILLIAM C. BURT,
Acting Chief Counsel,
Office of Price Stabilization.

AUGUST 22, 1952.

[Ceiling Price Regulation 166]

CPR 166—CEILING PRICES FOR TEXTILE PRODUCTS SOLD IN PUERTO RICO

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Ceiling Price Regulation 166 is hereby issued.

STATEMENT OF CONSIDERATIONS

This regulation establishes ceiling prices for textile products sold in Puerto Rico at various levels of distribution. This regulation supersedes the General Ceiling Price Regulation for sales of textile products manufactured in Puerto Rico and Ceiling Price Regulation 9 for sales of textile products imported from the United States and other countries.

Sales of textile products by religious or charitable institutions, by manufacturers of textile products manufactured in their own factories, and by custom tailors and dressmakers, are excluded from this regulation. Those sales continue to be covered by the General Ceiling Price Regulation.

The General Ceiling Price Regulation froze prices of textile products in Puerto Rico on the basis of the highest prices charged during the base period, December 19, 1950, to January 25, 1951. Ceiling Price Regulation 9 issued subsequently and applying only to commodities not manufactured or processed in Puerto Rico, established ceiling prices based on cost plus either the dollar and cent or the percentage markup received during the same base period as the General Ceiling Price Regulation, December 19, 1950, to January 25, 1951.

Imports of textile products into Puerto Rico increased materially soon after the outbreak in Korea. Due to anticipated shortages, merchants in their desire to increase their inventories bought large quantities of textile products thus creating a situation where the quantity of textile products available for consumption surpassed the demand. These large inventories caused the index of import prices to fall while the index of retail prices rose. These speculative markups prevailed during the base period of Ceiling Price Regulation 9, and thus became the basis for inflated ceiling prices not properly related to customary pre-Korea cost-price relationships.

In addition, although Ceiling Price Regulation 9 has proved a satisfactory interim regulation for distributors of textile products, many problems have been encountered in administering it due to the absence of written records of base period sales by a large number of sellers on which to base their markups. This condition, of course, made compliance and enforcement difficult. The issuance of a tailored regulation for sales of textile products in Puerto Rico is necessary to meet the problems of an unbalanced price structure resulting from speculative markups and the complexity of administration of Ceiling Price Regulation 9.

For the purpose of this regulation, textile products are divided into two groups, Group I comprising all textiles not listed in Group II, and Group II comprising certain textile products listed in section 1 of the regulation. Ceiling prices based on a percentage markup over cost are established for both groups. These markups were determined upon the basis of an island-wide survey and represents the prevailing markups over cost realized by Puerto Rican distributors of textile products immediately prior to Korea.

Provision is made for sales of textile products in job lots, consisting of merchandise generally classified as seconds, imperfects, substandards, remnants, and bad dies, for which Puerto Rico has always been a good market. Such special provisions are necessary as textile products in job lots are not customarily priced in the usual price pattern of regular textile products. Uniform markups are provided for sales of job lots, intact, as received, as well as when they are sold in pieces or when the job lots contain articles included in both Group I and II of textile products.

This regulation requires that sellers of textile products shall prepare and keep a textile reference book, in which they must enter, prior to the offer for sale or sale of textile products, the information required by section 5 of the regulation. The suggested form of reference book is substantially the same as that suggested for use during World War II by the Office of Price Administration. OPA's experience demonstrated the value of the reference book in securing compliance. At the same time, textile merchants in Puerto Rico acquired a system of keeping records of purchases and sales which many of them are still using.

The regulation also permits the pricing of fair trade commodities as now provided for in Supplementary Regulation 1 to Ceiling Price Regulation 9, and of commodities with uniform prices authorized to the manufacturer as now provided for in Supplementary Regulation 3 to Ceiling Price Regulation 9.

In the formulation of this regulation, there has been consultation with industry representatives, including trade associations, and consideration has been given to their recommendations. This consultation included meetings with the Industry Advisory Committee for Textiles. In the judgment of the Director, the provisions of this regulation are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended.

Every effort has been made to conform this regulation to existing business practices, cost practices, or methods or means or aids to distribution. Insofar as any provision of this regulation may operate to compel changes in the business practices, cost practices, or methods or means or aids to distribution, such provisions are found by the Director of Price Stabilization to be necessary to prevent certain circumventions or evasions of this regulation.

AUTHORITY: Sections 1 to 21 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101–2110, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR 1950 Sup.

SECTION 1. *What this regulation does.* (a) This regulation establishes ceiling prices for textile products at various levels of distribution. These new ceiling prices, after the effective date of this regulation, will supersede the ceiling prices established under any other price regulations or orders heretofore issued by the Office of Price Stabilization. This regulation is not applicable to sales of textile products by religious or charitable institutions, by manufacturers of textile products manufactured in their own factory, and by custom tailors and dressmakers.

(b) The term "textile products" when used in this regulation means a manufactured material or article consisting in chief part of wool or other animal fiber, cotton, rayon, silk, linen, or synthetic fiber by whatever process manufactured. For the purpose of this regulation, articles included within the definition of the term "textile products" are divided into two groups as follows:

GROUP I:
All textile products except headwear, footwear, and articles included in Group II.

GROUP II:
Lace, ribbon, crochet thread, hand knitting yarn, frogs, fringes, braids and edgings.
Sewing thread.
Slips, panties and brassieres.
Girdles.
Undershirts and drawers.
Children dresses and suits (sizes 12 or under in dresses and 16 or under in suits).
Nightgowns and pajamas.
Neckties.
Handkerchiefs.
Tablecloth and napkins.
Umbrellas.
Women's dresses with a delivered cost over $7.50 each.
Men's suits with a delivered cost over $20 each.
Trousers with a delivered cost over $7.50 each.

SEC. 2. *Geographical application.* This regulation is applicable only in Puerto Rico.

SEC. 3. *Ceiling prices for textile products*—(a) *Not part of job lot.* Your ceiling price for the sale of any textile product which is not part of a job lot is the delivered cost (as defined in section 21 of this regulation) multiplied by the applicable factor below:

Group	Sale at wholesale	Sale at retail
I	1.20	1.50
II	1.22	1.60

(b) *Job lots*—(1) *Sold intact, as received.* Your ceiling price for the sale of a job lot of textile products sold intact, as received, is the delivered cost of the job lot multiplied by the applicable factor set forth in paragraph (a) of this section.

(2) *Different products in a job lot.* Your ceiling price for the sale of individual articles included in a job lot of textile products are those prices which when added together will not exceed the ceiling price of the job lot when sold intact.

(3) *Job lot consisting of articles in Group I and Group II.* Your ceiling price for the sale of a job lot of textile products consisting of articles in both Group I and Group II (as defined in section 1 of this regulation) is the delivered cost multiplied by the lowest applicable factor (set forth in paragraph (a) of this section) to any article in the lot.

SEC. 4. *Identification of textile products.* You must assign a separate reference stock number to each shipment of a commodity, all the items of which have the same delivered cost, and must clearly identify the physical merchandise with the reference stock number by use of a label, tag, slip, sticker, mark or other similar appropriate marking.

SEC. 5. *Textile Reference Book.* (a) If your net sales for the last completed fiscal year which ended no later than December 31, 1951, were $6,000 or more, you must prepare a reference book (suggested form of which is contained in Appendix A to this regulation), which shall be kept by you and made available to the Office of Price Stabilization for examination on request, and in which you must enter, prior to the time any textile product included in this regulation is sold or offered for sale, the following information for each lot of an article, including job lots, contained in a shipment of textile products:

(1) Your own and your supplier's reference stock number.

(2) The unit in which you received delivery.

(3) The name of the commodity.

(4) The name and address of the supplier from whom the commodity was purchased.

(5) The date of delivery to you.
(6) The delivered cost per unit.
(7) The factor used in computing the ceiling price.
(8) The selling price per unit.

(b) If the commodity listed is a job lot, you must, in the column headed "Description of the Commodity", list all of the commodities in the job lot; in the column headed "Selling Price per Unit", list the selling price of each of the commodities in the job lot. The total of the individual selling prices must not exceed the ceiling price for the total job lot.

(c) All entries in the Textile Reference Book must be made in numerical sequence. Textile products received by you which are identical to products previously entered in the reference book must be re-entered under a new reference stock number.

SEC. 6. *Modification of ceiling prices by the Director of Price Stabilization.* The Director of Price Stabilization may at any time disapprove or reduce ceiling prices established under this regulation so as to bring them into line with the level of ceiling prices otherwise established by this regulation.

SEC. 7. *Petitions for amendment.* If you wish to have this regulation amended, you may file a petition for amendment in accordance with the provisions of Price Procedural Regulation 1, Revised.

SEC. 8. *Taxes.* You may collect, in addition to your ceiling price, any tax upon or incident to a retail sale of any item or items covered by this regulation if you state the tax separately and if the statute or ordinance does not prohibit sellers from stating and collecting the tax separately from the price.

SEC. 9. *Transfer of business.* If the business, assets or stock-in trade of any business dealing in the commodities covered by this regulation is sold or otherwise transferred after the effective date of this regulation, the ceiling prices of the transferee shall be the same as those which his transferor would have been subject to if no such transfer had taken place, and his obligation to keep records sufficient to verify such prices shall be the same. The transferor must turn over to the transferee prior to the transfer all records of transactions, including the textile reference book, which are necessary to enable the transferee to comply with the record provisions of this regulation.

SEC. 10. *Methods of delivery and terms of sale.* You are prohibited from changing your customary methods of delivery, terms, discounts, allowances, price differential or services supplied on sales of the commodities covered by this regulation, if the change would result in a higher price.

SEC. 11. *Calculations of ceiling prices involving fractions.* Fractions of a cent remaining after calculation of prices shall be dropped if the fraction is less than one-half cent and may be increased to the nearest higher cent if the fraction is one-half cent or more.

SEC. 12. *Fair trade commodities.* The ceiling prices established by this regulation may be adjusted in certain situations to minimum prices established under the Territorial Fair Trade Act of Puerto Rico, as follows:

(a) *Minimum prices established under Supplementary Regulation 1 to Ceiling Price Regulation 9.* Sellers of textile products covered by this regulation who have applied for and established minimum prices under the Territorial Fair Trade Act of Puerto Rico, in accordance with Supplementary Regulation 1 to Ceiling Price Regulation 9, may file an application with the Territorial Director of the Office of Price Stabilization for permission to continue to use such minimum prices. The application must state:

(1) The name and address of the applicant.

(2) The date on which the application required by Supplementary Regulation 1 to Ceiling Price Regulation 9 was filed with the Territorial Director of the Office of Price Stabilization, and the number of the order issued pursuant to that application.

(b) *Adjustment of ceiling prices established by this regulation to minimum prices established under the Territorial Fair Trade Act of Puerto Rico*—(1) *Who may apply.* Any seller seeking an adjustment under this regulation must file an application in accordance with Price Procedural Regulation 1, Revised, with the Territorial Director of the Office of Price Stabilization in Puerto Rico. The application shall state the following facts: Either (i) that his ceiling price for any commodity established by this regulation is less than the minimum price at which he was lawfully required to sell the commodity during the base period provided for in SR 1 to CPR 9, December 19, 1950, to January 25, 1951, under the provisions of a Territorial Fair Trade Act, and that he himself actually signed a fair trade minimum price contract or that the basic fair trade agreement was entered into in intraterritorial rather than interstate commerce and that the Territorial Fair Trade Act required non-signers who had notice, to comply; or (ii) that he has been permanently enjoined by a court from selling the commodity at less than such minimum price.

(2) *Amount of adjustment.* If the Office of Price Stabilization finds that the requirements of subparagraph (1) of this paragraph are met, the Director of the Office of Price Stabilization or his delegatee will issue an order permitting the ceiling price of the seller to be increased to the fair trade minimum price.

(c) Any person selling an article, the ceiling price for which is established under an order issued under this section of this regulation, need not prepare or maintain records showing how the ceiling price was determined for that article, as required by section 5 and section 17 of this regulation.

SEC. 13. *Branded commodities*—(a) *Uniform ceiling prices established under Supplementary Regulation 3 to Ceiling Price Regulation 9.* Sellers of branded textile products covered by this regulation, for which uniform dollar and cent ceiling prices have been established in Puerto Rico under Supplementary Regulation 3 to Ceiling Price Regulation 9, may continue to sell those commodities at the ceiling prices so established.

(b) *Establishment of uniform ceiling prices for branded textile products sold in Puerto Rico*—(1) *How retail ceiling prices are established.* The Director of Price Stabilization may, by order, upon application by the manufacturer who qualifies under section 12 (b) (1), of this regulation, establish uniform dollar and cents retail ceiling prices for branded textile products covered by this regulation sold in Puerto Rico whenever it appears, upon investigation by the Territorial Director of Price Stabilization, that:

(i) The article (or an article of the same type) was sold at retail in Puerto Rico at substantially uniform prices for a period immediately prior to January 26, 1951, and

(ii) The Director of Price Stabilization has previously, by order, established a uniform retail ceiling price for the article in the continental United States, and

(iii) The ceiling price requested for the article is no higher than the existing level of ceiling prices under this regulation.

(2) *How wholesale ceiling prices are established.* The Director of Price Stabilization may, by order, upon application by the manufacturer for a retail ceiling price, also establish a uniform wholesale ceiling price for branded textile products covered by this regulation whenever it appears, upon investigation by the Territorial Director of Price Stabilization, that:

(i) The applicant had a policy of uniform prices for sales in Puerto Rico at wholesale, for his branded merchandise for a period immediately prior to January 26, 1951, and can establish that the merchandise when sold at wholesale in Puerto Rico was sold at substantially uniform prices.

(3) *What the order may contain.* (i) An order may be issued under this section establishing uniform ceiling prices for all retail sales, or sales at wholesale, of an article covered by this regulation, although such sales may not otherwise be subject to this regulation.

(ii) Orders issued under this paragraph will generally include a provision requiring the applicant to tag or ticket the article or its container with the retail ceiling price as established under this regulation, and other specified information.

(iii) An order issued under this paragraph will require the applicant to send copies of the order and any subsequent amendments thereto to those purchasers for sale, of the articles covered by the order.

(iv) An order issued under this paragraph will ordinarily be in the form of applicant's selling price and retail ceiling price relationships. Such an order will ordinarily require the applicant to submit, from time to time as specified in the order, an identification of the articles which he is pricing pursuant to the terms of the order, and changes in his customers. Such an order in appropriate instances may also establish wholesale ceiling prices.

(4) *Who may apply.* (i) A manufacturer of a wholesaler of a branded textile product covered by this regulation selling at wholesale in Puerto Rico may apply under this paragraph if he can submit the information required by subparagraph (5) of this paragraph.

(ii) A group of manufacturers selling the same article in Puerto Rico under the same brand name may apply as a group under this paragraph if they can submit the information required by subparagraph (5) of this paragraph.

(5) *What the application must contain.* Two copies of each application must be filed with the Regional Director, Region 14, Office of Price Stabilization, Washington 25, D. C. The application must contain the following:

(i) Business name and address of the applicant.

(ii) An identification of the article for which the ceiling price is sought, including:

(a) The brand name identifying the article, and its style or lot number.

(b) An identification of the order issued by the Office of Price Stabilization under which his uniform ceiling price was established in the continental United States.

(c) His most recent invoice price and terms to various classes of retailers and wholesalers in Puerto Rico and in the continental United States.

(d) His suggested retail price, if any, for Puerto Rico immediately prior to January 26, 1951. (If he had a suggested retail price prior to January 26, 1951, he should submit evidence to show his method of retail price maintenance, such as national advertising, catalogues sent to retailers, advertising mats furnished retailers, etc. If he has no suggested retail price prior to January 26, 1951, or did not attempt to enforce his suggested retail price, but can show that the article sold at substantially uniform prices, he should submit a list of the names and addresses of all of his retailer-customers in Puerto Rico giving their retail selling price of the article immediately prior to January 26, 1951.)

(e) His suggested price for sales at wholesale, if any, in Puerto Rico, immediately prior to January 26, 1951 (including evidence to show his method of price maintenance), or if he has no such suggested price prior to January 26, 1951, or did not attempt to enforce such suggested price but can show that the merchandise was sold at substantially uniform prices, he should submit evidence similar to that specified for retail prices in subdivision (d) of this subparagraph.

(iii) The uniform retail and wholesale ceiling prices requested for the article in Puerto Rico.

(iv) In the case of wholesalers applying under this paragraph, the name and address of the manufacturer of the article and the manufacturer's style or lot numbers.

(v) In the case of a group of manufacturers applying for a single order covering the articles manufactured in common by the group, the application must contain, in addition to the requirements of subdivision (ii) of subparagraph (4) of this paragraph, a statement that each manufacturer of the group, who sold the article, maintained the same retail prices on the same article with the same brand.

(6) Any person selling an article, the ceiling price for which is established under an order issued under this section of the regulation, need not prepare or maintain records showing how the ceiling price was determined for that article, as required by section 5 and section 17 of this regulation.

SEC. 14. *Ceiling Prices for different cost inventories.* When you have purchased a commodity under separate invoices at different prices and you have in inventory identical items at different cost, your ceiling price for your entire inventory of identical items must be determined by one of the following methods. You must elect which of the three methods you will follow, and once having made that election you may not change to another method until you are authorized in writing to do so by the Territorial Director of the Office of Price Stabilization.

(a) *Last delivered cost.* Your ceiling price must be computed on the basis of the last delivered cost, provided the units of the commodity included in the last delivered cost are not less than 33 percent of inventory on hand (including units last received) of identical commodities at date of invoice corresponding to the last delivered cost.

(b) *First in-first out method.* You must compute the ceiling price for the number of identical items in your inventory listed in the first invoice received on the basis of that invoice cost and then compute the ceiling price for the number of identical items corresponding to the number of identical items received under the next succeeding invoice, and so on in chronological order.

(c) *Weighted average.* You must compute your ceiling prices on the basis of your weighted average delivered cost calculated as follows:

(1) Multiply each different delivered cost by the number of identical units in your inventory having such delivered cost. Add the products of the multiplication and divide this sum by the total number of identical items in the inventory. The quotient of this division is the weighted average delivered cost.

(2) Whenever you receive a new shipment of identical items at a cost which is different from the weighted average direct cost as determined in the next preceding calculation, and such shipment constitutes a quantity not less than 33 percent of inventory on hand (including units last received) you must recompute your ceiling price. The weighted average direct cost as determined in the next preceding calculation must be used as the direct cost of items on inventory before the new shipment was received. "Identical items" as used in this section means items of a commodity which normally sell at the same price and are generally regarded in the trade as identical.

SEC. 15. *Notification and posting*—(a) *Notification to purchasers, other than retail.* On and after the effective date of this regulation every seller of the commodities covered by this regulation, except at retail, shall, with each delivery, supply the purchaser with a statement of the ceiling prices of the commodities at time of delivery as follows: "The Office of Price Stabilization has established ceiling prices for this commodity at $____ on sales at wholesale and at $____ on sales at retail." The statement shall also indicate the seller's reference stock number, a notation of the section of this regulation under which the ceiling price has been determined, and the number and description of units sold.

(b) *Posting.* At all times, every seller offering to sell at retail the commodities covered by this regulation shall mark the selling prices of such commodity in a manner plainly visible to and understandable by the purchasing public. The selling price displayed must never exceed the ceiling price. The selling price may be marked on the commodity itself or may be posted at the place in the establishment where the commodity is offered for sale.

SEC. 16. *Sales slips and receipts.* Every seller of the commodities covered by this regulation who has customarily given purchasers sales slips or receipts, shall continue to do so. Upon request from a purchaser every seller of such commodity, regardless of previous custom, shall give the purchaser a receipt showing the date, the name and address of the seller, the quantity and description of the commodity and the price received for it.

SEC. 17. *Records.* If you are a seller of textile products of which you are the first purchaser in Puerto Rico, you must, in addition to the textile reference book provided in section 4 of this regulation, keep for examination by the Director of Price Stabilization for a period of two years, records, including purchase invoices, showing the basis upon which delivered cost (as defined in section 21 of this regulation) was computed.

SEC. 18. *Interpretations.* If you want an official interpretation of this regulation, you should write to the Territorial Counsel of the Office of Price Stabilization in Puerto Rico. Any section taken by you in reliance upon and in conformity with a written official interpretation will constitute action in good faith pursuant to this regulation. Further information on obtaining official interpretations is contained in Price Procedural Regulation 1, Revised.

SEC. 19. *Prohibitions and violations.* (a) You shall not do any act prohibited or omit to do any act required by this regulation, nor shall you offer, solicit, attempt, or agree to do or omit to do any such acts. Specifically, but not in limitation of the above, you shall not, regardless of any contract or other obligation, sell and no person in the regular course of trade or business shall buy from you at a price higher than the ceiling prices established by this regulation, and you shall keep, make, and preserve true and accurate records and reports required by this regulation. Prices lower than the ceiling prices may be charged, paid, or offered.

(b) If you violate any provisions of this regulation, you are subject to criminal penalties, enforcement action, and actions for damages.

(c) If any person subject to this regulation fails to prepare or keep any record or file any report required by this regulation in connection with the establishment of his ceiling price, or if any person subject to this regulation fails to establish a ceiling price or apply to the Office of Price Stabilization for the establishment of a ceiling price, if he is required to do so the Director of Price Stabilization may issue an order fixing his ceiling prices. Any ceiling price fixed in this manner will be in line with ceiling prices generally established by this regulation. The order fixing the ceiling price may apply to all deliveries or transfers completed prior to the date of issuance of the order. The issuance of such an order will not relieve the seller of his obligation to comply with the requirements of this regulation or of the various penalties for failure to do so.

SEC. 20. *Evasions.* Any means or device which results in obtaining indirectly a higher price than is permitted by this regulation, or in concealing or falsely representing information as to which this regulation requires records to be kept, is a violation of this regulation. This prohibition includes, but is not limited to means or devices making use of commissions, services, cross sales, transportation arrangements, premiums, discounts, special privileges, upgrading, tie-in-agreements, and trade understandings, as well as the omission from records of true data and the inclusion in records of false data.

SEC. 21. *Definitions and explanations.* (a) "Custom tailor and dressmaker" means manufacturers who sell to ultimate consumers in their own establishment, garments manufactured by them to individual specifications and at the special order of such ultimate consumers.

(b) "Delivered cost." This term means the sum of the following amounts, if separately stated, but includes only the amounts actually incurred by you:

(i) Net invoice cost (as defined in paragraph (d) of this section) to the first purchaser in Puerto Rico.

(ii) Transportation costs from point of manufacture to point of delivery. If during the period December 19, 1950 to January 25, 1951, you had in effect a method of averaging transportation costs, you must continue to use that method of averaging transportation cost.

(iii) Taxes.

(iv) Insurance.

(c) "Job lot" means a single purchase of a group of units of textile products, all of which in trade terms are "remnants," "shorts," "seconds," "pound goods," "imperfects," "close cuts," or "substandards."

(d) "Net invoice cost." This term refers to your invoice cost, less any discount you took, or could have taken, except the discount for prompt payment.

(e) "Person." This term includes any individual, corporation, partnership, association, or any other organized group of persons, or legal successors or representatives of the foregoing, and the United States or any other government or its political subdivisions or agencies.

(f) "Records." This term means books of account, sales lists, sales slips, orders, vouchers, contracts, receipts, invoices, bills of lading and other papers and documents.

(g) "Reference stock number" means the number employed by the manufacturer or supplier and the seller to identify a textile product.

(h) "Sales at retail" and "retailer." Sale at retail means a sale to a person who buys the particular commodity for his own consumption or that of his household, or a sale to commercial, industrial, institutional, or governmental users when such users buy the commodities covered by this regulation from retailers who have always sold such commodities at retail prices without regard to the class of purchaser. A seller who in the regular course of trade or business makes sales at retail is a retailer.

(i) "Sale at wholesale" and "wholesaler." Sale at wholesale means sales to retailers or to commercial, industrial, institutional, or governmental users. A person, who in the regular course of trade or business makes sales at wholesale is a wholesaler.

(j) "Textile reference book" means a book containing the seller's descriptive entries of the stock which he has on hand and which he is offering for sale.

(k) "Textile products" as used in this regulation is defined in section 1.

(l) "You." The pronoun "you" as used in this regulation indicates the person subject to the regulation.

Effective date. This regulation shall become effective August 27, 1952.

NOTE: The record-keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 22, 1952.

[General Ceiling Price Regulation, Interpretation 59]

GCPR, INT. 59—WHERE MANUFACTURERS SELL A DESKIDDED TIRE THE DESKIDDED TIRE IS A NEW COMMODITY AND DOES NOT REPRESENT THE SALE OF A SEPARATE SERVICE (GENERAL)

A seller of automobile tires offered certain tires for sale during the GCPR base period. Subsequently, the seller introduced a new process whereby he places narrow sharp incisions in the tread of a tire. The purpose of the operation, described as "deskidding," is to make the tire more resistant to skidding. The seller now proposes to sell the tires in the same form in which he sold them during the GCPR base period or, at the option of the purchaser, in the deskidded form. The question is thus presented whether in selling a deskidded tire, the seller is selling a new commodity, the ceiling price for which is to be determined under the GCPR, or whether he is selling a tire together with the separate service of deskidding, in which latter case his ceiling price under CPR 34 for the service of deskidding may be added to the ceiling price applicable to the undeskidded tire.

When a seller supplies a purchaser with a tire which has been deskidded by the seller at the request of the purchaser, the seller is selling a new commodity, a deskidded tire, rather than a tire plus the service of deskidding. The ceiling price for the deskidded tire is to be determined under the GCPR, which regulation governs ceiling prices applicable to sales of tires by manufacturers and resellers.

The sale of deskidded tires is distinguishable from the type of case where a vehicle owner drives into the place of business of a tire dealer and arranges for the removal of tires from his vehicle for the purpose of having them deskidded, in which case the ceiling price for the service rendered would be determinable under CPR 34, the services regulation.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

HERBERT N. MALETZ,
Chief Counsel,
Office of Price Stabilization.

[General Ceiling Price Regulation, Supplementary Regulation 115]

GCPR, SR 115—CEILING PRICES FOR MANUFACTURERS OF NEW WOODEN POTATO BARRELS PRODUCED IN MAINE AND SOLD FOR DELIVERY TO POTATO GROWERS AND POTATO DISTRIBUTORS IN AROOSTOOK COUNTY, MAINE

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161 and Economic Stabilization Agency General Order No. 2, this Supplementary Regulation No. 115 to the General Ceiling Price Regulation is hereby issued.

STATEMENT OF CONSIDERATIONS

This supplementary regulation to the General Ceiling Price Regulation establishes new ceiling prices at the manufacturing level for wooden potato barrels produced in Maine and sold for delivery to potato growers and distributors in Aroostook County, Maine.

Aroostook County, the northernmost county of the state, is the dominant potato growing area in Maine. Most of the potato barrels manufactured in Maine are produced in Aroostook County.

Potato barrels are used in the field in harvesting the potato crop, in transporting it to storage bins, and as temporary containers in the sorting, grading, and preparation of the potatoes for shipment. They are not generally used as shipping containers.

Because of the small time interval between the growing season and the onset of freezing weather, speed is essential in harvesting the Aroostook County potato crop. Consequently, an adequate supply of barrels is essential to assure the quick removal of the crop from the ground.

Fifteen potato barrel producers in Aroostook County manufacture about fifty thousand wooden potato barrels annually, with a total sales volume of approximately one hundred thousand dollars. Each manufacturer has, on the average, three employees.

Under this supplementary regulation each manufacturer may recalculate his ceiling prices by adding thirty percent to the ceiling prices which he established under the General Ceiling Price Regulation for sales of wooden potato barrels of the same quality and specifications.

This supplementary regulation is issued as an emergency measure to provide relief needed by the manufacturers, and thereby to encourage sufficient production for harvesting the 1952 potato crop in Aroostook County. Because December 19, 1950 to January 25, 1951, the base period of the GCPR, was a period of mid-winter inactivity for this industry, barrel manufacturers established their ceiling prices at the pre-Korean level that existed in the preceding summer of 1950. The prices prevailing in June 1950 were based on material costs that prevailed six to nine months previously, and do not reflect post-Korean increases in raw material and labor costs. Moreover, market prices for potato barrels were depressed in the summer of 1950, as the result of an influx of inferior barrels, which have since disappeared from the market.

A producer who cannot determine his ceiling price for a barrel under this supplementary regulation may apply to the OPS for the establishment of a ceiling price, under section 7 of the General Ceiling Price Regulation.

Although potato barrels are essential in harvesting the potato crop in Aroostook County, they constitute an insignificant part of the total cost of the crop. Consequently, this action should have little, if any, effect on the market price of potatoes.

In the judgment of the Director of Price Stabilization, the provisions of this supplementary regulation are generally fair and equitable and are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended.

So far as practicable, the Director of Price Stabilization gave due consideration to the national effort to achieve maximum production in furtherance of the objective of the Defense Production Act of 1950, as amended; to prices prevailing during the period from May 24 to June 24, 1950, inclusive; to prices prevailing January 25 to February 24, 1951, inclusive; to prices prevailing just before the issuance of this supplementary regulation, and to relevant factors of general applicability.

In the formulation of this supplementary regulation, there has been consultation with industry representatives, and consideration has been given to their recommendations.

REGULATORY PROVISIONS

Sec.
1. What this supplementary regulation does.
2. Ceiling prices for wooden potato barrels.
3. Definition.
4. Incorporation of GCPR provisions.

AUTHORITY: Sections 1 to 4 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101-2110, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.

SECTION 1. *What this supplementary regulation does.* This supplementary regulation supersedes sections 3, 4 and 6 of the General Ceiling Price Regulation with respect to manufacturers' sales of new wooden potato barrels produced in Maine, and sold for delivery to potato growers and potato distributors in Aroostook County, Maine, and establishes new ceiling prices for such sales.

SEC. 2. *Ceiling prices for wooden potato barrels.* The ceiling prices established under the General Ceiling Price Regulation for manufacturers' sales of new wooden potato barrels produced in Maine, and sold for delivery to potato growers and potato distributors in Aroostook County, Maine, are hereby increased thirty percent.

SEC. 3. *Definition.* When used in this supplementary regulation, the term "wooden potato barrels" shall mean barrels made from cedar staves sawed from cedar blocks, having cleated cedar bottoms, and ash or elm hoops, with a capacity of at least 2¾ bushels, or approximately 165 pounds of potatoes.

SEC. 4. *Incorporation of GCPR Provisions.* Except as herein specifically modified, all of the provisions of the General Ceiling Price Regulation remain in effect.

Effective date. This supplementary regulation shall become effective August 22, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 22, 1952.

[General Overriding Regulation 23, Amdt. 4]

GOR 23—TERRITORIAL EXEMPTIONS

EXEMPTION OF MEALS SERVED BY AMERICAN PLAN HOTELS AND BOARDING HOUSES

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabilization Agency General Order No. 2, this Amendment 4 to General Overriding Regulation 23 is hereby issued.

STATEMENT OF CONSIDERATIONS

Several American plan hotels and company owned boarding houses in the territories and possessions of the United States have pointed out to the Office of Price Stabilization the difficulties of operating their establishments because of the difficulties in separating costs attributable to their American plan operation under CPR 11, and costs attributable to their regular restaurant operations under CPR 120. Such administrative difficulties have been especially highlighted in areas where the Office of Rent Stabilization does not function. Several hotels and boarding houses in such areas have increased their flat charges for meals and lodging, and attributed such increase to increased rates for rent. In such cases it has proven extremely difficult to properly administer the applicable regulation.

In the opinion of the Director, the difficulties of continuing ceiling price restrictions imposed on meals served by American plan hotels and boarding houses, in areas not subject to rent control, would involve an administrative and enforcement burden out of all proportion to the importance of keeping them under price control. This amendment therefore, exempts from all Office of Price Stabilization regulation, American plan hotels and boarding houses, in the territories, which are not subject to rent control.

In the formulation of this amendment there has been consultation with representatives of the industry in the Territories, and consideration has been given to their recommendations. In the opinion of the Director this amendment is fair and equitable and is consistent with the purposes of the Defense Production Act of 1950 as amended.

AMENDATORY PROVISIONS

1. Section 2.2 of General Overriding Regulation 23 is amended by adding a new paragraph (f) following the present paragraph (e), as follows:

(f) *American plan hotels and boarding houses.* American plan hotels and boarding houses which make a flat charge for meals and lodging, and which are not subject to the rent control program of the Office of Rent Stabilization. This exemption applies only to sales of meals made by such institutions in connection with the rental of sleeping quarters, and for which a flat charge covering meals and lodging is made.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Effective date. This Amendment 4 to General Overriding Regulation 23 is effective August 22, 1952.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 22, 1952.

Chapter IV—Salary and Wage Stabilization, Economic Stabilization Agency

Subchapter D—National Enforcement Commission

[General Procedural Reg. 1, Revised]

GPR 1—GENERAL PROCEDURAL REGULATION, REVISED

Pursuant to the Defense Production Act of 1950, as amended (Pub. Law 774, 81st Cong.; Pub. Laws 96 and 429, 82d

Cong.); Executive Order 10161, as amended (16 F. R. 3503), and General Orders Nos. 15 and 18, Economic Stabilization Administrator, this Enforcement Procedural Regulation is hereby issued.

STATEMENT OF CONSIDERATIONS

This regulation establishes the procedural requirements to govern proceedings for the imposition of disallowances resulting from contraventions of the Defense Producton Act of 1950, as amended, by contraventions of regulations and orders relating to the stabilization of wages, salaries, and other compensation of employees within the respective jurisdictions of the Wage Stabilization Board, the Salary Stabilization Board and the Railroad and Airline Wage Board promulgated or approved by the Economic Stabilization Administrator, the Wage Stabilization Board, the Salary Stabilization Board, or the Railroad and Airline Wage Board.

In the formulation of this regulation, due consideration has been given to the standards and procedures set forth in Titles IV and VII of the Defense Production Act of 1950, as amended, hereinafter referred to as the act.

R. 8789; 3 CFR, 1951 Supp.

GENERAL

SECTION 1.1 *Enforcement proceedings.* Whenever it has been determined that any wage, salary, or other compensation has been paid in contravention of the regulations and orders issued or promulgated under the act, the extent to which any such wage, salary, or other compensation payment shall be disregarded by the executive departments and other governmental agencies in determining the costs or expenses of any employer for the purposes of any other law or regulation shall be prescribed in accordance with the provisions of section 405 (b) of the act. Any wage, salary, or other compensation paid in contravention of the regulations and orders issued or promulgated under the act may be disallowed in whole or in part for one or more of the following purposes:

(a) Calculating deductions or the basis for determining gain under the Revenue Laws of the United States;

(b) Determining costs and expenses under any contract made by or on behalf of the United States, either directly or indirectly;

(c) Establishing any maximum price pursuant to the act; and

(d) Determining the costs or expenses of any person for the purpose of any other law or regulation.

SEC. 1.2 *Institution of enforcement proceedings.* Whenever the Office of Salary Stabilization, the Wage Stabilization Board, or the Railroad and Airline Wage Board has reason to believe that any person has paid wages, salaries, or other compensation in contravention of the act or regulations and orders issued or promulgated pursuant thereto or determinations made thereunder, such Board or office may institute an enforcement proceeding to ascertain whether a contravention has occurred and to determine the amount to be certified to and disregarded by the executive departments and other government agencies.

SEC. 1.3. *Parties.* The term "party" or "parties," within the meaning of this regulation, shall mean the respective representative of the Office of Salary Stabilization, the Wage Stabilization Board, or the Railroad and Airline Wage Board, the respondent, any person executing a Stipulation for Certificate of Disallowance under section 8.1 of this regulation, and, to the extent permitted by section 3.1 of this regulation, any person intervening in any enforcement proceeding.

PLEADINGS; APPEARANCES; MOTIONS; HEARINGS; MISCELLANEOUS

SEC. 2.1 *Complaint.* (a) Whenever it appears to the Office of Salary Stabilization, the Wage Stabilization Board, or the Railroad and Airline Wage Board that any person has contravened the Act or any regulation or order issued or promulgated pursuant thereto by the Economic Stabilization Administrator or by any such Board or office and that an enforcement proceeding in respect thereto should be instituted before the National Enforcement Commission or the Commission's designee, it shall issue a complaint and cause the original thereof and one copy to be filed with the National Enforcement Commission, in Washington, D. C., and copies to be served upon all the parties. Where the respondent is a partnership, service must be made upon each individual partner against whose interest in such partnership it is intended to request the imposition of a sanction.

(b) The complaint shall set forth (1) a concise statement of the facts alleged to constitute the contravention; (2), in general, the sanctions which may be imposed therefor; (3) that the respondent has the right to submit a written answer; (4) that where no answer to the complaint is filed the allegations of the complaint shall be deemed to have been admitted; and (5) that the respondent has a right to a hearing at which he may present evidence and testimony and examine and cross-examine witnesses.

SEC. 2.2 *Answer.* (a) Within fifteen days after the receipt of the complaint, the respondent shall file a written answer with the National Enforcement Commission in Washington, and shall serve a copy on the Board or Office which issued the complaint, by registered mail. The answer shall be signed by a responsible officer if the respondent is a corporation; if the respondent is a partnership, by one of the partners; and if the respondent is the sole proprietor, by the proprietor. If the answer is signed by a partner for a partnership respondent, or by an officer for a corporation respondent, there must be attached thereto a certificate showing his authority to act on behalf of the partnership or corporation.

(b) The answer shall specifically and separately admit or deny each allegation of the complaint. It shall also contain a concise statement of the facts which constitute the grounds of defense, if any, and shall state whether or not the wages, salaries, or other compensation alleged in the complaint to have been paid in contravention of the Act, or any regulation, order or determination issued or promulgated thereunder, have in fact been paid. If the answer admits that the wages, salaries, or other compensation were paid as alleged in the complaint, but alleges that such wages, salaries, or other compensation were not paid in contravention of the Act, or any regulation or order issued or promulgated thereunder, the answer shall specify the provision or provisions of the Act, regulation, order or determination pursuant to which such wages, salaries, or other compensation are alleged to have been authorized.

(c) If no answer is filed, all allegations of the complaint shall be deemed admitted to be true. If an answer is filed, any allegation in the complaint not specifically denied in the answer shall be deemed admitted to be true.

SEC. 2.3 *Hearings.* (a) The hearing for the purpose of taking evidence upon the issues raised by the parties' pleadings shall be conducted by an Enforcement Commissioner. Enforcement Commissioners shall be appointed by the Economic Stabilization Administrator and shall be designated by the Chairman of the National Enforcement Commission for hearing assignments. For cause, an Enforcement Commissioner may be designated to take the place of the Enforcement Commissioner previously designated to conduct the hearing. Such hearings shall be public unless otherwise ordered by the National Enforcement Commission or by the Enforcement Commissioner presiding at the hearing.

(b) Upon the expiration of the time within which the respondent must answer, the National Enforcement Commission shall, as soon as possible, designate an Enforcement Commissioner for the hearing, fix the time and place of hearing and shall give not less than 15 days' written notice thereof to the parties. The notice shall set forth (1) the time and place of the hearing; (2) that the respondent has the right to a hearing before an Enforcement Commissioner, as provided in paragraph (a) of this section; (3) that at such hearing the respondent may be represented by counsel or other representative and will be given reasonable opportunity to present testimony and evidence and to examine and cross-examine witnesses on all matters relating to the allegations of the complaint; and (4) the name and post office address of the designated Enforcement Commissioner.

(c) In the event the Enforcement Commissioner designated to conduct the hearing becomes unavailable after the hearing has been concluded and before the filing of his findings and determination the National Enforcement Commission may transfer the case to itself for purposes of further hearing or issuance of findings and determination on the record, or may designate another Enforcement Commissioner for such purpose.

(d) Hearings shall be held in Washington, D. C., in the cities in which the respective regional offices of the Wage Stabilization Board or the Office of Salary Stabilization are located, or in such other places as may be specified by the Chairman of the National Enforcement Commission or the Enforcement Commissioner. Any party may request a change of the place of hearing on the ground of hardship. Such request shall be in writing and shall be sent to the designated Enforcement Commissioner at his office and post office address within 5 days after the receipt of the order designating an Enforcement Commissioner. The granting of any request for change in the place of hearing shall be in the discretion of the designated Enforcement Commissioner, who shall inform the parties of his decision.

SEC. 2.4 *Appearances.* The respondent or any person authorized to intervene in the proceeding may appear in his own behalf or by a duly authorized representative.

SEC. 2.5 *Motions.* Motions made prior to the commencement of the hearing, including motions for continuance, shall be made upon notice to the other parties and shall be filed with the designated Enforcement Commissioner at his office and post office address at least 5 days prior to the date of hearing. The granting of motions for continuance shall be at the discretion of the Enforcement Commissioner, who shall have discretion to continue the hearing from day to day, or adjourn to a later date or to a different place by announcement thereof at the hearing, or by other appropriate notice.

SEC. 2.6 *Transcript.* An official reporter shall make a stenographic report of every hearing and the transcript of the hearing shall become part of the record of each case. Stenographic transcripts of the proceeding shall be paid for by the parties requesting them, at the regular cost per copy.

SEC. 2.7 *Stipulation of fact.* The parties are authorized to enter into stipulations with respect to any relevant facts. Such stipulations may be filed at the hearing by any party to the stipulation.

SEC. 2.8 *Conduct of hearings.* The hearing shall be conducted by the Enforcement Commissioner in a fair and impartial manner. The rules of evidence prevailing in courts of law or equity shall not be controlling. The Enforcement Commissioner shall administer oaths and affirmations. Reasonable opportunity shall be afforded to all parties for the submission and consideration of evidence and arguments and the examination and cross-examination of witnesses.

SEC. 2.9 *Exclusion from hearings.* Contemptuous conduct at any hearing shall be ground for exclusion from the hearing. The refusal of a witness at any hearing to answer any question which has been ruled to be proper shall, in the discretion of the Enforcement Commissioner, be ground for disregarding in whole or in part the testimony previously given by such witness.

INTERVENTION AND SUBPOENAS

SEC. 3.1 *Request to intervene.* Any person desiring to intervene in a hearing shall make a motion for intervention. Such motion may be made either in writing or orally on the record, and shall state the ground upon which intervention is sought. The Enforcement Commissioner shall afford the other parties an opportunity to oppose the motion for intervention. The Enforcement Commissioner shall have discretion to determine the extent and terms of intervention, and shall inform all parties of his decision.

SEC. 3.2 *Subpoenas.* (a) The Enforcement Commissioner may issue subpoenas and subpoenas duces tecum requiring the attendance and testimony of any witness and the production of any books, papers, records, or other documents material to any enforcement case. Applications for subpoenas made prior to the hearing shall be filed with or sent to the designated Enforcement Commissioner at his post office address. Applications for subpoenas may be ex parte. In issuing subpoenas the Enforcement Commissioner shall comply with section 705 (a) of the Defense Production Act of 1950, as amended.

(b) Subpoenas duces tecum shall clearly describe so far as practicable the records, books, documents, or other material sought and shall specify the person to be served by name or official title.

(c) Such subpoenas and subpoenas duces tecum shall be issued only after the scope and purpose thereof have been ascertained by the Enforcement Commissioner and it has been established by the party making the application that no adequate and authoritative data are available from any Federal or other responsible agency.

FINDINGS AND DETERMINATION; RECORD

SEC. 4.1 *Findings and determination of Enforcement Commissioners.* (a) Proposed findings of fact and a recommended determination, as well as briefs in support thereof, may be submitted to the Enforcement Commissioner by any party within 15 days after the conclusion of the hearing or such additional time as the Enforcement Commissioner may prescribe at the conclusion of the hearing.

(b) As soon as feasible after the conclusion of the hearing, the Enforcement Commissioner shall make his findings and determination.

(c) The findings and determination of the Enforcement Commissioner shall be in writing. If, upon the entire record of the case, the Enforcement Commissioner finds that any wage, salary, or other compensation payment has been made in contravention of the act and the regulations or orders issued thereunder, he shall determine the amount to be disregarded or disallowed, the purpose or purposes for which such amount shall be disregarded or disallowed, and by what departments or government agencies such amount shall be disregarded or disallowed.

(d) In determining costs or expenses to be disregarded or disallowed, the Enforcement Commissioner shall comply with the provisions of General Order 15, Economic Stabilization Administrator.

(e) The Enforcement Commissioner shall file the original and two copies of his findings and determination with the National Enforcement Commission and cause a copy thereof to be served upon each of the parties. Upon the filing of the findings and determinatioh, the case will be transferred to the National Enforcement Commission. Service of the findings and determination shall be complete upon mailing.

(f) If no appeal is filed as hereinafter provided, the findings and determination of the Enforcement Commissioner shall, in the absence of clear and prejudicial error, be adopted by the National Enforcement Commission and a certificate of disallowance based thereon issue to the appropriate departments or agencies of the government.

SEC. 4.2 *Record.* The complaint and any amendments thereto, notice of hearing, order designating Enforcement Commissioner, answer and any amendments thereto, motions, rulings, orders, and stenographic report of the hearing, stipulations and exhibits, and such

other documents as the Enforcement Commissioner may deem proper, together with the findings and determination of the Enforcement Commissioner, shall constitute the record in the case.

APPEALS

SEC. 5.1 *Appeals to the National Enforcement Commission*—(a) *Right of appeal.* Any party may appeal to the National Enforcement Commission from the findings and determination of the Enforcement Commissioner.

(b) *Form and contents of appeal.* The appeal shall be in writing and shall state specifically the objections to the findings and determination from which the appeal is taken. No new evidence shall be considered on appeal.

(c) *Time and place of filing appeals.* An appeal may be taken within 30 days after service on the parties of the findings and determination. The appeal and the original and two copies of any memorandum or brief in support thereof shall be filed with the National Enforcement Commission, Washington 25, D. C., and a copy thereof shall be served upon each of the other parties. If timely request is made to the National Enforcement Commission, the time for filing an appeal and such memorandum or brief may be extended. The extension of time for filing such an appeal and such memorandum or brief is solely within the discretion of the National Enforcement Commission.

(d) *Submission of briefs on appeal.* Within 10 days after the filing of an appeal any other party may file a memorandum or brief with respect to any issues raised by the appeal. The original and two copies of any such memorandum or brief shall be filed with the National Enforcement Commission and a copy thereof shall be served upon each of the other parties.

(e) *Oral argument on appeal.* The appellant may request oral argument on appeal at the time of the filing of the appeal. Any other party may request oral argument within 10 days after the filing of the appeal. Such requests shall be in writing and shall be addressed to the National Enforcement Commission. The National Enforcement Commission shall give timely notice in writing of its action on the request for oral argument to all parties.

SEC. 5.2 *Decision on appeal.* (a) The National Enforcement Commission shall render its decision upon the entire record of the case including the record presented to the Enforcement Commissioner at the hearing, the findings and determination of the Enforcement Commissioner, and any memoranda or briefs submitted in connection with the appeal by any of the parties. The National Enforcement Commission may affirm, modify, or reverse the findings and determination of the Enforcement Commissioner in whole or in part, may remand the case for further hearing, or may dismiss the complaint.

(b) Copies of the findings and determination shall be sent to the respondent by registered mail, and copies shall be mailed to each other party. Within 10 days after such mailing, upon notice to the other parties, any party may petition the National Enforcement Commission for reconsideration of its findings and determination. The National Enforcement Commission shall give notice in writing to all parties of its action on such petition.

(c) The findings and determination of the National Enforcement Commission shall be final.

CERTIFICATES

SEC. 6.1 *Certificate of disallowance.* Whenever there has been a final decision in an enforcement proceeding imposing a disallowance sanction, as defined in section 1.1 of this regulation, the National Enforcement Commission shall issue a Certificate of Disallowance setting forth the name and address of the respondent or respondents and the amount which shall be disallowed and disregarded by any Executive Department or other agency or departments or agencies of the government in determining the costs and expense of the respondent. The certificate of disallowance shall be transmitted by the National Enforcement Commission to the appropriate Executive Departments or other agencies of the government and a copy served upon the appropriate board or office and the respondent. The certificate of disallowance shall be conclusive for the purposes stated therein.

NATIONAL CASES

SEC. 7.1 *National cases.* Whenever the National Enforcement Commission deems it necessary to effectuate the policies of the Act or to avoid unnecessary costs or delay it may, at any time after a complaint has issued, order that such complaint and any proceeding which may have been instituted with respect thereto, be transferred to and continued before it or any of its members. The provisions of sections 2, 3, 4, and 5 hereof shall, insofar as applicable, govern proceedings pursuant to this section before the National Enforcement Commission or any member thereof.

STIPULATIONS FOR CERTIFICATES

SEC. 8.1 *Stipulations for Certificates of Disallowance.* (a) The parties to an enforcement proceeding may enter into stipulations providing for the entry by the National Enforcement Commission of a Certificate of Disallowance upon consent of the parties; such a stipulation may be entered into prior to the issuance of the complaint, or at any stage of an enforcement proceeding.

(b) Stipulations shall set forth sufficient facts to establish: (1) That the wage, salary or other compensation which is the subject of the enforcement proceeding relates to employees within the jurisdiction of the Wage Stabilization Board, the Salary Stabilization Board or the Railroad and Airline Wage Board; (2) that the respondent has engaged in conduct in violation of section 405 (b) of the Defense Production Act of 1950, as amended, by contravening a regulation or order issued or promulgated pursuant to the act; (3) whether and by what means the respondent has come into compliance with the appropriate regulations; (4) the amount which the parties have agreed shall be disregarded or disallowed by a department or agency of the government, which departments or agencies of the government shall disregard or disallow such amount, and the purpose for which such departments or agencies shall disregard such amount; (5) in a proper case, the extenuating or mitigating circumstances, if any, which, in the opinion of the parties, justify a disallowance of less than the full amount of the illegal payment, on the basis of the standards set forth in General Order 15 of the Economic Stabilization Administrator; and (6) a waiver by each respondent of his or its right to all other and further proceedings under this regulation.

(c) Stipulations for Certificates of Disallowance upon consent of the parties shall be signed by the parties and transmitted to the National Enforcement Commission. The National Enforcement Commission shall issue and transmit a certificate of disallowance based upon such stipulation in accordance with the procedure set forth in section 6.1 of this regulation, except that the National Enforcement Commission may, in the exercise of its discretion, disapprove such a stipulation, and refuse to issue a certificate of disallowance based thereon under the following circumstances only:

(1) The employees to whom the contravening payments were made were not within the jurisdiction of the Board or Office that is a party to the stipulation; or

(2) The stipulation has not been executed by all respondents on whom service of a copy of the complaint would have been required in a plenary proceeding, pursuant to section 2.1 (a) of this regulation, or has not been executed by their duly authorized representatives, or, in the case of a corporate respondent, the authority of the person to execute the stipulation on its behalf has not been made a part of the stipulation; or

(3) The sanction consented to by the respondent in the stipulation is not in conformity with the disallowance policies set forth in Economic Stabilization Administrator's General Order 15 or with the policies of the National Enforcement Commission as set forth in its decisions. The amount of the stipulated disallowance shall not be subject to review unless it is apparent that the amount of the disallowance consented to is unwarranted by the facts of the case as stipulated; or

(4) Assuming the facts of the stipulation to be true, it appears therefrom that the respondent has not contravened an order or regulation issued or promulgated under the act.

(d) If the National Enforcement Commission refuses to issue a certificate of disallowance based on such stipulation, it shall issue a decision setting forth the reasons for such refusal and serve it upon the parties. Stipulations for entry of certificates of disallowance upon consent of the parties shall be without prejudice. The refusal of the National Enforcement Commission to issue a certificate based upon such a stipulation shall not preclude either the appropriate agency from issuing a complaint involving the same alleged contravention or the parties from entering into another, different stipulation, also subject to the provisions of this regulation.

CONSOLIDATION

SEC. 9.1 *Consolidation.* Whenever the National Enforcement Commission deems it necessary, in order to effectuate the policies of the act or to avoid unnecessary, cost or delay, it may order that one or more complaints issued by the Wage Stabilization Board, the Office of Salary Stabilization or the Railroad and Airline Wage Board or any proceeding or proceedings which have been instituted and are beyond the complaint stage be consolidated with any other proceeding which may have been instituted and be heard as one consolidated proceeding before a Regional Commissioner or before the National Enforcement Commission.

INTERPRETATIONS

SEC. 10.1 *Interpretations.* The Enforcement Commissioner, in making his findings and determinations, and the National Enforcement Commission in making its decisions, shall, to the extent applicable, be governed by the established regulations, interpretations, and policies formulated by the Board or Office involved in the enforcement proceeding.

SERVICE

SEC. 11.1 *Service.* (a) Complaints of the appropriate agencies and orders, decisions, certificates, and other process of the National Enforcement Commission or its agent may be served personally or by registered mail or by leaving a copy thereof at the principal office or place of business or last known residence of the person required to be served. The verified return by the individual so serving the same, setting forth the manner of such service, shall be proof of the same, and the return of the post office receipt therefor when registered and mailed, as aforesaid, shall be proof of service of the same.

(b) Except as otherwise provided in this regulation, service of papers by a party on other parties shall be made by registered mail or in any manner provided for the service of papers in a civil action by the law of the State in which the hearing is pending.

(c) When service is made by registered mail, the post office receipt shall be proof of service. When service is made in any manner provided by State law, proof of service shall be made in accordance with such law.

EFFECT ON OTHER ORDERS; EFFECTIVE DATE

SEC. 12.1 *Effect of this regulation on other orders.* Any orders or regulations or parts of orders or regulations the provisions of which are inconsistent with the provisions of this regulation are hereby superseded, except that, with respect to cases pending on or before July 29, 1952 (as such cases are defined in section 3 of the National Enforcement Commission Interim Procedural Order, adopted July 30, 1952), the National Enforcement Commission General Procedural Regulation No. 1, promulgated July 30, 1952 (17 F. R. 7087), and Interim Procedural Order, adopted July 30, 1952 (17 F. R. 7086), shall continue in effect, for the limited purposes described in said Interim Procedural Order, until final disposition of such pending cases, after which said regulation and said order shall be deemed to have been superseded, without further order.

SEC. 12.2 *Effective date.* This regulation is effective upon publication in the FEDERAL REGISTER.

ROGER L. PUTNAM,
Economic Stabilization Administrator.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Bureau of Animal Industry

[9 CFR Part 94]

EXISTENCE OF RINDERPEST OR FOOT-AND-MOUTH DISEASE; IMPORTATIONS PROHIBITED

DETERMINATION OF NON-EXISTENCE IN MEXICO

Notice is hereby given in accordance with section 4 (a) of the Administrative Procedure Act (5 U. S. C. 1003(a)), that the Secretary of Agriculture pursuant to the authority conferred upon him by section 306 of the Tariff Act of 1930 (19 U. S. C. 1306) proposes to determine, and to give notice of such determination, that neither rinderpest nor foot-and-mouth disease now exists in Mexico, and to amend § 94.1, Part 94, Subchapter D, Chapter I, Title 9 of the Code of Federal Regulations (§ 94.1 of B. A. I. Order No. 373) by striking therefrom the word "Mexico".

The proposed determination, notification, and amendment, would remove the present prohibition under section 306 of the Tariff Act upon importation into the United States of cattle, sheep, other domestic ruminants, and swine, and of fresh, chilled or frozen beef, veal, mutton, lamb, or pork from Mexico and render the commodities specified in Part 94, Subchapter D, Chapter I, Title 9 of the Code of Federal Regulations (B. A. I. Order 373), and originating in said country, no longer subject to the provisions of that part.

Any person who wishes to submit written data, views, or arguments concerning the proposed determination and amendment may do so by filing them with the Chief of the Bureau of Animal Industry, Agricultural Research Administration, United States Department of Agriculture, Washington 25, D. C., on or before August 27, 1952.

Done at Washington, D. C., this 22d day of August, 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

Production and Marketing Administration

[7 CFR Part 903]

[Docket No. AO-10, A-16]

HANDLING OF MILK IN ST. LOUIS, MISSOURI, MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at St. Louis, Missouri, on August 11 and 12, 1952, pursuant to notice thereof which was issued on August 4, 1952 (17 F. R. 7254).

The material issues of the record related to (1) Prices for Class I the remainder of 1952 and for the months of January, February, and March 1953.

(2) The emergency character of marketing conditions and the need for immediate change in the order provisions.

Findings and conclusions. The findings and conclusions with respect to the aforementioned material issues to be considered in this decision, all of which are based on the evidence introduced at the hearing and the record thereof, are as follows:

1. The differential to be added to the basic formula price in determining the Class I price should be $2.21 for the months of September, October, and November 1952, $2.04 for December 1952, and not less than $1.79 for the months of January and February 1953. The order now provides for a differential of $1.81 for the delivery periods of September through December 1952; and, if the supply-demand adjustment ratio remains unchanged from that now prevailing, the differential for January and February 1953 would be $1.39.

The Secretary of Agriculture has designated 47 counties in Missouri as disaster areas because of the serious damage to crops and pastures resulting from extremely high temperatures and deficiency in rainfall which have prevailed since April. In these 47 counties are located a large number of the farms supplying milk to the St. Louis market. In other areas of the milkshed, not designated disaster areas, many dairy farmers have suffered significant damage from extreme heat and lack of rainfall.

That portion of the State of Missouri south of the Missouri River received 7.53 inches of rainfall in May, June and July 1952 compared to a normal for that area of 14 inches. June was the driest month in the history of the local weather bureau whose records go back to 1836. Extreme heat likewise prevailed, the average temperature for June having been 8 to 10 degrees above normal for the month. During the first 10 days of August there was rain in various parts of the milkshed. Testimony at the hearing indicated that while this might give some relief, its arrival was too late to repair the damage done. Hay and grain production lost by the drought prior to August cannot be regained at this late date. Limited value will be obtained from pastures if normal rainfall is obtained throughout the remainder of the pasture season.

The pasture feed conditions in the St. Louis milkshed as indicated in the "Crop Report" of the Bureau of Agricultural Economics of the United States Department of Agriculture showed pasture conditions in a major portion of the milkshed ranging from "very poor" (50 to 65 percent of normal) to "extreme drought" (under 35 percent of normal) as of August 1.

With burned out pastures farmers have been forced to purchase hay and concentrates for summer feeding. In addition, they will have to continue such purchases throughout this winter to replace those feedstuffs which normally they have stored at the end of a growing season. The record shows that farmers who have rarely purchased hay even during the winter months are currently feeding hay purchased at 30 to 50 dollars per ton. In addition to paying high prices for hay, farmers in the St. Louis milkshed have been required to go long distances to obtain hay. Some price relief may be obtained from these high prices by the emergency hay supply program of the United States Department of Agriculture. However, the amount paid by the farmers who had heretofore purchased no hay will be a considerable added expense.

It was contended at the hearing that the drought conditions were not general throughout the milkshed. It appears that all farmers supplying milk to the St. Louis market were not affected in the same manner and to the same degree by the drought. In different geographic areas in the milkshed pasture feed conditions varied from excellent to extreme drought. Moreover, in some instances pasture feed conditions in the same geographic area might be abnormally different on several individual farms from that generally prevailing in a small area. It is not possible nor practicable to attempt to provide for such differences within the framework of the order, but to provide for such relief to those conditions as are generally representative of that prevailing on the farms in the area as a whole.

The average production per farm supplying the St. Louis market was 332 pounds in July 1952, a drop of 14 pounds, or 4 percent, from the same month a year ago. Although this drop is not currently affecting the supply in a critical manner, failure to give adequate consideration to the plight of the farmer supplying the St. Louis market could adversely affect the supply of milk for the St. Louis market in the coming short season. The producer needs to have some assurance pricewise at the present time in order to make plans for the months ahead, and to encourage him to maintain his production for the St. Louis market. St. Louis handlers obtain such milk for fluid use outside the St. Louis milkshed during the months of low production. A principal source of such purchases is from plants in the Chicago milkshed. The cost of this milk to St. Louis handlers will generally be greater than that which they are required to pay for producer milk at the prices proposed herein. Since prices for this supplemental milk are likely to be less in December than in November some decrease in Class I differentials is provided in December. No increase is provided for March, since production normally increases seasonally in that

month, and supplies from St. Louis milkshed and elsewhere are more adequate.

The price increase herein provided is found necessary because of the drought conditions in the milkshed, and the consequent threat to milk supplies. The St. Louis market has been short of producer milk during the fall and winter for several years. Without an emergency price increase shortages during the coming low production season might well reach critical proportions.

(2) The due and timely execution of the function of the Secretary under the act imperatively and unavoidably requires the omission of a recommended decision by the Assistant Administrator, Production and Marketing Administration, and the opportunity for exceptions thereto, on the above issue.

The conditions complained of are such that it is urgent that remedial action be taken as soon as possible. Delay beyond the minimum time required to make the attached order effective would defeat the purpose of such amendment. Farmers might be forced to adopt measures which would seriously impair production rates and threaten the milk supply for the marketing area. Accordingly, the time necessarily involved in the preparation, filing and publication of a recommended decision, and exceptions thereto, would make such relief ineffective. The propriety of omitting the recommended decision and opportunity of filing exceptions thereto with respect to the issues here considered was indicated on the record.

Rulings on proposed findings and conclusions. Briefs were filed on behalf of producers and handlers who would be subject to the proposed marketing agreement and order, as amended, and as hereby proposed to be further amended. The briefs contained suggested findings of fact, conclusions, and arguments with respect to the proposals discussed at the hearing. Every point covered in the briefs was carefully considered along with evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the suggested findings and conclusions contained in the briefs are inconsistent with the findings and conclusions contained herein, the requests to make such findings or to reach such conclusions are denied on the basis of the facts found and stated in connection with the findings and conclusions in this decision.

General findings. (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for such milk, and the minimum prices specified in the proposed marketing agreement and in the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed marketing agreement and the order, as amended and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and are applicable only to persons in the respective classes of industrial and commercial activity specified in the said marketing agreement upon which a hearing has been held.

Determination of representative period. The month of June 1952 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order amending the order, as amended, regulating the handling of milk in the St. Louis, Missouri, marketing area in the manner set forth in the attached amending order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such marketing order, as amended.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled respectively "Marketing Agreement Regulating the Handling of Milk in the St. Louis, Missouri, Marketing Area," and "Order Amending the Order, as Amended, Regulating the Handling of Milk in the St. Louis, Missouri, Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order, as amended, and as hereby proposed to be further amended by the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 20th day of August 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

Order[1] Amending the Order, as Amended, Regulating the Handling of Milk in the St. Louis, Missouri, Marketing Area

§ 903.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 *et seq.*), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the St. Louis, Missouri, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the St. Louis, Missouri, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Delete the last proviso in § 903.51 (a) and substitute therefor the following: "*And provided further,* That the plus amount to be added to the basic formula price shall be $2.21 for the months of September, October, and November 1952, $2.04 for December 1952, and not less than $1.79 for January and February 1953."

[F. R. Doc. 52-9330; Filed, Aug. 22, 1952; 8:57 a. m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

[7 CFR Part 921]

HANDLING OF MILK IN SPRINGFIELD, MISSOURI, MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.),

and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Springfield, Missouri, on August 7–8, 1952, pursuant to notice thereof which was published in the FEDERAL REGISTER August 2, 1952 (17 F. R. 7094).

Proposed amendments were submitted by the Greene County Milk Producers Association and by the Patton Creamery Company. The material issues of record related to the level of Class I prices, the classification and pricing of milk sold outside the marketing area, location differentials to handlers and producers, administrative assessments on other source milk, and the emergency character of production and marketing conditions.

This decision will consider only the issues with respect to:

(1) Price for Class I during the delivery periods for the remainder of the year 1952; the months of January, February, and March, 1953.

(2) The emergency character of marketing conditions and the need for immediate change in the order provisions.

Decision with respect to all other issues is reserved for later consideration.

Findings and conclusions. The findings and conclusions with respect to the aforementioned material issues to be considered in this decision, all of which are based on the evidence introduced at the hearing and the record thereof, are as follows:

(1) For the months of September, October, and November, 1952, the differential to be added to the basic formula price in determining the price for Class I milk shall be $2.00. For the months of December 1952, and January and February 1953, this differential shall not be less than $1.58.

Production conditions in the Springfield milkshed have been very unfavorable since last winter. Unseasonably cold weather early in November froze the ground so that melting snows did not moisten the ground as usual. Precipitation in the spring and early summer not only failed to make up the moisture shortage which accumulated during the winter, but contributed further to the shortage in that rainfall was well below normal in most months. June, which is a critical month in the production of grain and forage brought the lowest rate of precipitation for the month in the nearly 100 year history of the Springfield weather bureau. The cumulative deficit of precipitation for the growing season, of April through July amounted to 8.4 inches or nearly 50 percent.

Plant growth suffered not only as a result of the deficit of precipitation, but also by the occurrence of high temperatures. In Springfield the months of June and July brought 47 days of temperature is excess of 90 degrees. A number of these days saw temperatures over 100. Conditions throughout the Springfield milkshed approximated those recorded for the city of Springfield.

As a result of unfavorable weather conditions, crops and pastures in the Springfield milkshed are far below normal.

The Crop Reporting service of the U. S. Department of Agriculture reports that pasture conditions throughout the area have shown extreme drouth (under 35 percent of normal) for much of the pasture season. Testimony in the record indicates that hay production was about 25 percent of normal, and that most producers will be required to import at least half of the hay they feed this winter. Much of this hay will have to be imported from states as far away as Iowa, Nebraska and Illinois, at prices which run as much as 50 percent or more above hay prices of a year ago. This purchase of hay is particularly burdensome to Springfield producers since they ordinarily produce their own forage. As a result, much of the expense associated with the production of hay has been met in connection with regular farm operation, to which must now be added the cost of purchase of imported hay.

Feed grain and silage crops likewise have suffered substantial damage. These losses will necessitate considerable further outlay for farmers in feeding their herds, even, though an unusually large rate of culling prevails as is now indicated.

Milk production rates have already declined much more than seasonally. Average deliveries per producer fell 50 pounds from June to July in 1952 compared to a 13 pound decrease in the same period last year.

Somewhat milder weather in the first few days of August appear to have interrupted this trend, but it appears doubtful whether farmers could maintain anywhere near their last year's rates of production without substantial price increases over those likely to be provided under the order as it now stands.

While the outlook for production indicates that adequate milk will be produced by Springfield producers to supply consumer needs within the marketing area still many consumers outside this area depend on Springfield handlers for their year round supply of milk. It is necessary that Springfield order prices be set at levels which will insure supplies of milk for those outside consumers as well, in order not to jeopardize milk supplies for those in the marketing area. Furthermore prices to Springfield producers should reflect as far as possible the value of bulk milk in that general area. Conditions in many of the larger Southern markets indicate that local milk supplies will be short of needs this fall and winter in those markets and supplemental milk will be required. Springfield milk should be in good demand for this reason and outside sales of Class I milk should be large. Springfield producers will not be able to supply all the milk needed however, and much of the supplemental milk may come from the Chicago milkshed.

Since the sale of Springfield milk for Class I depends in large measure on demands from other markets it is important that the Springfield order Class I price be fixed at levels which will permit this milk to be sold as Class I milk. To price this milk so high that it would be forced to remain in the area, and be manufactured into Class II products would defeat the purpose of the emergency price increase herein provided.

It is important also that prices be held closely enough in line with the St. Louis order prices so that milk producers in any substantial number, will not be attracted away from that market. It is considered possible and desirable to provide that the minimum Class I differential be $2.00 over the basic formula for the delivery periods September through November. Thereafter when supplies of milk from other areas are more readily available a minimum differential of $1.58 is provided. No increase is provided for March, since production normally is more than adequate in that month.

(2) The due and timely execution of the function of the Secretary under the act imperatively and unavoidably requires the omission of a recommended decision by the Assistant Administrator, Production and Marketing Administration, and the opportunity for exceptions thereto, on the above issue.

The conditions complained of are such that it is urgent that remedial action be taken as soon as possible. Delay beyond the minimum time required to make the attached order effective would defeat the purpose of such amendment. Farmers might be forced to adopt measures which would seriously impair production rate and result in great expense and difficulty in restoring herds and production. Accordingly, the time necessarily involved in the preparation, filing and publication of a recommended decision, and exceptions thereto, would make such relief ineffective. The propriety of omitting the recommended decision and opportunity of filing exceptions thereto with respect to the issues here considered was indicated on the record.

Rulings on proposed findings and conclusions. Briefs concerning emergency price changes were filed by or on behalf of certain interested parties in this proceeding. Such briefs contained statements of fact, proposed findings and conclusions, and arguments with respect to the provisions of the proposed amendments. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the findings and conclusions proposed in the briefs are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusions in this decision.

General findings. (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which effect market supply and demand for milk in the said marketing area, and the minimum prices specified in the proposed marketing agreement and in the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and are applicable only to persons in the respective classes of industrial and commercial activity specified in, the said marketing agreement upon which a hearing has been held.

Determination of representative period. The month of June 1952 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order amending the order, now in effect, regulating the handling of milk in the Springfield, Missouri, marketing area, in the manner set forth in the attached amending order is approved or favored by producers who, during such period, were engaged in the production of milk for sale in the marketing area specified in such marketing order.

Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement Regulating the Handling of Milk in the Springfield, Missouri, Marketing Area", and "Order Amending the Order, as Amended, Regulating the Handling of Milk in the Springfield, Missouri, Marketing Area", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order, as amended, and as hereby proposed to be further amended by the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 20th day of August 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

Order[1] *Amending the Order, as Amended, Regulating the Handling of Milk in the Springfield, Missouri, Marketing Area*

§ 921.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Springfield, Missouri, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agrement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the Springfield, Missouri, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Change the period at the end of § 921.51 (a) to a colon and add the following: "*Provided further*, That the Class I price shall be the basic formula price for the preceding delivery period plus $2.00 in the months of September 1952 through November 1952 and not less than the basic formula price for the preceding delivery period plus $1.58 in the months of December 1952 through February 1953."

[F. R. Doc. 52-9328; Filed, Aug. 22, 1952; 8:55 a. m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

[7 CFR Part 928]

[Docket No. AO-227-A1]

HANDLING OF MILK IN NEOSHO VALLEY MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED AMENDMENT TO ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Pittsburg, Kansas, on Auugst 4–6, 1952, pursuant to notice thereof which was issued on July 16, 1952 (17 F. R. 6671, 6827).

The material issues of record related to the level and means of determining prices for Class I and Class II milk, the classification of milk in inventory, provisions appropriate with respect to plants having significant sales of bulk milk outside the area, changes in the marketing area, the obligations of handlers subject to other orders, administrative features of the order, and the necessity for action with respect to certain issues or aspects thereof which would require the omission of a recommended decision. This decision is concerned with the issues with respect to the price for Class I milk for the months of September 1952 through January 1953 and the necessity for action with respect to such price which would require the omission of a recommended decision.

Findings and conclusions. 1. The price for Class I milk for the months of September 1952 through January 1953 should be the basic formula price of the order plus $1.85.

The order for the Neosho Valley marketing area first became partially effective November 1, 1951, and fully effective December 1, 1951. Consequently market wide data developed through operation of the order which were available at the hearing covered only the 8 month period November 1951–June 1952, and did not permit comparisons with similar data for other years.

Evidence in the record makes it clear however that drought conditions and excessive temperatures during the months of May, June and July 1952 have created a critical situation with respect to production of milk in the coming fall and early winter months. The Neosho Valley market draws its milk supplies from 23 counties, 7 of which are in Missouri, 11 in Kansas and 5 in Oklahoma. Severe drought conditions have prevailed over much of this area during the past few months. The drought condition has been accompanied by excessive temperatures for sustained periods. These conditions have resulted in loss of pasture and feed crops upon which milk producers rely. They have been required to feed their milk cows hay and forage during the normal pasture season in a season when production of such roughage is only a fraction of normal. As a result they face the prospect of importing substantial amounts of hay from more favored areas at high prices, thus experiencing direct out-of-pocket costs which are not normal for producers in this area.

Milk supplies were less than Class I sales in November and December 1951. Production conditions at that time were more favorable than those in prospect for the coming fall and winter.

Increased milk prices are needed during the coming months as a means of providing some incentive for dairymen to incur the costs necessary to continue milk production and avoid dispersal of producing herds. An increase of 40 cents in the Class I price per hundredweight is the minimum which would appear to provide incentive to this end. Such increase should be effective for the months of September through January. The record indicates that this is approximately the period for which this additional incentive will be most urgently needed. The record contained evidence on proposals for longer time pricing proposals, including a supply-demand adjustment of the the Class I price. Time for adequate consideration of such proposals will be provided by making this emergency action effective through January 1953.

An increase of 40 cents can be accomplished by providing that the Class I differential added to the basic formula price of the order be increased from $1.45 to $1.85 for the months of September 1952 through January 1953. It is concluded that such a provision should be adopted.

2. The due and timely execution of the function of the Secretary under the act imperatively and unavoidably requires the omission of a recommended decision by the Assistant Administrator, Production and Marketing Administration, and the opportunity for exception thereto, on the above issues.

The conditions complained of are such that it is urgent that remedial action be taken as soon as possible. Delay beyond the minimum time required to make the attached order effective would defeat the purpose of such amendment. Accordingly, the time necessarily involved in the preparation, filing, and publication of a recommended decision, and exceptions thereto, would make such relief ineffective. The propriety of omitting the recommended decision and opportunity for filing exceptions thereto with respect to all proposals considered was indicated on the record by all interested parties.

Rulings on proposed findings and conclusions. Briefs were filed on behalf of producers and handlers who would be subject to the proposed marketing agreement and order, as hereby proposed to be amended. The briefs contained suggested findings of fact, conclusions, and arguments with respect to the proposals discussed at the hearing. Every point covered in the briefs was carefully considered along with evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the suggested findings and conclusions contained in the briefs are inconsistent with the findings and conclusions contained herein, the requests to make such findings or to reach such conclusions are denied on the basis of the facts found and stated in connection with the findings and conclusions in this decision.

General findings. (a) The proposed marketing agreement and the order as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and in the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

Determination of representative period. The month of July 1952 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order amending the order regulating the handling of milk in the Neosho Valley marketing area in the manner set forth in the attached amending order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such order.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled "Marketing Agreement Regulating the Handling of Milk in the Neosho Valley Marketing Area," and "Order Amending the Order Regulating the Handling of Milk in the Neosho Valley Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 20th day of August 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

Order[1] Amending the Order Regulating the Handling of Milk in the Neosho Valley Marketing Area

§ 928.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Neosho Valley marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof the handling of milk in the Neosho Valley marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order as hereby amended, and the aforesaid order is hereby amended as follows:

1. In § 928.51 (a) change the period at the end of the sentence to a colon and add "*And provided further,* That for the months of September, 1952, through January, 1953, the amount to be added to the basic formula price shall be $1.85 in lieu of $1.45."

[F. R. Doc. 52-9289; Filed, Aug. 22, 1952; 8:47 a. m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

[7 CFR Part 946]

[Docket No. AO-123 A-15]

HANDLING OF MILK IN LOUISVILLE, KENTUCKY, MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.),

and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Louisville, Kentucky, on August 13 and 14, 1952, pursuant to notice thereof which was issued on July 30, 1952 (17 F. R. 7127).

The material issues of record related to

(1) Prices for Class I the remainder of 1952 and for the months of January, February, and March 1953.

(2) The emergency character of marketing conditions and the need for immediate change in the order provisions.

Findings and conclusions. The findings and conclusions with respect to the aforementioned material issues to be considered in this decision, all of which are based on the evidence introduced at the hearing and the record thereof, are as follows:

1. The price for Class I milk should be increased 44 cents per hundredweight for the remainder of 1952 and for the first two months of 1953.

An immediate increase in the Class I milk price has been made necessary because of adverse production conditions in the Louisville milkshed.

Rainfall has been far below normal since early in June. Temperatures during this period have been unusually high. These conditions have combined to seriously reduce production of feed in pastures and fields. On July 1 the Crop Reporting Service of the United States Department of Agriculture reported that pastures in part of the milkshed had been reduced to "poor to fair" condition. By August 1 almost the entire milkshed was indicated to be in "severe" or "extreme drought" condition.

Hay production in most of the milkshed was at little more than half the normal rate. While most farmers got approximately normal first cuttings of hay subsequent cuttings ranged from poor to total failure. Grain and silage crops were also seriously affected. Some corn intended for grain has been cut for silage. Rates of supplemental feeding of forage to animals on pasture are abnormally high, resulting in increased needs for roughage, which is already in short supply.

Hay prices are well above normal and although little supplemental hay has as yet been purchased a large majority of the Louisville producers will have to obtain hay from outside the area before the feeding season is over. Competition from other drought stricken areas in Kentucky and states to the south and southwest for supplemental hay will undoubtedly be great. Even though the Production and Marketing Administration may assist farmers in obtaining hay at reasonable prices, costs to Louisville producers will be materially increased since hay requirements would normally be filled largely from own farm production. Unusually large amounts of concentrates will have to be purchased, and prices of these are well above what they were a year ago.

The entire Kentucky portion of the milkshed has been designated by the Farmers Home Administration as a disaster area, and the Indiana portion of the milkshed appears to be in little, if any, better condition.

Milk production rates fell rapidly in June, and early July, but appeared to recover somewhat as temperatures moderated early in August. Generally speaking dairy cow numbers appear to be fairly well maintained at the present time, but feed and price conditions on farms are such that further serious declines in production are almost sure to occur unless price increases are provided at once.

Several producer representatives testified at the hearing that drought conditions in the Louisville milkshed are worse this year than last, and that farm costs are higher. The proponent cooperative requested that its proposal be amended to request an 88 cent increase because of steadily worsening conditions.

Offsetting these conditions to some extent however are the higher prices for milk than prevailed last year. Basic formula prices normally advance somewhat during the fall and winter months and some increase in price may be forthcoming in this manner. It is concluded that a 44 cent increase, coupled with the increased producer returns now expected to prevail under the order should be sufficient to permit dairy farms to maintain their herds substantially intact during the fall and winter months.

No increase is provided in March, since the rate of milk production normally begins to advance during that month in building up to the next season's flush production.

(2) The due and timely execution of the function of the Secretary under the act imperatively and unavoidably requires the omission of a recommended decision by the Assistant Administrator, Production and Marketing Administration, and the opportunity for exceptions thereto, on the above issue.

The conditions complained of are such that it is urgent that remedial action be taken as soon as possible. Delay beyond the minimum time required to make the attached order effective would defeat the purpose of such amendment.

Farmers might be forced to adopt measures which would seriously impair production rates and threaten the milk supply for the marketing area. Accordingly, the time necessarily involved in the preparation, filing and publication of a recommended decision, and exceptions thereto, would make such relief ineffective. The propriety of omitting the recommended decision and opportunity of filing exceptions thereto with respect to the issues here considered was indicated on the record.

Rulings on proposed findings and conclusions. Briefs were filed on behalf of producers and handlers who would be subject to the proposed marketing agreement and order, as amended, and as hereby proposed to be further amended. The briefs contained suggested findings of fact, conclusions, and arguments with respect to the proposals discussed at the hearing. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the suggested findings and conclusions contained in the briefs are inconsistent with the findings and conclusions contained herein, the requests to make such findings or to reach such conclusions are denied on the basis of the facts found and stated in connection with the findings and conclusions in this decision.

General findings. (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for such milk, and the minimum prices specified in the proposed marketing agreement and in the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed marketing agreement and the order, as amended and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and are applicable only to persons in the respective classes of industrial and commercial activity specified in the said marketing agreement upon which a hearing has been held.

Determination of representative period. The month of June 1952 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order amending the order, as amended, regulating the handling of milk in the Louisville, Kentucky, marketing area in the manner set forth in the attached amending order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such marketing order, as amended.

Determination of representative period. Annexed hereto and made a part hereof are two documents entitled respectively "Marketing Agreement Regulating the Handling of Milk in the Louisville, Kentucky, Marketing Area," and "Order Amending the Order, as Amended, Regulating the Handling of Milk in the Louisville, Kentucky, Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order, as amended, and as hereby proposed to be further amended by the attached order

which will be published with this decision.

This decision filed at Washington, D. C., this 20th day of August 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

Order[1] Amending the Order, as Amended, Regulating the Handling of Milk in the Louisville, Kentucky, Marketing Area

§ 946.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Louisville, Kentucky, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the Louisville, Kentucky, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Change the period at the end of § 946.51 (a) to a colon and add the following: "*Provided*, That for each of the months of September 1952 through February 1953 the Class I price shall be the basic formula price plus $1.69 per hundredweight."

[F. R. Doc. 52-9329; Filed, Aug. 22, 1952; 8:56 a. m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

[7 CFR Part 991]

[Docket No. AO-194-A5]

HANDLING OF MILK IN ROCKFORD-FREEPORT, ILLINOIS, MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Rockford, Illinois, on December 4, 5, and 6, 1951, and on March 17 and 18, 1952, pursuant to notice thereof which was issued on November 27, 1951 (16 F. R. 12101) and March 10, 1952 (17 F. R. 2233), upon proposed amendments to the tentative marketing agreement and to the order as amended regulating the handling of milk in the Rockford-Freeport, Illinois, marketing area.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Assistant Administrator, Production and Marketing Administration, on June 13, 1952 filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision. Notice of such recommended decision and opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on June 18, 1952 (17 F. R. 5471) and as corrected on June 28, 1952 (17 F. R. 5831).

Within the period reserved for exceptions the Midwest Dairymen's Company, the Stephenson County Pure Milk Association, Central Dairy Company et al. and Union Dairy Farms et al. filed exceptions to certain of the findings, conclusions and actions recommended by the Assistant Administrator. In arriving at the findings, conclusions and regulatory provisions of this decision, each of such exceptions was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings, conclusions and actions decided upon herein are at variance with the exceptions, such exceptions are overruled.

The material issues and the findings and conclusions of the recommended decision (F. R. Doc. 52-6684, 17 F. R. 5471, 5831) are hereby approved and adopted as the findings and conclusions of this decision as if set forth in full herein, subject to the following modifications:

1. Delete the first two lines beginning in column 3, 17 F. R. 5475 (F. R. Doc. 52-6684) and substitute therefor the following: "Town View Dairy, Dakota, Illinois, the Midwest Dairymen's".

Determination of representative period. The month of February 1952 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order, as amended, regulating the handling of milk in the Rockford-Freeport, Illinois, marketing area in the manner set forth in the attached order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such marketing order.

Marketing agreement and order. Annexed hereto and made a part of this decision are two documents entitled, respectively, "Marketing Agreement Regulating the Handling of Milk in the Rockford-Freeport, Illinois, Marketing Area," and "Order, as Amended, Regulating the Handling of Milk in the Rockford-Freeport, Illinois, Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the attached order which is published with this decision.

This decision filed at Washington, D. C., this 19th day of August 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

Order,[1] as Amended, Regulating the Handling of Milk in the Rockford-Freeport, Illinois, Marketing Area

§ 991.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Rockford-Freeport, Illinois, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof the handling of milk in the Rockford-Freeport, Illinois, area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

DEFINITIONS

§ 991.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 991.2 *Secretary.* "Secretary" means the Secretary of Agriculture or other officer or employee of the United States authorized to exercise the powers or to perform the duties of the said Secretary of Agriculture.

§ 991.3. *Department.* "Department" means the United States Department of Agriculture or such other Federal agency authorized to perform the price reporting functions specified in §§ 991.50, 991.54 and 991.81.

§ 991.4 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 991.5 *Cooperative association.* "Cooperative association" means any cooperative marketing association which the Secretary determined after application by the association:

(a) To be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have full authority in the sale of milk of its members and to be engaged in making collective sales or marketing milk or its products for its members.

§ 991.6 *Rockford-Freeport marketing area.* "Rockford-Freeport marketing area," hereinafter called the "marketing area," means the territory lying within the corporate limits of the cities of Rockford, Loves Park and Freeport, together with the territory lying within the townships of Burritt, Cherry Valley, Harlem, Owen, Rockford and Winnebago, in Winnebago County, and Florence, Harlem, Lancaster and Silver Creek, in Stephenson County, all in the State of Illinois. "Rockford district" of the marketing area shall include the territory lying within the corporate limits of the cities of Rockford and Loves Park, and within the townships of Burritt, Cherry Valley, Harlem, Owen, Rockford and Winnebago, in Winnebago County, Illinois. "Freeport district" of the marketing area shall include that portion of the marketing area not included in the Rockford district.

§ 991.7 *Route.* "Route" means a delivery (including at a plant store) of milk, skim milk, buttermilk, flavored milk, or flavored milk drink in fluid form to a wholesale or retail stop(s) other than to a milk processing or distributing plant(s).

§ 991.8 *Approved plant.* "Approved plant" means a milk processing or distributing plant approved by the appropriate authorities for the distribution of Grade "A" milk under the milk ordinance of any municipality in the marketing area or under the Grade "A" milk and Grade "A" milk products law of the State of Illinois, and from which a route is operated wholly or partially within the marketing area. The term "approved plant" does not include any portions of the plant or facilities used for processing milk or any milk product required by the appropriate health authorities to be kept physically separate from that portion of the plant facilities used for receiving, processing, or packaging milk or milk products to be labeled Grade "A".

§ 991.9 *Rockford plant.* "Rockford plant" means a plant (a) located within the Rockford district, or (b) located outside the marketing area from which more than 50 percent of the Class I milk disposed of from such plant within the marketing area during the month is disposed of within the Rockford district.

§ 991.10 *Freeport plant.* "Freeport plant" means a plant (a) located within the Freeport district, or (b) located outside the marketing area from which more than 50 percent of the Class I milk disposed of from such plant within the marketing area during the month is disposed of within the Freeport district.

§ 991.11 *Unapproved plant.* "Unapproved plant" means any milk processing or distributing plant which is not an approved plant.

§ 991.12 *Handler.* "Handler" means any of the following:

(a) The operator of an approved plant in his capacity as such;

(b) The operator of an unapproved plant from which a route is operated wholly or partially within the marketing area; or

(c) Any cooperative association with respect to milk of producers caused to be diverted for its account from an approved plant to an unapproved plant from which no route is operated wholly or partially within the marketing area, which milk of producers shall be deemed as having been received by such cooperative association.

§ 991.13 *Producer.* "Producer" means either of the following:

(a) "Grade A producer" means any person, except a producer-handler, who under inspection of the appropriate health authorities of any of the municipalities of the marketing area, or of the State of Illinois, produces milk approved by such authority for distribution as Grade "A" milk within the marketing area, which milk is received at an approved plant, or is diverted by a cooperative association for its account from an approved plant to an unapproved plant; or

(b) "Non-Grade A producer" means any person, except a producer-handler, who produces milk which is received at an unapproved plant from which a route is operated wholly or partially within the marketing area.

§ 991.14 *Producer milk.* "Producer milk" means either of the following:

(a) "Grade A producer milk" means milk of one or more producers produced and received or diverted under the conditions set forth in § 991.13 (a); or

(b) "Non-Grade A producer milk" means milk of one or more producers produced and received under the conditions set forth in § 991.13 (b).

§ 991.15 *Other source milk.* "Other source milk" means skim milk or butterfat received at an approved plant, or at an unapproved plant from which a route is operated wholly or partially within the marketing area, except that contained in (a) producer milk, (b) receipts from other handlers, (c) receipts from handlers under any marketing agreement or order issued pursuant to the act for any other fluid milk marketing area of items listed herein as Class I milk in packaged or bottled form ready for delivery to consumers, which are disposed of in the original package in which received, and (d) any non-fluid milk product received from a non-handler and disposed of in the form in which received.

§ 991.16 *Producer-handler.* "Producer-handler" means any person who produces milk and operates a route wholly or partially within the marketing area, but who receives no milk from producers.

MARKET ADMINISTRATOR

§ 991.20 *Designation.* The agency for the administration of this subpart shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of the Secretary.

§ 991.21 *Powers.* The market administrator shall have the following powers with respect to this subpart.

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 991.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this subpart, including, but not limited to, the following:

(a) Within 30 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon such duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay, out of the funds provided by § 991.85:

(1) The cost of his bond and of the bonds of his employees;

(2) His own compensation; and

(3) All other expenses, except those incurred under § 991.86, necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this subpart, and, upon request by the Secretary surrender the same to such other person as the Secretary may designate;

(f) Publicly announce, unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who within 10 days after the day upon which he is required to perform such act, has not (1) made reports pursuant to §§ 991.30, 991.31 or 991.32, (2) maintained adequate records and facilities pursuant to § 991.33, or (3) made the payments required under §§ 991.80, 991.81, 991.83, 991.85, or 991.86;

(g) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(h) On or before the 10th day after the end of each month report to each cooperative association which so requests the amount and class utilization of milk caused to be delivered by such cooperative association, either directly or from producers who have authorized such cooperative association to receive payments for them, to each handler to whom the cooperative association sells milk. For the purpose of this report the milk caused to be so delivered by a cooperative association shall be prorated to each class in the proportion that the total receipts of milk received from producers by such handler were used in such class;

(i) Audit all reports and payments by each handler by inspection of such handler's records and of the records of any handler or person upon whose utilization the classification of skim milk or butterfat for such handler depends;

(j) Publicly announce, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the prices determined for each month as follows:

(1) On or before the 5th day after the end of such month, the minimum class prices pursuant to §§ 991.50, 991.51 and 991.53 and the butterfat differentials for each class pursuant to § 991.52, and

(2) On or before the 11th day after the end of such month, the uniform prices computed pursuant to § 991.71 and the butterfat differential computed pursuant to § 991.81 and

(k) Prepare and disseminate to the public such statistics and information as he deems advisable and as do not reveal confidential information.

REPORTS, RECORDS AND FACILITIES

§ 991.30 *Monthly reports of receipts and utilization.* On or before the 8th day after the end of each month each handler, except a producer-handler, shall report to the market administrator in the detail and on forms prescribed by the market administrator;

(a) The quantities of butterfat and quantities of skim milk contained in (or used in the production of) all receipts within such month of (1) producer milk, (2) skim milk and butterfat in any form from any other handler, and (3) other source milk, and the sources thereof;

(b) The product pounds of Class I and Class II milk received in packaged or bottled form ready for delivery to consumers from handlers under any marketing agreement or order issued pursuant to the act for any other fluid milk marketing area, and disposed of in the form in which received;

(c) The product pounds of non-fluid milk products received from any nonhandler and disposed of in the same form;

(d) The utilization of all receipts required to be reported under paragraphs (a) and (b) and (c) of this section; and

(e) Such other information with respect to all such receipts and utilization as the market administrator may prescribe.

§ 991.31 *Producer payroll reports.* On or before the 25th day after the end of each month each handler shall submit to the market administrator such handler's producer payroll for the preceding month which shall show (a) the total pounds of milk received from each producer and cooperative association and the total pounds of butterfat contained in such milk, (b) the amount of payment to each producer and cooperative association and (c) the nature and amount of all deductions and charges involved in the payments referred to in paragraph (b) of this section.

§ 991.32 *Reports by producer-handlers.* Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe.

§ 991.33 *Records and facilities.* Each handler shall maintain and make available to the market administrator or to his representative during the usual hours of business, such accounts and records of his operations and such facilities as are necessary for the market administrator to verify or to establish the correct data with respect to:

(a) The receipts and utilization, in whatever form, of all skim milk and butterfat received, including milk products received and disposed of in the same form;

(b) The weights, samples and tests for butterfat and for other content of all skim milk and butterfat handled;

(c) Payments to producers and cooperative associations; and

(d) The pounds of skim milk and butterfat contained in or represented by all milk, skim milk, cream and each milk product on hand at the beginning and at the end of each month.

§ 991.34 *Retention of records.* All books and records required under this subpart to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided*, That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case the market administrator shall give further written notification to the handler promptly, upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 991.40 *Skim milk and butterfat to be classified.* All skim milk and butterfat, in any form, received within the month by a handler, in producer milk, in other source milk, or from another handler shall be classified by the market administrator pursuant to the provisions of §§ 991.41 through 991.46.

§ 991.41 *Classes of utilization.* Subject to the conditions set forth in §§ 991.43 and 991.44 the skim milk and butterfat described in § 991.40 shall be classified separately by the market administrator on the basis of the following classes:

(a) Class I milk shall be all skim milk (including reconstituted skim milk) and butterfat;

(1) Disposed of (except as provided in paragraph (b) (4) of this section) (i) in fluid form as milk, skim milk, buttermilk, flavored milk, flavored milk drink, cream, any mixture which contains cream and milk or skim milk (not including ice cream mix) and not less than 6 percent butterfat, and eggnog, and (ii) in fluid or frozen form as concentrated milk, flavored milk, and flavored milk drink not sterilized; and

(2) Not specifically accounted for as any item included under subparagraph (1) of this paragraph or as Class II milk.

(b) Class II milk shall be all skim milk and butterfat:

(1) Used to produce a milk product other than any of those specified in paragraph (a) (1) of this section;

(2) In actual plant shrinkage of producer milk computed pursuant to § 991.42, but not in excess of 2 percent thereof;

(3) In inventory variation of milk, skim milk, cream or of any Class I milk product;

(4) In skim milk, flavored milk, flavored milk drink or buttermilk dumped or disposed of for livestock feed; and

(5) In actual plant shrinkage of other source milk computed pursuant to § 991.42.

§ 991.42 *Shrinkage.* The market administrator shall determine the shrinkage of skim milk and butterfat, respectively, in producer milk and in other source milk in the following manner:

(a) Compute the total shrinkage of skim milk and butterfat, respectively, for each handler; and

(b) Prorate the total shrinkage of skim milk and butterfat, respectively, computed pursuant to paragraph (a) of this section, between producer milk and other source milk after deducting receipts from other handlers.

§ 991.43 *Responsibility of handlers and reclassification of milk.* (a) All skim milk and butterfat shall be Class I milk, unless the handler who first receives such skim milk or butterfat proves to the market administrator that such skim milk or butterfat should be classified otherwise.

(b) Any skim milk or butterfat (except that transferred to a producer-handler) classified in one class shall be reclassified if used or reused by such handler or by another handler in another class.

§ 991.44 *Transfers.* Skim milk or butterfat disposed of by a handler either by transfer or diversion shall be classified:

(a) As Class I milk if transferred in the form of milk, skim milk, or cream, to an approved plant or to an unapproved plant from which a route is operated wholly or partially within the marketing area (except the plant of a producer-handler) unless utilization as Class II milk is mutually indicated in writing to the market administrator by both handlers on or before the 8th day after the end of the month within which such transaction occurred: *Provided*, That skim milk or butterfat so assigned to Class II milk shall be limited to the amount thereof remaining in such class in the plant of the transferee-handler after the subtraction of other source milk pursuant to § 991.46 (a) (2), and any excess of such skim milk or butterfat, respectively, shall be assigned to Class I milk: *And provided further*, That in no event shall skim milk or butterfat so transferred or diverted be so classified that other source milk is assigned to any higher class in the plant of the transferring handler than the lowest class to which producer milk (other than allowable shrinkage) is assigned in the plant of the transferee-handler, after application of the allocation provisions of § 991.46.

(b) As Class I milk if moved in the form of milk, skim milk, or cream to (1) a producer-handler, or (2) any unapproved plant located 100 miles or more from the marketing area, by shortest highway distance as determined by the market administrator.

(c) According to his reported utilization, if moved in the form of milk, skim milk or cream to any unapproved plant from which no route is operated wholly or partially within the marketing area and which is not a plant covered by paragraph (b) of this section: *Provided*, That (1) the receiver (operator of the unapproved plant) maintains books and records showing the utilization of all skim milk and butterfat received at such plant from all sources, (2) if the reported utilization is Class II milk, the quantity of skim milk or butterfat transferred or diverted which may be allowed in such class shall not exceed the total amount of skim milk or butterfat, respectively, which the market administrator can establish definitely on the basis of such books and records as having been used by the receiver in Class II milk (as defined in § 991.41) in the month in which the milk, skim milk or cream so moved was received in the unapproved plant, and (3) any quantity in excess of such established Class II use shall be Class I milk: *And provided further*, That if such books and records are not made available to the market administrator at his request, the total quantity of skim milk and butterfat contained in the milk, skim milk or cream transferred or diverted by the handler shall be Class I milk.

§ 991.45 *Computation of skim milk and butterfat in each class.* For each month, the market administrator shall correct for mathematical and for other obvious errors the report submitted by each handler and compute the total pounds of skim milk and butterfat, respectively, in Class I milk and Class II milk for such handler.

§ 991.46 *Allocation of skim milk and butterfat classified.* (a) The pounds of skim milk remaining in each class after making the following computations shall be the pounds in such class allocated to producer milk;

(1) Subtract plant shrinkage of skim milk in producer milk pursuant to § 991.41 (b) (2) from the total pounds of skim milk in Class II milk;

(2) Subtract from the pounds of skim milk in Class I milk (to the extent available), the pounds of skim milk in other source milk received during September through December, inclusive, in bulk as milk, skim milk or cream, in fluid form from a plant where milk is priced under the class price provisions of a marketing agreement or order issued pursuant to the act for another fluid milk marketing area;

(3) Subtract from the remaining pounds of skim milk in each class, in series beginning with available Class II milk, the pounds of skim milk in other source milk not otherwise subtracted pursuant to subparagraph (2) of this paragraph;

(4) Subtract from the remaining pounds of skim milk in each class the skim milk received from other handlers and assigned pursuant to § 991.44; and

(5) Add to the remaining pounds of skim milk in Class II milk the pounds subtracted pursuant to subparagraph (1) of this paragraph; or if the remaining pounds of skim milk in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the remaining pounds of skim milk in series beginning with Class II milk.

(b) Allocate classified butterfat to producer milk according to the method prescribed in paragraph (a) of this section for skim milk.

MINIMUM PRICES

§ 991.50 *Class I milk prices.* (a) The minimum price per hundredweight, on a 3.5 percent butterfat content basis, for Grade A producer milk received at, or diverted by a cooperative association from, Rockford plants and classified as Class I milk, shall be the price as determined for the month for the 70–85 mile zone pursuant to § 941.52 (a) (1) of this chapter, as amended, regulating the handling of milk in the Chicago, Illinois, marketing area issued pursuant to the act, plus 4 cents.

(b) The minimum price per hundredweight, on a 3.5 percent butterfat content basis, for Grade A producer milk received at, or diverted by a cooperative association from, Freeport plants and classified as Class I milk shall be the price determined for the month for the 100–115 mile zone pursuant to § 941.52 (a) (1) of this subchapter, as amended, regulating the handling of milk in the Chicago, Illinois, marketing area issued pursuant to the act, plus 4 cents.

(c) The minimum price per hundredweight for non-Grade A producer milk received at, or diverted by a cooperative association from, Rockford plants and classified as Class I milk shall be the Class I price computed pursuant to paragraph (a) of this section, less 10 cents.

(d) The minimum price per hundredweight for non-Grade A producer milk received at, or diverted by a cooperative association from, Freeport plants and classified as Class I milk shall be the Class I price computed pursuant to paragraph (b) of this section, less 10 cents.

§ 991.51 *Class II milk price.* The minimum price per hundredweight, on a 3.5 percent butterfat basis, for producer milk classified as Class II milk shall be the highest of the prices per hundredweight for milk of 3.5 percent butterfat content determined by the market administrator for the month pursuant to paragraphs (a), (b) and (c) of this section, computed to the nearest tenth of a cent.

(a) The average of the prices per hundredweight reported to have been paid, or to be paid, for such month to farmers for milk containing 3.5 percent butterfat content delivered during such month at each of the following listed manufacturing plants or places for which prices are reported to the Department or to the market administrator:

Companies and Location
Borden Co., Black Creek, Wis.
Borden, Co., Greenville, Wis.
Borden Co., Mt. Pleasant, Mich.
Borden Co., New London, Wis.
Borden Co., Orfordville, Wis.
Carnation Co., Berlin, Wis.
Carnation Co., Jefferson, Wis.
Carnation Co., Chilton, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Oconomowoc, Wis.
Carnation Co., Sparta, Mich.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed as follows:

(1) Multiply the simple average of the daily average wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the Department during such month, by 6;

(2) Add an amount computed as follows: From the simple average of the daily prices paid per pound, using the midpoint of any price range as one price, for Wisconsin State Brand Cheddars in cars or truckloads, f. o. b. Wisconsin assembling points, as reported by the Department for the trading days during the month, subtract 1.3 cents, and multiply by 2.4; and

(3) Divide such sum by 7, add 30 percent thereof, and multiply by 3.5;

(c) The price per hundredweight computed as follows:

(1) Multiply by 4.24 the simple average, as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade AA (93-score) bulk creamery butter per pound at Chicago, as reported by the Department during such month: *Provided*, That if no price is reported for Grade AA (93-score) butter, the highest of the Grade A (92-score) butter prices for that day shall be used in lieu of the price for Grade AA (93-score) butter;

(2) Multiply by 8.2 the weighted average of carlot prices per pound for spray process nonfat dry milk solids, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of such month by the Department;

(3) From the sum of the results arrived at under subparagraphs (1) and (2) of this paragraph, subtract 75.2 cents.

§ 991.52 *Class butterfat differentials*—(a) *Class I milk.* Multiply by 1.31 the simple average of the daily wholesale selling prices per pound (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter in the Chicago market as reported by the Department for the month preceding that in which the producer milk to be priced was received and divide the result by 10.

(b) *Class II milk.* Multiply by 1.20 the simple average of the daily wholesale selling prices per pound (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter at Chicago as reported by the Department during the month in which the producer milk to be priced was received, and divide the result by 10.

§ 991.53 *Computation of prices of skim milk and butterfat.* The prices per hundredweight of skim milk and butterfat to be paid by each handler for producer milk in each class shall be computed as follows: For each class, respectively, the price per hundredweight of skim milk shall be the applicable class price for the month (§§ 991.50 and 991.51) less the result of multiplying the applicable class butterfat differential for the month (§ 991.52) by 35. For each class, respectively, the price per hundredweight of butterfat shall be the applicable class price for the month plus the result of multiplying the applicable class butterfat differential for the month by 965.

APPLICATION OF PROVISIONS

§ 991.60 *Producer-handlers.* Sections 991.40 through 991.46, 991.50 through 991.55, 991.70 through 991.72, and 991.80 through 991.84, shall not apply to a producer-handler.

§ 991.61 *Milk subject to pricing under other Federal orders.* Except as follows, milk priced under any other Federal milk marketing agreement or order issued pursuant to the act for any other fluid milk marketing area shall not be subject to the provisions of this subpart:

(a) If such milk is disposed of on a route wholly or partially in the marketing area operated by or for a person subject to regulation as a handler under another order, such person shall report as requested by the market administrator, but shall not otherwise be considered a handler under this subpart;

(b) If such milk is received at the plant of a handler which is subject to the provisions of this subpart in any form other than those stated in § 991.15 (c) and (d), it shall be considered as other source milk; or

(c) If the provisions of the order for the other milk marketing area provide for determination as to the order under which milk shall be priced, the Secretary shall so determine.

§ 991.62 *Uniform price and producer payment provisions.* Sections 991.70, 991.71, 991.72, and 991.80 through 991.84 shall be applied to non-Grade A producer milk separately from Grade A producer milk.

DETERMINATION OF UNIFORM PRICES

§ 991.70 *Computation of value of producer milk.* The value of producer milk received during each month by each handler shall be computed by the market administrator by multiplying the pounds of skim milk and the pounds of butterfat in each class for such handler pursuant to § 991.46, by the applicable skim milk and butterfat prices computed pursuant to § 991.53, adding together the resulting amounts, and adding to this sum the amounts computed as follows: Multiply the pounds subtracted from the various classes pursuant to §§ 991.46 (a) (5) and 991.46 (b) by the applicable skim milk and butterfat prices.

§ 991.71 *Computation of uniform price.* For each month the market administrator shall compute the uniform price per hundredweight of producer milk (3.5 percent butterfat content) for Rockford handlers and for Freeport handlers, as follows:

(a) Combine into one total the values computed pursuant to § 991.70 (and subject to the provisions of § 991.62) for all handlers who made the reports pursuant to § 991.30 except those in default of payments required pursuant to § 991.83 for the preceding month;

(b) Subtract, if the weighted average butterfat content of producer milk is greater than 3.5 percent, or add, if such butterfat content is less than 3.5 percent, an amount computed by multiplying the difference of such weighted average butterfat content from 3.5 percent by the producer butterfat differential computed pursuant to § 991.81, and multiplying the resulting figure by the total hundredweight of such producer milk;

(c) Add an amount representing the cash balance on hand in the producer-settlement fund less the amount of unpaid obligations to handlers pursuant to §§ 991.84 and 991.87;

(d) Divide by the hundredweight of such producer milk;

(e) Subtract not less than 4 cents but less than 5 cents:

Provided, That for any month for which the percentage of Class I milk to producer milk receipts for Rockford handlers does not exceed the percentage of Class I milk to producer milk receipts for Freeport handlers, the adjustments provided by paragraphs (f) and (g) of this section shall not apply.

(f) In the case of Rockford handlers an adjusted uniform price shall be computed as follows:

(1) Adjust the values for Freeport handlers, computed pursuant to § 991.70, to a 3.5 percent butterfat basis by the butterfat differential in § 991.81, combine the adjusted values into one total, and divide such total by the hundredweight of producer milk received by such handlers;

(2) Subtract from such result the amount per hundredweight (subtrahend) subtracted pursuant to paragraph (e) of this section;

(3) Subtract such net amount from the per hundredweight figure resulting from paragraph (e) of this section;

(4) Determine the percentage which the total hundredweight of producer milk received by Freeport handlers bears to the total hundredweight of producer milk received by Rockford handlers, and multiply such percentage by the net amount per hundredweight resulting from subparagraph (2) of this paragraph;

(5) Add the amount computed under subparagraph (4) of this paragraph to the per hundredweight amount computed under paragraph (e) of this section;

(6) Adjust each sum to the nearest full cent.

(g) In the case of Freeport handlers an adjusted uniform price shall be computed as follows:

(1) Multiply the hundredweight of producer milk for Rockford handlers by the uniform price for such handlers adjusted as provided in paragraph (f) of this section;

(2) Subtract such amount from the amount computed in paragraph (c) of this section;

(3) Divide such net amount by the hundredweight of producer milk for Freeport handlers;

(4) Subtract an amount per hundredweight equal to that subtracted prior to the proviso in paragraph (e) of this section; and

(5) Adjust such net amount to the nearest full cent.

§ 991.72 *Notification to handlers.* On or before the 11th day after the end of each month, the market administrator shall mail to each handler at his last known address, a statement showing (a) the amount and value of his milk in each class and the totals thereof; (b) the applicable minimum class prices and uniform price; (c) the amount owed by him to, or the amount due him from, the producer-settlement fund, pursuant to § 991.83 or § 991.84; and (d) the amounts to be paid by him pursuant to §§ 991.80, 991.85, 991.86 and 991.87.

PAYMENTS

§ 991.80 *Time and method of payment.* Each handler shall make payments as follows:

(a) On or before the 18th day after the end of each month, to each producer, except producers for whom payment is made to a cooperative association pursuant to paragraph (b) of this section, at not less than the applicable uniform price for such month pursuant to § 991.71 adjusted by the producer butterfat differential pursuant to § 991.81, for all milk received from such producer during such month: *Provided*, That if by such date such handler has not received full payment for such month pursuant to § 991.84, he may reduce such payments uniformly per hundredweight for all producers by an amount not in excess of the per hundredweight reduction in payment from the market administrator: *And provided further*, That such handler shall make such balance of payment to those producers to whom it is due on or before the date for making payments pursuant to this paragraph next following that on which such balance of payment is received from the market administrator.

(b) On or before the 15th day after the end of each month, to a cooperative association with respect to milk caused to be delivered from producers' farms to such handler by such association for its account during such month not less than the value of such milk computed at the applicable uniform price, adjusted by the producer butterfat differential pursuant to § 991.81.

§ 991.81 *Producer butterfat differential.* In making payments pursuant to § 991.80 there shall be added to, or subtracted from, the uniform price, for each one-tenth of one percent of butterfat content in such producer milk above or below 3.5 percent, an amount computed by multiplying the simple average of the daily wholesale selling prices per pound (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter at Chicago as reported by the Department during the month in which the producer milk to be priced was received, by 0.12 and rounding to the nearest tenth of a cent.

§ 991.82 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to § 991.83 and payments related thereto pursuant to § 991.87 and out of which he shall make all payments to handlers pursuant to § 991.84 and payments related thereto pursuant to § 991.87.

§ 991.83 *Payments to the producer-settlement fund.* On or before the 15th day after the end of each month, each handler shall pay to the market administrator the amount by which the value of producer milk (§ 991.70) received by such handler during such month is greater than the total of amounts to be paid pursuant to § 991.80

§ 991.84 *Payments out of the producer-settlement fund.* On or before the 16th day after the end of each month, the market administrator shall pay to each handler the amount by which the value of producer milk (§ 991.70) received by such handler during such month is less than the sum of amounts due pursuant to §§ 991.83, 991.85, 991.86 and 991.87: *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce such payments uniformly per hundredweight and shall complete such payments as soon as the necessary funds are available.

§ 991.85 *Expense of administration.* As his prorata share of the expenses incurred pursuant to § 991.22 (d) each handler shall pay the market administrator on or before the 15th day after the end of each month, 4 cents per hundredweight, or such amount not exceeding 4 cents per hundredweight as the Secretary from time to time may prescribe, with respect to producer milk (including such handler's own production) and other source milk (excluding that subject to administrative expense assessment under another Federal milk marketing agreement or order issued pursuant to the act) received during such month.

§ 991.86 *Marketing services.* (a) Except as set forth in paragraph (b) of this section, each handler for each month shall deduct 5 cents per hundredweight, or such amount not exceeding 5 cents per hundredweight as may be prescribed by the Secretary, from the payments made to each producer pursuant to § 991.80, and shall pay such deductions to the market administrator on or before the 15th day after the end of such month. Such moneys shall be used by the market administrator to check weights, samples and tests of producer milk received by handlers and to provide producers with market information, such services to be performed by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of producers for whom a cooperative association is actually performing the services set forth in paragraph (a) of this section, but for whom such cooperative association does not receive payment for milk, each handler shall make, in lieu of the deduction specified in paragraph (a) of this section, such deductions from the payment to be made to such producers as may be authorized by the membership agreement or marketing contract between such cooperative association and such producers and on or before the 15th day after the end of such month pay every such deduction to the cooperative association rendering such services.

§ 991.87 *Adjustment of accounts.* (a) Whenever audit by the market administrator of any handler's reports, books, records or accounts disclose errors resulting in moneys due (1) the market administrator from such handler, (2) such handler from the market administrator, or (3) any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any such amount due; and payment thereof shall be made on or before the next date for making payment set forth in the provision under which such error occurred following the 5th day after such notice.

(b) An unpaid obligation of a handler shall bear interest at the rate of one-half of one percent per month, such interest to accrue on the first day of the month next following the due date of such obligation and on the first day of each month thereafter until such obligation is paid.

§ 991.88 *Termination of obligations.* The provisions of this section shall apply to any obligation under this subpart for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this subpart shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this subpart, to make available to the market administrator or his representatives all books and records required by this subpart to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this subpart to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this subpart shall terminate two years after the end of the month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

MISCELLANEOUS PROVISIONS

§ 991.90 *Effective time.* The provisions of this subpart or any amendments to this subpart shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated.

§ 991.91 *Suspension or termination.* The Secretary may suspend or terminate this subpart or any of its provisions whenever he finds that this subpart or any provision obstructs or does not tend to effectuate the declared policy of the act. This subpart shall terminate in any event whenever the provisions of the act authorizing it cease to be in effect.

§ 991.92 *Continuing obligations.* If, upon the suspension or termination of any or all provisions of this subpart, there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 991.93 *Liquidation.* Upon the suspension or termination of this subpart, except this section, the market administrator, or such other liquidating agent, as the Secretary may designate, shall if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated, all assets, books, and records of the market administrator shall be transferred promptly to such liquidating agent. If upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

§ 991.94 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this subpart.

§ 991.95 *Separability of provisions.* If any provision of this subpart, or its application to any person or circumstances, is held invalid, the application of such provision, and of the remaining provisions of this subpart, to other persons or circumstances shall not be affected thereby.

Order of the Secretary Directing That a Referendum Be Conducted Among the Producers Supplying Milk in the Rockford-Freeport, Illinois, Marketing Area, and Designation of an Agent To Conduct Such Referendum

Pursuant to section 8c (19) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 608c (19)), it is hereby directed that a referendum be conducted among the producers (as defined in the order, as amended, regulating the handling of milk in the Rockford-Freeport, Illinois, marketing area) who, during the month of February 1952 were engaged in the production of milk for sale in the marketing area specified in the aforesaid order to determine whether such producers favor the issuance of the order which is a part of the decision of the Secretary of Agriculture filed simultaneously herewith.

Jesse L. Cook is hereby designated agent of the Secretary to conduct such referendum in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders as published in the FEDERAL REGISTER on August 10, 1950 (15 F. R. 5177).

NOTICES

DEPARTMENT OF THE TREASURY

Bureau of Customs

[466.23]

CHLOROPHYLL AND CHLOROPHYLL DERIVATIVES

TARIFF CLASSIFICATION

AUGUST 19, 1952.

The Bureau, by letter to the collector of customs, New York, New York, dated August 19, 1952, ruled that chlorophyll and chlorophyll derivatives, in water-soluble forms, are classifiable under the provision in paragraph 5, Tariff Act of 1930, for chemical compounds, medicinal preparations, and combinations and mixtures of any of the foregoing, and dutiable at the modified rate of 12½ percent ad valorem.

This ruling will be effective as to such or similar merchandise entered for consumption or withdrawn from warehouse for consumption after 30 days after the date of publication of the abstract of this decision in a forthcoming issue of the weekly Treasury Decisions.

[SEAL] FRANK DOW,
Commissioner of Customs.

[F. R. Doc. 52-9314; Filed, Aug. 22, 1952; 8:52 a. m.]

[482.2]

CORK PARTS OF ARTIFICIAL BAIT

TARIFF CLASSIFICATION

AUGUST 18, 1952.

It appears probable that parts of artificial bait made of artificial, composition, or compressed cork are properly classifiable as parts of artificial bait under paragraph 1535, Tariff Act of 1930, at a rate of duty higher than that heretofore assessed under an established and uniform practice.

Pursuant to § 16.10a (d), Customs Regulations of 1943, as amended, (19 CFR 16.10a (d)), notice is hereby given that the existing uniform practice of classifying such merchandise as manufactures, wholly or in chief value of artificial, composition, or compressed cork, finished or unfinished, not specially provided for, under paragraph 1511, Tariff Act of 1930, is under review in the Bureau of Customs.

Consideration will be given to any relevant data, views or arguments pertaining to the correct classification of this merchandise which are submitted to the Bureau of Customs, Washington 25, D. C., in writing. To assure consideration, such communications must be received in the Bureau not later than 30 days from the date of publication of this notice. No hearings will be held.

[SEAL] FRANK DOW,
Commissioner of Customs.

DEPARTMENT OF COMMERCE

Federal Maritime Board

COMPANIA NAVIERA INDEPENDENCIA, S. A., ET AL.

NOTICE OF AGREEMENTS FILED FOR APPROVAL

Notice is hereby given that the following described agreements have been filed with the Board for approval pursuant to section 15 of the Shipping Act, 1916, as amended.

1. Agreement No. 7662–C between Compania Naviera Independencia, S. A., Compania Naviera Pacifico, S. A., and Compania Naviera TransAtlantico, S. A. provides for the cancellation of Agreement No. 7662 which covers the establishment and maintenance of a joint service (with limited passenger accommodations) under the trade name Independence Line, in the trade between Pacific, Atlantic and Gulf Coast ports of the United States, Pacific and Atlantic Coast ports of Canada, and Pacific, Gulf and Atlantic Coast ports of Mexico, Canal Zone, Central and South America, but not including transportation within the purview of the coastwise laws of the United States.

2. Agreement No. 7862 between United Fruit Company and Osaka Shosen Kaisha, Ltd., covers the transportation of cargo under through bills of lading from Japan and the Philippine Islands to New York and New Orleans, with transhipment at Cristobal, Canal Zone.

3. Agreement No. 7863 between Carriers Comprising the Norton Line Joint Service and Bull Insular Line, Inc., covers the transportation of cargo under through bills of lading from Argentina, Uruguay, and Brazil to Puerto Rico, with transshipment at New York, Philadelphia and Baltimore.

Interested parties may inspect these agreements and obtain copies thereof at the Regulation Office, Federal Maritime Board, Washington, D. C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to any of the agreements and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: August 19, 1952.

By order of the Federal Maritime Board.

[SEAL] R. L. MCDONALD,
Assistant Secretary.

CIVIL AERONAUTICS BOARD

[Serial No. E-6706; Docket No. 1705 et al.]

AIR FREIGHT RATE INVESTIGATION; DIRECTIONAL RATES

CERTIFICATED AIR CARRIERS

Ninth supplemental order modifying prescribed minimum rates (Serial No. E-6706). In the matter of rates and charges for the transportation of freight by air established, demanded, and charged by certificated air carriers known as air freight case; Docket No. 1705 et al.

Adopted by the Civil Aeronautics Board at its office in Washington, D. C. on the 19th day of August 1952.

The Board, on June 2, 1948, having entered an order prescribing lawful minimum rates for the transportation of property by air;

American Airlines, Inc., having filed a petition as amended, requesting modification of aforesaid minimum rate order so that a carrier serving a point at which carriers are authorized to serve through more than one airport may apply the prescribed minimum rates to and from any such airport notwithstanding that surface transportation would be involved between the airport served by the carrier's aircraft and any other airport in the same city;

And it appearing to the Board that a modification of the aforesaid minimum rate order to permit application as described hereinbefore would be just and reasonable and lawful under the various provisions of the Civil Aeronautics Act of 1938, as amended;

The Board acting pursuant to the powers vested in it by the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a), 403, 404 and 1002 thereof and finding that its action is necessary and appropriate to carry out the provisions and objectives of the act and to exercise and perform its powers and duties thereunder: *It is ordered,* That:

1. Order Serial Number E-1639 of June 2, 1948, as subsequently amended is hereby further amended to include the following:

That in complying with the provisions and requirements of the orders amended hereby an air carrier certificated to serve a point may apply airport-to-airport rates and charges, to or from any airport used by another air carrier or foreign air carrier authorized to serve the point in providing freight service at such point; and that when such rates and charges are applied to or from an airport not used by the air carrier in providing freight service to the point, the transfer of freight to and from such airport and the airport used by the carrier may be made by the carrier at no charge to consignor or consignee.

2. This order be published in the FEDERAL REGISTER, and

3. A copy of this order be served upon all air carriers parties to this proceeding.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[Docket No. 4603, et al.]

NORTH CENTRAL ROUTE INVESTIGATION CASE; REOPENED

NOTICE OF HEARING

In the matter of the proceeding known as the Reopened North Central Route Investigation Case.

Notice is hereby given, pursuant to the Civil Aeronautics Act of 1938, as amended, that hearing in the above-entitled proceeding, heretofore indefinitely postponed, is reassigned for September 8, 1952, at 10:00 a. m., d. s. t. in Room E-210, Temporary Building No. 5, Sixteenth Street and Constitution Avenue NW., Washington, D. C., before Examiner Barron Fredricks.

Dated at Washington, D. C., this 20th day of August 1952.

By the Civil Aeronautics Board.

[SEAL] FRANCIS W. BROWN,
Chief Examiner.

ECONOMIC STABILIZATION AGENCY

Office of the Administrator

DEPUTY ASSISTANT ADMINISTRATOR

INTERNAL REDELEGATION OF AUTHORITY

By virtue of the authority vested in the Economic Stabilization Administrator by E. O. 10161 of September 9, 1950 (15 F. R. 6105), as amended; E. O. 10182 of November 21, 1950 (15 F. R. 8013), as amended; E. O. 10200 of January 16, 1951 (16 F. R. 419); E. O. 10233 of April 21, 1951 (16 F. R. 3503); E. O. 10276 of July 31, 1951 (16 F. R. 7535), as amended; E. O. 10281 of August 28, 1951 (16 F. R. 8789); E. O. 10290 of September 24, 1951 (16 F. R. 9795); E. O. 10293 of September 27, 1951 (16 F. R. 9927), and E. O. 10377 of July 25, 1952 (17 F. R. 6891), this amendment of the Internal Redelegation of Authority (16 F. R. 10009; 16 F. R. 12411) is hereby issued.

1. Whenever the Economic Stabilization Administrator, the Deputy Economic Stabilization Administrator, the Assistant Economic Stabilization Administrator (Operations), and the General Counsel of the Economic Stabilization Agency are absent from the City of Washington, D. C., the functions delegated to the Administrator by the aforesaid Executive Orders are hereby further redelegated to the Deputy Assistant Economic Stabilization Administrator and shall be exercised by him as Acting Economic Stabilization Administrator.

2. This internal redelegation of authority shall take effect immediately upon filing with the Federal Register Division.

ROGER L. PUTNAM,
Administrator.

Office of Price Stabilization

[Ceiling Price Regulation 9, Supplementary Regulation 3, Special Order 14]

INTERNATIONAL LATEX CORP.

CEILING PRICES AT RETAIL

Statement of considerations. This order establishes uniform retail ceiling prices for the sale of garments and other articles manufactured by the International Latex Corporation, under the trade name "Playtex", in the Territories of Alaska, Hawaii, and Puerto Rico on the basis of an application filed by the International Latex Corporation under SR 3 to CPR 9. This supplementary regulation gives a manufacturer the right to apply for uniform retail ceiling prices for the sale in a territory or possession of an article or articles manufactured by him whenever it appears that the article or articles were sold at retail in that territory or possession at a substantially uniform price for the period immediately prior to January 26, 1951, and the Director of Price Stabilization has established a uniform retail ceiling price for sales of the article in the continental United States, and the ceiling prices proposed are no higher than the level of ceiling prices otherwise established under CPR 9. All of these criteria have been met by the International Latex Corporation.

By Delegation of Authority 7, Revised, the authority to establish uniform ceiling prices under this supplementary regulation has been vested in the Director of Region XIV.

Special provisions. For the reasons set forth in the statement of considerations and pursuant to SR 3 to CPR 9, this special order is hereby issued.

1. The ceiling prices for the sale by any retailer in the Territories of Alaska and Hawaii, and in the Commonwealth of Puerto Rico, of garments and other articles manufactured by the International Latex Corporation, Dover, Delaware, bearing the brand name "Playtex" are the retail prices listed in the application of the International Latex Corporation dated February 22, 1952 as amended by a supplementary application dated March 12, 1952, filed with Region XIV of the Office of Price Stabilization. A list of such ceiling prices will be filed by the Region XIV office of the Office of Price Stabilization with the Federal Register as an appendix to this special order as soon as practicable. On and after the date of receipt of a copy of this special order, with notice of prices annexed, but in no event later than September 15, 1952, no seller at retail may offer or sell any article covered by this special order at a price higher than the ceiling prices established by this special order. Sales may, of course, be made at less than ceiling prices.

2. The applicant must annex a copy of the price list to a copy of this order and, within 15 days of the effective date of this order, supply one copy to each retailer to whom the applicant has delivered an article covered by this special order within the two-month period immediately preceding the issuing of this regulation. A copy of this special order and that attached list shall be sent to all other purchasers for sale at retail on or before the first delivery date after the effective date of this special order of any article covered by this regulation. In addition, the applicant must furnish the Director of Region XIV of the Office of Price Stabilization, Washington 25, D. C., two copies of this notice and the attached list within fifteen days of the effective date of this order and a list of all retailers to whom this order and price list are sent within five days of mailing the orders. The list attached to this order, which must be furnished to sellers of the articles covered by this order, must be in substantially the following form:

(Column 1)	(Column 2)
Our price to retailers	Retailer's ceilings for articles of cost listed in column 1
$_____ per _____ {unit, dozen, etc.}	Terms {net, percent EOM, etc.} $_____

3. The applicant for this order must, within 60 days from the effective date of this order, either pre-ticket all articles covered by it, or provide to retailers, sufficient tags with each shipment for retailers to ticket the articles, with the retail ceiling price in the following form:

OPS-CPR 9—SR 3
Ceiling Price $_____

4. No retailer may sell or offer to sell any article covered by this order until a ticket as provided in section 3 has been attached to the article either by him, by the wholesaler, or by the manufacturer.

5. The applicant must file, within 45 days of the expiration of the first six-month period following the effective date of this order and within 45 days of the expiration of each successive six-month period, with the Director of Region XIV of the Office of Price Stabilization, Washington, D. C., a report setting forth the number of units of each article covered by this regulation which he has delivered in that six-month period.

6. This special order or any provision thereof may be revoked, suspended, or amended by the Director of Region XIV of the Office of Price Stabilization at any time.

Effective date. This special order shall become effective on August 21, 1952.

EDWARD J. FRIEDLANDER,
Acting Regional Director.

AUGUST 20, 1952.

[Region I. Redelegation of Authority No. 15, Amdt. 1]

DIRECTORS OF DISTRICT OFFICES, REGION I, BOSTON, MASS.

REDELEGATION OF AUTHORITY TO MAKE ADJUSTMENTS UNDER SR 39, REVISION 1 TO GCPR

By virtue of the authority vested in me as Director of the Regional Office of Price Stabilization, No. I, and pursuant to Delegation of Authority No. 25, Amendment 1 (17 F. R. 7098), this Amendment 1 to Redelegation of Authority No. 15 is hereby issued.

Section 1 of Redelegation of Authority No. 15 (16 F. R. 12411) is amended to read as follows:

SECTION 1. Authority is hereby redelegated to the Directors of the District Offices of the Office of Price Stabilization in Region I:

(a) To deny applications for adjustments of ceiling rates or charges made in accordance with the provisions of Supplementary Regulation 39, Revision 1 to the General Ceiling Price Regulation relating to interstate and intrastate operations;

(b) To make adjustments of ceiling rates or charges in accordance with the provisions of Supplementary Regulation 39, Revision 1 to the General Ceiling Price Regulation relating to interstate and intrastate operations.

This amended redelegation of authority shall take effect as of August 6, 1952.

JOSEPH M. McDONOUGH,
Regional Director, Region I.

AUGUST 20, 1952.

[Region V. Revocation of Redelegation of Authority No. 39]

DIRECTORS OF DISTRICT OFFICES, REGION V, ATLANTA, GA.

REVOCATION OF REDELEGATION OF AUTHORITY NO. 39 TO ACT UNDER CPR 24, AS AMENDED

By virtue of the authority vested in me as Director of the Regional Office of Price Stabilization, Region V, Atlanta, Georgia, pursuant to Delegation of Authority 68 (17 F. R. 4961), this Revocation of Redelegation of Authority No. 39 is hereby issued.

Preamble. Redelegation of Authority No. 37, is effective June 9, 1952, redelegates all of the authority delegated to the Regional Director by Delegation of Authority 68, whereas, Redelegation of Authority No. 39 omits authority to act under section 21 (b). Since this omission was inadvertent, and there is also an unnecessary reduplication of redelegation, it seems best, to avoid further confusion, to revoke the least complete of the two redelegations. For this reason, this Revocation of Redelegation of Authority No. 39 is being issued.

Revocatory provisions. Redelegation of Authority No. 39 is hereby revoked.

This revocation shall take effect as of August 11, 1952.

GEORGE D. PATTERSON, JR.,
Director, Regional Office V.

AUGUST 20, 1952.

[Region V. Redelegation of Authority No. 41]

DIRECTORS OF DISTRICT OFFICES, REGION V, ATLANTA, GA.

REDELEGATION OF AUTHORITY TO ACT UNDER CPR 26, REVISED

By virtue of the authority vested in me as Director of the Regional Office of Price Stabilization, Region V, Atlanta, Georgia, pursuant to Delegation of Authority 70 (17 F. R. 5917), this redelegation of authority is hereby issued.

1. Authority is hereby redelegated to the Directors of the District Offices of the Office of Price Stabilization, Region V, located in Montgomery in the State of Alabama, Jacksonville in the State of Florida, Jackson in the State of Mississippi, Columbia in the State of South Carolina, and Nashville in the State of Tennessee, to act under sections 5 (c) (3), 7, 21 (c), and 22 of CPR 26, Revised. All actions in respect to the foregoing sections of CPR 26, Revised, taken by any District Office of the Office of Price Stabilization in Region V, previous to this redelegation of authority are hereby confirmed and validated.

This redelegation of authority shall take effect as of August 11, 1952.

GEORGE D. PATTERSON, JR.,
Director, Regional Office V.

AUGUST 20, 1952.

FEDERAL COMMUNICATIONS COMMISSION

STATEMENTS OF ORGANIZATION, DELEGATIONS OF AUTHORITY AND PUBLIC INFORMATION

CERTIFIED COPIES; REQUESTS FOR; COSTS

In the matter of amendment of section 0.207 of the Commission's rules.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 14th day of August, 1952.

The Commission having before it the matter of amending section 0.207 of its rules and regulations to conform with the national policy for the control of non-classified technical data; and

It appearing, that in the interest of national security the public interest requires an amendment to that Section of the Rules to provide that in making certified copies of Commission records available to representatives of foreign governments or persons residing in foreign countries the criteria established by the Department of Commerce for the control of export of technical data will be considered; and

It further appearing, that authority for the proposed amendment is contained in section 4 (i) of the Communications Act of 1934, as amended;

It is ordered, effective immediately, that section 0.207 be amended to read as follows:

SEC. 0.207 *Certified copies; requests for; costs.* Copies of any documents subject to inspection under the provisions of section 0.206 will be prepared and certified by the Secretary, under seal, on written request, specifying the exact documents, the number of copies desired, and the date on which the same will be required. Such request must be made so as to permit a reasonable time for the preparation of such copies and any cost incurred in the preparation of such copies must be prepaid by the person making application therefor. *Provided, however*, That, if requests are received from representatives of foreign governments or from persons residing in foreign countries, the criteria established by the Department of Commerce for the control of export of technical data will be taken into account before such certified copies will be made available.

Released: August 19, 1952.

[Docket No. 10311]

CHESAPEAKE AND POTOMAC TELEPHONE CO. OF VIRGINIA

ORDER SCHEDULING HEARING

In the matter of the application of the Chesapeake and Potomac Telephone Company of Virginia for a certificate under section 221 (a) of the Communications Act of 1934, as amended, to acquire certain telephone plant and property of The Fauquier Telephone Company, Incorporated; Docket No. 10311, File No. P-C-2942.

At a session of the Federal Communications Commission, held at its offices in Washington, D. C., on the 13th day of August 1952;

The Commission having under consideration an application filed by The Chesapeake and Potomac Telephone Company of Virginia for a certificate under section 221 (a) of the Communications Act of 1934, as amended, that the proposed acquisition by The Chesapeake and Potomac Telephone Company of Virginia of certain telephone plant and property of The Fauquier Telephone Company, Incorporated, located in Remington and Bealeton, Fauquier County, Virginia, will be of advantage to persons to whom service is to be rendered and in the public interest;

It is ordered, That pursuant to the provisions of section 221 (a) of the Communications Act of 1934, as amended, the above application is assigned for public hearing for the purpose of determining whether the proposed acquisition will be of advantage to persons to whom service is to be rendered and in the public interest;

It is further ordered, That the hearing upon the said application be held at the offices of the Commission in Washington, D. C., beginning at 10:00 a. m. on the 4th day of September 1952, and that a copy of this Order shall be served on The Chesapeake and Potomac Telephone Company of Virginia, The Fauquier Telephone Company, Incorporated, the Governor of Virginia, the State Corporation Commission of Virginia, and the Postmasters of Remington and Bealeton, Virginia;

It is further ordered, That within five days after the receipt from the Commission of a copy of this order, the applicant herein shall cause a copy hereof to be published in a newspaper or newspapers having general circulation in Remington and Bealeton, Fauquier County, Virginia, and shall furnish proof of such publication at the hearing herein.

Released: August 18, 1952.

INDIANA GAS & WATER CO., INC., AND TEXAS GAS TRANSMISSION CORP.

NOTICE OF ORDER MODIFYING AND AFFIRMING, AS MODIFIED, THE INITIAL DECISION OF PRESIDING EXAMINER

AUGUST 19, 1952.

In the matters of Indiana Gas & Water Company, Inc., Docket No. G-1951; Texas Gas Transmission Corporation, Docket No. G-1552.

Notice is hereby given that on August 18, 1952, the Federal Power Commission issued its order entered August 14, 1952, modifying and affirming, as modified, the initial decision of the Presiding Examiner in the above-entitled matters.

[SEAL] J. H. GUTRIDE,
Acting Secretary.

[F. R. Doc. 52-9302; Filed, Aug. 22, 1952; 8:50 a. m.]

[Docket No. G-2027]

TEXAS EASTERN TRANSMISSION CORP.

NOTICE OF APPLICATION

AUGUST 19, 1952.

Take notice that Texas Eastern Transmission Corporation (Applicant), a Delaware corporation having its principal place of business at Texas Eastern Building, Shreveport, Louisiana, filed on August 8, 1952, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of a 24-inch pipeline river crossing as hereinafter described.

Applicant proposes to construct and operate a 24-inch pipeline, approximately 2,200 feet in length, across the bottom of the Arkansas River near Little Rock, Arkansas, at a point near the site of another pipeline proposed by the Applicant across this river. Applicant states that the additional river crossing herein proposed is necessary "to assure continuous and adequate service to its customers," and does not thereby propose to render any new service. Applicant estimates the cost of the project at $84,200, and proposes to accomplish the financing out of funds on hand.

Take notice that Applicant also filed on August 8, 1952, an application for a temporary certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act and § 157.9 of the Commission's rules and regulations, authorizing the construction of the facilities hereinbefore described pending determination of its application hereinbefore referred to and described.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 8th day of September 1952. The application is on file with the Commission for public inspection.

[SEAL] J. H. GUTRIDE,
Acting Secretary.

SECURITIES AND EXCHANGE COMMISSION

[File No. 812-791]

AMERICAN RESEARCH AND DEVELOPMENT CORP. AND SNYDER CHEMICAL CORP.

NOTICE OF APPLICATION

AUGUST 19, 1952.

Notice is hereby given that American Research and Development Corporation ("Research"), 200 Berkeley Street, Boston, Massachusetts, and Snyder Chemical Corporation ("Snyder"), Bethel, Connecticut, have filed an application pursuant to sections 6 (c) and 17 (b) of the Investment Company Act of 1940 requesting an order exempting from the requirements of section 17 (a) of that act the transaction hereinafter described.

Research, a registered, closed-end investment company, owns 10,800 shares (25.3 percent) of the outstanding Common Stock and $50,000 in par value (32.4 percent) of the outstanding $154,290 of the 5 percent Cumulative Preferred Stock of Snyder.. In addition, Research holds options expiring August 26, 1954, to purchase 2,000 shares of common stock from Snyder and 2,000 shares of common stock from other stockholders at $6 per share, and Research holds a $50,000 5 percent note of Snyder, or 50 percent of the latter's outstanding note indebtedness. Due to dividend arrearages, the preferred stock is presently entitled to elect a majority of the board of directors. On the basis of these facts, Snyder and Research are affiliated persons of each other and Snyder is presumed to be controlled by Research within the meaning of the definitions contained in sections 2 (a) (3) and 2 (a) (9), respectively, of the act.

Snyder has been successful in developing resin products of a high degree of technical acceptance but high costs, material shortages and development expenditures have caused Snyder to be in a continually precarious financial position. As the result of a deficit at March 31, 1950, of $184,702.20, Snyder decided to add to its management persons experienced in the production and marketing of resin products. William L. Abramowitz and his associates (hereinafter collectively called "Abramowitz") have offered to assume management, subject to the supervision of Snyder's board of directors and under an agreement whereby:

(1) Abramowitz will receive Snyder common stock equal in amount to one-third of such stock outstanding after such issue as partial compensation for services rendered from February 28, to October 1, 1951;

(2) Snyder will grant to Abramowitz options to purchase additional common stock at 1¢ per share (par value) to bring his aggregate holdings up to 50 percent of the outstanding common stock on February 28, 1951;

(3) Snyder will eliminate certain voting rights of its outstanding preferred stock and will create a Preferred Stock Sinking Fund into which Snyder will pay semi-annually $6,300 and annually 10 percent of its net profits after taxes; and

(4) Holders of at least 95 percent of preferred stock will waive arrearages of accrued and unpaid dividends through March 31, 1951, and agree to a redemption price of $1.05 rather than $1.10 per share.

The aforesaid options, expiring March 31, 1961, are subject to Snyder paying off its presently outstanding note indebtedness and having aggregate earnings after all taxes during the five-year period ending March 31, 1956, of $225,000. However, if such earnings are not reached until after that date, the options are exercisable at $1.50 per share for the one year period ending March 31, 1957, and at an increase of $1.50 per share in each yearly period thereafter to a maximum of $7.50 per share on or before March 31, 1961. Snyder would have the right for sixty days after March 31, 1954, to repurchase shares already issued to Abramowitz, if its earnings after taxes for the three years preceding that date are less than $75,000, at a price per share equal to one-third of the total earnings per share after taxes during said three-year period.

In order to meet the requirements of the Abramowitz offer, Snyder will submit to stockholders an amendment of its certificate of incorporation, providing for the elimination of certain voting rights of the outstanding preferred and for the creation of the proposed sinking fund therefor. The holders of all but 700 shares (less than ½ of 1 percent) of the preferred stock have indicated their willingness to vote for said amendment and concurrently to waive dividend arrearages on their preferred stock and to reduce its redemption price. Said waiver of dividend arrearages and reduction of redemption price cannot be accomplished by corporate amendment since such changes require 100 percent approval of stockholders. Upon completion of the corporate action and in connection with the waiver of arrearages and reduction of redemption price, the preferred stock certificates will be called in by Snyder and appropriately marked to indicate the amendments and, in the case of all but 700 shares, the forgiveness of arrearages and reduction of redemption price.

At December 31, 1951, Snyder had a deficit of $141,686.27 and it is unlikely that preferred dividends could be paid in the near future. Research has appraised its Snyder common stock (cost: $2,600) at $1 since December 31, 1948, and its Snyder preferred stock (cost: $50,000) at $1 since September 30, 1950. Arrearages on preferred stock held by Research amount to $11,250. Snyder's directors believe that participation by Abramowitz in the management is necessary and desirable for the success of the business, and that the creation of a Preferred Stock Sinking Fund and elimina-

tion of certain voting rights of the preferred stock are necessary and reasonable inducements to secure that participation in return for the issuance to Abramowitz of common stock. Research desires to aid in securing said participation and proposes to waive its claim to preferred dividend arrearages through March 31, 1951, and to reduce the redemption price.

The proposed transaction in which Snyder will exchange a new preferred stock, with sinking fund provisions, for its present preferred stock, the holders of which agree to waive the dividend arrearage thereon and accept a reduction in the redemption price, involves on the part of Snyder a purchase of the present preferred stock and a sale of the new preferred stock. It is Snyder's purchase of the present preferred stock owned by Research which is prohibited by section 17 (a) and for which exemption is sought in this application.

The application states that the terms of the proposed transaction are fair and reasonable and do not involve overreaching on the part of any person concerned; and that the transaction is consistent with the policies of Research as recited in its registration statement and reports filed under the act and with the general purposes of the act.

Since the proposed transaction involves the purchase of securities from a registered investment company (Research) by an affiliated person (Snyder), such transaction is prohibited by section 17 (a) of the act unless an exemption therefrom is granted by the Commission under section 17 (b) of the act.

For a more detailed statement of the matters of fact and law asserted, all interested persons are referred to said application which is on file in the offices of the Commission at Washington, D. C.

Notice is further given that an order granting the application may be issued by the Commission at any time on or after September 10, 1952, unless prior thereto a hearing upon the application is ordered by the Commission as provided in Rule N-5 of the rules and regulations promulgated under the act. Any interested person may, not later than September 8, 1952, at 5:30 p. m., e. d. s. t., submit in writing to the Commission his views or any additional facts bearing upon this application or the desirability of a hearing thereon, or request in writing that the Commission order a hearing to be held thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., and should state briefly the nature of the interest of the person submiting such information or requesting a hearing, the reasons for such request and the issues of fact or law raised by the application which he desires to controvert.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 52-9285; Filed, Aug. 22, 1952; 8:46 a. m.]

[File No. 812-794]

NATIONAL SECURITIES AND RESEARCH CORP.

NOTICE OF APPLICATIONS AND OPPORTUNITY FOR HEARING

AUGUST 19, 1952.

In the matter of Independence Fund Trust Certificates, First Mutual Trust Fund, and National Securities Series—Balanced Series—all sponsored by National Securities & Research Corporation, File No. 812-793; and First Mutual Trust Fund and National Securities Series—Balanced Series—both sponsored by National Securities and Research Corporation, File No. 812-794.

National Securities & Research Corporation has filed applications for itself and as sponsor of Independence Fund Trust Certificates, First Mutual Trust Fund, and National Securities Series—Balanced Series pursuant to section 11 (c) of the Investment Company Act of 1940 for an order approving pursuant to section 11 (a) of the act certain offers of securities. The applications assert the following:

Independence Fund Trust Certificates is a registered unit investment trust of the periodic payment type. The certificates are issued under a trust agreement dated as of July 1, 1931, between the Applicant, the Empire Trust Company, successor trustee, and the beneficiaries of Independence Fund Trust Certificates. These securities were first sponsored by the Applicant on July 1, 1931. They have not been offered since December 1937. Payments on all of the presently outstanding Independence Fund Trust Certificates are invested in shares of First Mutual Trust Fund.

First Mutual Trust Fund is an open-end diversified management investment company sponsored by the applicant. Shares of First Mutual Trust Fund are issued under a trust agreement dated as of March 1, 1937, between National Securities & Research Corporation, Empire Trust Company, Trustee, and the holders from time to time of shares of First Mutual Trust Fund. Shares of First Mutual Trust Fund are not at present generally offered to the public.

National Securities Series is an open-end diversified management company sponsored by the Applicant. There are ten series, each with its own separate portfolio objective. The holder of the shares of one Series participates only in the portfolio of that Series. National Securities Series—Balanced Series is one of the National Securities Series.

According to the applications, it is proposed to offer to the holders of shares of First Mutual Trust Fund such number of shares of National Securities Series—Balanced Series at net asset value as can be purchased with the proceeds from the liquidation of shares of First Mutual Trust Fund held. There will be no sales load involved. The liquidation value of shares of First Mutual Trust Fund is the net asset value after deducting the expense on sale of the portfolio securities, being brokerage, stamp taxes and S. E. C. fees. This is not the net asset value in effect for the purpose of determining the offering price, in which case brokerage would be added.

It is proposed to offer to the holders of Independence Fund Trust Certificates such number of shares of National Securities Series—Balanced Series at net asset value as can be purchased with the proceeds from the liquidation of Independence Fund Trust Certificates. Independence Fund Trust Certificates can be liquidated by the holders thereof who will receive the entire liquidating value of the shares of First Mutual Trust Fund held for them, less any trustee maintenance due.

Application to and authority from the Commission would not be required by section 11 (a) of the Investment Company Act of 1940 if it were possible to make the exchange on a strictly net asset value basis. This is impossible, however, the Applicant states, because according to advice of counsel, the First Mutual Trust Agreement cannot be effectively amended to eliminate the requirement that brokerage, stamp taxes and S. E. C. fees be deducted from net asset value to determine the liquidating value. This deduction does not go directly or indirectly to the Applicant.

The applications state that liquidations of shares of First Mutual have exceeded by over $2,000,000 the sales in the past five years and that last year liquidations were more than twelve times sales. The public offering of shares of First Mutual was withdrawn on June 30, 1952.

For a more detailed statement of the matters of fact and law asserted, all interested persons are referred to said applications which are on file in the offices of the Commission in Washington, D. C.

In appearing to the Commission that said applications present questions of law and fact common to each of said applications,

It is ordered, That the proceedings on the two applications be and the same are hereby consolidated; and

Notice is further given that an order granting the applications, in whole or in part and upon such conditions as the Commission may see fit to impose, may be issued by the Commission at any time on or after September 1, 1952, unless prior thereto a hearing upon the applications is ordered by the Commission as provided in Rule N-5 of the rules and regulations promulgated under the act. Any interested person may, not later than August 29, 1952 at 5:30 p. m., submit to the Commission in writing his views on any additional facts bearing upon these applications or the desirability of a hearing thereon, or request the Commission in writing that a hearing be held thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., and should state briefly the nature of the interest of the person submitting such information or requesting a hearing, the reasons for such request, and the issues of fact or law raised by the applications which he desires to controvert.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 812-798]

E. I. DU PONT DE NEMOURS AND CO. AND HENRY B. DU PONT

NOTICE OF APPLICATION

AUGUST 18, 1952.

Notice is hereby given that E. I. du Pont de Nemours and Company ("Applicant") of Wilmington, Delaware, an affiliated person of and presumptively controlled by Christiana Securities Company ("Christiana"), a registered closed-end non-diversified management company, which is an affiliated person of and presumptively controlled by Delaware Realty and Investment Company ("Realty"), a registered closed-end non-diversified management investment company, has filed an application pursuant to section 17 (b) of the Investment Company Act of 1940, for an order exempting from the provisions of section 17 (a) of the act the acquisition by Applicant of certain real estate from Henry B. du Pont ("Vendor"). In addition to being a director and minority stockholder of Realty, Christiana and Applicant, Vendor is also President of Realty and Vice President of Christiana and Applicant. Vendor, therefore, is an affiliated person of such corporations within the meaning of the act.

It appears from the application that Applicant is to acquire from Vendor a certain tract of land now owned by Vendor of approximately one hundred sixty (160) acres in size which is located in the vicinity of Wilmington, Delaware. The purchase price is to be two thousand dollars ($2,000.00) per acre, a total of approximately three hundred twenty thousand dollars ($320,000.00) in cash. Applicant desires to acquire such land for a site on which to construct laboratory facilities and for other company purposes.

For a more detailed statement of the matters of fact and law asserted, all interested persons are referred to said application which is on file in the offices of the Commission in Washingtn, D. C.

Notice is further given that an order granting the application may be issued by the Commission at any time on or after September 3, 1952, unless prior thereto a hearing upon the application is ordered by the Commission as provided in Rule N-5 of the rules and regulations promulgated under the act. Any interested person may, not later than September 2, 1952, at 5:30 p. m., submit to this Commission in writing his views or any additional facts bearing upon this application or the desirability of a hearing thereon, or request the Commission in writing that a hearing be held thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., and should state briefly the nature of the interest of the person submitting such information or requesting a hearing, the reasons for such request, and the issue of fact or law raised by the application which he desires to controvert.

By the Commission.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 27322]

SOYBEAN CAKE AND MEAL FROM ARKANSAS TO THE SOUTHWEST

APPLICATION FOR RELIEF

AUGUST 20, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to his tariff I. C. C. No. 3972.

Commodities involved: Soybean cake and meal, carloads.

From: Points in northeastern Arkansas.

To: Southwestern territory (on traffic accorded transit privileges at St. Louis, Mo., and Decatur, Ill.).

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Schedules filed containing proposed rates; F. C. Kratzmeir, Agent, I. C. C. No. 3972, Supp. 12 St. L.-S. F. Ry. tariff I. C. C. No. A-331, Supp. 24 and certain other transit tariffs.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

To: Dougherty, Ga.

Grounds for relief: Competition with rail carriers and circuitous routes.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] W. P. BARTEL, *Secretary.*

[F. R. Doc. 52-9300; Filed, Aug. 22, 1952; 8:49 a. m.]

[4th Sec. Application 27330]

LIMESTONE FROM INWOOD, W. VA., TO PITTSBURGH, PA., DISTRICT

APPLICATION FOR RELIEF

AUGUST 20, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: C. W. Boin, Agent, for The Baltimore and Ohio Railroad Company, The Pennsylvania Railroad Company, and The Pittsburgh and Lake Erie Railroad Company.

Commodities involved: Limestone, crude, fluxing, foundry, and furnace, carloads.

From: Inwood, W. Va.

To: Pittsburgh, Pa., district.

Grounds for relief: Rail competition and market competition.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

[SEAL] W. P. BARTEL, *Secretary.*

DEPARTMENT OF JUSTICE

Office of Alien Property

[Vesting Order 18989]

BARBARA PITTERMANN

In re: Bank accounts owned by Barbara Pittermann. F-28-2436; C-1.

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Cong., 65 Stat. 451; Executive Order 9193, as amended by Executive Order 9567 (3 CFR 1943 Cum. Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR 1946 Supp.) and Executive Order 9989 (3 CFR 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That Barbara Pittermann, who there is reasonable cause to believe on or since December 11, 1941, and prior to January 1, 1947, was a resident of Germany, is and prior to January 1, 1947, was a national of a designated enemy country (Germany);

2. That the property described as follows:

a. That certain debt or other obligation of the Central Savings Bank of the City of New York, 2100 Broadway, New York, New York, arising out of a savings account, account number 841,070, entitled Barbara Pittermann, maintained at the branch office of the aforesaid bank located at Fourth Avenue at Fourteenth Street, New York, New York, and any and all rights to demand, enforce and collect the same, and

b. That certain debt or other obligation of the Central Savings Bank of the City of New York, 2100 Broadway, New York, New York, arising out of a savings account, account number 1,214,584, entitled Barbara Pittermann in trust for Maria Möhwald, maintained at the branch office of the aforesaid bank located at Fourth Avenue at Fourteenth Street, New York, New York, and any and all rights to demand, enforce and collect the same,

is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by, Barbara Pittermann, the aforesaid national of a designated enemy country (Germany);

and it is hereby determined:

3. That the national interest of the United States requires that the person identified in subparagraph 1 hereof be treated as a person who is and prior to January 1, 1947, was a national of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described above, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193, as amended.

Executed at Washington, D. C., on August 19, 1952.

For the Attorney General.

[SEAL] ROWLAND F. KIRKS, *Assistant Attorney General, Director, Office of Alien Property.*

FEDERAL REGISTER

VOLUME 17 NUMBER 167

Washington, Tuesday, August 26, 1952

TITLE 6—AGRICULTURAL CREDIT

Chapter II—Rural Electrification Administration, Department of Agriculture

PART 200—PROCEDURES

Effective July 1, 1952, Part 200 of Title 6, issued September 11, 1946 (11 F. R. 177A—294–296, inclusive) (redesignated at 13 F. R. 8248) as amended April 23, 1949 (14 F. R. 2006) is hereby amended as follows:

1. By deleting all of Part 200, and substituting therefor a new Part 200 reading as follows:

Sec.
200.1 Loans pursuant to section 4 of Rural Electrification Act.
200.2 Loans pursuant to section 5 of Rural Electrification Act.
200.3 Loans pursuant to section 201 of Rural Electrification Act.
200.4 Studies, investigations, and reports.
200.5 Assistance to borrowers.

AUTHORITY: §§ 200.1 to 200.5 issued under 49 Stat. 1363, as amended, 63 Stat. 948; 7 U. S. C. and Sup. 901–915, 921–924.

§ 200.1 *Loans Pursuant to Section 4 of Rural Electrification Act*—(a) *General.* These loans are made to finance the construction and operation of generating plants, electric transmission and distribution lines or systems. They must be amortized within a maximum of thirty-five years, must be found to be self-liquidating within the period of the loan, and must be reasonably secured in the judgment of the Administrator. They bear interest at two per centum per annum. They may be made to persons, corporations, public bodies, and to cooperative, nonprofit, or limited dividend associations.

(b) *Applications.* There is no prescribed or standard form of application for such loans. Interested persons making inquiry are given specific advice as to their eligibility, the terms and conditions of the loans, the information that they should furnish, and the further steps they should take to perfect application. If the Administrator approves a loan proposal, the applicant is immediately notified and loan papers are forwarded for the signature of the borrower.

(c) *Construction.* Under the loan agreements, certain controls over construction by the borrower are exercised by the agency. These include approval of the consulting engineer selected and hired by the borrower, approval of the plans and specifications for the construction, approval of materials and equipment used, and approval of contracts with third parties for engineering services, for construction, and for purchase of materials, equipment and wholesale power. There is also provision for progress reports to the agency on construction, for inspection of construction by the agency and for audit of the borrower's records relating to construction.

(d) *Advance of loan funds.* Loan funds are advanced on the basis of requisitions submitted by borrowers in accordance with established requirements.

§ 200.2 *Loans pursuant to section 5 of Rural Electrification Act*—(a) *General.* These loans are made to finance the wiring of the premises of persons in rural areas and the acquisition and installation of electrical and plumbing appliances and equipment. They bear interest at two per centum per annum. They may be made to any of the borrowers of funds under section 4 of the act or to any person, firm or corporation supplying or installing the wiring, plumbing, or appliances.

(b) *Applications.* There is no standard or prescribed form of application for this type of loan. The information submitted in support of an application should set forth the purposes for which the loan is requested and the amount required for each purpose. If the Administrator approves a loan proposal, the applicant is immediately notified and loan papers are forwarded for the signature of the borrower.

(c) *Advances of loan funds.* Loan funds are advanced on the basis of requisitions submitted by the borrower. Before any funds are advanced the borrower must satisfy the agency that the installations financed comply with min-

§ 200.3 *Loans pursuant to section 201 of Rural Electrification Act*—(a) *General.* These loans are made for the purpose of financing the improvement, expansion, construction, acquisition, and operation of telephone lines, facilities, or systems to furnish or improve telephone service in rural areas. They must be self-liquidating within a period of not to exceed thirty-five years and bear interest at the rate of two per centum per annum. They may be made to persons now providing or who may hereafter provide telephone service in rural areas and to cooperative, nonprofit, limited dividend, or mutual associations.

(b) *Applications.* Applications for these loans should be made on Standard Form T–1, copies of which are made available by REA on request. After the information provided by the application form is examined, the applicant will be notified of any further steps to be taken. If the Administrator approves a loan proposal, the applicant is immediately notified and loan papers are forwarded for the signature of the borrower.

(c) *Advances of loan funds.* Loan funds are advanced on the basis of requisitions submitted by the borrower. Loan funds will be advanced to borrowers only as needed to meet approved obligations.

§ 200.4 *Studies, investigations, and reports.* Pursuant to section 2 of the act, the agency may make or cause to be made studies, investigations, and reports concerning the condition and progress of electrification and telephony in rural areas in the several States and territories and may publish and disseminate information with respect thereto.

§ 200.5 *Assistance to borrowers.* In carrying out the program of rural electrification and rural telephony provided by the act, the agency provides specialized and technical assistance to borrowers in respect of their organization, the construction of their facilities, and the technical and managerial operation of their completed systems. Persons or associations seeking an initial loan from the Rural Electrification Administration for the construction of a rural power or telephone system are assisted in perfecting their organization, in the conduct of their surveys and in the preparation of loan applications. Similar services are rendered when necessary to existing borrowers.

Issued this 14th day of August 1952.

[SEAL] CLAUDE R. WICKARD,
Administrator.

TITLE 7—AGRICULTURE

Chapter I—Production and Marketing Administration (Standards, Inspections, Marketing Practices), Department of Agriculture

Subchapter D—Warehouse Regulations

PART 102—GRAIN WAREHOUSES

MISCELLANEOUS AMENDMENTS

On July 2, 1952, there was published in the FEDERAL REGISTER a notice of proposed amendments of the grain warehouse regulations (7 CFR Part 102) under the United States Warehouse Act, as amended (7 U. S. C. 241–273). No objection, data, views, or arguments having been filed pursuant to the notice, under the authority of section 28 of the act, said regulations are hereby amended as follows:

1. A new § 102.3a is added to read:

§ 102.3a *All facilities to be licensed or exempted.* All facilities within the same city or town used for the storage of grain by an applicant for a warehouse license must qualify for a license and be licensed under the act if the applicant is to be licensed to operate as a grain warehouseman in such city or town, unless the facilities which are not to be covered by a license are exempted by the Secretary or his designated representative upon a finding that, due to the exercise of adequate controls by some independent agency over the operation of the nonfederally licensed facilities, there would be no likelihood of interchange, substitution, or commingling of grain stored in such facilities with grain stored in the federally licensed facilities. If all such facilities do not qualify for a license or for an exemption under this section, the applicant shall not be licensed under the act as a grain warehouseman in the city or town in which the facilities in question are located. Each applicant for a grain warehouse license must apply for a license covering all facilities operated by him for the storage of grain within the same city or town or for exemption as provided in this paragraph. If a licensed grain warehouseman acquires any additional grain storage facilities within the same city or town in which his licensed warehouse is located, he shall file promptly an application for a license or an exemption of the additional facilities. No grain storage facility acquired by a licensed grain warehouseman, subsequent to the issuance of his license, in the same city or town as his licensed facilities, shall be used for the storage of grain until it qualifies for license and is licensed or is exempted as provided in this section. If any one of the licensed grain storage facilities operated by a warehouseman in the same city or town becomes ineligible for a license at any time for any reason, it shall not thereafter be used for the storage of grain until the condition making it ineligible is removed or an exemption is granted as provided in this section. The use for the storage of grain by a licensed warehouseman of a facility which is in the same city or town as his licensed facilities and is neither licensed nor exempted, or other violation of the provisions of this section, shall be cause for suspension or revocation of any license issued to the warehouseman for the storage of grain.

2. Section 102.6 is amended to read:

§ 102.6 *Net assets.* (a) Each warehouseman shall have and maintain above all exemptions and liabilities, total net assets liable for the payment of any indebtedness arising from the operation of the warehouse equal to at least 4 percent of the total value of the maximum number of bushels of wheat that the warehouse could accommodate when stored in the manner customary to the warehouse, calculated upon the basis of the unit price for wheat announced annually by the Administrator: *Provided, however,* That if the commodity normally stored or to be stored in the warehouse in greatest quantity over the period of a year has a unit price, as announced annually by the Administrator, higher than wheat, the maximum number of bushels and the unit price of such commodity shall be used in calculating the amount of net assets required: *And provided further,* That a warehouseman who does not meet the net assets requirement specified in this paragraph may be licensed under the act and the regulations in this part if he furnishes the bond required under § 102.14 for such a warehouseman. In determining total net assets, credit may be given for insurable property such as buildings, machinery, equipment, and merchandise inventory, only to the extent that such property is protected by insurance against loss or damage by fire. Such insurance shall be in the form of lawful policies issued by one or more insurance companies authorized to do such business and subject to service of process in suits brought in the State in which the warehouse is located.

(b) In case a warehouseman is licensed or is applying for a license to operate two or more warehouses in the same State, the maximum number of bushels which all such warehouses will accommodate when stored in the manner customary to the warehouses, shall be considered in determining whether the warehouseman meets the net worth requirements specified in paragraph (a) of this section.

(c) For the purposes of paragraphs (a) and (b) of this section only, capital stock as such shall not be considered a liability.

(d) In case a State agency licensed or applying for a license as provided in section 9 of the act has funds of not less than $500,000 guaranteeing the performance of obligations of the agency as a warehouseman, such funds shall be considered sufficient to meet the net asset requirements of this section.

3. Section 102.7 is amended by adding thereto the following sentence: "If all the facilities operated for the storage of grain by the applicant within the same city or town are not to be licensed under the act, the applicant shall not be licensed as a grain warehouseman with respect to any of such facilities unless an exemption of the facilities which are not to be licensed is granted as provided in § 102.3a."

4. The third and fourth sentences in § 102.9 are amended to read, respectively: "The Secretary, or his designated representative, may, after opportunity for hearing has been afforded in the manner prescribed in this section, suspend or revoke a license issued to a warehouseman when such warehouseman (a) is bankrupt or insolvent; (b) has parted, in whole or in part, with his control over the licensed warehouse; (c) is in process of dissolution or has been dissolved; (d) has for any reason ceased to operate such licensed warehouse; (e) has in any other manner become incompetent or incapacitated to conduct the business of the warehouse; (f) has made unreasonable or exorbitant charges for services rendered; (g) is using in the same city or town in which his licensed warehouse facilities are located, any facility for storage of grain which is not covered by a license or an exemption as provided in § 102.3a; or (h) has in any

other manner violated or failed to comply with any provision of the act or the regulations in this part."

5. Section 102.14 is amended to read:

§ 102.14 *Amount of bond; additional amounts.* (a) The amount of bond to be furnished by a warehouseman who has met the net assets requirement of § 102.6 (a) shall be at least 6 percent of the total value of the maximum number of bushels of wheat that his warehouse could accommodate when stored in the manner customary to the warehouse, calculated upon the basis of the unit price for wheat announced annually by the Administrator: *Provided, however,* That if the commodity normally stored or to be stored in the warehouse in greatest quantity over the period of a year has a unit price, as announced annually by the Administrator, higher than wheat, the maximum number of bushels and the unit price of such commodity shall be used in calculating the amount of bond required: *And provided further,* That in any case the amount of bond shall not be less than $5,000 or more than $200,000, except as provided in paragraph (c) of this section. The amount of bond to be furnished by a warehouseman who has not met the net assets requirement of § 102.6 (a) shall be calculated in the manner prescribed in this paragraph except that it shall be at least 12 percent of the total value as specified in this paragraph and in any case shall not be less than $10,000 nor more than $400,000 except as provided in paragraph (c) of this section.

(b) In case a warehouseman has applied for licenses to operate two or more warehouses in the same State and his total assets are subject to the liabilities of each warehouse, he may if he desires give a single bond meeting the requirements of the act and the regulations in this part to cover all his warehouses within the State. In such case all of his warehouses in the State shall be deemed to be one warehouse and the maximum number of bushels that all of said warehouses will accommodate when stored in the manner customary to each of such warehouses shall be considered for the purposes of determining the amount of bond required under §§ 102.13 through 102.17.

(c) In case the Secretary, or his designated representative, finds that conditions exist which warrant requiring additional bond, there shall be added to the amount fixed in accordance with paragraph (a) of this section a further amount to meet such conditions.

6. Section 102.57 is amended to read:

§ 102.57 *License fees.* There shall be charged and collected a fee of $20 for each original warehouseman's license, and a fee of $10 for each amended or reinstated warehouseman's license applied for by a warehouseman, and a fee of $6 for each license, or amendment thereto, issued to an inspector and/or weigher.

7. Section 102.58 is amended to read:

§ 102.58 *Warehouse inspection fee.* There shall be charged and collected for each original inspection of a warehouse under the act, when such inspection is made upon application of a warehouseman, a fee at the rate of $5 for each 10,000 bushels of the grain storage capacity of the warehouse, or fraction thereof, determined in accordance with § 102.6 (a), but in no case less than $20 nor more than $500, and for each reinspection, applied for by the warehouseman, a fee based on the extent of the reinspection, proportioned to, but not greater than, that prescribed for the original inspection.

8. Section 102.80 is amended to read:

§ 102.80 *Appeal procedure.* In case a question arises as to the true grade of grain stored or to be stored in a licensed warehouse, for which official grain standards of the United States are in effect and for which a grain inspection certificate has been issued in accordance with § 102.64, any interested party may take an appeal for the determination of the grade of such grain as provided in this section. If the grain inspection certificate involved was issued under the Grain Standards Act, the appeal shall be governed by the regulations issued under that act: *Provided,* That a copy of the Federal appeal grade certificate issued in the appeal, together with any receipt covering the grain filed in the appeal, shall be sent to the licensed warehouseman concerned, and a copy of the Federal appeal grade certificate shall be sent to the licensed inspector and to each other person shown by the record of the appeal to be interested therein. When the grain inspection certificate with respect to which the appeal is taken was not issued under the Grain Standards Act, the appeal shall be governed by §§ 102.81 through 102.95.

9. Section 102.82 is amended by deleting the last sentence thereof reading as follows: "An appeal taken in conformity with the Grain Standards Act and regulations thereunder shall be deemed to be an appeal for the purposes of §§ 102.80–102.95."

10. Section 102.91 is amended to read:

§ 102.91 *Grain grade appeal fees.* The fees and charges in appeals from grain inspection certificates not issued under the Grain Standards Act shall be the same as those prescribed in the regulations under the Grain Standards Act for appeals from grain inspection certificates issued under that act. Such fees and charges shall be assessed against the appellant.

11. Section 102.96 is amended by deleting the phrase "except § 102.6" from the first sentence of the section.

12. Wherever in §§ 102.18, 102.44, 102.83, 102.86, 102.88, 102.90, 102.93, 102.94, 102.95, and 102.99, the phrase "§§ 102.80–102.95" appears, it is deleted and the phrase "§§ 102.81 through 102.95" is substituted therefor.

The amendments require all grain warehouse facilities in the same city or town operated by a warehouseman holding a grain warehouse license under the United States Warehouse Act to be covered by such license, except under specified conditions. The amendments increase the amount of net assets and bond required of licensed grain warehousemen and the fees for inspection of grain warehouses, for licenses of grain warehousemen, inspectors, and weighers, and for grain grading appeals. The grain grading appeal procedure is modified by the amendments. The amendments also modify the provisions of the regulations relating to suspension and revocation of grain warehouse licenses.

The changes made in the present regulations by the amendments are deemed necessary for the better protection of depositors and other persons interested in grain stored in warehouses licensed under the act. Since the grain storage season has commenced in some areas and is imminent in other areas, in order to be of most benefit to such persons the amendments must be made effective as soon as possible. Accordingly under section 4 of the Administrative Procedure Act (5 U. S. C. 1003) good cause is found for making the amendments effective less than 30 days after their publication in the FEDERAL REGISTER.

Effective date. The foregoing amendments shall become effective August 25, 1952.

(Sec. 28, 39 Stat. 490; 7 U. S. C. 268)

Done at Washington, D. C. this 21st day of August, 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

PART 904—MILK IN THE GREATER BOSTON MARKETING AREA

ORDER AMENDING ORDER, AS AMENDED

§ 904.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and proposed amendments to the order, as amended, regulating the handling of milk in the Greater Boston, Massachusetts, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will

tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(4) All milk and milk products, handled by handlers, as defined in this order, as amended, and as hereby further amended, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expenses of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expenses, 3 cents per hundredweight or such amount not exceeding 3 cents per hundredweight as the Secretary may prescribe with respect to all of his receipts of milk from producers (including such handler's own production) and his receipts of outside milk.

(b) *Additional findings.* It is necessary that the amendments hereinafter set forth be made effective not later than September 1, 1952, so as to reflect current marketing conditions. Any delay beyond September 1, 1952 in the effective date of this order amending the order, as amended, will seriously threaten the orderly marketing of milk in the Greater Boston, Massachusetts, marketing area. The provisions of the said order are well known to handlers, the public hearing having been held on January 28 through February 1, 1952, and reopened on May 12 through May 15, 1952, the recommended decisions having been published in the FEDERAL REGISTER (17 F. R. 3496) April 19, 1952 and (17 F. R. 6271) July 12, 1952 and the final decision having been executed by the Acting Secretary on August 5, 1952. Therefore, reasonable time, under the circumstances, has been afforded persons affected to prepare for its effective date and it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER (See section 4 (c), Administrative Procedure Act, Pub. Law 404, 79th Cong., 60 Stat. 237).

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing, or shipping milk covered by this order amending the order, as amended) of more than 50 percent of the volume of the milk covered by this order amending the order, as amended, which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended is approved or favored by at least two-thirds of the producers who participated in a referendum and who during the determined representative period (March 1952) were engaged in the production of milk for sale in the said marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof the handling of milk in the Greater Boston, Massachusetts, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Amend § 904.1 (b) by adding the town of Bedford to the list of Massachusetts cities and towns included in the marketing area.

2. Amend § 904.2 by renumbering paragraphs (f) through (k) as paragraphs (g) through (l) respectively and by adding a new paragraph (f) as follows:

(f) "Association of producers" means any cooperative marketing association which the Secretary determines to be qualified pursuant to the provisions of the act of Congress of February 18, 1922, known as the "Capper-Volstead Act," and to be engaged in making collective sales or marketing of milk or its products for the producers thereof.

3. Delete § 904.4 (h) and substitute therefor the following:

(h) "Concentrated milk" means the concentrated, unsterilized milk product, resembling plain condensed milk, which is disposed of to consumers for human consumption in fluid form.

4. Delete § 904.15 and substitute therefor the following:

§ 904.15 *Classes of utilization.* All milk and milk products received by a handler shall be classified as Class I milk or Class II milk. Subject to §§ 904.16, 904.17, and 904.18, the classes of utilization shall be as follows:

(a) Class I milk shall be:

(1) All fluid milk products sold, distributed, or disposed of as or in milk;

(2) All fluid milk products sold, distributed, or disposed of for human consumption as or in flavored milk, skim milk, flavored or cultured skim milk, or buttermilk;

(3) Ninety-eight percent, by weight, of the fluid milk products used to produce concentrated milk; and

(4) All fluid milk products the utilization of which is not established as Class II milk.

(b) Class II milk shall be all fluid milk products the utilization of which is established:

(1) As being sold, distributed, or disposed of other than as specified in subparagraphs (1), (2), and (3) of paragraph (a) of this section; and

(2) As plant shrinkage, not in excess of 2 percent of the volume handled.

5. Delete § 904.16 and substitute therefor the following:

§ 904.16 *Classification of milk and milk products utilized at regulated plants of pool handlers and buyer-handlers.* Subject to §§ 904.17 and 904.29 (a), milk and milk products received at a regulated plant of any pool handler or buyer-handler shall be classified in accordance with their utilization at such plant.

6. Delete § 904.17 and substitute therefor the following:

§ 904.17 *Classification of fluid milk products, other than cream, moved to other plants.* Any fluid milk product, except cream, which is moved from a regulated plant of a pool handler or a buyer handler to any other plant shall be classified as follows:

(a) If moved to a producer-handler's plant or an unregulated plant, it shall be classified as Class I milk up to the total quantity of the same form of fluid milk products so moved which is utilized as Class I milk at that plant.

(b) If moved to a producer-handler's plant or to an unregulated plant and thence to another plant, it shall be classified by applying § 904.16 or paragraph (a) of this section, whichever is applicable, except that if the other plant to which such movement is made is located outside of the New England States and New York State, it shall be classified as Class I milk.

7. Revise § 904.29 (c) by inserting after the words "Skim milk" the words "in bulk."

8. Delete § 904.40 and substitute therefor the following:

§ 904.40 *Class I price.* The Class I price per hundredweight at plants located in the 201–210 mile zone shall be the New England basic Class I price per hundredweight determined for each month pursuant to § 904.48.

9. Add a new § 904.48 as follows:

NEW ENGLAND BASIC PRICE FORMULA

§ 904.48 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section. The latest reported figures available to the market administrator on the 25th day of the preceding month shall be used in making the following computations except that if the 25th day of the preceding month falls on a Sunday or legal holiday, the

latest figures available on the next succeeding work day shall be used.

(a) Compute the economic index as follows:

(1) Divide by 1.143 the monthly wholesale price index for all commodities as reported by the Bureau of Labor Statistics, United States Department of Labor, with the years 1947–49 as the base period.

(2) Using the data on national and regional per capita income payments as published by the United States Department of Commerce, establish a "New England adjustment percentage" by computing the current percentage relationship of New England per capita income to the national per capita income. Multiply by the New England adjustment percentage the quarterly figure showing the current annual rate of per capita disposable personal income in the United States as released by the United States Department of Commerce or the Council of Economic Advisers to the President. Divide the result by 15.27 to determine an index of per capita disposable income in New England.

(3) Compute the simple average of the four latest weekly average retail prices per ton of dairy ration in the Boston milkshed as reported by the United States Department of Agriculture and divide the average by 0.884 to determine the dairy ration index. Compute the average, weighted by the indicated factors, of the following farm wage rates reported for the New England region by the United States Department of Agriculture: Rate per month with board and room, 1; rate per month with house, 1; rate per week with board and room, 4.33; rate per week without board or room, 4.33; and the rate per day without board or room, 26. Divide the average wage rate so computed by 1.458 to determine the wage rate index. Multiply the dairy ration index by 0.6 and the wage rate index by 0.4 and combine the two results to determine the grain-labor cost index.

(4) Divide by 3 the sum of the wholesale price index, the index of per capita disposable income in New England and the grain-labor cost index determined pursuant to this paragraph. The result shall be known as the economic index.

(b) Compute a supply-demand adjustment factor as follows:

(1) Combine into separate monthly totals the receipts from producers for Greater Boston, Lowell-Lawrence, Springfield, and Worcester and the Class I milk from producers for the same markets as announced by the respective market administrators in the statistical reports for such markets for the second and third months preceding the month for which the price is being computed.

(2) Divide the four-market total of Class I producer milk by the four-market total of receipts from producers for each of the two months for which computations were made pursuant to subparagraph (1) of this paragraph.

(3) Divide each of the percentages determined in subparagraph (2) of this paragraph into the following normal Class I percentage for the respective month, multiply each result by 100, and compute a simple average of the resulting percentages. The result shall be known as the percentage of normal supply.

	Normal class I percentage
January	76.9
February	73.9
March	65.3
April	57.7
May	51.6
June	50.7
July	61.6
August	70.1
September	70.7
October	73.4
November	82.0
December	77.8

(4) The supply-demand adjustment factor shall be the figure in the following table opposite the bracket under the normal supply column within which the percentage computed pursuant to subparagraph (3) of this paragraph falls. If the percentage falls in an interval between brackets, the applicable bracket shall be that above the interval in which the percentage falls if the adjustment for the previous month was determined by a bracket above such interval, and shall be determined by the bracket below such interval if the adjustment for the previous month was determined by a bracket below such interval. In determining the price for the first month in which this section is effective, the nearer bracket shall apply. The supply-demand adjustment factor shall not be less than .98 prior to the January 1953 price computation or less than .96 prior to the March 1953 price computation.

Percentage of normal supply:	*Supply-demand adjustment factor*
91.5 and under	1.12
92–92.5	1.10
93–93.5	1.08
94–94.5	1.06
95–96	1.04
97–98	1.02
99–101	1.00
102–103	.98
104–105	.96
106–107	.94
108–109	.92
110–111	.90
112 and over	.88

(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.

January and February	1.04
March	1.00
April	.92
May and June	.88
July	.96
August	1.00
September	1.04
October, November, and December	1.08

(d) Compute a New England basic Class I price index by multiplying the economic index determined pursuant to paragraph (a) of this section by the supply-demand adjustment factor determined pursuant to paragraph (b) of this section and multiplying the result by the applicable seasonal adjustment factor pursuant to paragraph (c) of this section.

(e) The New England basic Class I price shall be as shown in the following table:

New England basic Class I price index times $3.056		Class I price
At least—	But less than—	
$4.88	$5.10	$4.99
5.10	5.32	5.21
5.32	5.54	5.43
5.54	5.76	5.65
5.76	5.98	5.87
5.98	6.20	6.09
6.20	6.42	6.31

If the New England basic Class I price index times $3.056 is less than $4.88 or more than $6.42, the New England basic Class I price shall be determined by extending the table at the indicated rate of extension

(f) Notwithstanding the provisions of paragraphs (a) through (e) of this section, the New England basic Class I price for November or December of each year shall not be lower than such price for the immediately preceding month.

10. Amend § 904.51 (a) by deleting the phrase "for milk received during each month since the effective date of the most recent amendment of this subpart" and substitute therefor the phrase "for the preceding month."

11. Revise § 904.75 of the Boston order by deleting the present language and substituting therefor the following:

§ 904.75 *Deductions from payments to members.* (a) Each association of producers may file with a handler who is not an association of producers, a claim for authorized deductions from the payments otherwise due to its producer members for milk delivered to such handler. Such claim shall contain a list of the producers for which such deductions apply, an agreement to indemnify the handler in the making of the deductions, and a certification that the association has an unterminated membership contract with each producer listed authorizing the claimed deduction.

(b) In making payments to his producers for milk received during the month, each handler shall make deductions in accordance with the association's claim and shall pay the amount deducted to the association with an accompanying statement showing the pounds of milk delivered by each producer from whom the deduction was made, within 25 days after the end of the month.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 21st day of August 1952, to be effective on and after the 1st day of September 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

[F. R. Doc. 52-9371; Filed, Aug. 25, 1952; 8:49 a. m.]

PART 934—MILK IN THE LOWELL-LAWRENCE, MASSACHUSETTS, MARKETING AREA

ORDER AMENDING ORDER, AS AMENDED

§ 934.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and proposed amendments to the order, as amended, regulating the handling of milk in the Lowell-Lawrence, Massachusetts, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary that the amendments hereinafter set forth be made effective not later than September 1, 1952, so as to reflect current marketing conditions. Any delay beyond September 1, 1952, in the effective date of this order amending the order, as amended, will seriously threaten the orderly marketing of milk in the Lowell-Lawrence, Massachusetts, marketing area. The provisions of the said order are well known to handlers, the public hearing having been held on January 28 through February 1, 1952, and reopened on May 12 through May 15, 1952, the recommended decisions having been published in the FEDERAL REGISTER (17 F. R. 3496) April 19, 1952 and (17 F. R. 6271) July 12, 1952, and the final decision having been executed by the Acting Secretary on August 5, 1952. Therefore, reasonable time, under the circumstances, has been afforded persons affected to prepare for its effective date and it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER (see section 4 (c), Administrative Procedure Act, Pub. Law 404, 79th Cong., 60 Stat. 237).

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing, or shipping milk covered by this order amending the order, as amended) of more than 50 percent of the volume of the milk covered by this order amending the order, as amended, which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers who participated in a referendum and who during the determined representative period (June 1952) were engaged in the production of milk for sale in the said marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof the handling of milk in the Lowell-Lawrence, Massachusetts, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Amend § 934.2 (e) by deleting the phrase "a dairy farmer who ordinarily delivers to a handler's pool plant" and substituting therefor "a dairy farmer with respect to his operation of a farm from which milk is ordinarily delivered to a handler's pool plant."

2. Delete § 934.4 (g) and substitute therefor the following:

(g) "Exempt milk" means milk which is received at a regulated plant:

(1) In bulk from an unregulated plant or from the dairy farmer who produced it, for processing and bottling and for which an equivalent quantity of packaged milk is returned to the dairy farmer or to the operator of the unregulated plant during the same month; or

(2) In packaged form from an unregulated plant in return for an equivalent quantity of bulk milk moved from a regulated plant for processing and bottling during the same month.

3. Delete § 934.4 (h) and substitute therefor the following:

(h) "Concentrated milk" means the concentrated, unsterilized milk product, resembling plain condensed milk, which is disposed of to consumers for human consumption in fluid form.

4. Amend § 934.12 by adding a new paragraph (g) as follows:

(g) Employ and fix the compensation of such persons as may be necesary to enable him to exercise his powers and perform his duties.

5. Delete paragraphs (a) and (b) of § 934.15 and substitute therefor the following:

(a) Class I milk shall be:

(1) All fluid milk products sold, distributed, or disposed of as or in milk.

(2) All fluid milk products sold, distributed, or disposed of for human consumption as or in flavored milk, skim milk, flavored or cultured skim milk, or buttermilk;

(3) Ninety-eight percent, by weight, of the fluid milk products used to produce concentrated milk; and

(4) All fluid milk products the utilization of which is not established as Class II milk.

(b) Class II milk shall be all fluid milk products the utilization of which is established:

(1) As being sold, distributed, or disposed of other than as specified in subparagraphs (1), (2), and (3) of paragraph (a) of this section; and

(2) As plant shrinkage, not in excess of 2 percent of the volume handled.

6. In § 934.16 (e), delete the words following the comma after the word "orders" and substitute therefor the following: "and thence to another plant, they shall be classified by applying the provisions of paragraphs (a) through (d) of this section, whichever is applicable except that if the other plant to which such movement is made is located outside of the New England States and New York State, they shall be classified as Class I milk."

7. Delete § 934.22 (a) and substitute:

(a) Each country receiving plant shall be a pool plant in any month in which more than 30 percent of its total receipts of fluid milk products, other than cream, after deducting Class I sales direct to consumers outside the marketing area, is disposed of directly to consumers in the marketing area as Class I milk or is shipped as milk to city plants at which more than 50 percent of the total receipts of fluid milk products, other than cream, is disposed of as Class I milk: *Provided*, That the quantity of fluid milk products, other than cream, disposed of in the marketing area as Class I milk, is at least 10 percent of its total receipts of fluid milk products other than cream.

8. Amend § 934.25 by inserting the word "bulk" before the words "skim milk" as they appear in paragraphs (c), (g), and (j).

9. Delete § 934.40 and substitute therefor the following:

§ 934.40 *Class I price at city plants.* The Class I price per hundredweight at

city plants shall be the New England basic Class I price per hundredweight determined for each month pursuant to § 934.48 plus 52 cents: *Provided*, That the price shall be increased or decreased to the extent of any increase or decrease in the rail tariff for the transportation of milk in carlots in tank cars for mileage distances of 201–210 miles, inclusive, as published in the New England Joint Tariff M No. 6 and supplements thereto or revisions thereof. The adjustment shall be made to the nearest one-half cent per hundredweight, and shall be effective in the first complete month in which such increase or decrease in the rail tariff applies.

10. Add a new § 934.48 as follows:

NEW ENGLAND BASIC PRICE FORMULA

§ 934.48 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section. The latest reported figures available to the market administrator on the 25th day of the preceding month shall be used in making the following computations except that if the 25th day of the preceding month falls on a Sunday or legal holiday, the latest figures available on the next succeeding work day shall be used.

(a) Compute the economic index as follows:

(1) Divide by 1.143 the monthly wholesale price index for all commodities as reported by the Bureau of Labor Statistics, United States Department of Labor, with the years 1947–49 as the base period.

(2) Using the data on national and regional per capita income payments as published by the United States Department of Commerce, establish a "New England adjustment percentage" by computing the current percentage relationship of New England per capita income to the national per capita income. Multiply by the New England adjustment percentage the quarterly figure showing the current annual rate of per capita disposable personal income in the United States as released by the United States Department of Commerce or the Council of Economic Advisers to the President. Divide the result by 15.27 to determine an index of per capita disposable income in New England.

(3) Compute the simple average of the four latest weekly average retail prices per ton of dairy ration in the Boston milkshed as reported by the United States Department of Agriculture and divide the average by 0.884 to determine the dairy ration index. Compute the average, weighted by the indicated factors, of the following farm wage rates reported for the New England region by the United States Department of Agriculture: Rate per month with board and room, 1; rate per month with house, 1; rate per week with board and room, 4.33; rate per week without board or room, 4.33; and the rate per day without board or room, 26. Divide the average wage rate so computed by 1.458 to determine the wage rate index. Multiply the dairy ration index by 0.6 and the wage rate index by 0.4 and combine the two results to determine the grain-labor cost index.

(4) Divide by 3 the sum of the wholesale price index, the index of per capita disposable income in New England and the grain-labor cost index determined pursuant to this paragraph. The result shall be known as the economic index.

(b) Compute a supply-demand adjustment factor as follows:

(1) Combine into separate monthly totals the receipts from producers for Greater Boston, Lowell - Lawrence, Springfield, and Worcester and the Class I milk from producers for the same markets as announced by the respective market administrators in the statistical reports for such markets for the second and third months preceding the month for which the price is being computed.

(2) Divide the four-market total of Class I producer milk by the four-market total of receipts from producers for each of the two months for which computations were made pursuant to subparagraph (1) of this paragraph.

(3) Divide each of the percentages determined in subparagraph (2) of this paragraph into the following normal Class I percentage for the respective month, multiply each result by 100, and compute a simple average of the resulting percentages. The result shall be known as the percentage of normal supply.

	Normal Class I percentage
January	76.9
February	73.9
March	65.3
April	57.7
May	51.6
June	50.7
July	61.6
August	70.1
September	70.7
October	73.4
November	82.0
December	77.8

(4) The supply-demand adjustment factor shall be the figure in the following table opposite the bracket under the normal supply column within which the percentage computed pursuant to subparagraph (3) of this paragraph falls. If the percentage falls in an interval between brackets, the applicable bracket shall be that above the interval in which the percentage falls if the adjustment for the previous month was determined by a bracket above such interval, and shall be determined by the bracket below such interval if the adjustment for the previous month was determined by a bracket below such interval. In determining the price for the first month in which this section is effective, the nearer bracket shall apply. The supply-demand adjustment factor shall not be less than .98 prior to the January 1953 computation or less than .96 prior to the March 1953 price computation.

Percentage of normal supply:	*Supply-demand adjustment factor*
91.5 and under	1.12
92–92.5	1.10
93–93.5	1.08
94–94.5	1.06
95–96	1.04
97–98	1.02
99–101	1.00
102–103	.98
104–105	0.96
106–107	0.94
108–109	.92
110–111	.90
112 and over	.88

(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.

January and February	1.04
March	1.00
April	.92
May and June	.88
July	.96
August	1.00
September	1.04
October, November, and December	1.08

(d) Compute a New England basic Class I price index by multiplying the economic index determined pursuant to paragraph (a) of this section by the supply-demand adjustment factor determined pursuant to paragraph (b) of this section and multiplying the result by the applicable seasonal adjustment factor pursuant to paragraph (c) of this section.

(e) The New England basic Class I price shall be as shown in the following table:

New England basic Class I price index times $0.0361		Class I price
At least—	But less than—	
$4.88	$5.10	$4.99
5.10	5.32	5.21
5.32	5.54	5.43
5.54	5.76	5.65
5.76	5.98	5.87
5.98	6.20	6.09
6.20	6.42	6.31

If the New England basic Class I price index times $0.0361 is less than $4.88 or more than $6.42, the New England basic Class I price shall be determined by extending the table at the indicated rate of extension

(f) Notwithstanding the provisions of paragraphs (a) through (e) of this section, the New England basic Class I price for November or December of each year shall not be lower than such price for the immediately preceding month.

11. In § 934.51 (a) delete the phrase "for milk received during each month since the effective date of the most recent amendment of this subpart" and substitute therefore the phrase "for the preceding month."

12. Revise § 934.51 by deleting paragraph (b) and renumbering paragraphs (c) through (f) as paragraphs (b) through (e), respectively.

13. In § 934.70, delete the period at the end of the section and substitute therefor the following: ", accompanied by a statement showing the pounds of milk delivered by each producer from whom the deduction was made."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 21st day of August 1952, effective on and after the 1st day of September 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

[F. R. Doc. 52-9372; Filed, Aug. 25, 1952; 8:49 a. m.]

PART 947—MILK IN THE FALL RIVER, MASSACHUSETTS, MARKETING AREA

ORDER AMENDING ORDER

§ 947.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and proposed amendments to the order, as amended, regulating the handling of milk in the Fall River, Massachusetts, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary that the amendments hereinafter set forth be made effective not later than September 1, 1952, so as to reflect current marketing conditions. Any delay beyond September 1, 1952, in the effective date of this order amending the order, as amended, will seriously threaten the orderly marketing of milk in the Fall River, Massachusetts, marketing area. The provisions of the said order are well known to handlers, the public hearing having been held on January 28 through February 1, 1952, and reopened on May 12 through May 15, 1952, the recommended decisions having been published in the FEDERAL REGISTER (17 F. R. 3496) April 19, 1952 and (17 F. R. 6271) July 12, 1952, and the final decision having been executed by the Acting Secretary on August 5, 1952. Therefore, reasonable time, under the circumstances, has been afforded persons affected to prepare for its effective date and it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER. (See section 4 (c), Administrative Procedure Act, Pub. Law 404, 79th Cong., 60 Stat. 237.)

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing, or shipping milk covered by this order amending the order, as amended) of more than 50 percent of the volume of the milk covered by this order amending the order, as amended, which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers who participated in a referendum and who during the determined representative period (June 1952) were engaged in the production of milk for sale in the said marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Fall River, Massachusetts marketing area, shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Delete § 947.12 and substitute therefor the following:

§ 947.12 *Concentrated milk.* "Concentrated milk" means the concentrated, unsterilized milk product, resembling plain condensed milk, which is disposed of to consumers for human consumption in fluid form.

2. In § 947.41 delete paragraph (a) and subparagraph (1) of paragraph (b) and substitute therefor the following:

(a) Class I milk shall be all milk and milk products sold, distributed, or disposed of as milk which contains one half of 1 percent or more but less than 16 percent butterfat; chocolate or flavored whole milk or skim milk, skim milk, buttermilk, or cultured skim milk for human consumption; 98 percent, by weight, of the fluid milk products used to produce concentrated milk, and all fluid milk products the utilization of which is not established as Class II.

(b) • • •

(1) Sold, distributed, or disposed of as other than the items specified in paragraph (a) of this section; and

3. Add a new § 947.48 as follows:

NEW ENGLAND BASIC PRICE FORMULA

§ 947.48 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section. The latest reported figures available to the market administrator on the 25th day of the preceding month shall be used in making the following computations except that if the 25th day of the preceding month falls on a Sunday or legal holiday, the latest figures available on the next succeeding work day shall be used.

(a) Compute the economic index as follows:

(1) Divide by 1.143 the monthly wholesale price index for all commodities as reported by the Bureau of Labor Statistics, United States Department of Labor, with the years 1947–49 as the base period.

(2) Using the data on national and regional per capita income payments as published by the United States Department of Commerce, establish a "New England adjustment percentage" by computing the current percentage relationship of New England per capita income to the national per capita income. Multiply by the New England adjustment percentage the quarterly figure showing the current annual rate of per capita disposable personal income in the United States as released by the United States Department of Commerce or the Council of Economic Advisers to the President. Divide the result by 15.27 to determine an index of per capita disposable income in New England.

(3) Compute the simple average of the four latest weekly average retail prices per ton of dairy ration in the Boston milkshed as reported by the United States Department of Agriculture and divide the average by .884 to determine the dairy ration index. Compute the average, weighted by the indicated factors, of the following farm wage rates reported for the New England region by the United States Department of Agriculture: Rate per month with board and room, 1; rate per month with house, 1; rate per week with board and room, 4.33; rate per week without board or room, 4.33; and the rate per day without board or room, 26. Divide the average wage rate so computed by 1.458 to determine the wage rate index. Multiply the dairy ration index by 0.6 and the wage rate index by 0.4 and combine the two results to determine the grain-labor cost index.

(4) Divide by 3 the sum of the wholesale price index, the index of per capita disposable income in New England and the grain-labor cost index determined pursuant to this paragraph. The result shall be known as the economic index.

(b) Compute a supply-demand adjustment factor as follows:

(1) Combine into separate monthly totals the receipts from producers for Greater Boston, Lowell-Lawrence, Springfield, and Worcester and the Class I milk from producers for the same markets as announced by the respective market administrators in the statistical reports for such markets for the second and third months preceding the month for which the price is being computed.

(2) Divide the four-market total of Class I producer milk by the four-market total of receipts from producers for each of the two months for which computations were made pursuant to subparagraph (1) of this paragraph.

(3) Divide each of the percentages determined in subparagraph (2) of this paragraph into the following normal Class I percentage for the respective month, multiply each result by 100, and compute a simple average of the resulting percentages. The result shall be known as the percentage of normal supply.

	Normal class I percentage
January	76.9
February	73.9
March	65.3
April	57.7
May	51.6
June	50.7
July	61.6
August	70.1
September	70.7
October	73.4
November	82.0
December	77.8

(4) The supply-demand adjustment factor shall be the figure in the following table opposite the bracket under the normal supply column within which the percentage computed pursuant to subparagraph (3) of this paragraph falls. If the percentage falls in an interval between brackets, the applicable bracket shall be that above the interval in which the percentage falls if the adjustment for the previous month was determined by a bracket above such interval, and shall be determined by the bracket below such interval if the adjustment for the previous month was determined by a bracket below such interval. In determining the price for the first month in which this section is effective, the nearer bracket shall apply. The supply-demand adjustment factor shall not be less than 0.98 prior to the January 1953 price computation or less than 0.96 prior to the March 1953 price computation.

Percentage of normal supply:	*Supply-demand adjustment factor*
91.5 and under	1.12
92–92.5	1.10
93–93.5	1.08
94–94.5	1.06
95–96	1.04
97–98	1.02
99–101	1.00
102–103	.98
104–105	.96
106–107	.94
108–109	.92
110–111	.90
112 and over	.88

(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.

January and February	1.04
March	1.00
April	.92
May and June	.88
July	.96
August	1.00
September	1.04
October, November and December	1.08

(d) Compute a New England basic Class I price index by multiplying the economic index determined pursuant to paragraph (a) of this section by the supply-demand adjustment factor determined pursuant to paragraph (b) of this section and multiplying the result by the applicable seasonal adjustment factor pursuant to paragraph (c) of this section.

(e) The New England basic Class I price shall be as shown in the following table:

New England basic Class I price index times $0.0361		Class I price
At least—	But less than—	
$4.88	$5.10	$4.99
5.10	5.32	5.21
5.32	5.54	5.43
5.54	5.76	5.65
5.76	5.98	5.87
5.98	6.20	6.09
6.20	6.42	6.31

If the New England basic Class I price index times $0.0361 is less than $4.88 or more than $6.42, the New England basic Class I price shall be determined by extending the table at the indicated rate of extension.

(f) Notwithstanding the provisions of paragraphs (a) through (e) of this section, the New England basic Class I price for November or December of each year shall not be lower than such price for the immediately preceding month.

4. Delete § 947.50 and substitute:

§ 947.50 *Class I prices.* Each handler shall pay producers or cooperative associations for Class I milk containing 3.7 percent butterfat delivered by them to plants located within 100 miles of the City Hall in Fall River, not less than the New England basic Class I price per hundredweight determined for the month pursuant to § 947.48 plus 81 cents: *Provided*, That the price shall be increased or decreased to the extent of any increase or decrease in the rail tariff for the transportation of milk in carlots in tank cars for mileage distances of 201–210 miles, inclusive, as published in the New England Joint Tariff M No. 6 and supplements thereto or revisions thereof. The adjustment shall be made to the nearest one-half cent per hundredweight, and shall be effective in the first complete month in which such increase or decrease in the rail tariff applies.

5. Amend § 947.72 by adding a sentence at the end of the section as follows: "Such payment shall be accompanied by a statement showing the pounds of milk delivered by each producer for whom such deduction was made."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 21st day of August 1952, to be effective on and after the 1st day of September 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

[F. R. Doc. 52-9375; Filed, Aug. 25, 1952; 8:50 a. m.]

[Tokay Grape Order 1]

PART 951—TOKAY GRAPES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 951.313 *Tokay Grape Order 1*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 51, as amended (7 CFR Part 951; 17 F. R. 7417), regulating the handling of Tokay grapes grown in San Joaquin and Sacramento Counties in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Industry Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of Tokay grapes, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than August 26, 1952. A reasonable determination as to the supply of, and the demand for, Tokay grapes must await the development of the crop and adequate information thereon was not available to the Industry Committee until August 19, 1952; recommendation as to the need for, and the extent of, grade and size regulation was made at the meeting of said committee on August 19, 1952, after consideration of all available information relative to the supply and demand conditions for such grapes, at which time the recommendations and information were transmitted to the Department; shipments of the current crop of such grapes are now being made and this section should be applicable, insofar as practicable, to all shipments of such grapes in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., August 26, 1952, and ending at 12:01 a. m., P. s. t., January 1, 1953, no shipper shall ship any Tokay grapes which do not meet the grade and size specifications of U. S. No. 1 Table Grapes and the following additional requirements:

(i) Each bunch of such grapes shall have at least 55 percent, by count, of fairly well colored berries;

(ii) Such grapes shall test, in accordance with the applicable provisions of section 802 of the Agricultural Code of California, not less than seventeen (17) percent soluble solids in juice: *Provided*, That such grapes, which otherwise meet the maturity requirements of U. S. No. 1 Table Grapes, may be shipped if the juice thereof contains soluble solids, determined as aforesaid, equal to or in excess of twenty-four (24) parts to one (1) part of acid; and,

(iii) In lieu of the tolerance of ten (10) percent for variations incident to proper grading and handling provided for U. S. No. 1 Table Grapes, not more than a total of eight (8) percent, by weight, of the Tokay grapes contained in any container may fail to meet the requirements of U. S. No. 1 Table Grapes: *Provided*, That with respect to Tokay grapes produced in the Florin District, there shall be allowed, in addition to the tolerances provided for U. S. No. 1 Table Grapes, for each container of such grapes an aggregate tolerance of six (6) percent, by weight, for defects not considered serious damage, for bunches smaller than the minimum size specified for U. S. No. 1 Table Grapes, and for bunches which are not fairly well colored: *Provided further*, That none of the aforesaid tolerances shall apply to the maturity requirements specified in subdivision (ii) of this subparagraph.

(2) *Definitions.* As used herein, "handler," "shipper," "ship," "Florin District," "bunches," and "size" shall have the same meaning as when used in the amended marketing agreement and order; and "U. S. No. 1 Table Grapes," "fairly well colored berries," "defects," and "serious damage" shall have the same meaning as when used in the United States Standards for Table Grapes (7 CFR 51.232).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 22d day of August 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

[F. R. Doc. 52-9424; Filed, Aug. 25, 1952; 9:01 a. m.]

PART 996—MILK IN THE SPRINGFIELD, MASSACHUSETTS, MARKETING AREA

ORDER AMENDING ORDER, AS AMENDED

§ 996.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and proposed amendments to the order, as amended, regulating the handling of milk in the Springfield, Massachusetts, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary that the amendments hereinafter set forth be made effective not later than September 1, 1952, so as to reflect current marketing conditions. Any delay beyond September 1, 1952, in the effective date of this order amending the order, as amended will seriously threaten the orderly marketing of milk in the Springfield, Massachusetts, marketing area. The provisions of the said order are well known to handlers, the public hearing having been held on January 28 through February 1, 1952, and reopened May 12 through May 15, 1952, the recommended decisions having been published in the FEDERAL REGISTER (17 F. R. 3496) April 19, 1952 and (17 F. R. 6271) July 12, 1952, and the final decision having been executed by the Acting Secretary on August 5, 1952. Therefore, reasonable time, under the circumstances, has been afforded persons affected to prepare for its effective date and it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER (See section 4 (c), Administrative Procedure Act, Public Law 404, 79th Congress, 60 Stat. 237).

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order amending the order, as amended) of more than 50 percent of the volume of the milk covered by this order amending the order, as amended, which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers who participated in a referendum and who during the determined representative period (June 1952) were engaged in the production of milk for sale in the said marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof the handling of milk in the Springfield, Massachusetts, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Delete § 996.4 (g) and substitute therefor the following:

(g) "Concentrated milk" means the concentrated, unsterilized milk product, resembling plain condensed milk, which is disposed of to consumers for human consumption in fluid form.

2. Amend § 996.12 by adding a new paragraph (g) as follows:

(g) Employ and fix the compensation of such persons as may be necessary to enable him to exercise his powers and perform his duties.

3. Delete paragraphs (a) and (b) of § 996.15 and substitute therefor the following:

(a) Class I milk shall be:

(1) All fluid milk products sold, distributed, or disposed of as or in milk.

(2) All fluid milk products sold, distributed, or disposed of for human consumption as or in flavored milk, skim milk, flavored or cultured skim milk, or buttermilk;

(3) Ninety-eight percent, by weight, of the fluid milk products used to produce concentrated milk; and

(4) All fluid milk products the utilization of which is not established as Class II milk.

(b) Class II milk shall be all fluid milk products the utilization of which is established:

(1) As being sold, distributed, or disposed of other than as specified in subparagraphs (1), (2), and (3) of paragraph (a) of this section; and

(2) As plant shrinkage, not in excess of 2 percent of the volume handled.

4. In § 996.16 (e) delete the words following the comma after the word "orders" and substitute therefor the following: "and thence to another plant, they shall be classified by applying the provisions of paragraphs (a) through (d) of this section, whichever is applicable, except that if the other plant to which such movement is made is located outside of the New England States and New York State, they shall be classified as Class I milk."

5. Amend § 996.25 by inserting the word "bulk" before the words "skim milk" as they appear in paragraphs (c), (g), and (j).

6. Delete § 996.40 and substitute therefor the following:

§ 996.40 *Class I price at city plants.* The Class I price per hundredweight at city plants shall be the New England basic Class I price per hundredweight determined for each month pursuant to § 996.48 plus 52 cents: *Provided,* That the price shall be increased or decreased to the extent of any increase or decrease in the rail tariff for the transportation of milk in carlots in tank cars for mileage distances of 201–210 miles, inclusive, as published in the New England Joint Tariff M No. 6 and supplements thereto or revisions thereof. The adjustment shall be made to the nearest one-half cent per hundredweight, and shall be effective in the first complete month in which such increase or decrease in the rail tariff applies.

7. Add a new § 996.48 as follows:

NEW ENGLAND BASIC PRICE FORMULA

§ 996.48 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section. The latest reported figures available to the market administrator on the 25th day of the preceding month shall be used in making the following computations except that if the 25th day of the preceding month falls on a Sunday or legal holiday, the latest figures available on the next succeeding work day shall be used.

(a) Compute the economic index as follows:

(1) Divide by 1.143 the monthly wholesale price index for all commodities as reported by the Bureau of Labor Statistics, United States Department of Labor, with the years 1947–49 as the base period.

(2) Using the data on national and regional per capita income payments as published by the United States Department of Commerce, establish a "New England adjustment percentage" by computing the current percentage relationship of New England per capita income to the national per capita income. Multiply by the New England adjustment percentage the quarterly figure showing the current annual rate or per capita disposable personal income in the United States as released by the United States Department of Commerce or the Council of Economic Advisers to the President. Divide the result by 15.27 to determine an index of per capita disposable income in New England.

(3) Compute the simple average of the four latest weekly average retail prices per ton of dairy ration in the Boston milkshed as reported by the United States Department of Agriculture and divide the average by 0.884 to determine the dairy ration index. Compute the average, weighted by the indicated factors, of the following farm wage rates reported for the New England region by the United States Department of Agriculture: Rate per month with board and room, 1; rate per month with house, 1; rate per week with board and room, 4.33; rate per week without board or room, 4.33; and the rate per day without board or room, 26. Divide the average wage rate so computed by 1.458 to determine the wage rate index. Multiply the dairy ration index by 0.6 and the wage rate index by 0.4 and combine the two results to determine the grain-labor cost index.

(4) Divide by 3 the sum of the wholesale price index, the index of per capita disposable income in New England and the grain-labor cost index determined pursuant to this paragraph. The result shall be known as the economic index.

(b) Compute a supply-demand adjustment factor as follows:

(1) Combine into separate monthly totals the receipts from producers for Greater Boston, Lowell - Lawrence, Springfield, and Worcester and the Class I milk from producers for the same markets as announced by the respective market administrators in the statistical reports for such markets for the second and third months preceding the month for which the price is being computed.

(2) Divide the four-market total of Class I producer milk by the four-market total of receipts from producers for each of the two months for which computations were made pursuant to subparagraph (1) of this paragraph.

(3) Divide each of the percentages determined in subparagraph (2) of this paragraph into the following normal Class I percentage for the respective month, multiply each result by 100, and compute a simple average of the resulting percentages. The result shall be known as the percentage of normal supply.

	Normal Class I percentage
January	76.9
February	73.9
March	65.3
April	57.7
May	51.6
June	50.7
July	61.6
August	70.1
September	70.7
October	73.4
November	82.0
December	77.8

(4) The supply-demand adjustment factor shall be the figure in the following table opposite the bracket under the normal supply column within which the percentage computed pursuant to subparagraph (3) of this paragraph falls. If the percentage falls in an interval between brackets, the applicable bracket shall be that above the interval in which the percentage falls if the adjustment for the previous month was determined by a bracket above such interval, and shall be determined by the bracket below such interval if the adjustment for the previous month was determined by a bracket below such interval. In determining the price for the first month in which this section is effective, the nearer bracket shall apply. The supply-demand adjustment factor shall not be less than 0.98 prior to the January 1953 computation or less than 0.96 prior to the March 1953 price computation.

Percentage of normal supply:	*Supply-demand adjustment factor*
91.5 and under	1.12
92–92.5	1.10
93–93.5	1.08
94–94.5	1.06
95–96	1.04
97–98	1.02
99–101	1.00
102–103	.98
104–105	.96
106–107	.94
108–109	.92
110–111	.90
112 and over	.88

(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.

January and February	1.04
March	1.00
April	.92
May and June	.88
July	.96
August	1.00
September	1.04
October, November, and December	1.08

(d) Compute a New England basic Class I price index by multiplying the economic index determined pursuant to paragraph (a) of this section by the supply-demand adjustment factor determined pursuant to paragraph (b) of this section and multiplying the result by the applicable seasonal adjustment factor pursuant to paragraph (c) of this section.

(e) The New England basic Class I price shall be as shown in the following table:

New England basic Class I price index times $0.0361		Class I price
At least—	But less than—	
$4.88	$5.10	$4.99
5.10	5.32	5.21
5.32	5.54	5.43
5.54	5.76	5.65
5.76	5.98	5.87
5.98	6.20	6.09
6.20	6.42	6.31

If the New England basic Class I price index times $0.0361 is less than $4.88 or more than $6.42, the New England basic Class I price shall be determined by extending the table at the indicated rate of extension.

(f) Notwithstanding the provisions of paragraphs (a) through (e) of this section, the New England basic Class I price for November or December of each year shall not be lower than such price for the immediately preceding month.

8. In § 996.51 (a) delete the phrase "for milk received during each month since the effective date of the most recent amendment of this subpart" and substitute therefor the phrase "for the preceding month."

9. Amend § 996.64 (b) by inserting before the words "and Suffield" the word "Stafford."

10. In § 996.71 delete the period at the end of the section and substitute therefore the following: ", accompanied by a statement showing the pounds of milk delivered by each producer from whom the deduction was made."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 21st day of August 1952, to be effective on and after the 1st day of September 1952.

[SEAL] CHARLES F. BRANNAN, *Secretary of Agriculture.*

[F. R. Doc. 52-9373; Filed, Aug. 25, 1952; 8:50 a. m.]

PART 999—MILK IN THE WORCESTER, MASSACHUSETTS, MARKETING AREA

ORDER AMENDING ORDER, AS AMENDED

§ 999.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed marketing agreement and proposed amendments to the order, as amended, regulating the handling of milk in the Worcester, Massachusetts, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary that the amendments hereinafter set forth be made effective not later than September 1, 1952, so as to reflect current marketing conditions. Any delay beyond September 1, 1952, in the effective date of this order amending the order, as amended, will seriously threaten the orderly marketing of milk in the Worcester, Massachusetts, marketing area. The provisions of the said order are well known to handlers, the public hearing having been held on January 28 through February 1, 1952, and reopened on May 12 through May 15, 1952, the recommended decisions having been published in the FEDERAL REGISTER (17 F. R. 3496) April 19, 1952, and (17 F. R. 6271) July 12, 1952, and the final decision having been executed by the Acting Secretary on August 5, 1952. Therefore, reasonable time, under the circumstances, has been afforded persons affected to prepare for its effective date and it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER (See section 4 (c), Administrative Procedure Act, Pub. Law 404, 79th Cong., 60 Stat. 237).

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing, or shipping milk covered by this order amending the order, as amended) of more than 50 percent of the volume of the milk covered by this order amending the order, as amended, which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers who participated in a referendum and who during the determined representative period (June 1952) were engaged in the production of milk for sale in the said marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof the handling of milk in the Worcester, Massachusetts, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Delete § 999.4 (g) and substitute therefor the following:

(g) "Concentrated milk" means the concentrated, unsterilized milk product, resembling plain condensed milk, which is disposed of to consumers for human consumption in fluid form.

2. Amend § 999.12 by adding a new paragraph (g) as follows:

(g) Employ and fix the compensation of such persons as may be necessary to enable him to exercise his powers and perform his duties.

3. Delete paragraphs (a) and (b) of § 999.15 and substitute therefor the following:

(a) Class I milk shall be:

(1) All fluid milk products sold, distributed, or disposed of as or in milk;

(2) All fluid milk products sold, distributed, or disposed of for human consumption as or in flavored milk, skim milk, flavored or cultured skim milk, or buttermilk;

(3) Ninety-eight percent, by weight, of the fluid milk products used to produce concentrated milk; and

(4) All fluid milk products the utilization of which is not established as Class II milk.

(b) Class II milk shall be all fluid milk products the utilization of which is established:

(1) As being sold, distributed, or disposed of other than as specified in subparagraphs (1), (2), and (3) of paragraph (a) of this section; and

(2) As plant shrinkage, not in excess of 2 percent of the volume handled.

4. In § 999.16 (e) delete the words following the comma after the word "orders" and substitute therefor the following: "and thence to another plant, they shall be classified by applying the provisions of paragraphs (a) through (d) of this section, whichever is applicable, except that if the other plant to which such movement is made is located outside of the New England States and New York State, they shall be classified as Class I milk."

5. Amend § 999.25 by inserting the word "bulk" before the words "skim milk" as they appear in paragraphs (c), (g), and (j).

6. Delete § 999.40 and substitute therefore the following:

"§ 999.40 *Class I price at city plants.* The Class I price per hundredweight at city plants shall be the New England basic Class I price per hundredweight determined for each month pursuant to § 999.48 plus 52 cents: *Provided,* That the price shall be increased or decreased to the extent of any increase or decrease in the rail tariff for the transportation of milk in carlots in tank cars for mileage distances of 201–210 miles, inclusive, as published in the New England Joint Tariff M No. 6 and supplements thereto or revisions thereof. The adjustment shall be made to the nearest one-half cent per hundredweight, and shall be effective in the first complete month in which such increase or decrease in the rail tariff applies.

7. Add a new § 999.48 as follows:

NEW ENGLAND BASIC PRICE FORMULA

§ 999.48 *Computation of New England basic Class I price.* The New

President. Divide the result by 15.27 to

for the previous month was determined

amendment of this subpart and

England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section. The latest reported figures available to the market administrator on the 25th day of the preceding month shall be used in making the following computations except that if the 25th day of the preceding month falls on a Sunday or legal holiday, the latest figures available on the next succeeding work day shall be used.

(a) Compute the economic index as follows:

(1) Divide by 1.143 the monthly wholesale price index for all commodities as reported by the Bureau of Labor Statistics, United States Department of Labor, with the years 1947–49 as the base period.

(2) Using the data on national and regional per capita income payments as published by the United States Department of Commerce, establish a "New England adjustment percentage" by computing the current percentage relationship of New England per capita income to the national per capita income. Multiply by the New England adjustment percentage the quarterly figure showing the current annual rate of per capita disposable personal income in the United States as released by the United States Department of Commerce or the Council of Economic Advisers to the President. Divide the result by 15.27 to determine an index of per capita disposable income in New England.

(3) Compute the simple average of the four latest weekly average retail prices per ton of dairy ration in the Boston milkshed as reported by the United States Department of Agriculture and divide the average by .884 to determine the dairy ration index. Compute the average, weighted by the indicated factors, of the following farm wage rates reported for the New England region by the United States Department of Agriculture: Rate per month with board and room, 1; rate per month with house, 1; rate per week with board and room, 4.33; rate per week without board or room, 4.33; and the rate per day without board or room, 26. Divide the average wage rate so computed by 1.458 to determine the wage rate index. Multiply the dairy ration index by 0.6 and the wage rate index by 0.4 and combine the two results to determine the grain-labor cost index.

(4) Divide by 3 the sum of the wholesale price index, the index of per capita disposable income in New England and the grain-labor cost index determined pursuant to this paragraph. The result shall be known as the economic index.

(b) Compute a supply-demand adjustment factor as follows:

(1) Combine into separate monthly totals the receipts from producers for Greater Boston, Lowell-Lawrence, Springfield, and Worcester and the Class I milk from producers for the same markets as announced by the respective market administrators in the statistical reports for such markets for the second and third months preceding the month for which the price is being computed.

(2) Divide the four-market total of Class I producer milk by the four-market total of receipts from producers for each of the two months for which computations were made pursuant to subparagraph (1) of this paragraph.

(3) Divide each of the percentages determined in subparagraph (2) of this paragraph into the following normal Class I percentage for the respective month, multiply each result by 100, and compute a simple average of the resulting percentages. The result shall be known as the percentage of normal supply.

	Normal Class I percentage
January	76.9
February	73.9
March	65.3
April	57.7
May	51.6
June	50.7
July	61.6
August	70.1
September	70.7
October	73.4
November	82.0
December	77.8

(4) The supply-demand adjustment factor shall be the figure in the following table opposite the bracket under the normal supply column within which the percentage computed pursuant to subparagraph (3) of this paragraph falls. If the percentage falls in an interval between brackets, the applicable bracket shall be that above the interval in which the percentage falls if the adjustment for the previous month was determined by a bracket above such interval, and shall be determined by the bracket below such interval if the adjustment for the previous month was determined by a bracket below such interval. In determining the price for the first month in which this section is effective, the nearer bracket shall apply. The supply-demand adjustment factor shall not be less than .98 prior to the January 1953 computation or less than .96 prior to the March 1953 price computation.

Percentage of normal supply:	*Supply-demand adjustment factor*
91.5 and under	1.12
92–92.5	1.10
93–93.5	1.08
94–94.5	1.06
95–96	1.04
97–98	1.02
99–101	1.00
102–103	.98
104–105	.96
106–107	.94
108–109	.92
110–111	.90
112 and over	.88

(c) The seasonal adjustment factor shall be the factor listed below for the month for which the price is being computed.

January and February	1.04
March	1.00
April	.92
May and June	.88
July	.96
August	1.00
September	1.04
October, November, and December	1.08

(d) Compute a New England basic Class I price index by multplying the economic index determined pursuant to paragraph (a) of this section by the supply-demand adjustment factor determined pursuant to paragraph (b) of this section and multiplying the result by the applicable seasonal adjustment factor pursuant to paragraph (c) of this section.

(e) The New England basic Class I price shall be as shown in the following table:

New England basic Class I price index times $0.0561		Class I price
At least—	But less than—	
$4.88	$5.10	$4.99
5.10	5.32	5.21
5.32	5.54	5.43
5.54	5.76	5.65
5.76	5.98	5.87
5.98	6.20	6.09
6.20	6.42	6.31

If the New England basic Class I price index times $0.0561 is less than $4.88 or more than $6.42, the New England basic Class I price shall be determined by extending the table at the indicated rate of extension.

(f) Notwithstanding the provisions of paragraphs (a) through (e) of this section, the New England basic Class I price for November or December of each year shall not be lower than such price for the immediately preceding month.

8. Amend § 999.50 by adding a new paragraph (g) as follows:

(g) Subtract any amount which the handler is required to pay on such milk pursuant to § 904.66 (b) of the Boston order.

9. Amend § 999.51 (a) by deleting the phrase "for milk received during each month since the effective date of the most recent amendment of this subpart" and substitute therefor the phrase "for the preceding month."

10. In § 999.71 delete the period at the end of the section and substitute therefor the following: ", accompanied by a statement showing the pounds of milk delivered by each producer from whom the deduction was made."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C. this 21st day of August 1952, to be effective on and after the 1st day of September 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

[F. R. Doc. 52-9374; Filed, Aug. 25, 1952; 8:50 a. m.]

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[Ceiling Price Regulation 167]

CPR 167—CEILING PRICES FOR PRODUCERS AND DISTRIBUTORS OF COTTONSEED FEED PRODUCTS

Pursuant to the Defense Production Act of 1950, as amended, Executive Order 10161, and Economic Stabllization Agency General Order No. 2, this Ceiling Price Regulation 167 is hereby issued.

and is applicable only to persons in the

therefor the following:

§ 999.48 *Computation of New England basic Class I price.* The New

STATEMENT OF CONSIDERATIONS

This regulation establishes ceiling prices for producers and distributors of cottonseed feed products.

Cottonseed feed products include cottonseed cake, flakes, meal, sized cake, pellets, cubes, hulls, hull bran and cottonseed feed. Cottonseed cake and flakes are the products resulting after the extraction of the oil from cottonseed. The cake and flakes are finely ground to produce cottonseed meal. The meal is one of the most widely used protein supplements for dairy cattle and is used extensively for feeding beef cattle. It is also used to feed sheep, hogs and work-stock, and, to a limited extent, as a fertilizer. The cake, cracked into small pieces known as sized cake, and the meal, formed into pellets or cubes, are used for range feeding. Cottonseed hulls, a by-product in the processing of the cottonseed, are widely used as a roughage in feeding livestock, or, when ground into hull bran, are fed in conjunction with cottonseed meal. Cottonseed meal and hulls or hull bran may also be mixed in varying proportions to produce a cottonseed feed of a lower protein content than cottonseed meal.

Cottonseed feed products are a highly important part of the total feed supply. Cottonseed cake and meal rank second only to soybean cake and meal in volume of production of the various oilseed meals. Annual production has averaged 2,012,000 tons from the 1946–47 season through the 1950–51 season. This represents more than one-fourth of the total average production of oilseed meals over the same period.

Ceiling prices for all sellers of cottonseed meal were originally established under the General Ceiling Price Regulation (GCPR). Variations in individual ceilings under the freeze have resulted in inequities among various sellers and have placed some sellers at a disadvantage in a highly competitive market. Moreover, owing to supply and demand conditions prevailing during the freeze period, some areas of production—notably California—were caught with a level of ceiling prices considerably below their normal price relationships with other areas.

This regulation accomplishes three main purposes. First, it establishes a level of ceiling prices for cottonseed feed products which is in line with the normal price relationships of these products with competing feeds. Second, it sets dollar-and-cent ceiling prices for processors at all points of production and thus eliminates variations in individual ceiling prices existing under the GCPR. Third, it fixes dollar-and-cent markups for the various classes of distributors and limits the number of markups which may be taken.

This regulation is being issued at this time as part of a general policy to provide dollar-and-cent ceilings for the oilseed meals at the beginning of the new crop year. The ceiling prices set by this regulation reflect the results of a general survey of oilseed meal relationships.

The ceiling prices for cottonseed cake and meal reflect the relationship between the prices of these products and corn prices. Corn composes about 60 percent of the feed concentrates fed to livestock in this country. Another 30 percent of the feed concentrates are feed grains and low protein feeds whose prices are closely related to corn prices. The remaining 10 percent are high protein feed supplements, including cottonseed meal, the prices of which vary to a greater extent in relation to corn prices than do prices of other feeds because they have different properties, are used for different feeding purposes and are produced in different areas. However, the prices of the high protein feeds are determined competitively, over a period of time, by their feeding value in relation to other feeds and a readjustment takes place whenever the price becomes out of line with normal price relationships and relative feeding values. The ceiling prices for cottonseed meal established by this regulation are therefore based upon the relationship between cottonseed meal and corn prices. They are set in relation to the parity price of corn, the legal minimum price at which ceiling prices for corn can be established. These ceiling prices are also in line with the ceiling prices of competing high protein feeds.

Under this regulation, a processor's ceiling price of $80.00 per ton, bulk, is set for cottonseed meal, 41 percent protein, f. o. b. mill, for Tennessee, Mississippi, and East Arkansas. Variations in prices for other points of production reflect normal area differentials. Owing to the diversity in GCPR ceilings, individual sellers are affected in varying degrees by the industry-wide ceilings set by this regulation. Available data indicate that small increases over present ceilings will result in Tennessee, Mississippi, Georgia, North and South Carolina. Prices in California and Arizona, which were frozen under the GCPR far below their normal relationship to other areas, are increased more substantially to bring them in line with the level of ceiling prices established for other producing points. On the other hand, prices in Texas and Oklahoma rose abnormally prior to the GCPR "freeze" because of decreased production and increased demand by feeders resulting from drought conditions. Available information indicates that this regulation, in restoring a more normal relationship with ceiling prices in other areas, may involve moderate reductions of the ceiling prices of some processors in these states.

This regulation lists dollar-and-cent ceiling prices for processors, on an f. o. b. mill basis, at all major points of production. Ceiling prices for deliveries at other points are determined by adding transportation charges actually incurred to the f. o. b. mill ceiling. Ceiling prices for most of the cottonseed feed products covered by this regulation are based upon deliveries of products of a guaranteed standard protein content. Methods are provided for computing ceilings for guarantees of less than standard protein content and for deliveries of less than the protein content guaranteed. Uniform ceiling prices for all processors are set for cottonseed hulls and hull bran. A method is prescribed for determining ceiling prices for cottonseed feed, a mixture of meal and hulls or hull bran.

This regulation also provides f. o. b. mill ceiling prices for grinders, persons who produce meal, cake or pellets from purchased slab cake. "Grinder" includes both the crusher who buys slab cake to supplement his own production of cake from seed processed in his plant and the producer who makes meal, cake, and pellets exclusively from purchased cake. The grinder who is also a crusher is permitted the same distributive markups on meal, sized cake, and pellets, whether he purchases the slab cake or produces it in his plant from seed. A specific dollar-and-cent "dealer" markup is provided for the grinder who is not also a crusher. This conforms with customary industry pricing practices.

Under this regulation distributors other than trucker-merchants determine their ceiling prices by adding a specified markup to their suppliers' ceiling price. These markups are based upon data submitted by distributors and other members of the industry. On the basis of these data the markups provided approximate those currently received by distributors.

Trucker-merchants determine their ceiling prices by adding a hauling allowance at a specified schedule to the supplier's ceiling price. From information presently available, the schedule used provides a reasonable return to the trucker-merchant. However, should additional data indicate that changes are needed, the schedule will be revised accordingly.

Available information as to pre-Korean margins of distributors indicate that the markups for distributors established by this regulation meet the requirements of the Defense Production Act of 1950, as amended.

It is not believed that this regulation will cause any substantial changes in business practices, cost practices or methods, or means or aids to distribution; however, to the extent that such changes may be compelled, they are necessary to prevent circumvention or evasion of this regulation.

The specifications and standards for cottonseed feed products used in this regulation, including those used in distinguishing different kinds, classes, and types of products, were, prior to the issuance of the regulation, in general use in the industry. No practicable alternative to the use of these standards exists in securing effective price control of these products.

In the formulation of this regulation there has been extensive consultation with industry representatives, including the Cottonseed Feed Products Industry Advisory Committee and trade association representatives; and consideration has been given to their recommendations.

In the judgment of the Director of Price Stabilization, the provisions of this regulation are generally fair and equitable, are necessary to effectuate the purposes of Title IV of the Defense Production Act of 1950, as amended, and comply with all applicable standards of that act.

Class I producer milk by the four-market ply-demand adjustment factor determining Price Regulation 167 is hereby issued.

REGULATORY PROVISIONS

Sec.
1. What this regulation does.
2. Sales not covered.
3. Processors' ceiling prices for sales in bulk, in carload lots or pool carlots, f. o. b. mill.
4. Processors' ceiling prices for a sale in a less-than-carload lot.
5. Processors' ceiling prices for a delivery at a point other than producing point.
6. Processors' maximum markup.
7. Ceiling prices for sales by grinders.
8. Ceiling prices for sales by trucker-merchants.
9. Ceiling prices for sales by jobbers and car-door sellers.
10. Ceiling prices for sales by wholesalers and retailers.
11. Allowance for sacks and sacking.
12. Ceiling prices for cottonseed meal futures contracts.
13. Petitions for amendment.
14. Adjustable pricing.
15. Excise or similar taxes.
16. Transfer of business.
17. Current records.
18. Prohibitions.
19. Evasions.
20. Definitions.

AUTHORITY: Sections 1 to 20 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154. Interpret or apply Title IV, 64 Stat. 803, as amended; 50 U. S. C. App. Sup. 2101–2110. E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.

SECTION 1. *What this regulation does*—(a) *Coverage.* This regulation establishes ceiling prices for producers and distributors of cottonseed feed products. For the sellers and products covered, this regulation supersedes the General Ceiling Price Regulation (GCPR) and Supplementary Regulation (SR) 31, Revision 2, to the GCPR. For sales by the Commodity Credit Corporation, it supersedes SR 14 to the GCPR.

(b) *Geographical applicability.* This regulation applies in the 48 states of the United States and the District of Columbia.

SEC. 2. *Sales not covered.* This regulation does not apply to:

(a) Export sales and sales for export. These sales are covered by Ceiling Price Regulation 61.

(b) Sales of imported cottonseed feed products. These sales are covered by Ceiling Price Regulation 31.

SEC. 3. *Processors' ceiling prices for sales in bulk, in carload lots, or pool carlots, f. o. b. mill.* If you are a processor your ceiling prices for sales of cottonseed feed products, per ton, bulk, f. o. b. mill, in carload lots or pool carlots, are as follows:

(a) *Cottonseed feed products, except hulls, hull bran and cottonseed feed—(1) Sales with guarantee of standard protein content.* If at the time of sale you guarantee that the lot of cottonseed feed products (except hulls, hull bran, and cottonseed feed) will contain, at a minimum, the standard protein content for the commodity, and you fulfill such guarantee by delivering a lot with at least such standard protein content, your ceiling price is as follows:

(i) If you produce the lot at a point listed in Table I, your ceiling price is the price listed in Table I for that point of production.

(ii) Other production points: If you produce the lot at a point not listed in Table I, your ceiling price is the price listed in Table I for the same product for the point nearest to the actual point of production.

(iii) "Standard protein content" is 41 percent for cottonseed meal, cake, sized cake, flakes, cubes, and pellets, and 28 percent for whole pressed cottonseed meal, cake, sized cake, cubes, and pellets.

TABLE I

Point of production	Cake or flakes		Meal		Sized cake		Pellets or cubes	
	Cottonseed	Whole pressed cottonseed	Cottonseed	Whole pressed cottonseed	Cottonseed	Whole pressed cottonseed	Cottonseed	Whole pressed cottonseed
Mississippi	$78.00	$66.00	$80.00	$68.00	$81.00	$69.00	$82.25	$70.25
Tennessee	78.00	66.00	80.00	68.00	81.00	69.00	82.25	70.25
East Arkansas [1]	78.00	66.00	80.00	68.00	81.00	69.00	82.25	70.25
West Arkansas [2]	79.00	67.00	81.00	69.00	82.00	70.00	83.25	71.25
Missouri	79.00	67.00	81.00	69.00	82.00	70.00	83.25	71.25
Illinois	79.00	67.00	81.00	69.00	82.00	70.00	83.25	71.25
Louisiana	79.00	67.00	81.00	69.00	82.00	70.00	83.25	71.25
Oklahoma	80.00	68.00	82.00	70.00	83.00	71.00	84.25	72.25
Texas	80.00	68.00	82.00	70.00	83.00	71.00	84.25	72.25
Alabama	79.00	67.00	81.00	69.00	82.00	70.00	83.25	71.25
Georgia	80.00	68.00	82.00	70.00	83.00	71.00	84.25	72.25
Florida	80.00	68.00	82.00	70.00	83.00	71.00	84.25	72.25
South Carolina	81.00	69.00	83.00	71.00	84.00	72.00	85.25	73.25
North Carolina	81.00	69.00	83.00	71.00	84.00	72.00	85.25	73.25
New Mexico	80.00	68.00	82.00	70.00	83.00	71.00	84.25	72.25
Arizona	80.00	68.00	82.00	70.00	83.00	71.00	84.25	72.25
California	80.00	68.00	82.00	70.00	83.00	71.00	84.25	72.25

[1] East Arkansas consists of the following counties in Arkansas: Arkansas, Clay, Craighead, Crittenden, Jackson, Lawrence, Lee, Mississippi, Monroe, Phillips, Poinsett, Randolph, St. Francis, and Woodruff.
[2] West Arkansas consists of all points not included in East Arkansas.

(2) *Sales with guarantee of less than standard protein content.* If, at the time of sale you guarantee that the lot of cottonseed feed products (except hulls, hull bran and cottonseed feed) will contain any specified protein content less than the standard for the commodity and you fulfill such guarantee by delivering a lot with at least the minimum protein content guaranteed, you determine your ceiling price by deducting from your ceiling price of the same commodity of standard protein content, as determined under subparagraph (1) of this paragraph, $1.00 per ton for each unit of protein or fraction thereof by which the guaranteed protein content of the lot is under the standard for the commodity.

(3) *Sales with guaranteed minimum of 43 percent protein content.* If at the time of sale you guarantee that a lot of cottonseed meal, cake, sized cake, flakes, cubes, or pellets will contain, at a minimum, 43 percent protein and you fulfill such guarantee by delivering a lot with at least 43 percent protein, you determine your ceiling price by adding $4.00 per ton to your ceiling price of that product of standard protein content, as determined under subparagraph (1) of this paragraph.

(4) *Deliveries of less than guaranteed protein content.* If at the time of sale you guarantee that a lot of cottonseed feed products (except hulls, hull bran, and cottonseed feed) will contain any minimum protein content and you do not fulfill such guarantee on delivery, your ceiling price, as determined under subparagraphs (1), (2) or (3) of this paragraph is reduced in such proportion as the deficiency bears to the guarantee.

Example: You produce a particular lot of cottonseed meal at Memphis and deliver it to your customer in bulk, in a carload lot, at your mill. At the time of sale you guarantee that the lot will contain, at a minimum, 41 percent protein. Under subparagraph (1) of this paragraph, if you delivered a lot with a protein content of 41 percent or more, your ceiling price for that lot would be $80.00. However, upon analysis, the lot you deliver is found to contain 40.1 percent protein. Your ceiling price for that lot is $78.20 $\left(\frac{\$80.00}{41}=\$1.95.\quad \$1.95\times 40.1=\$78.20\right)$.

(5) *Sales with no guaranteed minimum protein content.* If at the time of sale you do not guarantee that a lot of a cottonseed feed product (except hulls, hull bran, and cottonseed feed) will contain any minimum protein content, you determine your ceiling price per ton by multiplying the actual number of full units of protein in the lot by $2.40, if the lot is produced from whole pressed cottonseed, or $1.90 if produced from cottonseed. However, your ceiling price determined under this subparagraph must not exceed the ceiling price for the same commodity of standard protein content as determined under subparagraph (1) of this paragraph.

(b) *Cottonseed hulls.* Your ceiling price for cottonseed hulls is $25.00 per ton.

(c) *Cottonseed hull bran.* Your ceiling price for cottonseed hull bran is $29.00 per ton, plus your transportation cost, if any, from the point of production of the cottonseed hulls to the point of production of the cottonseed hull bran.

(d) *Cottonseed feed.* Your ceiling price for cottonseed feed is determined as follows:

(1) *Guarantee of minimum protein content.* If, at the time of sale, you guarantee that a lot of cottonseed feed will contain any specified minimum protein content and you fulfill such guarantee by delivering a lot with at least the minimum protein content guaranteed, you determine your ceiling price by deducting from your ceiling price for cottonseed meal of standard protein content, as fixed by paragraph (a) (1) of this section, $1.00 per ton for each unit of protein, or fraction thereof, by which the guaranteed protein content of the lot of cottonseed feed is below 41 percent.

(2) *Delivery of less than guaranteed protein content.* If you deliver a lot of cottonseed feed containing less than the guaranteed minimum protein content your ceiling price, as determined under subparagraph (1) of this paragraph, is reduced in such proportion as the deficiency bears to the guarantee.

SEC. 4. *Processors' ceiling prices for a sale in a less-than-carload lot.* If you are a processor and you deliver a lot of cottonseed feed products (except hulls and hull bran) in bulk in a less-than-carload lot, you may add $1.00 per ton to your ceiling price for a sale in a carload lot or pool carlot as otherwise determined under this regulation. The l. c. l. markup provided in this section is in addition to the distributive markups provided for processors in section 6.

SEC. 5. *Processors' ceiling prices for a delivery at a point other than the producing points.* If you are a processor your ceiling price for a delivery of a lot of cottonseed feed product at a point other than the point at which the lot was produced is determined by adding to your ceiling price for that product, f. o. b. mill, as otherwise determined under this regulation, your "transportation cost" from the point at which the lot was produced to the point at which your customer takes delivery.

SEC. 6. *Processors' maximum markup.* As a processor, you are not permitted to add a markup in determining your ceiling price for a sale of any lot which you produce, except as provided in this section. In the cases specified below you may add a markup not to exceed the corresponding amount listed.

	Cottonseed hulls or hull bran (per ton)	All other cottonseed feed products (per ton)
If you sell such a lot to a feeder after having unloaded it into a store operated by you as a separate place of business not located at the production plant where the lot was produced	$4.00	$4.50
In all other cases, if you sell such lot after having unloaded it into a separate place of business, operated by you, not located at the production plant where the lot was produced:		
To feeders	1.00	2.00
To anyone else, except a grinder	1.00	1.50
If you sell to a feeder in quantities of 20,000 pounds or less from the production plant where the lot was produced	1.00	2.00

SEC. 7. *Ceiling prices for sales by grinders*—(a) *Sales of cottonseed or whole-pressed cottonseed meal, sized cake, cubes or pellets produced from domestic slab cake, f. o. b. mill.* If you are a grinder of domestic slab cake, your ceiling price for a sale of cottonseed or whole-pressed cottonseed meal, sized cake, cubes, or pellets, in bulk, f. o. b. your mill, is determined by adding to your supplier's ceiling price for the slab cake from which the lot is produced, f. o. b. your supplier's place of business, the following:

(1) Your "transportation cost", if any, from point of production of the slab cake to point of production of the meal, sized cake, cubes, or pellets, and

(2) (i) $2.50 per ton if you produce and sell meal; or

(ii) $3.50 per ton if you produce and sell sized cake; or

(iii) $4.75 per ton if you produce and sell cubes or pellets; and

(3) A markup as provided in paragraph (d) of this section.

(b) *Sales of cottonseed, or whole-pressed cottonseed meal, sized cake, cubes or pellets produced from imported slab cake, f. o. b. mill.* If you are a grinder of imported slab cake, your ceiling price, per ton, for a sale of cottonseed or whole-pressed cottonseed meal, sized cake, cubes or pellets, bulk, f. o. b. your mill, is determined by adding to the cost to you at United States point of entry of the imported slab cake from which the lot is produced, if you are the importer, or to your supplier's ceiling price for the slab cake from which the lot is produced, if you are not the importer, the following:

(1) Your "transportation cost," if any, from the U. S. point of entry or from such other point at which you take delivery from your supplier, to the point of production of the meal, sized cake, cubes or pellets; and

(2) (i) $2.50 per ton if you produce and sell meal, or

(ii) $3.50 per ton if you produce and sell sized cake, or

(iii) $4.75 per ton if you produce and sell cubes or pellets, and

(3) A markup as provided in paragraph (d) of this section.

(c) *Deliveries at a point other than producing point.* If you are a grinder, your ceiling price for a delivery of a lot at any point other than the point at which it is produced is determined by adding to your ceiling price for that lot, f. o. b. mill, as otherwise determined under this regulation, your "transportation cost" from the point at which the lot was produced to the point at which your customer takes delivery.

(d) *Grinder's maximum markup.* As a grinder, you may add to your ceiling price, as otherwise determined under this regulation, a markup not to exceed the amount provided below:

	Markup
If you are a grinder but are not also a crusher (i. e., you do not also crush cottonseed in your plant).	$2.00 per ton.
If you are a grinder and are also a crusher (i. e., you also crush cottonseed in your plant).	You may add the applicable processor's markup specified in section 6 of this regulation.

SEC. 8. *Ceiling prices for sales by trucker-merchant.* (a) If you are a trucker-merchant, you determine your ceiling price for a lot of cottonseed feed products by adding to your supplier's ceiling price on the sale of the lot to you, the hauling allowance from the point at which you take delivery of the lot from your supplier to the point at which you deliver it to your customer. "Hauling allowance" means the following scale of charges:

(1) If the total haul does not exceed 100 miles: 3 cents per 100 pounds for the first 5 miles, or fraction thereof, plus 1 cent per 100 pounds for each additional 5 miles or fraction thereof.

(2) If the total haul exceeds 100 miles:

(i) The lower of the following:

(*a*) The lowest carload rail rate from the rail point nearest the point of origin to the rail point nearest the point of destination, plus eight cents per 100 pounds; or

(*b*) 22 cents per 100 pounds.

(ii) You may add to the allowance computed under subdivision (i) ¼ cent per 100 pounds for each five miles or fraction thereof by which the total haul exceeds 100 miles.

In calculating the mileage for any haul, you must use the distance via the shortest route, reasonably suitable for truck movement, between the point where you receive delivery from your supplier and the point where your customer takes delivery.

(b) Statement of information. As a trucker-merchant, you must, with respect to every lot of cottonseed feed products transported by you, procure or prepare a statement setting forth the following:

(1) Your name and address and the state vehicle license number(s) of your truck or other vehicle in which you transport the lot.

(2) The name and address of your supplier.

(3) The date of purchase.

(4) The guaranteed protein content, if any.

(5) Your supplier's ceiling price.

After you deliver the lot, you must add your hauling charge as determined under this section and sign the statement. Except for a sale which you make to a feeder, you must give a copy of this statement of information to your customer. If your customer is a feeder, you must give him a copy upon demand. Both the trucker-merchant and each customer other than a feeder must retain such copies in their files for a period of two years for inspection by the Office of Price Stabilization.

The statement of information required by this section is in addition to the sales record required by section 17, unless the trucker-merchant includes on the statement the additional information required by section 17.

SEC. 9. *Ceiling prices for sales by jobbers and car door sellers.* If you are a jobber or a car door seller, you determine your ceiling price for a lot of cottonseed feed products by adding to your supplier's ceiling price on the sale of the lot to you, your transportation cost, if any, and the applicable markup listed below:

(a) *Jobbers.* If you are a jobber, you may add one of the following markups if no other jobber has already handled the same lot and taken a jobber's markup:

	Cottonseed hulls and hull bran (markup per ton)	All other cottonseed feed products (markup per ton)
For deliveries of pool car lots	$2.00	$2.25
For all other deliveries	1.75	2.00

(b) *Car door sellers.* If you are a car door seller, you may add a markup of $3.00 per ton for sales or deliveries of hulls and hull bran and $5.50 for sales or deliveries of all other cottonseed feed products.

SEC. 10. *Ceiling prices for sales by wholesalers and retailers.* If you are a wholesaler or retailer, you determine your ceiling price by adding to your "cost at ceiling", as determined under paragraph (b) of this section, your transportation cost, if any, from your warehouse or store, and the applicable markup set forth in paragraph (a).

(a) Wholesalers and retailers markups: If no other seller of the same class has already handled the same lot and taken a markup, you may add the applicable one of the following markups:

	Cottonseed hulls and hull bran (per ton)	All other cottonseed feed products (per ton)
Wholesalers:		
Sales and deliveries of 20,000 pounds or less	$3.25	$5.00
All other sales and deliveries	3.25	4.50
Retailers	5.00	8.00

(b) Determine your "cost at ceiling" by one of the following methods:

(1) *Method 1.* If you maintain the identity of any receipt, on the sale of such receipt you may use as your "cost at ceiling" your supplier's ceiling price on the sale and delivery of the lot to you, plus your transportation cost, if any, to your warehouse or store. You may use this method of determining your "cost at ceiling" even though you are simultaneously determining your "cost at ceiling" for resale of other receipts under Method 2.

(2) *Method 2.* This method may be used both by wholesalers and retailers in connection with the resale of two or more receipts. In using it, you may not include in your calculations any receipt whose identity is maintained and for which you figure a "cost of ceiling" under Method 1 above.

For receipts of a cottonseed feed product in sacks, use as your "cost at ceiling" the weighted average of your suppliers' ceiling prices for deliveries to you in sacks plus your transportation cost, if any, to your warehouse or store. For receipts of a cottonseed feed product in bulk, use as your "cost at ceiling" the weighted average of your suppliers' ceiling prices for deliveries to you in bulk, plus your transportation cost, if any, to your warehouse or store. Calculate each weighted average of ceiling prices as follows:

(i) Select a day for calculation and recalculate on that day each week thereafter (or, in case that day falls on a legal holiday, recalculate on the next business day).

(ii) Make your first calculation under this Method 2 as follows:

Step 1. Take your latest receipt prior to the day of calculation delivered to you on the basis (sacked or bulk) for which you are calculating a weighted average of ceiling prices, and all receipts delivered to you on the same basis for the 28 days preceding that last receipt.

Step 2. Multiply the number of tons of each receipt by your supplier's ceiling price per ton on the sale and delivery to you of that receipt, and add to this amount your transportation cost for the receipt, if any, to your warehouse or store.

Step 3. Add the results obtained under Step 2 and divide by the total number of tons involved in your calculations. The result is your "cost at ceiling" for the first week for all your sales of that cottonseed feed product (except, of course, for the sales for which you elect to determine your ceiling price under Method 1).

(iii) Follow the directions of subdivision (ii) above for all succeeding calculations except that you use your last receipt and all receipts during the 14 day period preceding such last receipt in arriving at your "cost of ceiling."

(iv) If you wish to discontinue using this Method 2, you may do so, if, on the next calculation day, you take an inventory of the commodity. You may then treat the amount in inventory (excluding any receipts priced under Method 1) as a receipt on which your "cost at ceiling" is the weighted average price you would compute under this Method 2 for the succeeding week. If some of your receipts are bulk and some sacked, calculate separate weighted averages for these two types of receipts.

SEC. 11. *Allowance for sacks and sacking.* If you are a processor or grinder and you sell and deliver a cottonseed feed product in sacks, or if you are a wholesaler or retailer and you sack a cottonseed feed product which you buy in bulk, you may add to your ceiling price, per ton, in bulk, as otherwise determined under this regulation, the following:

(a) $1.00 per ton; plus

(b) The lower of the following:

(1) An amount consisting of the cost per sack of your most recent customary purchase of sacks of the kind, size, and condition (new or used) used for the lot, multiplied by the number of sacks furnished per ton of the cottonseed feed product you deliver; or

(2) The applicable allowance from the following table:

Type of sack used	New sacks (per ton)	Used sacks (per ton)
Cotton	$5.25	$4.25
Burlap	4.25	3.50
Paper	3.25	----------

SEC. 12. *Ceiling prices for cottonseed meal futures contracts.* The ceiling price for cottonseed meal futures contracts traded on the Memphis Merchants Exchange is $80.00 per ton.

SEC. 13. *Petitions for amendment.* If you wish to have this regulation amended, you may file a petition for amendment in accordance with the provisions of Price Procedural Regulation No. 1.

SEC. 14. *Adjustable pricing.* Nothing in this regulation prohibits you from making a contract or offer to sell at (a) the ceiling price in effect at the time of delivery, or (b) the lower of a fixed price or the ceiling price in effect at the time of delivery. You may not, however, deliver or agree to deliver at a price to be adjusted upward in accordance with any increase in ceiling prices after delivery.

SEC. 15. *Excise or similiar taxes.* You may collect in addition to your ceiling price, the amount of any excise, sales, or similar tax actually paid by you if the statute or ordinance imposing the tax does not prohibit you from stating and collecting the tax separately from your selling price.

SEC. 16. *Transfer of business.* If, after the effective date of this regulation, you acquire the business, assets or stock-in-trade of any cottonseed feed product business, and you carry on the business, or continue to deal in cottonseed feed products separately from any other establishment previously owned or operated by you, you shall have the same ceiling prices and be under the same obligation to keep records as the person from whom you acquired the business, assets or stock. If, after the effective date of this regulation, you transfer your business, assets or stock, you must either preserve and make available, or turn over to the transferee, all your records which are necessary for him to comply with the ceiling price or record-keeping provisions of this regulation.

SEC. 17. *Current records.* Except as otherwise provided in this section, every person who sells shall make and keep and every person who in the regular course of trade or business buys a cottonseed feed product shall keep for inspection by the Office of Price Stabilization for a period of two years accurate records of each sale or purchase made after the effective date of this regulation.

(a) *Sales.* (1) Every person making a sale under this regulation to a buyer other than a feeder shall record each such sale on an invoice or bill of sale, a copy of which must be given to the buyer. Every person making a sale to a feeder in a lot of more than 1000 pounds must keep a record thereof, although it does not have to be in the form of an invoice or bill of sale, and, upon demand, must give a copy of such record to the feeder. Every such sales record must state the name and address of the seller and buyer; the date of sale and delivery; the kind of cottonseed feed product and the quantity sold; the selling price; the guaranteed protein content, if any; the seller's ceiling price for the lot. Except for sales of 5,000 pounds or less to a feeder, every sales record must also indicate the point at which the lot was produced (if the seller knows it), the buyer's receiving point; any charge made for sacks or sacking; any transportation charge included in the ceiling price which is incurred by the seller in making delivery to his purchaser, and any markup specified in this regulation which is added by the seller.

(2) *Grinder.* In addition to the sales record which he is required to give to his customer under subparagraph (1) above, every grinder making a sale of a cottonseed feed product must keep a record showing his supplier's ceiling price (or the cost at United States point of entry if the grinder is the importer) for the slab cake from which the lot was produced; the date of purchase of the slab cake; the name and address of his supplier; his transportation cost from point of production of the slab cake (or from United States point of entry or other point of delivery to him if he buys imported slab cake) to the point of production of the lot of meal, sized cake or pellets.

(b) *Purchases.* Every person other than a feeder making a purchase of cottonseed feed products in the course of trade or business must keep the sales record which his seller is required to give him under this section.

SEC. 18. *Prohibitions.* You shall not do any act prohibited or omit to do any act required by this regulation, nor shall you offer, solicit, attempt, or agree to do or omit to do any such acts. Specifically (but not in limitation of the above), you shall not, regardless of any contract or other obligation, sell, and no person shall buy from you at a price higher than the ceiling price established by this regulation, and you shall make and preserve true and accurate records required by this regulation. If you violate any provisions of this regulation, you are subject to criminal penalties, enforcement action, and action for damages.

SEC. 19. *Evasions.* Any device which results in obtaining indirectly a higher price than is permitted by this regulation or in concealing or falsely representing information as to which this regulation requires records to be kept is a violation of this regulation. This prohibition includes, but is not limited to, devices making use of commissions, services, cross sales, transportation arrangements, premiums, discounts, special privileges, up-grading, tie-in agreements and trade understandings, as well as the omission from records of true data and the inclusion in records of false data.

SEC. 20. *Definitions*—(a) *Sellers covered by this regulation.*

(1) "Car door seller" means a person, other than the processor or grinder, who, with respect to any lot he has received as a carload shipment, resells the same to feeders in l. c. l. lots from the rail car door.

(2) "Crusher" means a person engaged in the business of converting cottonseed, by the hydraulic, expeller, or solvent extraction process, into cottonseed feed products, cottonseed oil, and cotton linters.

(3) "Grinder" means, with respect to any lot, a person who processes or procures the processing of meal, sized cake, pellets or cubes from cottonseed cake or whole pressed cottonseed cake which he buys. It includes a crusher who buys cottonseed cake or whole-pressed cottonseed cake and processes the same into meal, sized cake, pellets, or cubes.

(4) "Jobber" means, with respect to any lot, any person other than the processor, grinder, car door seller, or trucker-merchant, who sells such lot without previously having unloaded it into a warehouse or store.

(5) "Processor" means, with respect to any lot, the person who manufactures such lot. It does not include a grinder, as defined in subparagraph (3) of this paragraph. When any lot of cottonseed feed products is processed by a person who does not own it, the owner who caused it to be processed shall be deemed to be the processor when he sells the commodity, or commodities, which result.

(6) "Retailer" means a person, other than the processor or grinder, who maintains a store, and who, with respect to any lot he has purchased and unloaded into that store, resells such lot to a feeder. "Store" means a building where a regular business of selling and delivering feeds and/or grain is carried on, and where the owner or one or more of his employees works on substantially a full-time, year-round basis, in such business or in a general retail business of which such feed and grain business is a part. "Feeder" means, with respect to any lot, a person who uses such lot for feeding animals or poultry, or as a fertilizer.

(7) "Trucker-merchant" means, with respect to any lot, a person other than the processor or grinder, who, without having previously unloaded the lot into a warehouse or store for his own account and use, transports and delivers the lot to his customer in a truck or wagon owned or leased and operated by him.

(8) "Wholesaler" means with respect to any lot:

(i) A person, other than the processor or grinder, who, after having unloaded it into a warehouse or store, sells such lot to any one other than a feeder; or

(ii) A person, other than the processor or grinder, who, after having unloaded it into a place of business other than a store, sells such lot to a feeder.

(b) *Products covered by this regulation.* (1) "Cottonseed feed" is a mixture of cottonseed meal and cottonseed hulls or cottonseed hull bran which mixture shall contain less than 36 percent protein.

(2) "Cottonseed feed products" means cottonseed meal, cake (or slab cake), sized cake, flakes, cubes, pellets; whole pressed cottonseed meal, cake (or slab cake), sized cake, cubes, pellets; cottonseed hulls and hull bran; cottonseed feed.

(3) "Cottonseed flakes" is the product obtained after solvent extraction of the oil from cottonseed kernels and such portions of the hull as is necessary in the manufacturing process.

(4) "Cottonseed hulls" are the by-product produced by the processor in the production of cottonseed cake.

(5) "Cottonseed hull bran" means cottonseed hulls which have been processed to remove excess fiber.

(6) "Cottonseed cake" is the product remaining after the commercial extraction of the oil from cottonseed by either the hydraulic or screw-press process. It is composed principally of the cottonseed kernel, with such portion of the hull as is necessary in the manufacture of oil.

(7) "Cottonseed meal" is ground cottonseed cake (other than sized cake) including such cottonseed hull bran as is necessary to control the protein content. It does not contain less than 36 percent protein.

(8) "Cottonseed meal cubes" and "whole pressed cottonseed meal cubes" are the products resulting from processing cottonseed meal or whole pressed cottonseed meal through a cubing machine.

(9) "Cottonseed meal pellets" and "whole pressed cottonseed meal pellets" are the products resulting from the processing of cottonseed meal or whole pressed cottonseed meal through a pelleting machine.

(10) "Domestic slab cake" means slab cake produced at any point in the United States.

(11) "Imported slab cake" means slab cake produced at any point outside the United States.

(12) "Sized cake" is cracked cottonseed cake or cracked whole pressed cottonseed cake which will not pass through a 1/2-inch screen. It may, however, include limited quantities of cottonseed or whole-pressed cottonseed meal, not in excess of 10 percent.

(13) "Whole pressed cottonseed cake" is the product resulting from subjecting the whole, clean, undecorticated cottonseed to pressure for the extraction of oil, and includes the entire cottonseed less the oil extracted and the lint removed.

(14) "Whole pressed cottonseed meal" is ground whole pressed cottonseed cake, other than sized cake.

(c) *Miscellaneous definitions.* (1) "Carload lot" means any quantity which takes the carload rail freight rate under the applicable railroad tariff requirements.

(2) "Less-than-carload lot" means any lot containing a quantity less than a carload lot other than a pool car lot. It includes any delivery by or into a truck.

(3) "Person" includes any individual, corporation, partnership, association, or other organized group of persons, or legal successors or representatives of the foregoing, and the United States or any other government or their political subdivisions or agencies.

(4) "Pool car lot" means a lot being shipped to the purchaser as part of a rail carload lot sold by one seller to two or more persons.

(5) "Supplier's ceiling price" means the ceiling price, per ton, your supplier could have charged on the sale and delivery to you if he had given you, and fulfilled on delivery, the same protein guarantee, if any, you are giving your customer.

(6) "Transportation cost" means:

(i) When a common carrier, contract carrier, or other carrier for hire or compensation is employed, the charges (exclusive of loading charges not customarily included in such transportation charges) which are actually incurred by the seller or purchaser, as the case may be. This amount may include, if applicable, the 3 percent transportation tax.

(ii) Where the seller or purchaser, as the case may be, does his own hauling, the reasonable value of the transportation service (exclusive of loading), not exceeding the common or contract carrier rate for the same service, or any ceiling price established by the Office of Price Stabilization for such service.

(iii) When any movement involves a combination of the types of transportation included in (i) and (ii), the sum of the amounts computed separately for each portion of the movement.

(7) "Unit of protein" equals one percent of protein and "each unit of protein or fraction thereof" means the number of full units, if any, plus an additional unit for any fractional unit.

Effective date. This regulation is effective August 25, 1952.

NOTE: The record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

ELLIS ARNALL,
Director of Price Stabilization.

AUGUST 25, 1952.

[F. R. Doc. 52-9460; Filed, Aug. 25, 1952; 12:00 m.]

Chapter VI—National Production Authority, Department of Commerce

[CMP Regulation No. 1, Direction 4 as amended August 22, 1952]

CMP REG. 1—BASIC RULES OF THE CONTROLLED MATERIALS PLAN

DIR. 4—ACQUISITION AND USE OF FOREIGN AND USED STEEL WITHOUT ALLOTMENT

This amended direction under CMP Regulation No. 1 is found necessary and appropriate to promote the national defense and is issued pursuant to the authority of section 101 of the Defense Production Act of 1950, as amended. In the formulation of this amended direction, there has been consultation with industry representatives, including representatives of trade associations, and consideration has been given to their recommendations. Consultation with representatives of all industries affected has been rendered impracticable because the amendment affects many different industries.

EXPLANATORY

This amendment affects Direction 4 to CMP Regulation No. 1 as follows: The title and sections 1, 2, and 3 are deleted; a new title and new sections 1 to 8 are substituted therefor. As so amended, Direction 4 to CMP Regulation No. 1 reads as follows:

REGULATORY PROVISIONS

Sec.
1. What this direction does.
2. Definitions.
3. Acquisition and use of foreign and used steel.
4. Relation of this direction to the self-authorization procedure.
5. Acceptance of orders by suppliers.
6. Importation of Class A products.
7. Effect on inventory limitations.
8. Applicability of other regulations and orders.

AUTHORITY: Sections 1 to 8 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *What this direction does.* This direction authorizes the acquisition and use of foreign steel and used steel without an allotment. It also permits persons to import Class A products without charging the steel content of such products against their allotments. The direction authorizes acceptance of delivery of used steel without regard to inventory restrictions by persons who maintain separate inventory records for such types of steel.

SEC. 2. *Definitions.* As used in this direction:

(a) "Foreign steel" means steel in the forms and shapes indicated in Schedule I of CMP Regulation No. 1, produced in foreign countries other than Canada, which can be positively identified as of such foreign origin through physical characteristics or markings or through adequate documentation.

(b) "Used steel" means steel in the forms and shapes indicated in Schedule I of CMP Regulation No. 1, which has been utilized in production or construction, including but not limited to offal and steel salvaged from scrap.

SEC. 3. *Acquisition and use of foreign and used steel.* (a) Notwithstanding the provisions of CMP Regulation No. 1, as amended, any person may acquire foreign steel and used steel without placing an authorized controlled material order therefor and without charging any allotment. He may use the steel so acquired to produce Class A and Class B products, even though he thereby exceeds his authorized production schedule: *Provided, however,* That he shall not, for such production, acquire copper or aluminum controlled material in excess of the quantities which he is authorized to acquire therefor pursuant to allotments he has received or under Direction 1, 17, or 18 to CMP Regulation No. 1, whichever is applicable: *And provided further,* That no person who has received an authorized production schedule for a Class B product or products which contains a specific limitation on the number of units which may be produced, shall exceed such unit limitation.

(b) A person who may exceed his authorized production schedule pursuant to this section may use the DO rating assigned to his authorized production schedule, in accordance with the provisions of CMP Regulation No. 3, to purchase products or materials other than controlled materials required for such additional production.

SEC. 4. *Relation of this direction to the self-authorization procedure.* (a) A person who wishes to operate under the self-authorization provisions of Direction 1 or 17 to CMP Regulation No. 1, whichever is applicable, and who acquires or plans to acquire foreign steel or used steel without placing authorized controlled material orders therefor need not consider the quantity of such steel in determining whether or not his total requirements for delivery of controlled material exceed the quantities for which he may self-authorize, nor need he charge the foreign or used steel so acquired against such quantities. He may, if he operates under the said Direction 1 or 17, use the rating DO–SU, in accordance with the provisions of CMP Regulation No. 3, to acquire products and materials other than controlled materials required for the additional production made possible by the use of the foreign or used steel acquired pursuant to the provisions of section 3 of this direction.

(b) A person who requires no controlled material other than foreign steel and used steel which he acquires without use of an authorized controlled material order may use the rating DO–SU, in accordance with the provisions of CMP Regulation No. 3, to acquire products and materials other than controlled materials required for the production of Class A or Class B products made possible by the use of the foreign or used steel so acquired.

SEC. 5. *Acceptance of orders by suppliers.* A person who wishes to sell or otherwise transfer title to foreign steel or used steel may accept and make delivery on orders for such steel, placed pursuant to the provisions of this direction, without requesting authorization from NPA or a claimant agency.

SEC. 6. *Importation of Class A products.* Not withstanding the provisions of CMP Regulation No. 1, any person who has received an allotment for an authorized production schedule pursuant to an application or under Direction 18 to CMP Regulation No. 1, or who operates within the self-authorization quantities prescribed in Direction 1 or 17 to CMP Regulation No. 1, whichever is applicable, shall not be required to charge against such allotments or self-authorization quantities the steel content of any Class A product he acquires which can be positively identified through physical characteristics or markings or through adequate documentation as having been produced in a foreign country other than Canada. Any such person shall, nevertheless, charge against such allotments or self-authorization quantities the content of copper and aluminum controlled material of any such imported Class A product.

SEC. 7. *Effect on inventory limitations.* If a user of controlled material maintains separate inventory records for used steel, he may accept delivery of such used steel without regard to the provisions of CMP Regulation No. 2 or of any other regulation or order of NPA. Attention is directed to the provisions of section 4 (f) of CMP Regulation No. 2 (Inventories of Controlled Materials) regarding acceptance of delivery of imported controlled material acquired prior to landing, and restrictions on acceptance of further deliveries from domestic sources.

SEC. 8. *Applicability of other regulations and orders.* Except as specifically provided, nothing in this direction shall be construed to relieve any person from complying with all other applicable regulations and orders of NPA.

This direction as amended shall take effect August 22, 1952.

NATIONAL PRODUCTION AUTHORITY,
By GEORGE W. AUXIER,
Executive Secretary.

[F. R. Doc. 52-9388; Filed, Aug. 22, 1952; 10:03 a. m.]

[NPA Order M-80, Amdt. 2 of Aug. 25, 1952]

M-80—IRON AND STEEL—ALLOYING MATERIALS AND ALLOY PRODUCTS

INCREASE OF ZIRCONIUM ALLOWANCE

This amendment is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this amendment, consultation with industry representatives has been rendered impracticable due to the need for immediate action and because the amendment affects many different industries.

This amendment affects NPA Order M-80 as amended March 12, 1952, and as further amended by Amendment 1 of May 7, 1952, by increasing the quantity of zirconium appearing in item 13 of List II, so that such item as amended will now read as follows:

13. Zirconium—15 tons.
(64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154)

This amendment shall take effect August 25, 1952.

NATIONAL PRODUCTION AUTHORITY,
By GEORGE W. AUXIER,
Executive Secretary.

[F. R. Doc. 52-9458; Filed, Aug. 25, 1952; 11:31 a. m.]

[NPA Order M-80, Schedule 5 as Amended Aug. 25, 1952]

M-80—IRON AND STEEL—ALLOYING MATERIALS AND ALLOY PRODUCTS

SCHEDULE 5—COLUMBIUM AND TANTALUM

This schedule as amended is found necessary and appropriate to promote the national defense and is issued pursuant to the Defense Production Act of 1950, as amended. In the formulation of this amended schedule, there has been consultation with industry representatives, including trade association representatives, and consideration has been given to their recommendations. This amended schedule is issued under NPA Order M-80 and is made a part of that order.

EXPLANATORY

This amended schedule revises Schedule 5 dated May 2, 1952, to NPA Order M-80 by adding a paragraph to section 8 relaxing restrictions on Type 347 stainless steel which has been in the inventory of a steel distributor or steel producer for 6 months or more.

REGULATORY PROVISIONS

Sec.
1. Definitions.
2. Columbium and tantalum subject to allocation.
3. Applications for allocation.
4. Exceptions to allocation requirements.
5. Use of substitutes.
6. Authorized controlled material orders required.
7. Restrictions.
8. Exceptions.
9. Conservation of scrap.
10. Communications.

AUTHORITY: Sections 1 to 10 issued under sec. 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, Sept. 9, 1950, 15 F. R. 6105; 3 CFR, 1950 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61; 3 CFR, 1951 Supp.; secs. 402, 405, E. O. 10281, Aug. 28, 1951, 16 F. R. 8789; 3 CFR, 1951 Supp.

SECTION 1. *Definitions.* All definitions contained in NPA Order M-80, including the definition of columbium and tantalum contained in List I of that order, are applicable to this schedule. "Columbium and tantalum" means ferro-columbium and ferro-columbium tantalum.

SEC. 2. *Columbium and tantalum subject to allocation.* Columbium and tantalum are subject to complete allocation.

SEC. 3. *Applications for allocation.* Section 10 of NPA Order M-80 forbids deliveries or use of an alloying material made subject to complete allocation, except in accordance with an allocation authorization. Applications for an allocation authorization for deliveries may be made on or before the seventh day of any month for delivery in the succeeding month on Form NPAF-114.

SEC. 4. *Exceptions to allocation requirements.* The provisions of sections 2 and 3 of this schedule shall not apply to:

(a) Deliveries to any person whose total receipts from all sources during any calendar month are not thereby made to exceed 10 pounds of columbium and tantalum, and who delivers a signed certification to his supplier as follows:

The undersigned, subject to statutory penalties, certifies that acceptance of deliveries and use by the undersigned of the columbium and tantalum herein ordered will not be in violation of NPA Order M-80 or of Schedule 5 of that order.

This certification constitutes a representation by the purchaser to the seller and to NPA that delivery of the columbium and tantalum ordered may be accepted by the purchaser under NPA Order M-80 and this schedule, and that such columbium and tantalum will not be used by the purchaser in violation of that order or this schedule.

(b) Deliveries of pure metal columbium and tantalum in any amount.

(c) Deliveries of columbium- and tantalum-bearing scrap or columbium- and tantalum-bearing ores and concentrates: *Provided,* That the use of such columbium and tantalum ores and concentrates shall be subject to sections 2 and 3 of this schedule when used as a source of columbium and tantalum in commercial melting, manufacture, or processing.

SEC. 5. *Use of substitutes.* No columbium- or columbium-tantalum-bearing steel shall be used or incorporated in any product or material where a noncolumbium- or noncolumbium-tantalum-bearing steel will meet the requirements for the use to be made of the product or material. No columbium-bearing steel shall be used or incorporated in any product or material if columbium-tantalum-bearing steel will meet the requirements for the use to be made of the product or material.

SEC. 6. *Authorized controlled material orders required.* (a) Except as may be otherwise directed by NPA, columbium- or columbium-tantalum-bearing steels shall be produced, sold, delivered, or purchased only pursuant to authorized controlled material orders placed by the Department of Defense, the Atomic Energy Commission, or manufacturers of Class A and/or Class B products which are to be made, in whole or in part, of columbium- or columbium-tantalum-bearing steels, and required by Department of Defense or Atomic Energy Commission programs.

(b) Authorized controlled material orders for columbium- or columbium-tantalum-bearing steels in support of the Aircraft Program of the Department of Defense shall be valid for deliveries only when supported by a certification that delivery of the quantity specified as and when ordered has been approved and authorized by the Aircraft Production Resources Agency. Such certification shall be as follows:

Certified as approved by APRA

Such certification shall constitute a representation by the purchaser to the supplier and to NPA that the purchaser has been duly authorized by the Aircraft Production Resources Agency to accept delivery of such steel, and is entitled to accept such delivery as permitted in this schedule. The certification required by this section shall be in addition to the certification required by CMP Regulation No. 1. This limitation shall not apply to those items of finished steel mill products which cannot be converted into other steel mill products and which were physically held in inventory prior to September 30, 1951.

SEC. 7. *Restrictions.* Subject to the exceptions of section 8 of this schedule, no person, in the production of any columbium- or columbium-tantalum-bearing steels, shall use more columbium or columbium-tantalum than is reasonably required to assure a ratio between columbium or columbium-tantalum and carbon in such steels greater than 8 to 1 as a minimum: *Provided, however,* That in cases where the material specifications require corrosion testing of sensitised specimens, no person shall use more columbium or columbium-tantalum in such steel products than is reasonably required to assure that such steels meet the specific requirements with respect to corrosion testing: *And provided further,* That when practical melting schedules appropriate to achieve maximum production necessitate the inclusion in single heat lots of steels requiring corrosion testing with steels not requiring such testing, such amount of columbium or columbium-tantalum may be used as will assure steels which will meet the highest corrosion testing requirements of any such steels included in any such single heat lot.

SEC. 8. *Exceptions.* (a) This schedule shall not prohibit the completion of the production and the delivery of materials or products containing columbium or tantalum in any form ordered and accepted prior to April 6, 1951, which, by reason of the condition or nature of the materials or products, cannot, without excessive loss of yield, be used in con-

without an allotment. It also permits persons to import Class A products with-

and materials other than controlled materials required for the additional pro-

[F. R. Doc. 52-9388; Filed, Aug. 22, 1952; 10:03 a. m.]

orders required. (a) Except as may be

excessive loss of yield, be used in con-

nection with authorized controlled material orders; nor shall it prohibit the use, in filling authorized controlled material orders, of columbium- or columbium-tantalum-bearing steel held on or before April 6, 1951, in the inventory of a producer or fabricator of steel products.

(b) The restrictions of sections 5, 6, and 7 of this schedule shall not apply to the production and use of (1) welding rods for welding extra low carbon (0.03 maximum) austenitic stainless steels, or austenitic stainless steels stabilized with columbium, tantalum, titanium, or nonferrous nickel-base alloys, or (2) columbium-bearing steels in the power-generating and chemical-process industries which operate continuously in the temperature range of 800–1,600 degrees Fahrenheit where other stabilized compositions are not suitable.

(c) Any authorized controlled material order for columbium- or columbium-tantalum-bearing steels, authorized by the Aircraft Production Resources Agency pursuant to section 6 of this schedule, is exempt from the restrictions of section 7 of this schedule to the extent required by the specifications contained in such APRA authorization.

(d) Commencing August 25, 1952, the restrictions of sections 5 and 6 of this schedule shall not apply to the sale and the use of Type 347 stainless steel in the finished forms of structural shapes, plate, sheet, tube, strip, wire, or bar, if the particular item of such Type 347 steel to be sold or used, has, on the date of the sale or use, been in the inventory of a steel producer or a steel distributor for a period of 6 months or more: *Provided*, That such item of Type 347 stainless steel may be sold only pursuant to an authorized controlled material order: *And provided further*, That the use of any such item of steel shall be subject to the restrictions of Schedule A to NPA Order M–80.

SEC. 9. *Conservation of scrap.* No person shall dispose of or accept any scrap containing commercially recoverable columbium and tantalum which is fit for remelting, except for use in the melting or processing of products in which columbium and tantalum is required.

SEC. 10. *Communications.* All communications concerning this schedule shall be addressed to the National Production Authority, Washington 25, D. C., Ref: M–80, Schedule 5.

This schedule as amended shall take effect August 25, 1952.

NATIONAL PRODUCTION AUTHORITY,
By GEORGE W. AUXIER,
Executive Secretary.

[F. R. Doc. 52-9459; Filed, Aug. 25, 1952; 11:31 a. m.]

Chapter IX—Petroleum Administration for Defense, Department of the Interior

[PAD Order No. 2 as Amended August 22, 1952]

LIMITATION ON THE USE OF NATURAL GAS

This order is found necessary and appropriate to promote the national defense in that increased gas requirements for national defense and other purposes and scarcity of materials for the construction of pipelines and other gas facilities have impaired and threaten to impair the adequacy of gas deliveries to defense industries and for essential civilian uses. In the formulation of this order as amended, there has been consultation with industry representatives, including trade association representatives and representatives of public utility regulatory bodies, and consideration has been given to their recommendations.

This amendment affects PAD Order No. 2 by amending sections 3 (b) (1) and (9), 5 (a), 5 (a) (1), (2), and (3), 6 (d), and by omitting section 5 (c) and deleting part of the State of Michigan from Schedule A. As amended, PAD Order No. 2 reads as follows:

Sec.
1. What this order does.
2. Definitions.
3. Limitations on deliveries of natural gas.
4. Changes in areas to which limitations are applicable.
5. Applications.
6. Records and reports.
7. Communications.
8. Defense against claims for damages.
9. Violations.

AUTHORITY: Sections 1 to 9 issued under section 704, 64 Stat. 816, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2154. Interpret or apply sec. 101, 64 Stat. 799, Pub. Law 429, 82d Cong.; 50 U. S. C. App. Sup. 2071; sec. 101, E. O. 10161, September 9, 1950, 15 F. R. 6105, Apr. 21, 1951, 16 F. R. 3503, Feb. 6, 1952, 17 F. R. 1171, and June 9, 1952, 17 F. R. 5269; 3 CFR 1950, 1951 Supp.; sec. 2, E. O. 10200, Jan. 3, 1951, 16 F. R. 61, July 16, 1952, 17 F. R. 6425; 3 CFR 1951 Supp.

SECTION 1. *What this order does.* In order to prevent shortages of gas needed for defense production and essential civilian uses, this order restricts expansion of natural gas markets by imposing limitations on the delivery of natural gas for space heating and large volume use.

SEC. 2. *Definitions.* As used in this order:

(a) "Person" means any individual, corporation, partnership, association, or any other organized group of persons, or legal successor or representative of the foregoing, and includes the United States or any agency thereof, or any other Government, or any of its political subdivisions, or any agency of any of the foregoing.

(b) "Natural gas" means either natural gas unmixed, or an mixture of natural and any other gas which mixture has a heat value in excess of 600 b. t. u. per cubic foot measured in accordance with the usual standards used by the natural gas seller.

(c) "Natural gas seller" means any person (including a pipeline company) selling natural gas in any of the forty-eight States or the District of Columbia for consumption by the purchaser.

(d) "Affiliate"—Two persons shall be considered "affiliates" if one owns, controls or holds with power to vote in excess of 50 percent of the voting stock of the other, or if more than 50 percent of the voting stock of each is owned, controlled, or held with power to vote by the same person.

(e) "Standby facilities" means equipment in serviceable operating condition designed to use oil, electricity, coal or other fuel to replace natural gas.

(f) "Central space heating equipment" means one or more pieces of equipment used for the purpose of raising atmospheric temperature in any structure and intended, because of its or their size, type, or location or number to heat more than one room, or to heat a room having more than 400 square feet of floor space.

(g) "Large volume consumer" means a person whose consumption of natural gas purchased from a natural gas seller is expected to equal or exceed 500 therms on any day.

(h) "State commission" means the regulatory body of the State, or the District of Columbia, having jurisdiction over gas public utility operations in the State, or the District of Columbia, respectively, or, in the absence of such a body, any public regulatory body of a political subdivision of the State having regulatory jurisdiction over gas public utility operations within such political subdivision.

(i) "Community" means one or more contiguous and adjoining urban areas served by a single natural gas seller by means of a single local distribution system.

SEC. 3. *Limitation on deliveries of natural gas.* The limitations provided in this section are subject to the provisions of section 704 of the Defense Production Act of 1950, as amended. Certifications pursuant to that section shall be filed with the Petroleum Administration for Defense, Department of the Interior, Washington 25, D. C. Upon receipt of such certification, the Petroleum Administration for Defense will notify each natural gas seller in the jurisdiction to which the certification applies, and will publish notice of such certification in the FEDERAL REGISTER. The limitations of this section shall cease to apply to deliveries by any natural gas seller in a jurisdiction for which a certification has been filed upon receipt by such seller of notification by the Petroleum Administration for Defense of the filing or on the date of the first publication of the certification in the FEDERAL REGISTER, whichever is the earlier.

(a) No natural gas seller shall deliver natural gas to a large volume consumer for the operation of any gas-fired equipment in an area listed in Schedule A, and no large volume consumer shall accept such delivery, unless:

(1) Such equipment was installed prior to August 22, 1951, or

(2) The natural gas seller had agreed in writing prior to August 22, 1951, to make the delivery of natural gas, if to a new customer, or to increase its deliv-

ery of natural gas, if to an existing customer, for the operation of such equipment, or

(3) The equipment replaces other gas-fired equipment, using within 5 percent of the same volume of gas, or

(4) Such delivery of natural gas is fully interruptible at the request of the natural gas seller and neither the natural gas seller nor any interconnected affiliate thereof nor any natural gas supplier of such seller operates underground storage, or

(5) Such delivery of natural gas is to be used for lease operations or well drilling, or

(6) The natural gas seller has facilities for manufacturing gas in sufficient volume and of a heat content adequate to meet, on a sustained basis, all of its requirements for gas, and certifies in writing to the Petroleum Administration for Defense that such facilities are in operating condition and that such seller has adequate supplies to operate, and will operate, such facilities continuously if so requested by the Petroleum Administration for Defense, or

(7) Such delivery has been approved by the Petroleum Administration for Defense.

(b) No natural gas seller shall deliver natural gas in an area listed in Schedule A for the operation of central space heating equipment installed subsequent to August 22, 1951, and no person shall accept such delivery, unless

(1) The total number of such deliveries commenced by the natural gas seller in any community during each twelve-month period following August 22, 1951, does not exceed 1 percent of the natural gas seller's gas customers on August 22, 1951, in that community and such deliveries are commenced in such order as may be approved by the appropriate State commission, (any exemption or modification of the limitations imposed by this order heretofore or hereafter granted under section 5 (a) authorizing deliveries to addtional customers, unless otherwise stated, shall be in lieu of the 1 percent permitted herein), or

(2) The equipment replaces other central space heating equipment, using within 5 percent of the same volume of gas, or

(3) The central space heating equipment, if in a new structure, was specified in a written construction contract for the structure and work on the foundation under the new structure was commenced prior to August 22, 1951, or

(4) In the case of a conversion from another fuel to gas, work on such conversion was commenced prior to August 22, 1951, or

(5) The natural gas seller had entered into a written agreement prior to August 22, 1951, to deliver natural gas for the operation of the central space heating equipment during the 1951-52 heating season, or

(6) Such delivery of natural gas is part of the consideration for the granting of a right-of-way, or

(7) The natural gas seller has facilities for manufacturing gas in sufficient volume and of heat content adequate to meet, on a sustained basis, all of its requirements for gas, and certifies in writing to the Petroleum Administration for Defense that such facilities, are in operating condition and that such seller has adequate supplies to operate, and will operate, such facilities continuously if so requested by the Petroleum Administration for Defense, or

(8) The central space heating equipment was completely installed or converted to the use of gas during the twenty-four month period following the date of commencement of natural gas service in any community which previously had not had any gas distribution service or which had had distribution service of other than natural gas to fewer than 5,000 customers at the time of the commencement of natural gas service in that community, or

(9) The central space heating equipment was completely installed or converted to the use of gas following the date of commencement of natural gas service in a community which had previously had distribution service of other than natural gas to 5,000 or more customers and which date of commencement of natural gas service shall not have been earlier than July 1, 1950, provided that central space heating customers shall not be added at an annual rate in excess of 5 percent or in a total number in excess of 10 percent of the number of gas customers served in such community by the natural gas seller, or its predecessor, at the time of commencement of natural gas service.

(Each separate apartment or other similar residential unit and each separately operated commercial or industrial enterprise, in a multiple-unit building or development which building or development is served through a single meter, shall be considered as a separate "delivery" or "customer" in applying subparagraphs (1) and (9) of this paragraph.)

(c) No natural gas seller shall deliver natural gas, in an area listed in Schedule A, for the operation of central space heating equipment or to a large volume consumer for the operation of any gas-fired equipment, and no person shall accept such delivery, if the delivery or acceptance is prohibited by a State or local limitation on the delivery or the use of gas.

SEC. 4. *Changes in areas to which limitations are applicable.* From time to time as conditions warrant, Schedule A will be revised by the addition of new areas or the elimination of already listed areas. Any natural gas seller, any person from whom a natural gas seller purchases its natural gas supplies and any State commission may request the Petroleum Administration for Defense to add new areas to Schedule A.

SEC. 5. *Applications.* (a) Application may be made by a natural gas seller, operating in an area to which section 3 of this order is applicable, in writing to the Petroleum Administration for Defense, Department of the Interior, Washington 25, D. C., Ref: PAD Order No. 2, for an exemption from or for a modification of all or a part of the limitations imposed by this order for a specified period. Such applications shall include:

(1) A statement of the precise exemption or modification desired, including the period of time for which it is desired;

(2) A statement of the gas sales during the twelve months, ending not more than 60 days preceding the date of the application, made from the applicant's system or that portion thereof for which exemption or modification is requested;

(3) A statement of estimated gas requirements for the period of twenty-four months following the date of the application;

(The data furnished under subparagraphs (2) and (3) of this paragraph should show peak day, monthly and annual figures, broken down between firm and interruptible service and by classes of customers, and also should show the number of new space heating customers proposed to be served.)

(4) A statement of the supply of gas, by sources, available to meet such requirements;

(5) A statement from applicant's natural gas supplier, if such supplier is a pipe line company, showing the natural gas available from the supplier to meet applicant's requirements;

(6) Any other information which in applicant's opinion will support the application;

(7) A recommendation or recommendations, in respect to the application, by the State commission or State commissions in whose geographic jurisdiction the exemption or modification will apply, together with a statement of the facts supporting such recommendation or recommendations.

(The recommendation and statement of supporting facts must be subscribed by an appropriate officer of the State commission. If the recommendation and statement of supporting facts of a State commission cannot be obtained, such fact shall be stated, together with the reasons therefor.)

(b) Application, pursuant to section 3 (a) (7), may be made by a natural gas seller, operating in an area to which section 3 of this order is applicable, in writing to the Petroleum Administration for Defense, Department of the Interior, Washington 25, D. C., Ref: PAD Order No. 2, for approval of delivery of natural gas to a large volume consumer. Such application shall state:

(1) The name, address and business of the large volume consumer;

(2) Whether it is feasible to use another fuel, and, if not, the reasons therefor;

(3) The daily, monthly and annual volume of gas proposed to be delivered;

(4) The facts showing applicant's ability to deliver such volumes, the effect thereof upon applicant's other customers and applicant's underground storage operations;

(5) The manufacturing or other process or operation in which the gas will be used, including the product or products of such process or operation;

(6) The type of equipment in which the gas will be used;

(7) Why standby facilities cannot be used to an extent which will permit the service to be fully interruptible;

(8) Whether the proposed delivery of natural gas requires authorization by a State commission or by the Federal Power Commission. If such authorization is required, a copy of the order or orders, by which it is granted, should be attached;

(9) All other information which in applicant's opinion justifies the delivery in the interest of national defense.

SEC. 6. *Records and reports.* (a) Each natural gas seller covered by this order shall retain in his possession for at least two years records in sufficient detail to permit an audit to determine that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be maintained in the form of microfilm or other photographic copies instead of the originals.

(b) All records required by this order shall be made available, at the usual place of business where maintained, for inspection and audit by duly authorized representatives of the Petroleum Administration for Defense.

(c) Natural gas sellers subject to this order shall keep such records and submit such reports to the Petroleum Administration for Defense as it shall require in addition to those required herein, subject to the terms of the Federal Reports Act of 1942 (56 Stat. 1078, 5 U. S. C. 139–139f).

(d) Each natural gas seller operating in an area listed in Schedule B, who is hereafter specifically notified to file a report, shall make a comprehensive report to the Petroleum Administration for Defense on such date or dates as may be specified by the Petroleum Administration for Defense, in such form and in such detail as may be prescribed, showing its peak day and annual market requirements by classes of customers for the twelve months following the date of the report, and its ability to supply such requirements.

SEC. 7. *Communications.* All communications concerning this order shall be addressed to the Petroleum Administration for Defense, Department of the Interior, Washington 25, D. C., Ref: PAD Order No. 2.

SEC. 8. *Defense against claims for damages.* No person shall be held liable for damages or penalties for any default under contract or order which shall result directly or indirectly from compliance with this order of the Petroleum Administration for Defense, or any direction, directive, or other instruction issued pursuant thereto, notwithstanding that such order, direction, directive or instruction shall thereafter be declared by judicial or other competent authority invalid.

SEC. 9. *Violations.* Any person who wilfully violates any provision of this order, or who wilfully conceals a material fact or furnishes false information in the course of operation under this order, is guilty of a crime and upon conviction may be punished by fine or imprisonment, or both.

This amended order shall take effect on August 22, 1952.

OSCAR L. CHAPMAN,
Secretary of the Interior and
Petroleum Administrator for Defense.

SCHEDULE A

Areas subject to limitations contained in PAD Order No. 2:
Connecticut.
Delaware.
District of Columbia.
Kentucky[1] (only those portions served with gas supplied by a subsidiary of The Columbia Gas System, Inc., or by Louisville Gas & Electric Co.).
Maryland.[1]
Massachusetts.
Michigan (only those portions served with gas supplied in whole or in part by Michigan-Wisconsin Pipe Line Company).
New Hampshire.[1]
New Jersey.
New York.
Ohio.[1]
Pennsylvania.[1]
Rhode Island.
Virginia.[1]
West Virginia[1] (only those portions served with gas supplied by a subsidiary of The Columbia Gas System, Inc.).
Wisconsin.[1]

SCHEDULE B

Alabama.	Nebraska.
Connecticut.	New Hampshire.
Delaware.	New Jersey.
District of Columbia.	New York.
Florida.	North Carolina.
Georgia.	Ohio.
Illinois.	Pennsylvania.
Indiana.	Rhode Island.
Iowa.	South Carolina.
Kentucky.	South Dakota.
Maryland	Tennessee.
Massachusetts.	Virginia.
Michigan.	West Virginia.
Minnesota.	Wisconsin.
Missouri.

Chapter XVII—Housing and Home Finance Agency

[Appendix to CR 3, Amdt. 2]

CR 3—RELAXATION OF RESIDENTIAL CREDIT CONTROLS: REGULATION GOVERNING PROCESSING AND APPROVAL OF EXCEPTIONS AND TERMS FOR CRITICAL DEFENSE HOUSING AREAS

MISCELLANEOUS AMENDMENTS

1. This Amendment 2 amends the Appendix to CR 3 published in the FEDERAL REGISTER July 18, 1952 (17 F. R. 6585), and last amended by Amendment 1 published July 26, 1952 (17 F. R. 6856), by adding the following additional critical defense housing areas to the areas already designated under CR 3:

Area, Including Geographical Description and Date Designated

190. Battle Creek, Michigan, Area. (The City of Battle Creek and the Townships of Bedford, Battle Creek, Emmett and Pennfield in Calhoun County, the Fort Custer Military Reservation, also the City of Galesburg and the Townships of Charleston and Ross in Kalamazoo County; all in Michigan), August 26, 1952.

191. Colville, Washington, Area. (Census Division 3 and the portions of Census Divisions 1 and 2 lying east of the Columbia River, including the City of Colville, all in Stevens County, Washington), August 26, 1952.

192. Klamath, California, Area. (Klamath Judicial Township including Klamath and Klamath Glen, in Del Norte County, California), August 26, 1952.

193. Elizabeth City, North Carolina, Area. (Pasquotank County, including Elizabeth City town, North Carolina), August 26, 1952.

194. Great Lakes-North Chicago-Waukegan, Illinois, Area. (All of Lake County, Illinois), August 26, 1952.

2. The Appendix to CR 3 is further amended by changing the description of critical defense housing areas previously published and numbered 11, 90, 117, 178, 182, and 186, respectively, to read as follows:

11. Norfolk-Portsmouth, Virginia, Area. (Norfolk and Princess Anne Counties; the independent cities of Norfolk, South Norfolk, and Portsmouth; and that portion of Nansemond County lying north of U. S. Highway Number 17 and east of the Nansemond River; all in Virginia.)

90. Bridgeport, Connecticut, Area. (The Towns of Bridgeport, Easton, Fairfield, Monroe, Shelton, Stratford and Trumbull in Fairfield County; and the Town of Milford in New Haven County, all in Connecticut.)

117. Kinston, North Carolina, Area. (All of Lenoir County and the town of Grifton in Pitt County, North Carolina.)

178. Portsmouth, New Hampshire-Kittery, Maine, Area. (All of Strafford County, except the towns of Middleton and New Durham; the City of Portsmouth and the Towns of Atkinson, Brentwood, Danville, Deerfield, East Kingston, Epping, Exeter, Fremont, Greenland, Hampstead, Hampton, Hampton Falls, Kensington, Kingston, New Castle, Newfields, Newington, Newmarket, Newton, North Hampton, Northwood, Nottingham, Plaistow, Raymond, Rye, Sandown, Seabrook, South Hampton and Stratham in Rockingham County, in the State of New Hampshire; and the Towns of Berwick, Eliot, Kittery, North Berwick, South Berwick and York, in York County, Maine.)

182. Roseburg, Oregon, Area. (The Precincts of Brown, Civil Bend, Edenbower East 1 and 2, Edenbower West 1 and 2, Garden Valley, Green, Mill, Parrott and Wilbur, including the City of Roseburg, all in Douglas County, Oregon.)

186. Corning-Painted Post, New York, Area. (The Towns of Thurston, Campbell, Hornby, Rathbone, Addison, Erwin, Corning, Woodhull, Tuscarora, Lindley and Caton, the city of Corning and the villages of Painted Post, Woodhull, Addison, Riverside and South Corning, all in Steuben County, New York and the town of Catlin in Chemung County, New York.)

RAYMOND M. FOLEY,
Housing and Home Finance Administrator.

[F. R. Doc. 52-9354; Filed, Aug. 25, 1952; 8:47 a. m.]

[1] This state has certified as permitted by Section 704 of the Defense Production Act of 1950, as amended, and therefore is not subject to the limitations provided in section 3 of this order.

PROPOSED RULE MAKING

DEPARTMENT OF THE TREASURY

Bureau of Internal Revenue

[26 CFR Part 40]

EXCESS PROFITS TAX; TAXABLE YEARS ENDING AFTER JUNE 30, 1950

MINERAL PROPERTIES; DETERMINING NONTAXABLE INCOME FROM EXEMPT EXCESS OUTPUT

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in duplicate to the Commissioner of Internal Revenue, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in sections 62 and 3791 of the Internal Revenue Code (53 Stat. 32, 467; 26 U. S. C. 62, 3791).

[SEAL] JOHN B. DUNLAP,
Commissioner of Internal Revenue.

In order to clarify the extent to which separate mineral properties may be aggregated pursuant to the election provided in section 453 (a) (10) of the Internal Revenue Code for the purpose of determining nontaxable income from exempt excess output, in order to clarify regulations relating to section 453 (b) (2) and (4) of the Code, and in order to reflect the addition of certain minerals to those listed in section 453 (a) (13), (b) (2), and (b) (4) of the Code by the Revenue Act of 1951, approved October 20, 1951, Regulations 130 [26 CFR Part 40] are amended as follows:

PARAGRAPH 1. There is inserted immediately preceding § 40.453–1, the following:

SEC. 515. NONTAXABLE INCOME FROM CERTAIN MINING PROPERTIES (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

Section 453 (relating to nontaxable income from exempt excess output) is hereby amended as follows:

(a) By amending the first sentence of subsection (a) (13) thereof to read as follows: "The term 'unit net income' means the amount ascertained by dividing the net income (computed with the allowance for depletion) from the coal, ore, sulphur, potash, metallurgical grade limestone, chemical grade limestone, or timber recovered from the mineral property, or timber block, as the case may be, during the taxable year by the number of units of such mineral or timber recovered from such property in such year."

(b) By inserting immediately after the words "coal mining property" in subsection (b) (2) thereof the following: ", or of a sulphur, potash, metallurgical grade limestone, or chemical grade limestone mineral property,".

(c) By striking out so much of subsection (b) (4) as precedes the second sentence and inserting in lieu thereof the following:

(4) *Certain properties not in operation during normal period.* For any taxable year, the nontaxable income from exempt excess output of a metal or coal mining property, of a sulphur, potash, metallurgical grade limestone, or chemical grade limestone mineral property, of a timber block, or of a natural gas property, which was not in operation during the normal period, shall be an amount equal to one-third of the net income for such taxable year (computed with the allowance for depletion) from such property or timber block, as the case may be.

SEC. 523. EFFECTIVE DATE OF TITLE V (TITLE V, REVENUE ACT OF 1951, APPROVED OCTOBER 20, 1951).

* * * the amendments made by this title (including section 515) shall be applicable only with respect to taxable years ending after June 30, 1950.

PAR. 2. Section 40.453–2 (g) is amended to read as follows:

(g) *Alternative computation of exempt excess output for more than one mineral property.* (1) Section 453 (a) (10) provides that where more than one mineral property (as defined in paragraph (f) of this section) is owned or operated by a producer or lessor (as defined in paragraph (a) (1) and (2) of this section), such producer or lessor may elect to treat the mineral properties as one property for the purpose of applying section 453 (b) (1). If the taxpayer elects under section 453 (a) (10), such properties shall be aggregated and treated as one property to the extent provided under the rules set forth in paragraph (m) (2) and (3) of this section. In the case of a taxpayer making the election under section 453 (a) (10), a coal or mineral property not in operation during the normal period (see section 453 (a) (4) and paragraph (d) of this section) shall be included with such properties which were in operation during the normal period to the extent such property which was not in operation during the normal period may be so included under the rules set forth in paragraph (m) (2) and (3) of this section.

(2) In the case of a taxpayer making the election under section 453 (a) (10), the net income from the coal or mineral property shall be computed in a manner similar to that described in paragraph (j) of this section with respect to a mineral property as if the properties aggregated under subparagraph (1) of this paragraph were a mineral property, except that the amount of depletion allowed in the computation of such net income shall be the sum of the amounts computed according to sections 23 (m) and 114, and the regulations thereunder.

(3) The election pursuant to section 453 (a) (10) shall be made in a statement attached to Schedule EP (Form 1120) accompanying the income tax return, filed on or before the last day required by law for the filing of such return, for the taxable year for which the election is being made. The last day required by law for filing of such return includes the last day of the period of any extension of time granted for such filing. Such election must be made for each taxable year for which the benefits of section 453 (a) (10) are claimed and such an election does not preclude the taxpayer from electing for a subsequent year to compute nontaxable income from exempt excess output by treating the mineral properties as separate properties under the rules set forth in paragraph (f) of this section. If the taxpayer has failed so to elect or desires to change its election, such election or change in election may, subject to the approval of the Commissioner, be made by the taxpayer filing with the Commissioner of Internal Revenue, Washington 25, D. C., within the period of limitations for the filing of claims for credit or refund with respect to the year or years involved, a notice of its election or change in election accompanied by a recomputation of its income and excess profits taxes for such years. If the recomputation results in an overpayment for any of such years, the taxpayer should file a claim for refund on Form 843 in accordance with the provisions of section 322.

PAR. 3. Section 40.453–2 (m) is amended as follows:

(A) By striking the word "ore" wherever appearing in subparagraph (1) of such section and by inserting in lieu thereof the following: "mineral".

(B) By adding the following new sentence at the end of subparagraph (2) of such section: "A coal property not in operation during the normal period (see section 453 (a) (4) and paragraph (d) of this section) shall be included with properties which were in operation during the normal period to the extent such properties which were not in operation during the normal period may be so included under the rules set forth in this section.

(C) By amending subparagraph (3) of such section to read as follows:

(3) For the purpose of section 453 (a) (13) and section 453 (b) (2), a mineral property shall include the aggregate of all tracts or parcels of land containing mineral deposits in which economic interests were owned, and from which minerals were extracted, by the taxpayer at any time after the beginning of the normal period (excluding, however, any tract or parcel of land in which an economic interest was acquired, and from which minerals were extracted, by any other person subsequent to the last date of ownership and operation by the taxpayer) to the extent that such tracts or parcels of land were operated by the taxpayer as an operation unit, regardless of whether the economic interest in one tract or parcel of land differed from that in another. The mineral property of a lessor is the tract or parcel of land containing mineral deposits in which an economic interest is owned by the lessor. It need not necessarily be coextensive with the mineral property in the case of the producer. A mineral

property not in operation during the normal period (see section 453 (a) (4) and paragraph (d) of this section) shall be included with properties which were in operation during the normal period to the extent such properties which were not in operation during the normal period may be so included under the rules set forth in this section.

(D) By amending subparagraph (4) of such section to read as follows:

(4) The net income (computed with the allowance for depletion) from the coal or the mineral recovered from the mining property during a taxable year for which the benefits of section 453 (b) (2) are claimed shall be the net income from the mining property from which such coal or mineral is recovered, computed in a manner similar to that described in paragraph (j) of this section with respect to a mineral property as if such mining property were a mineral property, except that the amount of depletion allowed in the computation of such net income shall be the sum of the amounts computed according to sections 23 (m) and 114, and the regulations thereunder.

(E) By striking the word "ore" wherever appearing in subparagraph (13) of such section and by inserting in lieu thereof the following: "mineral."

PAR. 4. Section 40.453–3 (b) is amended as follows:

(A) By striking the headnote of such paragraph which reads *Metal and coal mines* and inserting in lieu thereof *Mines in operation during normal period.*

(B) By inserting immediately after subparagraph (4) of such section the following new subparagraph (5):

(5) The computation of nontaxable income from exempt excess output in the case of those mineral properties, in addition to metal or coal mining properties, which are referred to in section 453 (b) (2) shall be made in a manner consistent with that set forth in subparagraph (1) through (4) of this paragraph.

PAR. 5. Section 40.453–4 is amended as follows:

(A) By striking the headnote of such section which reads *Mines, timber properties, and natural gas properties not in operation during normal period* and by inserting in lieu thereof the following: *Certain properties not in operation during normal period.*

(B) By inserting immediately after "coal mining property," wherever appearing in such section the following: "certain other mineral properties referred to in section 453 (b) (4),".

CIVIL AERONAUTICS BOARD

[14 CFR Part 41]

SPECIAL CIVIL AIR REGULATION; FLIGHT TIME LIMITATIONS FOR PILOTS NOT REGULARLY ASSIGNED TO ONE TYPE OF CREW

NOTICE OF PROPOSED RULE MAKING

Pursuant to authority delegated by the Civil Aeronautics Board to the Bureau of Safety Regulation, notice is hereby given that the Bureau will propose to the Board an extension of the authority granted by Special Civil Air Regulation SR–381 as hereinafter set forth.

Interested persons may participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Civil Aeronautics Board, attention Bureau of Safety Regulation, Washington 25, D. C. In order to insure their consideration by the Board before taking further action on the proposed rule, communications must be received by September 8, 1952. Copies of such communications will be available after September 10, 1952, for examination by interested persons at the Docket Section of the Board, Room 5412, Commerce Building, Washington, D. C.

Special Civil Air Regulation SR–381 which terminates September 30, 1952, provides authority whereby a pilot may serve in more than one type of flight crew without incurring any penalty in terms of maximum permissive flight duty. This authority has heretofore been provided for an experimental period with a view to the establishment of permanent rules for such crew assignments.

The Civil Aeronautics Administration has informed the Bureau that the regulation is a desirable one and not subject to abuse. It therefore recommends that the authority granted by SR–381 be continued and that it be incorporated in Part 41. Certain scheduled air carriers have also asked that the authority be incorporated in Part 41. However, the Bureau considers, since a proposed major revision of Part 41 is expected to be published shortly, that it would be more advisable to extend the authority granted by SR–381 and incorporate the changes in the proposed revision of Part 41 when published.

This regulation will not allow evasion of the stricter limitations applicable to smaller crew combinations, but will allow assignment of a pilot in any given month to another type of crew combination without additional flight time limitation if he flies not more than 20 hours in the type of crew to which the more restrictive flight time limitations apply and if such assignment is not interrupted more than once during such month.

Accordingly it is proposed to extend for 1 year the authority granted by Special Civil Air Regulation SR–381 to read as follows:

1. Contrary provisions of § 41.57 of the Civil Air Regulations notwithstanding, the following rules shall apply to the monthly and quarterly flight time limitations of pilots assigned in combinations of two-pilot crews, two-pilot and additional flight crew member crews, or three-pilot and additional flight crew member crews.

2. A pilot who is assigned to duty aloft for more than 20 hours in two-pilot crews in a given month, or whose assignment in such crews is interrupted more than once in the month by assignment to a crew consisting of two or more pilots and an additional flight crew member, shall be governed by the provisions of § 41.54.

3. Except for a pilot coming within the provisions of paragraph 2, a pilot who is assigned to duty aloft for more than 20 hours in two-pilot and additional flight crew member crews in a given month, or whose assignment in such crews is interrupted more than once in the month by assignment to a crew consisting of three pilots and an additional flight crew member, shall be governed by the provisions of § 41.55.

4. A pilot to whom the provisions of paragraphs 2 and 3 are not applicable, assigned to duty aloft for a total of 20 hours or less within a given month in two-pilot crews with or without additional flight crew members, shall be governed by the provisions of § 41.56.

5. A pilot assigned to each of two-pilot, two-pilot and additional flight crew member, and three-pilot and additional flight crew member crews in a given month, who is not governed by the provisions of paragraphs 2, 3, or 4, shall be governed by the provisions of § 41.55.

This regulation shall terminate one year from its effective date unless sooner superseded or rescinded by the Board.

This regulation is proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended. The proposal may be changed in the light of comments received in response to this notice of proposed rule making.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601–610, 52 Stat. 1007–1012; 49 U. S. C. 551–560)

Dated: August 8, 1952, at Washington, D. C.

By the Bureau of Safety Regulation.

[SEAL] JOHN M. CHAMBERLAIN, *Director.*

Lots 60–B and 61–D.

The above area aggregates 15,826.03 acres.

ALFRED R. GOLZE,
Acting Assistant Commissioner.

I concur. The records of the Bureau of Land Management will be noted.

Lot 40, T. 53 N., R. 95 W., and lots 60 and 61, T. 51 N., R. 103 W., are patented lands.

The lands are chiefly valuable for grazing.

No applications for these lands may be allowed under the homestead, small tract, desert land, or any other non-mineral public land laws, unless the lands have already been classified as valuable or suitable for such type of application, or shall be so classified upon consideration of an application.

This order shall not otherwise become effective to change the status of such lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, and selection as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the public lands affected by this order shall be subject only to (1) application under the homestead or the desert-land laws or the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944, 58 Stat. 747 (43 U. S. C. 279–284), as amended, subject to the requirements of applicable law, and (2) application under any applicable public-land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph. All applications filed under this paragraph either at or before 10:00 a. m. on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this order, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this order, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

Applications for these lands, which shall be filed in the Land and Survey Office, Cheyenne, Wyoming, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations and Part 296 of that title, to the extent that such regulations are applicable. Applications under the homestead laws shall be governed by the regulations contained in Parts 166 to 170, inclusive, of Title 43 of the Code of Federal Regulations, and applications under the desert-land laws and the said Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Parts 232 and 257, respectively, of that title.

Inquiries concerning these lands shall be addressed to the Manager, Land and Survey Office, Cheyenne, Wyoming.

WILLIAM ZIMMERMAN, Jr.,
Associate Director,
Bureau of Land Management.

AUGUST 20, 1952.

DEPARTMENT OF DEFENSE

Department of the Navy

CHIEF, BUREAU OF SUPPLIES AND ACCOUNTS

DELEGATION OF AUTHORITY TO ELIMINATE EXCESSIVE PROFITS UNDER RENEGOTIATION ACT OF 1948

Pursuant to and in accordance with the "Delegation of Authority to Eliminate Profits under the Renegotiation Act of 1948", dated January 20, 1952, from the Secretary of Defense to the Secretaries of the Army, the Navy and the Air Force, 17 F. R. 1065, there is hereby delegated to the Chief of the Bureau of Supplies and Accounts the responsibility for the elimination of any excessive profits determined by agreement or order pursuant to the Renegotiation Act of 1948. Without limiting the generality of the foregoing, the Chief of the Bureau of Supplies and Accounts is particularly directed to take the following action:

(a) Receive and collect all payments, reports, financial data and other items, as provided in any such agreement or order, and transmit all payments received by him to the Treasurer of the United States to be covered into the Treasury as miscellaneous receipts;

(b) When necessary in order to eliminate any such excessive profits, either (i) effect the withholding from amounts otherwise due to a contractor of any amount of such excessive profits of such contractor, or (ii) direct a contractor to withhold for the account of the United States, from amounts otherwise due to a subcontractor, any amount of such excessive profits of such subcontractor;

(c) Keep appropriate records with respect to the performance of the terms and provisions of all renegotiation agree-

ments and with respect to the discharge of liability of contractors and subcontractors under orders determining excessive profits made or entered pursuant hereto; and

(d) Advise the Secretary of the Navy as to any unremedied defaults under any such renegotiation agreements or orders, and recommend appropriate action with respect thereto.

The Chief of the Bureau of Supplies and Accounts is hereby authorized to redelegate in whole or in part the authority delegated in the first paragraph hereof.

This notice is effective as of the 20th day of January 1952.

H. R. ASKINS,
Assistant Secretary of the Navy.

AUGUST 14, 1952.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

ORGANIZATION

Effective July 1, 1952, the organization of the Rural Electrification Administration shall be as follows:

Central organization. The principal office of the Rural Electrification Administration is at Washington, D. C. The function of the Agency is the carrying out of a program of rural electrification and rural telephony, as provided for by the Rural Electrification Act of 1936, as amended (7 U. S. C. 901–915).

The Administrator. The Administrator is appointed by the President with the advice and consent of the Senate, for a term of ten years. He functions as the chief administrative official of the Agency under the general supervision and direction of the Secretary of Agriculture. He is aided directly by a Deputy Administrator and an Assistant Administrator. The work is carried on through the Area Offices, Divisions, and the Staff described in succeeding paragraphs.

Electric Distribution Area Offices. Executes all REA programs for electric distribution borrowers and refrigeration locker plant borrowers. Five area offices have been established as follows: Northeast, Southeast, North Central, Western and Southwest. Each of the Area Offices advises and assists loan applicants in system development and in the preparation of applications; receives, evaluates and processes all loan applications; makes recommendations to the Administrator on loans; advises and assists borrowers in the design and construction of their systems; reviews proposed or completed construction for approval on behalf of the Administrator; advises and assists borrowers in the operation of their systems including activities such as accounting, organization and operating procedures, financial performance, technical operations and maintenance, taxes, insurance, and the effective use of electric power.

Telephone Loans Division. Executes all REA programs for telephone borrowers in connection with: Loan applications; organization and system development; business and operating management, including general management, organization, operating procedures, accounting, financial performance, taxes, and insurance. Receives, processes, and evaluates loan applications and prepares recommendations regarding allocations and loans to the Administrator.

Telephone Engineering Division. Executes all REA programs for telephone borrowers in connection with: The design; construction; and technical operations and maintenance of rural telephone systems and related facilities. Reviews proposed and completed construction for approval on behalf of the Administrator.

Power Division. Executes REA programs for power-type borrowers. Advises and assists such loan applicants in system development and in the preparation of applications; receives, evaluates, and processes all loan applications; makes recommendations to the Administrator on loans; advises and assists borrowers in the operation of their systems including activities such as accounting, organization, operating procedures, financial performance, technical operations and maintenance, taxes, insurance, and the effective use of electric power. Provides staff service to the Administrator and the Electric Distribution Area Offices on matters of wholesale power supply, wholesale power rates, and the design, construction, and operation of generating facilities of electric distribution-type borrowers.

Operations Division. Provides staff service to the REA organization relating to: System operations (other than technical) of electric distribution and telephone borrowers; electric and telephone loans, including area coverage and acquisitions; telephone rates; electric retail rates; performance standards and methods; insurance; locker plants; power use; cooperative organization and member education; and labor relations.

Engineering Division. Provides staff services to the REA organization relating to: Design, construction, technical operation and maintenance of physical plant (excluding transmission facilities of power-type borrowers and all generating facilities) of electric borrowers and of telephone borrowers; system engineering studies; consulting engineering services; controlled materials; architectural engineering services; safety and job training; and radio and communication facilities.

Technical Standards Division. Provides staff services relating to development, improvement, and standardization of materials, equipment, and facilities for the electric and telephone programs; and the solution of complex technical problems, such as sectionalizing, brush control, voltage regulations, etc., affecting groups of borrowers.

Division of Controller. Conducts REA accounting activities; the design and installation of accounting systems for borrowers; technical advice and assistance to line and staff divisions on accounting matters; and the examination of borrowers' records and REA activities.

Information Services Division. Prepares and disseminates information designed to acquaint borrowers and the public with the status and progress of the rural electrification and rural telephone programs; and provides technical assistance to other staff divisions and to line divisions in the preparation of written and audio-visual materials as required in the execution of their programs.

Personnel Division. Conducts the personnel program of REA including classification and organization matters; employment, employee relations and counseling; training; health and general welfare.

Administrative Services Division. Provides an administrative services program for REA including procurement; property accountability; space management; communications and records management; mapping services; and the maintenance of records required for the administration of the Agency's production control system.

Issued this 14th day of August 1952.

[SEAL] CLAUDE R. WICKARD,
Administrator.

VARIOUS OFFICIALS

DELEGATIONS OF AUTHORITY

Effective July 1, 1952, the following delegations of authority have been authorized:

A. Authority has been delegated to the Deputy Administrator to exercise, in the absence of the Administrator, as Acting Administrator, any of the powers of the Administrator.

B. Authority has been delegated to the Assistant Administrator to exercise, in the absence of the Administrator and Deputy Administrator, as Acting Administrator, any of the powers of the Administrator.

C. Authority has been delegated to the Deputy Administrator and Assistant Administrator:

(1) To approve, "for Claude R. Wickard, Administrator," contracts, agreements, and amendments thereto between REA borrowers and parties other than REA.

(2) To authorize transfers of funds in loan budgets where purpose of loan or allocation is changed.

(3) To place or release "stop orders."

(4) To approve transfers and sales of property, material, and equipment between borrowers and parties other than the United States.

(5) To authorize the purchase of supplies, equipment and services for REA.

(6) To approve the selection of managers for borrowers' systems.

(7) To approve depositories for borrowers funds.

(8) To approve the selection of engineers by borrowers.

(9) To approve the selection of architects by borrowers.

(10) To approve the selection by borrowers of their attorneys.

(11) To approve the selection of certified public accountants by borrowers.

(12) To approve borrowers' proposals for radio and carrier current facilities.

(13) To release liens on borrowers' motor vehicles.

(14) To approve force account construction by borrowers.

(15) To approve final documents submitted by borrowers in connection with contract construction.

(16) To approve final payments by borrowers to contractors and engineers.

(17) To approve the use of general or equity funds by borrowers.

(18) To execute endorsements and assignments of collateral and cancellations or endorsements of fact of payment of borrowers indebtedness to the United States.

(19) To certify requisitions for loan funds and administrative vouchers.

(20) To approve removal and sale of portion of borrowers' system from land acquired by Federal, state or territorial government agencies.

D. Authority has been delegated to the Associate Solicitor for Rural Electrification or the Chief, Electrification Operations Division, Office of the Solicitor, or, in their respective absences, the persons officially acting for them:

(1) To execute certificates concerning a borrower's status.

(2) To execute certificates regarding a borrower's incorporation.

E. Authority has been delegated to the Associate Solicitor for Rural Electrification or the Chief, Electrification Loans Division, Office of the Solicitor, or in their respective absences, the persons officially acting for them:

(1) To make affidavits with respect to the recording and filing of mortgages and deeds of trust and renewals of the liens thereof.

F. Authority has been delegated to the Chief, Assistant Chief, and Section Heads, Telephone Loans Division (in addition to the Deputy Administrator and Assistant Administrator):

(1) To approve depositories for the funds of telephone borrowers.

(2) To approve sales of material or equipment by telephone borrowers.

(3) To approve the use of equity funds by telephone borrowers.

G. Authority has been delegated to the Chief, Telephone Engineering Division, or, in his absence, the person officially acting for him (in addition to the Deputy Administrator and Assistant Administrator):

(1) To approve, "for Claude R. Wickard, Administrator," the following contracts and amendments thereto between telephone borrowers and parties other than the United States:

(a) Engineering service contracts;

(b) Architectural service contracts;

(c) Central office equipment contracts;

(d) Construction contracts.

H. Authority has been delegated to the Chief and Assistant Chief, Telephone Engineering Division, or in their absence, the persons officially acting for them (in addition to the Deputy Administrator and Assistant Administrator):

(1) To approve, "for Claude R. Wickard, Administrator," the following contracts, agreements, and amendments thereto between telephone borrowers and parties other than the United States:

(a) Construction contract amendments involving less than $50,000.

(b) Materials contract amendments.

(c) Central office equipment contract amendments involving not more than $5,000.

(d) Highway and railroad crossing agreements.

(2) To approve final construction documents submitted by telephone borrowers.

(3) To approve final payments to contractors and engineers by telephone borrowers.

(4) To approve selection of engineers by telephone borrowers.

(5) To release liens on motor vehicles purchased by telephone borrowers.

(6) To approve force account construction by telephone borrowers.

I. Authority has been delegated to the Chief and Assistant Chiefs, Power Division, or in their absence, those persons officially acting for them (in addition to the Deputy Administrator and Assistant Administrator):

(1) To approve, "for Claude R. Wickard, Administrator," the following contracts and agreements and amendments thereto between power-type borrowers and parties other than the United States:

(a) Construction contracts;

(b) Engineering contracts;

(c) Architectural contracts;

(d) Material and equipment contracts;

(e) Agreements in respect of physical or electrical interference with power or communication facilities;

(f) Highway and railroad crossing agreements.

J. Authority has been delegated to the Chief, Assistant Chiefs, and Section Heads, Power Division (in addition to the Deputy Administrator and Assistant Administrator); to perform the following acts with respect to power-type borrowers:

(1) To approve borrowers sales and transfers of materials and equipment.

(2) To release liens on motor vehicles.

(3) To approve requisitions, work orders, expenditure reports, final documents, and final payments to contractors in connection with construction.

(4) To approve proposals for radio and carrier current facilities.

(5) To approve the use of general funds.

(6) To approve depositories for borrowers funds.

(7) To approve force account engineering and construction.

K. Authority has been delegated to the Controller and Assistant Controllers, Division of Controller, or in their absence to the persons officially acting for them (in addition to the Deputy Administrator and Assistant Administrator):

(1) To execute endorsements and assignments of collateral, and to cancel or endorse fact of payment on evidences of borrowers indebtedness to United States.

(2) To approve borrowers' selection of certified public accountants.

L. Authority has been delegated to the Controller, Assistant Controller in charge of accounts, Assistant to the Assistant Controller in charge of accounts, Head and Assistant Head, Voucher and Employee Accounts Section, and Supervisor, Audit Unit, Voucher and Employee Accounts Section, Division of Controller (in addition to the Deputy Administrator and Assistant Administrator):

(1) To certify requisitions for loan funds.

(2) To certify administrative vouchers.

M. Authority has been delegated to the Area Directors, Acting Area Directors and Assistant Area Directors, Electric Distribution Area Offices or in their absence to the persons officially acting for them (in addition to the Deputy Administrator and Assistant Administrator):

(1) To approve, "for Claude R. Wickard, Administrator," the following contracts, agreements, and amendments thereto between electric distribution borrowers and parties other than the United States:

(a) Engineering service contracts;

(b) Architectural service contracts;

(c) Construction contracts;

(d) Equipment and material contracts;

(e) Meter loop material and installation contracts;

(f) Agreements with respect to physical and electrical interference with power and communication lines;

(g) Highway and railroad crossing agreements;

(h) Retail rate contracts relating to large power installations.

(2) To approve force account construction.

(3) To approve final construction documents.

(4) To approve final payments to engineers and contractors.

(5) To approve depositories for borrowers funds.

(6) To approve the use of general funds by borrowers.

(7) To execute release of lien on borrowers motor vehicles.

(8) To approve borrowers' selection of engineer and architect.

(9) To approve borrowers' proposals for radio and carrier current facilities.

N. Authority has been delegated to the Chief, Administrative Services Division, or in his absence to the person officially acting for him (in addition to the Deputy Administrator and Assistant Administrator):

(1) To approve the procurement of equipment, materials, and services for REA.

These delegations supersede all prior delegations with reference to these matters.

Issued this 14th day of August 1952.

[SEAL] CLAUDE R. WICKARD,
Administrator.

[F. R. Doc. 52-9376; Filed, Aug. 25, 1952; 8:51 a. m.]

DEPARTMENT OF LABOR

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068,

as amended; 29 U. S. C. and Sup. 214), and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners, and learning period for certificates issued under the general learner regulations (§§ 522.1 to 522.14) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Single Pants, Shirts and Allied Garments, Women's Apparel, Sportswear and Other Odd Outerwear, Rainwear, Robes and Leather and Sheep-Lined Garments Divisions of the Apparel Industry Learner Regulations (29 CFR 522.160 to 522.166, as amended December 31, 1951; 16 F. R. 12043, and June 2, 1952; 17 F. R. 3818).

Adelphi Shirt Co., 943 Hamilton Street, Allentown, Pa., effective 8-18-52 to 8-17-53; 10 learners (sport shirts and undershirts).

David W. Brown Co., 3915 Powelton Avenue, Philadelphia 4, Pa., effective 8-14-52 to 8-13-53; five learners (children's cotton outerwear).

Ely & Walker Factory, Salem, Mo., effective 8-14-52 to 8-13-53; 10 percent of the productive factory workers engaged solely in the production of sport shirts and pajamas; learners at subminimum wage rates to be used in the manufacture of these items only (sport shirts and pajamas).

Harrisville Garment Corp., Harrisville, W. Va., effective 8-14-52 to 8-13-53; 10 percent of the productive factory force or 10 learners, whichever is greater (blouses).

Kaynee Co., Williamsburg, Ky., effective 8-14-52 to 2-13-53; 25 learners for expansion purposes (shirts, pajamas, trousers).

Kutztown Sportswear Co., 361 East Main Street, Kutztown, Pa., effective 8-11-52 to 2-10-53; 45 learners for expansion purposes (ladies' blouses).

Charles F. May Co., 53-55 North Third Street, Philadelphia, Pa., effective 8-18-52 to 8-17-53; five learners (work jackets and coveralls).

Meyer Weiss, Fourteenth and Market Streets, Pottsville, Pa., effective 8-18-52 to 8-17-53; 10 percent of the productive factory force (ladies' blouses).

Oswego Manufacturing Co., 355 West First Street, Oswego, N. Y., effective 8-15-52 to 8-14-53; 10 learners; learners to be employed at subminimum wage rates in the manufacture of brassieres and cotton slips only (slips and brassieres).

Palmetto Garment Co., Inc., Goldsmith Street, Greenville, S. C., effective 8-12-52 to 8-11-53; five learners (children's underwear and boxer shorts).

Wright Manufacturing Co., P. O. Box 509, Toccoa, Ga., effective 8-20-52 to 8-19-53; 10 percent of the productive factory force (work clothing).

Cigar Industry Learner Regulations (29 CFR 522.201 to 522.211, as amended January 25, 1950; 15 F. R. 400).

The Antonio Co., 1316 Spring Street, Tampa, Fla., effective 8-19-52 to 8-18-53; six learners; cigar machine operators; 320 hours at not less than 60 cents per hour.

Glove Industry Learner Regulations (29 CFR 522.220 to 522.231, as amended October 26, 1950; 15 F. R. 6888).

Livermore Falls Glove Co., Livermore, Maine, effective 8-22-52 to 8-21-53; five learners (work gloves).

Picardy Mills, Inc., Sherwood and Reeve Street, Dunmore, Pa., effective 8-19-52 to 8-18-53; 10 percent of the productive factory workers engaged in the learner occupations (knit fabric gloves).

Portage Hosiery Co., Portage, Wis., effective 8-19-52 to 8-18-53; five learners (mittens).

Richmond Glove Corp., 601 North D Street, Richmond, Ind., effective 8-18-52 to 8-17-53; 10 learners (work gloves).

Hosiery Industry Learner Regulations (29 CFR 522.40 to 522.51, as revised November 19, 1951; 16 F. R. 10733).

Ardmore Hosiery Co., Inc., 320 Isley Street, Greensboro, N. C., effective 8-19-52 to 8-18-53; five learners.

Portage Hosiery Co., Portage, Wis., effective 8-19-52 to 8-18-53; 5 percent of the productive factory force.

Knitted Wear Industry Learner Regulations (29 CFR 522.68 to 522.79, as amended January 21, 1952; 16 F. R. 12866).

Ely & Walker Factory, Salem, Mo., effective 8-14-52 to 8-13-53; five learners; learners to be engaged at subminimum wage rates in the manufacture of men's woven underwear only (men's shorts).

Morse & Morse, Inc., 240 South Broadway, Los Angeles 12, Calif., effective 8-19-52 to 8-18-53; 5 percent of the productive factory force (polo shirts).

Oswego Manufacturing Co., 355 West First Street Oswego, N. Y., effective 8-15-52 to 8-14-53; five learners to be employed at subminimum wage rates in the manufacture of night gowns only (tricot nylon gowns).

Winston Manufacturing Co., Hafeyville, Ala., effective 8-25-52 to 2-24-53; 50 learners for expansion purposes (undergarments and sleeping wear).

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.14).

J. Capps & Sons, Ltd., 500 West Lafayette Avenue, Jacksonville, Ill., effective 8-19-52 to 8-18-53; 7 percent of the productive factory force; machine operators (except cutting), pressers, handsewers; each 480 hours; 60 cents per hour for the first 240 hours and 65 cents per hour for the remaining 240 hours (men's suits and topcoats).

Gala-Mo-Arts, Inc., Sikeston, Mo., effective 8-18-52 to 2-17-53; 10 learners: pottery finishers (including spongers), pottery decorators (including spray painters); each 240 hours at 65 cents per hour (lamp bases).

The following special learner certificate was issued to the school-operated industries listed below.

Hawaiian Mission Academy, 1438 Pensacola Street, Honolulu, T. H., effective 9-1-52 to 8-31-53; print shop—compositor, pressman, and related skilled and semiskilled occupations, six learners, 350 hours at 55 cents per hour, 325 hours at 60 cents per hour, 325 hours at 70 per hour; laundry—laundry worker (semiskilled occupations only), four learners, 100 hours at 55 cents per hour, 100 hours at 60 cents per hour, 100 hours at 70 cents per hour; clerical—typist, bookkeeper, related skilled and semiskilled occupations, four learners, 200 hours at 55 cents per hour, 200 hours at 60 cents per hour, 200 hours at 70 cents per hour.

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be canceled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 18th day of August 1952.

MILTON BROOKE,
Authorized Representative of the Administrator.

FEDERAL POWER COMMISSION

[Docket No. G-2004]

TEXAS ILLINOIS NATURAL GAS PIPELINE CO.

ORDER FIXING DATE OF HEARING

AUGUST 19, 1952.

On July 16, 1952, Texas Illinois Natural Gas Pipeline Company (Applicant), a Delaware Corporation having its principal place of business at 20 North Wacker Drive, Chicago 6, Illinois, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the transportation and sale from authorized but unallocated capacity of not more than 501 Mcf of natural gas a day to Allied Gas Company for resale to the Air Force at its Chanute Air Force Base at Rantoul, Illinois, as more fully described in said application on file with the Commission and open to public inspection.

Applicant has requested that its application be heard under the shortened procedure provided by § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, and no request

to be heard, protest, or petition has been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on July 30, 1952 (17 F. R. 6993).

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on September 11, 1952, at 9:45 a. m., e. d. s. t., in the Hearing Room of the Federal Power Commission, 1800 Pennsylvania Avenue, NW., Washington, D. C., concerning the matters involved and the issues presented by such application, as supplemented: *Provided, however,* That the Commission may, after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State Commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Date of issuance: August 20, 1952.

By the Commission.

[SEAL] J. H. GUTRIDE,
Acting Secretary.

[F. R. Doc. 52-9335; Filed, Aug. 25, 1952; 8:46 a. m.]

[Docket No. G-1953]

MICHIGAN-WISCONSIN PIPE LINE CO.

ORDER FIXING DATE OF HEARING

Correction

In F. R. Doc. 52-9097, appearing at page 7561 of the issue for Tuesday, August 19, 1952, the following change should be made:

In the fourth paragraph, the date "August 20, 1952" should read "August 29, 1952."

FEDERAL TRADE COMMISSION

[File No. 21-440]

ATHLETIC GOODS INDUSTRY

NOTICE OF HOLDING OF TRADE PRACTICE CONFERENCE

Notice is hereby given that a trade practice conference under the auspices of the Federal Trade Commission will be held for the Athletic Goods Industry in the Mural Room of the Hotel Morrison, Chicago, Illinois, September 18, 1952, commencing at 10 a. m., d. s. t.

All persons, firms, corporations, and organizations engaged in the business of manufacturing, distributing, or marketing athletic goods are cordially invited to attend or be represented at this conference and to take part in the proceedings.

The proceedings in this matter were instituted by the Commission pursuant to an application therefor by the Southern California Sporting Goods Association for the purpose of revising and extending the trade practice rules for the Golf, Baseball, and Athletic Goods Industry promulgated by the Commission on October 29, 1931. A regional conference was held at Los Angeles on May 19, 1952, for the purpose of facilitating participation on the part of industry members located in the West Coast and Rocky Mountain States. The conference to be held on September 18, constitutes a further step in the proceedings.

The conference and further proceedings in the matter will be directed toward the eventual establishment and promulgation by the Commission of trade practice rules for the industry under which unfair methods of competition, unfair or deceptive acts or practices, and other trade abuses, may be eliminated and prevented.

Issued: August 21, 1952.

By direction of the Commission.

[SEAL] WM. P. GLENDENING JR.,
Acting Secretary.

OFFICE OF DEFENSE MOBILIZATION

[CDHA 75]

FINDING AND DETERMINATION OF CRITICAL DEFENSE HOUSING AREAS UNDER THE DEFENSE HOUSING AND COMMUNITY FACILITIES AND SERVICES ACT OF 1951

AUGUST 21, 1952.

Upon a review of the construction of new defense plants and installations, and the reactivation or expansion of operations of existing defense plants and installations, and the in-migration of defense workers or military personnel to carry out activities at such plants or installations and the availability of housing and community facilities and services for such defense workers and military personnel in the area set forth below, I find that all of the conditions set forth in section 101 (b) of the Defense Housing and Community Facilities and Services Act of 1951 (Pub. Law 139, 82d Cong., 1st Sess.) exist.

Accordingly, pursuant to section 101 of the Defense Housing and Community Facilities and Services Act of 1951 and by virtue of the authority vested in me by paragraph number 1 of Executive Order 10296 of October 2, 1951, I hereby determine that said area is a critical defense housing area.

Opheim, Montana, Area. (The area consists of School District 9, including Opheim Town, in Valley County, Montana.)

JOHN R. STEELMAN,
Acting Director of Defense Mobilization.

[File No. 70–2908]

BLACKSTONE VALLEY GAS AND ELECTRIC CO. ET AL

NOTICE OF FILING REGARDING SALE OF COMMON STOCK TO AFFILIATES

AUGUST 20, 1952.

In the matter of Blackstone Valley Gas and Electric Company, Brockton Edison Company, Fall River Electric Light Company, Eastern Utilities Associates; File No. 70–2908.

Notice is hereby given that an application-declaration has been filed with this Commission by Eastern Utilities Associates ("EUA"), a registered holding company, and its three direct public-utility subsidiary companies, namely, Blackstone Valley Gas and Electric Company ("Blackstone"), Brockton Edison Company ("Brockton") and Fall River Electric Light Company ("Fall River"). Applicants-declarants have designated sections 9, 10, 12 (d), 12 (f), and 12 (g) of the Public Utility Holding Company Act of 1935 and Rules U-23 and U-43 promulgated thereunder as applicable to the proposed transactions, which are summarized as follows:

Blackstone, Brockton and Fall River own all of the outstanding stock of Montaup Electric Company ("Montaup"), the system's generating company, such stock ownership being 48.63, 23.42 and 32.95 percent, respectively, of the investment in Montaup. The power contract under which Montaup sells electric energy to its owner companies requires periodic changes in the investment of such owner companies in Montaup so that their investment ratios will be approximately the same as the ratios based on their actual use of Montaup's facilities. To accomplish this purpose Blackstone proposes to sell 3,066 shares of common stock of Montaup, of which 1,544 will be sold to Fall River and 1,522 will be sold to Brockton. Such stock will be sold at a price of $103.72815 per share or for a total consideration of $318,030.51. The price per share represents the par value plus the pro rata portion of the earned surplus attributable to each common share of Montaup outstanding at the close of business on September 30, 1951.

All of the Montaup stock held by Blackstone is pledged as mortgaged property under that company's indenture of mortgage securing its outstanding bonds. The cash consideration of $318,030.51 will be deposited by Blackstone with its indenture trustee in order to secure the release of said 3,066 common shares and, subsequently, the cash deposited with the trustee will be released by the substitution by Blackstone of bondable property additions in accordance with the provisions of the mortgage indenture.

The application-declaration states that no State commission, other than the Massachusetts Department of Public Utilities, and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions. The application-declaration further states that the expenses in connection with the proposed transactions are estimated not to exceed $700 of which $600 represents counsel fees.

It is requested that the transactions be authorized pursuant to the procedure of Rule U-23, without a hearing, and that the Commission's order herein become effective upon issuance.

Notice is further given that any interested person may, not later than September 8, 1952, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said application-declaration which he desires to controvert or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street, NW., Washington 25, D. C. At any time thereafter said application-declaration, as filed or as amended, may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rule U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 52–9338; Filed, Aug. 25, 1952; 8:46 a. m.]

[File No. 70–2915]

NIAGARA MOHAWK POWER CORP.

NOTICE REGARDING PROPOSED ACQUISITION OF SECURITIES AND UTILITY ASSETS FROM NON-AFFILIATE

AUGUST 20, 1952.

Notice is hereby given that an application has been filed with this Commission, pursuant to sections 9 (a) and 10 of the Public Utility Holding Company Act of 1935 ("act") by Niagara Mohawk Power Corporation ("Niagara Mohawk"), a public utility company and an exempt holding company. As of June 30, 1952, The United Corporation, a registered holding company, owned 9.57 percent of Niagara Mohawk's voting securities.

Notice is further given that any interested person may, not later than September 2, 1952, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law raised by said application proposed to be controverted, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street, NW., Washington 25, D. C. At any time after September 2, 1952, said application, as filed or as amended, may be granted as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transaction as provided in Rules U-20 (a) and U-100 thereof.

All interested persons are referred to said application which is on file in the office of this Commission for a statement of the transactions therein proposed, which are summarized as follows:

Niagara Mohawk proposes to acquire from J. B. Wise, Inc., a hydroelectric power plant and related facilities located on the Black River in the City of Watertown, New York. Niagara Mohawk renders electric service in the territory in which said plant is located and purchases most of the electric output of such plant. Niagara Mohawk also proposes to acquire from J. B. Wise, Inc., 238 shares of the common stock and 14½ shares of the preferred stock of Beebee Island Corporation ("Beebee"), a New York corporation owning and operating a hydroelectric power plant on the Black River in said City of Watertown. Niagara Mohawk now owns approximately 83 percent of the outstanding voting securities of such company which was organized by the owners of water power sites on Beebee Island to develop the water power which is made available to the Beebee stockholders in direct proportion to their stock holdings.

Niagara Mohawk proposes to purchase the hydroelectric power plant and the stock of Beebee for an aggregate consideration of $199,000.

By the Comission.

ECONOMIC STABILIZATION AGENCY

Office of Price Stabilization

[Region II, Redelegation of Authority No. 42]

DIRECTORS OF DISTRICT OFFICES, REGION II, NEW YORK, N. Y.

REDELEGATION OF AUTHORITY TO MAKE AREA ADJUSTMENTS UNDER SECTION 11 (d) OF CPR 17

By virtue of the authority vested in me as Director of the Regional Office of Price Stabilization, No. II, pursuant to Delegation of Authority No. 72 (17 F. R. 7357), this redelegation of authority is hereby issued.

1. Authority is hereby redelegated to the Directors of the District Offices of Price Stabilization of Region II:

a. To request information in accordance with OPS Public Form 151 of tank wagon sellers of fuel oil for the purpose of adjusting ceiling prices under section 11 (d) of Ceiling Price Regulation 17;

b. To issue area adjustments by special order under the provisions of section 11 (d) of Ceiling Price Regulation 17;

c. To disapprove area adjustments requested under section 11 (d) of Ceiling Price Regulation 17.

This redelegation of authority shall take effect on August 22, 1952.

JAMES G. LYONS, *Regional Director, Region II.*

[Region III, Redelegation of Authority No. 31, Revision 1]

DIRECTORS OF DISTRICT OFFICES, REGION III, PHILADELPHIA, PA.

REDELEGATION OF AUTHORITY TO ACT UNDER SECTIONS 4 (a) (6), 6 (c), 6 (d), 7, 9 (b) (3), 10, 14 (f), 16 (b) AND 21 OF CPR 134

By virtue of the authority vested in me as Director of the Regional Office of Price Stabilization, No. III, at Philadelphia, Pennsylvania, pursuant to Delegation of Authority No. 61, Revision 1 (17 F. R. 6424), this Revision 1 to Redelegation of Authority No. 31 is hereby issued.

Redelegation of Authority No. 31 is revised to read as follows:

1. Authority is hereby redelegated to each of the District Directors of the Office of Price Stabilization in Region III to take appropriate action under sections 4 (a) (6), 6 (c), 6 (d), 7, 9 (b) (3), 10, 14 (f), 16 (b), and 21 of CPR 134. All actions taken by field offices under sections 4 (a) (6), 6 (c), 6 (d), 7, 9 (b) (3), 10, 14 (f), 16 (b) and 21 of CPR 134, previous to this authority, are hereby confirmed and validated.

This redelegation of authority shall take effect as of August 13, 1952.

VOLUME 17 NUMBER 168

Washington, Wednesday, August 27, 1952

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10387

SPECIFICATION OF LAWS FROM WHICH CERTAIN FUNCTIONS AUTHORIZED BY THE MUTUAL SECURITY ACT OF 1951, AS AMENDED, SHALL BE EXEMPT

By virtue of the authority vested in me by section 532 of the Mutual Security Act of 1951, as added by section 7 (m) of the Mutual Security Act of 1952 (Public Law 400, approved June 20, 1952, 66 Stat. 146), it is hereby determined that, to the extent hereinafter indicated, the performance of functions authorized by the said Mutual Security Act of 1951, as amended (including the performance of functions authorized by the Act for International Development, as amended, the Institute of Inter-American Affairs Act, as amended, and the Mutual Defense Assistance Act of 1949, as amended), without regard to the laws specified in the lettered subdivisions of sections 1, 2, and 3 of this order will further the purposes of the said Mutual Security Act of 1951, as amended.

SECTION 1. With respect to functions authorized by section 503 (b) of the Mutual Security Act of 1951, as amended (22 U. S. C. 1654 (b)), the Act for International Development, as amended (22 U. S. C. 1557 *et seq.*), and the Institute of Inter-American Affairs Act, as amended (22 U. S. C. 281 *et seq.*):

(a) The act of March 26, 1934, c. 90, 48 Stat. 500, as amended (15 U. S. C. 616a).

(b) Section 3648 of the Revised Statutes, as amended, 60 Stat. 809 (31 U. S. C. 529).

(c) Section 305 of the act of June 30, 1949 (the Federal Property and Administrative Services Act of 1949), c. 288, 63 Stat. 396 (41 U. S. C. 255).

(d) Section 3709 of the Revised Statutes, as amended (41 U. S. C. 5).

(e) Section 3710 of the Revised Statutes (41 U. S. C. 8).

(f) Section 2 of the act of March 3, 1933, c. 212, 47 Stat. 1520 (41 U. S. C. 10a).

(g) Section 3735 of the Revised Statutes (41 U. S. C. 13).

(h) Section 901 of the act of June 29, 1936, c. 858, 49 Stat. 2015 (46 U. S. C. 1241).

SEC. 2. With respect to purchases authorized to be made outside the continental limits of the United States under the Mutual Defense Assistance Act of 1949, as amended (22 U. S. C. 1571 *et seq.*), sections 503 (b) and 506 of the Mutual Security Act of 1951, as amended, the Act for International Development, as amended, and the Institute of Inter-American Affairs Act, as amended:

(a) Section 10 (1) of the act of July 2, 1926, c. 721, 44 Stat. 787, as amended (10 U. S. C. 310 (l)).

(b) Section 4 (c) of the act of February 19, 1948 (the Armed Services Procurement Act of 1947), c. 65, 62 Stat. 23, as amended, 65 Stat. 700 (41 U. S. C. 153 (c)).

(c) Section 304 (c) of the act of June 30, 1949 (the Federal Property and Administrative Services Act of 1949), c. 288, 63 Stat. 395, as amended, 65 Stat. 700 (41 U. S. C. 254 (c)).

(d) Section 1301 of the act of March 27, 1942 (the Second War Powers Act, 1942), c. 199, 56 Stat. 185 (50 U. S. C. App. 643).

SEC. 3. With respect to functions performed in Burma and Indonesia under the Act for International Development, as amended:

(a) Section 5 (c) (2) of the act of July 16, 1914, c. 141, 38 Stat. 508, as amended, 60 Stat. 810 (5 U. S. C. 78 (c) (2)).

This order supersedes Executive Order No. 9943 of April 9, 1948, 13 F. R. 1975, entitled "Providing for Carrying out the Foreign Assistance Act of 1948".

HARRY S. TRUMAN

Subchapter C—Production and Subsistence Loans

[FHA Instruction 441.1]

PART 341—APPROVAL AUTHORITY

Part 341, Title 6, Code of Federal Regulations (13 F. R. 9419), is revised to read as follows:

Sec.
- 341.1 General policy.
- 341.2 Authorization to State Directors.
- 341.3 Authorization to redelegate loan approval authority.
- 341.4 Limitations relative to redelegation of authority.

AUTHORITY: §§ 341.1 to 341.4 issued under sec. 41 (1), 60 Stat. 1066; 7 U. S. C. 1015 (1). Interpret or apply sec. 21, 60 Stat. 1072, 65 Stat. 197; 7 U. S. C. 1007.

§ 341.1 *General policy.* In so far as feasible, consistent with sound program administration, Production and Subsistence loans will be approved in the field by State Field Representatives and County Supervisors, provided the exercise of such authority conforms to prescribed loan making policies. Therefore, subject to the limitations contained herein, State Directors will redelegate loan approval authority to State Field Representatives and County Supervisors and will provide the necessary instructions with respect to the exercise thereof. Loans which for policy reasons cannot be approved by the State Director will be submitted to the Administrator for approval.

§ 341.2 *Authority to State Directors.* Subject to the applicable policies and provisions contained in Parts 341–345 of this chapter, State Directors are hereby authorized to approve Production and Subsistence loans to eligible applicants: *Provided:*

(a) No Production and Subsistence loan may be made in excess of $7,000.

(b) Production and Subsistence loans totaling more than $7,000 may not be approved within any 120-day period.

(c) No Production and Subsistence loan may be made that will result in a borrower becoming indebted in excess of $10,000 for Production and Subsistence loans. This maximum limit will include principal and interest and other charges paid by the Government in connection with any such loan and charged to the account of the borrower.

(d) No Production and Subsistence loan may be made to an applicant who has been indebted continuously for Production and Subsistence loans for seven consecutive years until all of his indebtedness under such loans has been paid in full. The seven year period will begin to run from the date of the check representing the oldest loan received during the period for which the borrower has been continuously indebted even though that loan may have been paid in full.

(e) Production and Subsistence loans to applicants whose debts have been settled pursuant to Part 364 of this chapter as reflected by the County Office records, or where such a settlement is contemplated, may not be approved without concurrence of the National Office.

(f) The aggregate amount of Production and Subsistence loans made in connection with any one joint owner group service will not exceed $10,000.

(g) No Production and Subsistence loan may be made to an applicant who is still indebted on November 1, 1953, for Rural Rehabilitation, Emergency Crop and Feed, 1934–35 Drought Feed, Regional Agricultural Credit Corporation, Flood and Windstorm Restoration, or Wartime Civilian Control Administration loans for production type purposes, made prior to November 1, 1946, until all indebtedness under such loans has been paid in full. In such cases any Production and Subsistence loan must also be paid in full before further loans may be approved. Rural Rehabilitation loan as used herein includes advances from State Rural Rehabilitation Corporation funds before November 1, 1946, but does not include farm development loans made from Rural Rehabilitation or State Rural Rehabilitation Corporation Trust funds.

§ 341.3 *Authorization to redelegate loan approval authority.* State Directors are hereby authorized to redelegate to State Field Representatives and County Supervisors in charge of County Offices, all or any part of their authority to approve Production and Subsistence loans subject to their review, Provided that:

(a) County Supervisors may not be authorized to approve:

(1) Loans which will result in a total principal indebtedness for Production and Subsistence loans in excess of $5,000.

(2) Annual loans as authorized under § 342.7 of this chapter in excess of $1,000.

(3) Production and Subsistence loans (initial or subsequent) made in connection with the making of a Farm Ownership or Farm Housing loan.

(4) Loans involving repayment schedules in excess of five years, except that County Supervisors may be authorized to approve loans involving schedules not in excess of five years and six months when the principal income from the fifth year's operations will not be received in time to make the final payment within five years from the date of the loan check.

(5) Loans involving the deferment of payments pursuant to authority contained in § 342.4 (d) of this chapter.

(6) Loans to borrowers who are indebted for Rural Rehabilitation, Emergency Crop and Feed, 1934–35 Drought Feed, Regional Agricultural Credit Corporation, Flood and Windstorm Restoration, or Wartime Civilian Control Administration loans for production type purposes, made prior to November 1, 1946, or who have been indebted continuously for Production and Subsistence loans for five years or longer.

(b) State Field Representatives may not be authorized to approve:

(1) Loans involving the deferment of payments pursuant to authority contained in § 342.4 (d) of this chapter.

(2) Loans to borrowers who have been continuously indebted for Production and Subsistence loans for five years or longer.

(c) State Directors will reserve the right to revoke any of the authority redelegated under this § 341.3.

§ 341.4 *Limitations relative to redelegation of authority.* Each State Director will determine the loan approval authority to be redelegated to State Field Representatives and County Supervisors with respect to the amounts and any other limitations applicable to the State as a whole, and will issue State Instructions redelegating such authority on a position basis.

(a) State Directors may restrict or revoke the exercise of redelegated loan approval authority to individual State Field Representatives and County Supervisors by means of individual "policy letters." Restrictions and limitations on redelegated loan approval authority are permitted to assist in the development and maintenance of a sound Farmers Home Administration program.

[SEAL] DILLARD B. LASSETER,
Administrator.

AUGUST 5, 1952.

Approved: August 22, 1952.

CHARLES F. BRANNAN,
Secretary of Agriculture.

[F. R. Doc. 52-9394; Filed, Aug. 26, 1952; 8:48 a. m.]

[FHA Instruction 441.2]

PART 342—POLICIES

Part 342, Title 6, Code of Federal Regulations (13 F. R. 9419, 14 F. R. 4507, 15 F. R. 1583), is revised to read as follows:

Sec.
- 342.1 General.
- 342.2 Selection of applicants.
- 342.3 Use of loan funds.
- 342.4 Terms of loans.
- 342.5 Security policies.
- 342.6 Loan limitations and requirements.
- 342.7 Making annual loans.

§§ 342.1 to 342.8 issued under ... spend the major portion of his time in ... ments prescribed in § 342.2 (a) and other

AUTHORITY: §§ 342.1 to 342.7 issued under sec. 41 (1), 60 Stat. 1066; 7 U. S. C. 1015 (1). Interpret or apply sec. 21, 60 Stat. 1072, 65 Stat. 197; 7 U. S. C. 1007. Other statutory provisions interpreted or applied are cited to text in parentheses.

§ 342.1 *General.* (a) Title II of the Bankhead-Jones Farm Tenant Act, as amended, authorizes the making of Production and Subsistence loans to eligible farmers and stockmen for financing farm and home needs. The objective of this loan program through the extension of credit and supervision is to enable such farmers and stockmen to become established successfully in a sound, well balanced system of farming in order to make full and efficient use of their land and labor resources.

(b) Production and Subsistence loans authorized under this program are for the purpose of assisting eligible applicants (1) whose primary needs are credit and guidance in making the adjustments and improvements necessary for successful farm and home operations on family type farms, (2) who have or can acquire with the assistance provided by the Farmers Home Administration the necessary land and labor resources for making such adjustments and improvements, (3) who have or through proper guidance can develop the abilities needed to carry out successful family type farm and home operations, and (4) who have reasonable prospects of repaying their loans within the scheduled period and of operating within a reasonable period without further assistance from the Farmers Home Administration.

(c) Except as provided in § 342.7, each Production and Subsistence loan will be based on a long-time and annual farm and home plan developed jointly by the applicant and the County Supervisor.

(d) Preference will be given to eligible veteran applicants in making Production and Subsistence loans. However, there is no difference in the eligibility and loan requirements for veterans and non-veterans.

§ 342.2 *Selection of applicants—(a) Qualifications.* Before a Production and Subsistence loan is made, the applicant must meet the following qualifications:

(1) He must be a citizen of the United States.

(2) He must possess legal capacity to contract for the loan.

(3) He must have had farm experience or training sufficient to indicate reasonable prospects of conducting successful family type farming operations. He may be an individual who for special reasons may not have farmed during the past few years but whose background and normal means of livelihood in the past have been farming.

(4) He is operating a family type farm or, with the assistance available under this program, will operate such a farm after the loan is made.

(5) He is unable to obtain sufficient credit to finance his actual needs at rates (but not exceeding the rate of five percentum per annum) and terms prevailing in or near his community for loans of similar size and character.

(6) After his loan is made, he will derive the major portion of his income from farming or stock raising and will spend the major portion of his time in carrying on his farming or stock raising operations. Under this policy, applicants who will be seasonally employed off the farm during the early years of their loans may qualify for assistance. However, loans will not be made to those who will carry on types of farming which will require substantial income from other employment during the term of the loan or to those who will be regularly employed off the farm. Payments to veterans for pensionable disabilities and other veterans' benefits will not be considered as off-farm income under this requirement.

(7) He owns, or will have available under satisfactory tenure arrangements, a farm suitable for carrying on successful family type farming operations.

(8) There is evidence to indicate that he will endeavor honestly to carry out the undertakings and obligations required of him under his loan.

(b) *Certification by applicant.* Before an application for a Production and Subsistence loan is considered, the applicant must certify in writing on Form FHA–49, "Certifications—Production and Subsistence Loans," that he is a citizen of the United States and that sufficient credit to meet his actual needs for the designated crop year is not available to him at the rates (but not exceeding the rate of five percentum per annum) and terms for loans of similar size and character prevailing in or near the community where he resides. It will not be necessary for the applicant to submit written rejections from other credit sources except when required by the County Committee or loan approval official.

(c) *Certification by County Committee.* Before a Production and Subsistence loan is approved the County Committee must certify in writing on Form FHA–49 that the applicant is eligible to receive a loan or loans under the provisions of Title II of the Bankhead-Jones Farm Tenant Act, as amended; that credit sufficient in amount to finance the actual needs of the applicant is not available to him at the rates (but not exceeding the rate of five percentum per annum) and terms prevailing in or near the community in which the applicant resides for loans of similar size and character from commercial banks, cooperative lending agencies, or from any other responsible source; and that, in the opinion of the Committee, the applicant will honestly endeavor to carry out the undertakings and obligations required of him. The certification will specify the maximum amount which may be loaned to the applicant within a designated crop year. However, if it is found, after the certification has been made, that additional credit will be needed or that another farm will be operated, it will be necessary for the County Committee again to certify the applicant as eligible.

(d) *Administrative determinations.* When an applicant has been certified as eligible for a Production and Subsistence loan by the County Committee in accordance with § 342.2 (c), the loan approval official will determine administratively whether the applicant meets the requirements prescribed in § 342.2 (a) and other requirements for a loan. It is the responsibility of the loan approval official to determine whether a sound loan has been developed in keeping with the objectives of title II of the Bankhead-Jones Farm Tenant Act, as amended, and, if it appears that such objectives cannot be accomplished, a loan will not be made.

(Sec. 44 (a) (2) and (3), 60 Stat. 1068; 7 U. S. C. 1018 (a) (2) and (3))

§ 342.3 *Use of loan funds.* (a) Production and Subsistence loans may be made for:

(1) Purchasing necessary livestock, farm equipment, farm equipment repairs, seed, fertilizer, feed, lime, insecticides, farm supplies, and other farm needs. These purposes do not include the purchase of passenger automobiles.

(2) Paying for necessary hired farm labor during peak seasons or periods of emergency and for necessary custom work or services.

(3) Paying cash rent where no other satisfactory rental arrangements can be effected, for not more than one year in advance, provided:

(i) The applicant is obligated under a written lease to pay in advance the amount to be loaned for such purpose.

(ii) The terms of the lease provide the applicant with reasonably secure and satisfactory tenure.

(4) Paying debts secured by liens on livestock or farm equipment, but not including household furnishings and equipment, when such action is necessary to enable the applicant to retain the property, or when a split line of credit is undersirable because of the difficulties in identifying security property and accounting for income, provided:

(i) The property involved is essential to the applicant's farming operations and is of the type and quality needed.

(ii) The amount refinanced does not exceed the County Supervisor's fair market value appraisal of the livestock and farming equipment serving as security for the debt being refinanced.

(iii) The loan is not made primarily for the purpose of exchanging creditors, extending the time for repayment, or obtaining a lower interest rate.

(5) Paying delinquent taxes on real and personal property essential to the applicant's farming operations when such action is necessary to preserve the property involved. However, Production and Subsistence loan funds will not be used to pay taxes, either current or delinquent, on Farm Ownership or Farm Housing farms.

(6) Paying premiums on insurance policies covering property serving as security for Farmers Home Administration loans, except that Production and Subsistence loan funds may not be used to pay the initial premium on insurance policies covering buildings on Farm Ownership or Farm Housing farms; however, such funds may be used to pay subsequent premiums on such policies if the applicant is unable to pay the premiums out of his own funds, and if a Production and Subsistence loan is being made at the time primarily for some other purpose.

(7) Purchasing essential home equipment and furnishings and home equipment repairs required by the applicant family to sustain itself on the farm in a reasonably satisfactory manner.

(8) Meeting family subsistence needs, including premiums on reasonable amounts of health and life insurance and expenses for medical care. Applicants must understand, however, that within the limits of their resources they must plan and carry on adequate food production and conservation programs. After the first year on the program, loans will not be made for the purchase of food that could have been produced feasibly on the farm.

(9) Erecting necessary farm buildings, making essential repairs and improvements to existing farm buildings, and purchasing equipment and paying other costs for establishing or improving a farm water supply, provided not more than $1,000 may be advanced to a borrower for any or all such purposes during any fiscal year.

(10) Purchasing fencing material.

(11) Establishing and improving pastures and hay crops, constructing terraces and waterways, land clearing and leveling, drainage, and paying for other approved soil conservation and improvement measures.

(12) The acquisition of memberships in farm purchasing and marketing and farm service type cooperative associations. However, loan funds will not be used to purchase memberships in production cooperatives or memberships for the purpose of establishing control by the Farmers Home Administration in any type of cooperative.

(b) The use of Production and Subsistence loan funds for the purposes authorized in § 342.3 (a), (9), (10), and (11) is subject to the following limitations:

(1) The authority to make Production and Subsistence loans for real estate improvements shall be exercised in such manner as to assure no duplication of the policies applicable to the making of farm development, farm housing and water facilities loans for a similar purpose. Before a Production and Subsistence loan is made for real estate improvements, a careful analysis must be made of the applicant's resources and proposed operations and a determination made that such real estate improvements cannot be provided practicably through Farm Development, Farm Housing or Water Facilities loans; that the farm can be developed to the extent that a sound farm and home program can be established on the farm within the prescribed loan limitations, taking into consideration the applicant's need for additional operating credit during the period of development; and that the applicant will be able to repay his Production and Subsistence loans within the prescribed repayment period. If the analysis of the borrower's resources and the proposed farm and home operations discloses that this objective cannot be reached under this authority, Production and Subsistence loan funds will not be advanced.

(2) Generally, additional real estate improvements needed on the farm of a Farm Ownership or Farm Housing borrower should be obtained through a subsequent Farm Ownership or Farm Housing loan. However, where the development costs are small in relation to the real estate investment and can be provided under the policies set forth above, Production and Subsistence loan funds may be used for this purpose subject to the following:

(i) For a direct Farm Ownership borrower the unpaid balance on the borrower's Farm Ownership loan plus the Production and Subsistence loan funds to be advanced for real estate purposes must not exceed the fair and reasonable value of the farm as certified by the County Committee.

(ii) For an insured Farm Ownership borrower the unpaid balance on the borrower's Farm Ownership loan plus the Production and Subsistence loan funds to be advanced for real estate purposes must not exceed 90 percent of the fair and reasonable value of the farm as certified by the County Committee.

(iii) With respect to either a direct or insured Farm Ownership borrower, the loan approval official must determine from his knowledge of the farm or from information available in the County Office records that the fair and reasonable value of the farm with the contemplated improvements will not exceed the average value of efficient family type farm management units in the County in which the farm is located, as determined by the Secretary in connection with Farm Ownership farms.

(iv) For a Farm Housing borrower the unpaid balance on the Farm Housing loan and other loans secured by liens on the real estate, plus the Production and Subsistence loan funds advanced for real estate purposes, must not exceed the reasonable value of the farm as recommended by the County Committee.

(3) Production and Subsistence loan funds may not be used to finance real estate improvements which are included in the original farm development plan.

(4) Production and Subsistence loans may not be used in lieu of the authority to make Water Facilities loans in the seventeen western states, except that when Production and Subsistence loans are being made for other purposes, funds not in excess of $500 may be included for water facilities purposes.

(5) Production and Subsistence loans may not be made for these purposes to a tenant unless he has a written lease for a sufficient period of time and under terms that will enable him to obtain reasonable returns on his investment. In addition, the lease in such case must provide for compensating the tenant for any unexhausted value of the improvement upon termination of the lease. In the case of an owner, it must be determined, before funds are advanced for these purposes, that he will likely continue to operate the farm for a sufficient period of time and under such terms that will enable him to obtain reasonable returns on his investment. In cases involving tenant applications, the loan docket must contain positive evidence that the landlord, applicant and County Supervisor have thoroughly discussed and agreed to the proposed improvements.

§ 342.4 *Terms of loans.* (a) Interest will be charged at the rate of 5 percent per annum on all Production and Subsistence loans. Interest will accrue on outstanding principal only and will not be compounded.

(b) Repayments of principal on adjustment Production and Subsistence loans will be scheduled in accordance with the borrower's reasonable repayment ability, determined by an analysis of his farm and home operations as reflected in his long-time and annual farm and home plan. Except as provided in paragraph (d) of this section, principal repayments on such loans will be scheduled at least annually, unless it is determined that income sufficient to meet the initial payment will not be received within 12 months from the date of the loan check, in which case the initial payment may be scheduled on a date coinciding with the date the income is to be received, but not beyond 18 months from the date of the loan check, and at least one payment will be scheduled during each 12 months period thereafter. In no event will payments be scheduled later than 7 years from the date of the loan check.

(1) Advances for annual recurring expenses will be scheduled for repayment when the principal income from the year's operations normally would be received. Advances for such purposes as seeding permanent type legumes and grasses and for basic soil treatment are not considered annual recurring expenses and may be scheduled for repayment over a period consistent with the applicant's repayment ability but in no event longer than the expected life of the seeding or treatment.

(2) Advances to purchase or produce feed for productive livestock, or livestock to be fed for the market, will be scheduled for repayment when the principal income from the sale of such livestock or livestock products normally can be expected.

(3) Advances for purposes other than those enumerated in § 342.4 (b) (1) and (2) will be scheduled for repayment over the minimum period consistent with the applicant's ability to pay, as determined from an analysis of the farm and home operations. In no instance may the repayment schedule extend beyond the useful life of the security offered for the advance.

(c) Generally, an adjustment Production and Subsistence loan will be scheduled for repayment over a period not exceeding five years; however, repayments may be scheduled over a longer period, but not exceeding seven years, when it is evident that the applicant will not realize sufficient income from his proposed operations to retire the loan in an orderly manner within a shorter period. A repayment schedule up to seven years may be justified in situations such as the following:

(1) Dairy or beef cattle herds are being built up or improved and maximum production cannot be anticipated soon enough to permit full repayment of the loan within a five-year period.

(2) Substantial amounts are being advanced for pasture development, fencing and other land improvements and a longer repayment period is need for repaying advances for these purposes along with the advances for capital purchases.

(3) A major farm reorganization is planned and a relatively large investment is required in working capital.

(4) The investment in livestock or equipment required to maintain or expand the enterprise as an efficient family type operation exceptionally heavy and a repayment schedule longer than five years is necessary.

(d) The initial principal and interest payment on an adjustment Production and Subsistence loan may be deferred until the end of the second full crop year following the date of the loan when income sufficient to make the initial payment is not expected at an earlier date. Since repayments on such a loan may be extended, in justifiable cases, over a period not in excess of seven years and the amount scheduled for repayment each year may vary according to the repayment ability of the borrower, it is expected that the privilege of complete deferment of the initial payment will be used only rarely. A deferred payment may be justified in some cases when the loan is being scheduled over a period in excess of five years in situations referred to in paragraph (c) (2) and (3) of this section and there will not be sufficient farm income realized from the operations to make a payment at the end of the first full crop year.

(e) Annual Production and Subsistence loans authorized in § 342.7 will be scheduled for repayment when the principal income normally will be received. In no case may such a loan be scheduled for repayment over a period in excess of twelve months from the date of the loan check, except that a loan made to purchase or produce feed for livestock being fed for market, or to purchase or produce feed for productive livestock, may be scheduled for repayment over a period not exceeding eighteen months.

(Sec. 44 (b), 60 Stat. 1069, sec. 48, 60 Stat. 1070, sec. 4, 65 Stat. 198; 7 U. S. C. 1022)

§ 342.5 *Security policies.* (a) Each Production and Subsistence loan will be secured for the full amount of the loan by a first lien on all livestock and farm equipment purchased or refinanced with proceeds of the loan and by a lien on the crops growing or to be grown by the applicant, subject only to the landlord's interest in the crops for rent, except as follows:

(1) If a particular crop of the applicant is under lien as security for advances made by another creditor to produce the crop, or is to be financed wholly by another creditor, a lien will be taken on such crop subject to the lien of the other creditor, provided no advance will be made by the Farmers Home Administration in connection with such crop.

(2) Small farm tools and equipment purchased with loan funds that will have very little resale value after normal use for two or three years, will not be included in mortgages securing Production and Subsistence loans.

(b) Loans made to purchase or produce feed for livestock being fed for market or to be fed to productive livestock, other than those used for subsistence purposes, must be secured by first liens on such livestock.

(c) Loans will be further secured by the best lien obtainable on as much of the livestock and farm equipment of security value owned by the applicant at the time the loan is made as is necessary to protect the interest of the Government. Generally, the livestock and farm equipment owned by the applicant will not be used as security for loans made only for the production of cash crops, as authorized in § 342.7. Normally, loans for this purpose will be secured by crop liens only.

(d) Borrowers having insurance on cash crops from which repayments are expected, will be required to give written assignments of the proceeds of such insurance. If such insurance is to be obtained at a later date, an agreement will be reached with the borrower to give an assignment when the insurance is obtained.

(e) When loans are made to finance dairy enterprises from which repayments are expected, assignments will be taken on the milk income to assist in obtaining regular repayments as income is received whenever it is possible to obtain an agreement from the purchaser to honor the assignments. Assignments of proceeds from the sale of other agricultural products will be taken when necessary to protect the interests of the Government.

(f) In states in which the landlord acquires by statute a lien on crops or personal property for advances made for supplies, or supplies furnished, or for past-due rent, or if the landlord has acquired such interest by lease, mortgage lien, or contract, the landlord will be required to subordinate in favor of the Government any interest he now has or may acquire in the livestock, farm equipment, and crops of the applicant resulting from advances made for supplies, or for supplies furnished, or for past-due rent.

(g) Lien searches to determine that the Government will receive the required security will be made in all cases at the time or immediately before the security instrument is obtained.

(Sec. 44 (b), 60 Stat. 1069; 7 U. S. C. 1018 (b))

§ 342.6 *Loan limitations and requirements.* The following loan requirements and limitations will be observed in making Production and Subsistence loans:

(a) The amount of each loan will be limited to the needs of the applicant and his ability to repay, provided:

(1) No Production and Subsistence loan may be made in excess of $7,000.

(2) No Production and Subsistence loans may be approved in excess of $7,000 within any 120-day period.

(3) No loan may be made that will result in a borrower becoming indebted in excess of $10,000 for Production and Subsistence loans. This maximum limit will include principal and interest and other charges paid by the Government in connection with any such loans and charged to the account of the borrower.

(b) No loan may be made to an applicant who has been indebted continuously for Production and Subsistence loans for seven consecutive years until all of his indebtedness under such loans has been paid in full. When it is determined that a sound well-balanced system of farming cannot be worked out with an applicant so that he can attain the objective set forth in § 342.1 within a 7-year period, such application for assistance should be rejected.

(c) An applicant who is still indebted on November 1, 1953, for Rural Rehabilitation, Emergency Crop and Feed, 1934-35 Drought Feed, Regional Agricultural Credit Corporation, Flood and Windstorm Restoration or Wartime Civilian Control Administration loans for production type purposes made prior to November 1, 1946, will not be eligible to receive Production and Subsistence loans until all indebtedness under such old loans has been paid in full. In such cases, any Production and Subsistence loan also must be paid in full before the applicant is eligible for further loans. Rural Rehabilitation loan as used herein includes advances from State Rural Rehabilitation Corporation Trust funds before November 1, 1946, but does not include Farm Development loans made from Rural Rehabilitation and State Rural Rehabilitation Corporation Trust funds. This limitation is based upon a provision in the act. Present borrowers who have already been indebted for five consecutive years on these old loans will only be eligible to receive further loans for one additional crop year. Therefore, additional loans may be made to those present borrowers who are indebted for these old loans only when it can be reasonably determined that their farm and home operations can be placed on a sound basis and that further loans will not be needed under this program after November 1, 1953.

(d) Indebtedness on old production type loans described in paragraph (c) of this section made prior to November 1, 1946, is not taken into consideration when determining loan limits; however, plans for the orderly liquidation of such indebtedness must be included in the debt payment plans developed with each applicant. In addition, it must be determined that satisfactory plans have been developed with the applicant family for correcting the deficiencies in their operations which have resulted in their being indebted continuously over a period of more than five years.

(e) Production and Subsistence loans may not be made for the purchase of real estate or for making payments on real estate already purchased. Among other things, this precludes the making of Production and Subsistence loans for the purpose of making down payments on insured Farm Ownership loans or for replacing livestock and equipment sold primarily for the purpose of obtaining funds with which to make such down payments, and for refinancing debts incurred for that purpose.

(f) A joint loan may be made to husband and wife, mother and son, or father and son, living together as a family and operating jointly the same farm unit. No other joint loans may be made. However, separate loans may be made to eligible individuals who are engaged jointly in farming, provided that not more than two individuals are interested

in the operation; the security requirements contained in § 342.5 are met; the operations provide the equivalent of a family type operation for each applicant family; and the total of the loans to both individuals does not exceed the loan limitations for an individual. If a loan is made to only one such individual, it will be secured by a first lien on his interest in the crops and chattels and the other individual will be required to execute the mortgage with him so as to disclaim any interest in the security property offered by the applicant. If a loan is made to each of the two individuals, the security instruments for each will be executed by both, or a joint mortgage may be taken.

(g) Before Production and Subsistence loans are made, applicants will be required to make satisfactory arrangements for the use of sufficient land of the quality and condition necessary for carrying on the type of farming intended on a sound and practical basis. When loans are made to tenants the landlord must have knowledge of and agree to the long-time farm and home plan.

(h) Before a loan can be made to an applicant for whom debts have been settled pursuant to Part 364 of this chapter as reflected by the County Office records, or where a settlement under such part is contemplated, it must appear conclusively that the applicant's failure to repay his loan indebtedness was the result of circumstances beyond his control; the causes which necessitated the debt settlement, other than weather hazards, disasters, or price fluctuations, have been removed; and the borrower's operations are now sound and afford him a better than reasonable prospect of repaying the loan and meeting his other obligations. Loans in such cases must be submitted to the National Office for review prior to approval.

§ 342.7 *Making annual loans.* In areas where farmers have suffered property damage or production losses because of natural calamities, and a need exists for emergency credit, generally such need will be met through the authority to make disaster loans under Part 381 of this chapter. However, if it is found that an applicant does not qualify for a disaster loan, but due to circumstances beyond his control, such as losses of property by fire or natural causes and severe illnesses resulting in the temporary loss of earning power or excessive demands on income, is in need of emergency credit and meets the requirements set forth in § 342.2 (a), an annual Production and Subsistence loan may be made provided the applicant is conducting sound farming operations of a satisfactory nature and does not need to make major adjustments in such operations, and it is not anticipated that similar loans will be needed in subsequent years.

(a) Before an annual loan is made, the loan approval official will determine that the loan can be repaid within a period not to exceed twelve months, except that loans to purchase or produce feed for livestock being fed for market or to purchase or produce feed for productive livestock, may be repaid as provided in § 342.4 (e), without jeopardizing the applicant's future operations; the amount of the loan and the purposes for which the funds are to be used are consistent with the applicant's needs for the year; the applicant has made adequate provision for meeting all necessary farm and home expenses, either through the loan or other sources; and, the estimated income from which the loan will be paid is sufficient for that purpose and to provide a reasonably safe margin, taking into consideration production hazards and price fluctuations.

(b) The foregoing determinations will be based upon an analysis of the applicant's resources, farming experience and ability, debt repayment history, and proposed operations. Current and reliable information regarding the past record of the applicant, the quality of farming operations carried on by him and the productivity of the farm to be operated must be available as a basis for making this analysis. A visit to the farm before the loan is approved is required in order to obtain this information unless the County Supervisor can obtain it without going to the farm.

[FHA Instruction 441.3]

PART 343—PROCESSING

Part 343, Title 6, Code of Federal Regulations (14 F. R. 4971, 15 F. R. 1479, 7418, 17 F. R. 5416), is revised to read as follows:

Sec.
343.1 General.
343.2 Definitions.
343.3 Loan forms and routines.
343.4 Approval or rejection of loans.
343.5 Loan closing.
343.6 Revision in the use of loan funds.

AUTHORITY: §§ 343.1 to 343.6 issued under sec. 41 (1), 60 Stat. 1066; 7 U. S. C. 1015 (1). Statutory provisions interpreted or applied are cited to text in parentheses.

DERIVATION: §§ 343.1 to 343.6 contained in FHA Instruction 441.3.

§ 343.1 *General.* Sections 343.2 to 343.6 set forth the requirements and procedures for the preparation and execution of documents and for other routines in connection with making Production and Subsistence loans.

§ 343.2 *Definitions.* (a) "Applicant" is any individual who applies for a Production and Subsistence loan, regardless of whether he has previously obtained or is presently indebted for a loan.

(b) "Initial adjustment loan" is a Production and Subsistence loan based upon a farm and home plan and made to an applicant who is not indebted for a Production and Subsistence loan based upon such a plan or is not indebted for a Rural Rehabilitation loan.

(c) "Subsequent adjustment loan" is a Production and Subsistence loan based upon a farm and home plan and made to an applicant who is indebted for a Production and Subsistence loan based upon such a plan or is indebted for a Rural Rehabilitation loan.

(d) "Annual loan" is a Production and Subsistence loan not based on a farm and home plan. The terms "initial" and "subsequent" are not used in connection with annual loans.

(Sec. 21 (a), 65 Stat. 197; 7 U. S. C. 1007)

§ 343.3 *Loan forms and routines—*(a) *Applications for loans.* Applications for Production and Subsistence loans will be made at the County Office and will be acted upon promptly.

(1) Applicants for initial adjustment loans will execute Form FHA–197, "Application for FHA Services," in an original only.

(2) Applicants for subsequent adjustment loans will not be required to execute Form FHA–197, but will be required to execute Form FHA–49, "Certifications-Production and Subsistence Loans," in accordance with paragraph (b) (1) of this section. Also, if current financial information is not available in the County Office records, table A of Form FHA–14, "Farm and Home Plan," will be completed in an original only for the use of the County Committee in determining the eligibility of the applicant.

(3) Applicants for annual loans will execute Form FHA–197 and Form FHA–197A, "Report on Application for Loan," in the originals only.

(b) *Form FHA–49, "Certifications—Production and Subsistence Loans."* (1) Part I, "Applicant Certification," on Form FHA–49 will be executed by each applicant at the time the application for assistance for the crop year is made. However, if the County Committee has previously certified the applicant as eligible for loan assistance for a designated crop year, it will not be necessary for the applicant to execute another certification on Form FHA–49 in connection with loan assistance to be extended within the maximum amount established and the period covered by the Committee certification.

(2) When the applicant is determined to be eligible, the County Committee will execute Part II, "County Committee Certification," on Form FHA–49 before the loan is approved. This certification will cover any loan(s) to be made to the applicant during the crop year specified, within the maximum amount of credit established by the County Committee.

(3) When the applicant is determined to be ineligible by the County Committee, the County Supervisor will notify the applicant of the County Committee action and the reasons therefor.

(4) County Committee actions regarding the eligibility of applicants will be taken in committee meetings attended by at least two members.

(c) *Form FHA–14A, "Long-time Farm and Home Plan."* Form FHA–14A will be prepared in connection with adjustment type loans and the original thereof will be retained by the applicant.

(d) *Form FHA–14, "Farm and Home Plan."* In making adjustment loans, a Farm and Home Plan encompassing the applicant's operations and credit needs upon a farm and home plan and made to an applicant who is indebted for a Production and Subsistence loan based upon such a plan or is indebted for a Rural Rehabilitation loan.

account, the intial mortgage to secure

(Sec. 21 (a), 65 Stat. 197, sec. 44 (a), (b),

(3) Loans to establish a water facili-

for the planned crop year will be developed. The applicant will be provided a copy of the Farm and Home Plan either in the record book or on Form FHA–14.

(e) *Tenure agreement.* A copy of the lease agreement between tenant applicants and their landlords or a statement containing the terms and conditions of the agreement, whether written or oral, will be obtained. When applicants are acquiring their farms under purchase contracts or subject to mortgages, a copy of such contract or mortgage, or a statement containing the terms and conditions thereof, will likewise be obtained.

(f) *Form FHA–31, "Promissory Note."* Form FHA–31 will be prepared to show the full amount of each loan and the scheduled repayments thereon which will be in multiples of $5. Not more than four repayments on a single note will be scheduled for any year. The time limitations for repayment schedules prescribed in § 342.4 of this chapter run from the date of the loan check instead of the date of the note. Form FHA–31 will be dated as of the date of execution by the applicant, and the original only will be executed. The applicant's spouse will be required to execute Form FHA–31 when legally required by State law, or the loan approval official determines that the signature is needed because of the spouse's interest in the farm being operated or in property offered as security, or it is determined by the State Director on a state basis that the spouse's signature will be required. A copy of Form FHA–31 will be given to the applicant.

(1) The following requirements will be met in establishing repayment schedules:

(i) Payments will be scheduled at least annually, unless it is determined that income sufficient to meet the initial payment will not be received within 12 months from the date of the loan check, in which case the initial payment may be scheduled on a date coinciding with the date the income is to be received but not beyond 18 months from the date of the loan check, and at least one payment will be scheduled during each 12-month period thereafter. In no event will payments be scheduled later than 7 years from the date of the loan check.

(ii) When the initial payment is to be deferred pursuant to the authority contained in § 342.4 (d) of this chapter, the first payment will be scheduled to fall due when the principal income from the second full crop year normally would be expected and payments will be scheduled at least annually thereafter except that the date of the last installment may not extend beyond 7 years from the date of the loan check. If a loan is made during a crop year and sufficient time remains in that year for the applicant to realize substantial benefits from the year's operations, the crop year during which the loan was made will be considered as the first full crop year. Otherwise, the crop year immediately following that during which the loan was made will be considered as the first full crop year. The amount of the initial installment will be based upon the applicant's anticipated ability to pay by the end of the second full crop year following the date of the loan check, taking into consideration the fact that the interest which has accrued during the period of deferment will fall due concurrently with the initial installment.

(iii) The amount of each installment must be based upon the repayment ability of the borrower and in every case must be more than a mere nominal or token payment.

(g) *Form FHA–5, "Loan Voucher."* The applicant will be required to execute Form FHA–5 for the amount of each loan.

(h) *Immediate and future loans.* All of an applicant's anticipated credit needs for the crop year will be planned for when Form FHA–14 or Form FHA–197A is developed. The loan documents may provide for the loan funds to be disbursed in an immediate loan, or an immediate loan and one or more future loans, or one or more future loans without an immediate loan. However, all of such loans must be disbursed at least 30 days apart and not later than the end of the fiscal year in which they were approved. If it is not practical for all the loans to be disbursed by the end of the fiscal year, additional loans may be approved after the beginning of the succeeding fiscal year to meet the remainder of the applicant's credit needs for the designated crop year.

(i) *Form FHA–87, "Report of Lien Search."* Form FHA–87 or other form providing substantially the same information will be obtained. Generally, the applicant will be required to obtain the lien search report from the sources selected by him and to pay the cost thereof out of his own funds or out of loan funds. However, in a given county if the cost of lien searcher is exorbitant, or if such service is not available, the State Director may authorize the employees of the County Office to perform this service without cost to applicants.

(j) *Form FHA–30, "Crop and Chattel Mortgage."* The original (and one copy if it is to be filed rather than recorded) will be executed by the applicant, and will be acknowledged or witnessed as required by State law. The requirements for the signature of the applicant's spouse will be as prescribed for Form FHA–31 in paragraph (f) of this section.

(k) *Form FHA–32, "Subordination Agreement."* When required by paragraph (f) of § 342.5 of this chapter, the applicant will obtain from the landlord a subordination agreement on Form FHA–32. Such form will be prepared in a sufficient number of copies to provide one to each party executing the agreement. Form FHA–32 is not required when Form FHA–81, "Standard Farm Lease," containing a subordination agreement, is used.

(l) *Form FHA–80, "Assignment of Proceeds From the Sale of Agricultural Products."* Form FHA–80, or other form approved by the State Director and the representative of the Office of the Solicitor, will be used to obtain an assignment of proceeds from the sale of farm, dairy, or other agricultural products. Form FHA–80, or other form, will be prepared in an original and two copies and signed by the applicant and the purchaser. One copy will be given to the purchaser, and one copy will be given to the applicant.

(Sec. 21 (a), (c), 65 Stat. 197, sec. 42 (c), 60 Stat. 1067, sec. 44, 60 Stat. 1068, 1069, sec. 48, 60 Stat. 1070, 65 Stat. 198, sec. 1, 63 Stat. 407; 7 U. S. C. 1007, 1015, 1018, 1022; 31 U. S. C. 712a)

§ 343.4 *Approval or rejection of loans.* (a) If the loan is approved, the loan approval official will sign Form FHA–5 and will prescribe any special conditions of approval or special security requirements.

(b) If a loan is rejected, the loan approval official will notify the applicant of the rejection with the return of the original of Form FHA–31 and any executed security instruments.

(Sec. 21, 65 Stat. 197, sec. 44, 60 Stat. 1068, 1069, sec. 48, 60 Stat. 1070, 65 Stat. 198; 7 U. S. C. 1007, 1018, 1022)

§ 343.5 *Loan closing—*(a) *Check delivery.* Only properly bonded employees of the Farmers Home Administration will receive and deliver loan checks. Upon receipt of a loan check, the County Supervisor will notify the applicant promptly, indicating where and when he may expect delivery of the check, or will mail the check to him, or when a supervised bank account is required and the depository bank does not require the applicant's endorsement for deposit, he may deposit the loan check in the supervised bank account and furnish the applicant a copy of the deposit slip. If the bank will not accept the loan check for deposit in a supervised bank account without the applicant's endorsement, the County Supervisor will retain the check and arrange with the applicant for a time and place for its deposit.

(b) *Lien search reports.* At the time or immediately before the security instrument is obtained in accordance with paragraph (d) of this section, a report of lien search must be obtained showing that the security requirements can be met.

(c) *Security documents.* Properly bonded County Office employees are authorized to execute and file or record any legal instruments necessary to obtain or preserve security for loans, including mortgages and similar lien instruments (when the holder of a mortgage or other lien is required to execute the instrument), affidavits, acknowledgments, and other certifications (when the mortgagee must execute such certification under State law).

(d) *Obtaining security for Production and Subsistence loans.* In cases in which capital goods are to be purchased and covered by a lien, the County Supervisor will encourage the applicant to arrange for the purchase of all such items by the time the initial mortgage is taken in order to eliminate the taking of additional mortgages. The taking of security in closing loans will be governed by the following requirements:

(1) If all of the loan funds are deposited in a supervised bank account, the initial mortgage to secure the loan will be taken not later than the date of the first withdrawal of any of the loan funds from such account.

(2) If only a part or none of the loan funds are deposited in a supervised bank account, the intial mortgage to secure the loan will be taken at the time of the delivery of the loan check to the applicant.

(3) If, at the time the initial mortgage is taken under the requirements of subparagraph (1) or (2) of this paragraph, a part of the property which is to serve as security for the loan is yet to be purchased, a first lien will be taken on such property at the time it is purchased unless such a lien is acquired under "Future Advance" or "After Acquired Property" clauses in the mortgage.

(e) *Executing and recording or filing.* Crop and chattel mortgages must be delivered to the recording office for recordation or filing, whichever is appropriate, as soon as such instruments are executed and delivered to the Farmers Home Administration, provided, however, that in those cases in which lien instruments are taken before delivery of the loan checks, they will be delivered to the recording official for filing or recording at the time of the delivery of the loan checks.

(f) *Fees.* Statutory fees for filing or recording mortgages or other legal instruments and notary and lien search fees incident to loan transactions in all cases will be paid by the borrower from personal funds or from the proceeds of the loan. Whenever cash is accepted by Farmers Home Administration personnel to be used to pay the filing or recording fees for security instruments, or the cost of making lien searches, Form FHA–385, "Acknowledgment of Payment for Recording and Lien Search Fees," will be executed and given to the borrower. Farmers Home Administration personnel who accept custody of such fees will make it clear to the borrower that the amount so accepted is not received by the Government as a credit on the borrower's indebtedness, but is accepted only for the purpose of paying the recording, filing, or lien search fees on behalf of the borrower.

(Sec. 21 (a), 65 Stat. 197, sec. 44 (b), (c), 60 Stat. 1069; 7 U. S. C. 1007, 1018)

§ 343.6 *Revision in the use of loan funds.* (a) In all instances, the use made of loan funds must be in accord with the purposes for which Production and Subsistence loans may be made. However, changes may be made in the use of loan funds within such authorized purposes, provided the borrower and the County Supervisor agree to the changes.

(b) When changes are made in the use of loan funds, no revision will be made in the repayment schedule on Form FHA–31. However, when funds loaned for the purchase of capital goods are to be used to meet operating expenses, the borrower must agree to repay the funds so used in accordance with the repayment terms prescribed in § 342.4 of this chapter. Appropriate changes with respect to the repayments will be made in table K of Form FHA–14 or table H of Form FHA–197A and initialed by the borrower.

(Sec. 21 (a), 65 Stat. 197, sec. 44 (a), (b), 60 Stat. 1068, 1069, sec. 48, 60 Stat. 1070, 65 Stat. 196; 7 U. S. C. 1007, 1018, 1022)

[FHA Instruction 442.1]

PART 351—APPROVAL AUTHORITY

Part 351, Title 6, Code of Federal Regulations, (13 F. R. 9425, 16 F. R. 5861), is revised to read as follows:

Sec.
351.1 Authorization to State Directors.
351.2 Authorization to State Directors to redelegate loan approval authority.

AUTHORITY: §§ 351.1 and 351.2 issued under sec. 6 (3), 50 Stat. 870; 16 U. S. C. 590w (3). Interpret or apply secs. 2 (3), 5, 50 Stat. 869, 870; 16 U. S. C. 590s (3), 590v.

§ 351.1 *Authorization to State Directors.* (a) State Directors are authorized to close Water Facilities loans requiring the approval of the Administrator, subject to all of the conditions contained in loan approval letters and documents issued by the Administrator.

(b) Loans in excess of the amounts and authority specified in this section will be submitted to the Administrator for approval.

(c) State Directors are authorized to approve Water Facilities loans subject to applicable loan making policies and to the following limitations:

(1) No Water Facilities loan, initial or subsequent, will be approved which will result in a total outstanding Water Facilities indebtedness of any one individual in excess of $12,000.

(2) No Water Facilities loan, initial or subsequent, will be approved which will result in a total outstanding Water Facilities indebtedness of any one incorporated borrower in excess of $50,000.

(3) The aggregate of loans made to all individuals in connection with any one water facilities group service will not exceed $20,000.

(d) Water Facilities loan applications of former borrowers for whom a debt settlement action has been approved, or of present borrowers for whom a debt settlement action is pending or is contemplated, will be referred to the National Office for approval.

§ 351.2 *Authorization to State Directors to redelegate loan approval authority.* (a) State Directors are authorized to redelegate to State Field Representatives all or any part of their authority to approve Water Facilities loans, except that State Field Representatives may not be authorized to approve:

(1) Loans to incorporated applicants.

(2) Loans made for the purpose of, or loans including funds for, acquiring memberships or water stock in, or paying assessments to, a water association.

(3) Loans to establish a water facilities group service.

(b) State Directors are authorized to redelegate to County Supervisors, in charge of County Offices, all or any part of their authority to approve Water Facilities loans to individuals, except that County Supervisors may not be authorized to approve:

(1) Loans for irrigation purposes.

(2) Any loan, initial or subsequent, which will result in a total outstanding Water Facilities indebtedness in excess of $1,500.

(3) Loans to establish a water facilities group service.

[SEAL] DILLARD B. LASSETER,
Administrator.

AUGUST 14, 1952.

TITLE 7—AGRICULTURE

Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

PART 928—MILK IN THE NEOSHO VALLEY MARKETING AREA

ORDER AMENDING ORDER REGULATING HANDLING

§ 928.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Neosho Valley marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supplies of and demand for milk in the marketing area, and the minimum

Parts 203, 291, 292, 296, 297, and 298 of

prices specified in the order, as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective not later than September 1, 1952. Any delay beyond September 1, 1952 in the effective date of this order amending the order will seriously disrupt the orderly marketing of milk for the Neosho Valley marketing area. The changes effected by this order amending the order do not require of persons affected substantial or extensive preparation prior to the effective date. In view of the foregoing it is hereby found that good cause exists for making this order effective September 1, 1952 (sec. 4 (c), Administrative Procedure Act, 5 U. S. C. 1003 (c)).

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order amending the order which is marketed within the Neosho Valley marketing area) of more than 50 percent of the milk which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said proposed marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order is approved or favored by at least two-thirds of the producers who, during the determined representative period (July 1952), were engaged in the production of milk for sale in the said marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof the handling of milk in the Neosho Valley marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order as hereby amended, and the aforesaid order is hereby amended as follows:

1. In § 928.51 (a) change the period at the end of the sentence to a colon and add *"And provided further,* That for the months of September 1952, through January 1953, the amount to be added to the basic formula price shall be $1.85 in lieu of $1.45."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 22d day of August 1952, to be effective on and after the 1st day of September 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

[F. R. Doc. 52-9426; Filed, Aug. 26, 1952; 8:53 a. m.]

[Peach Order 1, Amdt. 1]

PART 940—PEACHES GROWN IN THE COUNTY OF MESA IN COLORADO

REGULATION BY GRADES AND SIZES

a. *Findings.* 1. Pursuant to the amended marketing agreement and Order No. 40, as amended (7 CFR Part 940), regulating the handling of peaches grown in the County of Mesa in the State of Colorado, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Administrative Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of such peaches, as hereinafter provided, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than August 25, 1952.

Shipments of peaches grown in Mesa County, Colorado, are currently subject to regulation by grades and sizes in accordance with the provisions of Peach Order 1 (§ 940.304; 17 F. R. 7383) and will continue to be so regulated, unless such order is amended, until 12:01 a. m., m. s. t., October 16, 1952; information showing that such order should be amended, in order to effectuate the declared policy of the act, prior to the shipping season of Elberta peaches grown in Mesa County, Colorado, was received by the Department on August 22, 1952; shipments of such peaches are expected to begin on or about August 25, 1952; the aforesaid information was submitted by the Administrative Committee following its meeting on August 21, 1952, with growers and handlers of peaches; such meeting was called to discuss necessary changes in the current regulation and was held pursuant to notice, mailed on August 19, 1952, to all peach growers and handlers of record; the provisions of this amendment are identical to those recommended at the aforesaid meeting; and compliance with the provisions of this amendment will not require of handlers any preparation therefor which cannot be completed prior to the effective time hereof.

b. It is therefore ordered as follows: The provisions of paragraph (b) (1) (ii) of § 940.304 (Peach Order 1; 17 F. R. 7383) are hereby amended to read as follows:

(ii) Any peaches which are of a size smaller than 2⅛ inches in diameter: *Provided,* That any lot of peaches shall be deemed to be of a size not smaller 2⅛ inches in diameter (*a*) if not more than 10 percent, by count, of the peaches in such lot are smaller than 2⅛ inches in diameter and if not more than 15 percent, by count, of the peaches contained in any individual container in such lot are smaller than 2⅛ inches in diameter; or (*b*) if the peaches in such lot are shipped in peach boxes and the peaches are of a size not smaller than a size that will pack, in accordance with the specifications of a standard pack, a count of 70 peaches in a peach box, except that the tolerance for variations incident to proper packing, provided in such pack specifications, shall not permit a variation of more than 4 peaches in any such box.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 22d day of August 1952 to become effective at 12:01 a. m., m. s. t., August 25, 1952.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Branch, Production and Marketing Administration.

[F. R. Doc. 52-9423; Filed, Aug. 26, 1952; 8:52 a. m.]

PART 950—PEACHES GROWN IN UTAH

DETERMINATION RELATIVE TO EXPENSES AND FIXING OF RATE OF ASSESSMENT FOR 1952–53 FISCAL YEAR

Notice was published in the August 2, 1952, daily issue of the FEDERAL REGISTER (17 F. R. 7095) that consideration was being given to proposals regarding the expenses and the fixing of the rate of assessment for the 1952–53 fiscal year under the marketing agreement and Order No. 50 (7 CFR Part 950) regulating the handling of peaches grown in Utah, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice which were submitted by the Administrative Committee (established pursuant to said marketing agreement and order), it is hereby found and determined that:

§ 950.202 *Expenses and rate of assessment for the 1952–53 fiscal year*—(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Administrative Committee, established pursuant to the provisions of the aforesaid marketing agreement and order, to enable such committee to perform its functions, in accordance with the provisions thereof, during the fiscal year beginning May 1, 1952, will amount to $6,000.00.

(b) *Rate of assessment.* The rate of assessment, which each handler who first ships peaches shall pay as his pro rata share of the aforesaid expenses in accordance with the applicable provisions of said marketing agreement and order is hereby fixed at one and one-half cents ($0.015) per bushel basket of peaches, or an equivalent quantity of peaches in other containers or in bulk, shipped by such handler during said fiscal year.

It is hereby further found that it is impracticable and contrary to the public interest to postpone the effective time hereof until 30 days after publication in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that (1) in accordance with the provisions of said marketing agreement and order, the rate of assessment is applicable to all peaches shipped during the 1952–53 fiscal year; (2) such shipments are subject to the regulatory provisions of Peach Order 1 (7 CFR 950.302; 17 F. R. 6809); (3) the provisions hereof do not impose any obligation on a handler until such handler ships peaches; and (4) it is essential that the specification of the assessment rate be issued immediately so that the aforesaid assessments may be collected and thereby enable said Administrative Committee to perform its duties and functions in accordance with said marketing agreement and order.

Notwithstanding the approval of the aforesaid expenses, none of such funds may be used to pay any wage or salary that is inconsistent with the Defense Production Act of 1950, as amended, Executive Order No. 10161, or any supplementary order, directive, or regulation pursuant thereto.

As used herein, the terms "handler," "ships," "shipped," "shipments," "peaches," and "fiscal year" shall have the same meaning as when used in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 22d day of August 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter B—Economic Regulations

[Regs., Serial No. ER-176]

PART 202—TERMS, CONDITIONS AND LIMITATIONS OF CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY; INTERSTATE AND OVERSEAS AIR TRANSPORTATION

BUSINESS NAME OF AIR CARRIER

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 19th day of August 1952.

At the present time the Economic Regulations of the Board do not attempt to regulate the names under which air carriers do business. While a change in name by the holder of a certificate of public convenience and necessity has always been regarded by the Board as requiring an amendment to such certificate, there is no express requirement that the carrier do business under the exact name in which its certificate is issued. The Board possesses the power, pursuant to section 411 of the Civil Aeronautics Act to require a carrier, after notice and hearing, to cease and desist from the use of a given name in cases where it finds that such use by the carrier concerned amounts to an unfair or deceptive practice or an unfair method of competition.

Until the relatively recent past there has been no need to make specific provision relating to the use of business names by air carriers since most carriers were in fact doing business under their certificated name without any compulsion to do so. However, there has been an increasing tendency, particularly among some of the large irregular carriers, to use names different from those in which operating authority is granted by the Board, in some cases the name being used having no identifiable relation to the name in which the authority is held. This has resulted in confusion in the minds of the public, an increase in the administrative burden of the Board, and greater difficulty in achieving adequate enforcement of the act and the regulations. The Board has received an increasingly large number of complaints from the public indicating that the complainant did not know the true identity of the carrier against which the complaint was being made. In several instances, it has been necessary to undertake considerable correspondence and even field investigations in order to identify the carrier responsible. Aircraft accidents have been reported in the press as having involved air carriers bearing names not registered with or even known to the Board. In at least one instance, a trade name of a carrier whose operating authority had been revoked for willful violation of the act was assumed by another carrier operated by the same management personnel as that of the carrier whose authority had been revoked.

Most important, the foregoing practices, combined with equally unstable identities among ticket agencies, have made it difficult, and in many instances impossible, for members of the traveling public to know the identity with whom they are doing business. This has had serious consequences both with respect to the business relationships involved and with respect to liability for injury or death of a passenger or other members of the public, or the loss of or damage to property.

The possibility of such abuse exists for every type of air carrier, irrespective of how its operations are authorized; and, even though the number of abuses has been relatively small, the Board believes that it should now take action to enable it to deal effectively with such abuses and to prevent their occurrence. For this reason it is adopting this regulation together with companion amendments to Parts 203, 291, 292, 296, 297, and 298 of the Economic Regulations. In so doing it is the intention of the Board to permit the greatest managerial discretion possible in the use of business names consistent with the objective of the regulation. Accordingly, the regulation permits use of abbreviations, initials, nicknames and other variations of the name on file with the Board without obtaining permission therefor and places no restrictions on the use of slogans. Moreover, in cases where the circumstances warrant such action, the Board may permit the use of two or more different names by one carrier upon a showing that such multiple use will not be contrary to the public interest. It should be noted that the carrier may make application for authority to use a substitute name without the necessity for going through a full public hearing as required by section 401 (h). Permission granted to that end will not effect a formal change in name, but will merely constitute authority to use a different name.

It should also be noted that the restriction on the use of names does not become effective until 60 days after the effective date of the regulation. This 60-day period is designed to enable carriers which have developed goodwill in a name different from that in which their operating authority is held, to apply for and obtain permission to use such other name either exclusively or in conjunction with its certificated name. In cases where goodwill has been established in a name by use thereof, the Board will deny permission to continue such name only in cases where it believes that a violation of section 411 may be involved and such fact has been established after notice and opportunity for a hearing.

Interested persons have been afforded an opportunity to participate in the making of this rule and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 202 of the Economic Regulations (14 CFR Part 202) effective September 23, 1952, by adding thereto a new § 202.8 to read as follows:

§ 202.8 *Business name of air carrier.* On and after November 15, 1952, it shall be an express condition upon the operating authority granted by each certificate issued pursuant to section 401 of the act authorizing an air carrier to engage in interstate or overseas air transportation, that the air carrier concerned, in holding out to the public and in performing air transportation services shall do so only in a name the use of which is authorized under the provisions of this section.

(a) Except as otherwise provided under paragraph (b) of this section, an air carrier may do business in the name in which its certificate of public convenience and necessity is then issued and outstanding, including abbreviations, contractions, initial letters, or other minor variations of such name which are readily indentifiable therewith.

(b) An air carrier may do business in no identifiable relation to the name in

[Regs., Serial No. ER-178]

The possibility of such abuse exists

(b) An air carrier may do business in

(b) An air carrier may do business in such other and different name or names as the Board may by order permit, upon a finding that the use of such other name or names is not contrary to the public interest. Any such permission may be made conditional upon the abandonment of the use of the certificated name in air transportation service by the air carrier concerned, or otherwise be made subject to such reasonable terms and conditions as the Board may find necessary to protect the public interest.

(c) Slogans shall not be considered names for the purposes of this section, and their use is not restricted hereby.

(d) Neither the provisions of this section nor the grant of a permission hereunder shall be deemed to constitute a finding for purposes other than for this section, or to effect a waiver of, or exemption from, any provisions of the Civil Aeronautics Act, or any orders, rules, or regulations issued thereunder.

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply secs. 411, 416; 52 Stat. 1004, as amended; 49 U. S. C. 491, 496)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

[Regs., Serial No. ER-177]

PART 203—TERMS, CONDITIONS AND LIMITATIONS OF CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY; FOREIGN AIR TRANSPORTATION

BUSINESS NAME OF AIR CARRIER

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 19th day of August 1952.

At the present time the Economic Regulations of the Board do not attempt to regulate the names under which air carriers do business. While a change in name by the holder of a certificate of public convenience and necessity has always been regarded by the Board as requiring an amendment to such certificate, there is no express requirement that the carrier do business under the exact name in which its certificate is issued. The Board possesses the power, pursuant to section 411 of the Civil Aeronautics Act to require a carrier, after notice and hearing, to cease and desist from the use of a given name in cases where it finds that such use by the carrier concerned amounts to an unfair or deceptive practice or an unfair method of competition.

Until the relatively recent past there has been no need to make specific provision relating to the use of business names by air carriers since most carriers were in fact doing business under their certificated name without any compulsion to do so. However, there has been an increasing tendency, particularly among some of the large irregular carriers, to use names different from those in which operating authority is granted by the Board, in some cases the name being used having no identifiable relation to the name in which the authority is held. This has resulted in confusion in the minds of the public, an increase in the administrative burden of the Board, and greater difficulty in achieving adequate enforcement of the act and the regulations. The Board has received an increasingly large number of complaints from the public indicating that the complainant did not know the true identity of the carrier against which the complaint was being made. In several instances, it has been necessary to undertake considerable correspondence and even field investigations in order to identify the carrier responsible. Aircraft accidents have been reported in the press as having involved air carriers bearing names not registered with or even known to the Board. In at least one instance, a trade name of a carrier whose operating authority had been revoked for willful violation of the act was assumed by another carrier operated by the same management personnel as that of the carrier whose authority had been revoked.

Most important, the foregoing practices, combined with equally unstable identities among ticket agencies, have made it difficult, and in many instances impossible, for members of the traveling public to know the identity with whom they are doing business. This has had serious consequences both with respect to the business relationships involved and with respect to liability for injury or death of a passenger or other members of the public, or the loss of or damage to property.

The possibility of such abuse exists for every type of air carrier, irrespective of how its operations are authorized; and, even though the number of abuses has been relatively small, the Board believes that it should now take action to enable it to deal effectively with such abuses and to prevent their occurrence. For this reason it is adopting this regulation together with companion amendments to Parts 202, 291, 292, 296, 297 and 298 of the Economic Regulations. In so doing it is the intention of the Board to permit the greatest managerial discretion possible in the use of business names consistent with the objective of the regulation. Accordingly, the regulation permits use of abbreviations, initials, nicknames and other variations of the name on file with the Board without obtaining permission therefor and places no restrictions on the use of slogans. Moreover, in cases where the circumstances warrant such action, the Board may permit the use of the two or more different names by one carrier upon a showing that such multiple use will not be contrary to the public interest. It should be noted that the carrier may make application for authority to use a substitute name without the necessity for going through a full public hearing as required by section 401 (h). Permission granted to that end will not effect a formal change in name, but will merely constitute authority to use a different name.

It should also be noted that the restriction on the use of names does not become effective until 60 days after the effective date of the regulation. This 60-day period is designed to enable carriers which have developed goodwill in a name different from that in which their operating authority is held, to apply for and obtain permission to use such other name either exclusively or in conjunction with its certificated name. In cases where goodwill has been established in a name by use thereof, the Board will deny permission to continue such name only in cases where it believes that a violation of section 411 may be involved and such fact has been established after notice and opportunity for a hearing.

Interested persons have been afforded an opportunity to participate in the making of this rule and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 203 of the Economic Regulations (14 CFR Part 203) effective September 23, 1952, by adding thereto a new § 203.9 to read as follows:

§ 203.9 *Business name of air carrier.* On and after November 15, 1952, it shall be an express condition upon the operating authority granted by each certificate issued pursuant to section 401 of the act authorizing an air carrier to engage in foreign air transportation, that the air carrier concerned, in holding out to the public and in performing air transportation services shall do so only in a name the use of which is authorized under the provisions of this section.

(a) Except as otherwise provided under paragraph (b) of this section, an air carrier may do business in the name in which its certificate of public convenience and necessity is then issued and outstanding, including abbreviations, contractions, initial letters, or other minor variations of such name which are readily identifiable therewith.

(b) An air carrier may do business in such other and different name or names as the Board may by order permit, upon a finding that the use of such other name or names is not contrary to the public interest. Any such permission may be made conditional upon the abandonment of the use of the certificated name in air transportation service by the air carrier concerned, or otherwise be made subject to such reasonable terms and conditions as the Board may find necessary to protect the public interest.

(c) Slogans shall not be considered names for the purposes of this section, and their use is not restricted hereby.

(d) Neither the provisions of this section nor the grant of a permission hereunder shall be deemed to constitute a finding for purposes other than for this section, or to effect a waiver of, or exemption from, any provisions of the Civil Aeronautics Act, or any orders, rules, or regulations issued thereunder.

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply secs. 411, 416; 52 Stat. 1004, as amended; 49 U. S. C. 491, 496)

By the Civil Aeronautics Board.

PART 291—CLASSIFICATION AND CONTINUED EXEMPTION OF LARGE IRREGULAR AIR CARRIERS

BUSINESS NAME OF AIR CARRIER

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 19th day of August 1952.

At the present time the Economic Regulations of the Board do not attempt to regulate the names under which air carriers do business. While a change in name by the holder of a certificate of public convenience and necessity has always been regarded by the Board as requiring an amendment to such certificate, there is no express requirement that the carrier do business under the exact name in which its economic operating authority is issued. The Board possesses the power, pursuant to section 411 of the Civil Aeronautics Act to require a carrier, after notice and hearing, to cease and desist from the use of a given name in cases where it finds that such use by the carrier concerned amounts to an unfair or deceptive practice or an unfair method of competition.

Until the relatively recent past there has been no need to make specific provision relating to the use of business names by air carriers since most carriers were in fact doing business under their official name without any compulsion to do so. However, there has been an increasing tendency, particularly among some of the large irregular carriers, to use names different from those in which operating authority is granted by the Board, in some cases the name being used having no identifiable relation to the name in which the authority is held. This has resulted in confusion in the minds of the public, an increase in the administrative burden of the Board, and greater difficulty in achieving adequate enforcement of the act and the regulations. The Board has received an increasingly large number of complaints from the public indicating that the complainant did not know the true identity of the carrier against which the complaint was being made. In several instances, it has been necessary to undertake considerable correspondence and even field investigations in order to identify the carrier responsible. Aircraft accidents have been reported in the press as having involved air carriers bearing names not registered with or even known to the Board. In at least one instance, a trade name of a carrier whose operating authority had been revoked for willful violation of the act was assumed by another carrier operated by the same management personnel as that of the carrier whose authority had been revoked.

Most important, the foregoing practices, combined with equally unstable identities among ticket agencies, have made it difficult, and in many instances impossible, for members of the traveling public to know the identity with whom they are doing business. This has had serious consequences both with respect to the business relationships involved and with respect to liability for injury or death of a passenger or other members of the public, or the loss of or damage to property.

The possibility of such abuse exists for every type of air carrier, irrespective of how its operations are authorized; and, even though the number of abuses has been relatively small, the Board believes that it should now take action to enable it to deal effectively with such abuses and to prevent their occurrence. For this reason it is adopting this regulation together with companion amendments to Parts 202, 203, 292, 296, 297, and 298 of the Economic Regulations. In so doing it is the intention of the Board to permit the greatest managerial discretion possible in the use of business names consistent with the objective of the regulation. Accordingly, the regulation permits use of abbreviations, initials, nicknames and other variations of the name on file with the Board without obtaining permission therefor and places no restrictions on the use of slogans. Moreover, in cases where the circumstances warrant such action, the Board may permit the use of two or more different names by one carrier upon a showing that such multiple use will not be contrary to the public interest. Permission granted under this part will not effect a formal change in name, but will merely constitute authority to use a different name.

It should also be noted that the restriction on the use of names does not become effective until 60 days after the effective date of the regulation. This 60-day period is designed to enable carriers which have developed goodwill in a name different from that in which their operating authority is held, to apply for and obtain permission to use such other name either exclusively or in conjunction with its certificated name. In cases where goodwill has been established in a name by use thereof, the Board will deny permission to continue such name only in cases where it believes that a violation of section 411 may be involved and such fact has been established after notice and opportunity for a hearing.

Interested persons have been afforded an opportunity to participate in the making of this rule and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 291 of the Economic Regulations (14 CFR Part 291) effective September 23, 1952, by adding thereto a new § 291.28 to read as follows:

§ 291.28 *Business name of air carrier.* On and after November 15, 1952, it shall be an express condition upon the operating authority granted by this part and the letters of registration issued hereunder that the air carrier concerned, in holding out to the public and in performing air transportation services shall do so only in a name the use of which is authorized under the provisions of this section.

(a) Except as provided under paragraph (b) of this section, an air carrier may do business in the name in which its letter of registration is then issued and outstanding, including abbreviations, contractions, initial letters, or other minor variations of such name which are readily identifiable therewith.

(b) An air carrier may do business in such other and different name or names as the Board may by order permit, upon a finding that the use of such other name or names is not contrary to the public interest. Any such permission may be made conditional upon the abandonment of the use of the name in which its letter of registration is issued and outstanding, in air transportation service by the air carrier concerned, or otherwise be made subject to such reasonable terms and conditions as the Board may find necessary to protect the public interest.

(c) Slogans shall not be considered names for the purposes of this section, and their use is not restricted hereby.

(d) Neither the provisions of this section nor the grant of a permission hereunder shall be deemed to constitute a finding for purposes other than for this section, or to effect a waiver of, or exemption from, any provisions of the Civil Aeronautics Act, or any orders, rules, or regulations issued thereunder.

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply secs. 411, 416; 52 Stat. 1004, as amended; 49 U. S. C. 491, 496)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

PART 292—CLASSIFICATION AND EXEMPTION OF ALASKAN AIR CARRIERS

BUSINESS NAME OF AIR CARRIER

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 19th day of August 1952.

At the present time the Economic Regulations of the Board do not attempt to regulate the names under which air carriers do business. While a change in name by the holder of a certificate of public convenience and necessity has always been regarded by the Board as requiring an amendment to such certificate, there is no express requirement that the carrier do business under the exact name in which its economic operating authority is issued. The Board possesses the power, pursuant to section 411 of the Civil Aeronautics Act to require a carrier, after notice and hearing, to cease and desist from the use of a given name in cases where it finds that such use by the carrier concerned amounts to an unfair or deceptive practice or an unfair method of competition.

Until the relatively recent past there has been no need to make specific provision relating to the use of business names by air carriers since most carriers were in fact doing business under their official name without any compulsion to do so. However, there has been an increasing tendency, particularly among some of the large irregular carriers, to use names different from those in which operating authority is granted by the Board, in some cases the name being used having no identifiable relation to the name in which the authority is held. This has resulted in confusion in the minds of the public, an increase

in the administrative burden of the Board, and greater difficulty in achieving adequate enforcement of the act and the regulations. The Board has received an increasingly large number of complaints from the public indicating that the complainant did not know the true identity of the carrier against which the complaint was being made. In several instances, it has been necessary to undertake considerable correspondence and even field investigations in order to identify the carrier responsible. Aircraft accidents have been reported in the press as having involved air carriers bearing names not registered with or even known to the Board. In at least one instance, a trade name of a carrier whose operating authority had been revoked for willful violation of the act was assumed by another carrier operated by the same management personnel as that of the carrier whose authority had been revoked.

Most important, the foregoing practices, combined with equally unstable identities among ticket agencies, have made it difficult, and in many instances impossible, for members of the traveling public to know the identity with whom they are doing business. This had had serious consequences both with respect to the business relationships involved and with respect to liability for injury or death of a passenger or other members of the public, or the loss of or damage to property.

The possibility of such abuse exists for every type of air carrier, irrespective of how its operations are authorized; and, even though the number of abuses has been relatively small, the Board believes that it should now take action to enable it to deal effectively with such abuses and to prevent their occurrence. For this reason it is adopting this regulation together with companion amendments to Parts 202, 203, 291, 296, 297 and 298 of the Economic Regulations. In so doing it is the intention of the Board to permit the greatest managerial discretion possible in the use of business names consistent with the objective of the regulation. Accordingly, the regulation permits use of abbreviations, initials, nicknames and other variations of the name on file with the Board without obtaining permission therefor and places no restrictions on the use of slogans. Moreover, in cases where the circumstances warrant such action, the Board may permit the use of two or more different names by one carrier upon a showing that such multiple use will not be contrary to the public interest. It should be noted that a certificated carrier may make application for authority to use a substitute name without the necessity for going through a full public hearing as required by section 401 (h). Permission granted to that end will not effect a formal change in name, but will merely constitute authority to use a different name.

It should also be noted that the restriction on the use of names does not become effective until 60 days after the effective date of the regulation. This 60-day period is designed to enable carriers which have developed goodwill in a name different from that in which their operating authority is held, to apply for and obtain permission to use such other name either exclusively or in conjunction with its official name. In cases where goodwill has been established in a name by use thereof, the Board will deny permission to continue such name only in cases where it believes that a violation of section 411 may be involved and such fact has been established after notice and opportunity for a hearing.

Interested persons have been afforded an opportunity to participate in the making of this rule and due consideration has been given to all relevant matter presented.

[Reg., Serial No. ER-180]

PART 296—CLASSIFICATION AND EXEMPTION OF AIR FREIGHT FORWARDERS

BUSINESS NAME OF AIR CARRIER

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 19th day of August 1952.

At the present time the Economic Regulations of the Board do not attempt to regulate the names under which air carriers do business. While a change in name by the holder of a certificate of public convenience and necessity has always been regarded by the Board as requiring an amendment to such certificate, there is no express requirement that the carrier do business under the exact name in which its economic operating authority is issued. The Board possesses the power, pursuant to section 411 of the Civil Aeronautics Act to require a carrier, after notice and hearing, to cease and desist from the use of a given name in cases where it finds that such use by the carrier concerned amounts to an unfair or deceptive practice or an unfair method of competition.

Until the relatively recent past there has been no need to make specific provision relating to the use of business names by air carriers since most carriers were in fact doing business under their official name without any compulsion to do so. However, there has been an increasing tendency, particularly among some of the large irregular carriers, to use names different from those in which operating authority is granted by the Board, in some cases the name being used having no identifiable relation to the name in which the authority is held. This has resulted in confusion in the minds of the public, an increase in the administrative burden of the Board, and greater difficulty in achieving adequate enforcement of the act and the regulations. The Board has received an increasingly large number of complaints from the public indicating that the complainant did not know the true identity of the carrier against which the complaint was being made. In several instances, it has been necessary to undertake considerable correspondence and even field investigations in order to identify the carrier responsible. Aircraft accidents have been reported in the press as having involved air carriers bearing names not registered with or even known to the Board. In at least one instance, a trade name of a carrier whose operating authority had been revoked for willful violation of the act was assumed by another carrier operated by the same management personnel as that of the carrier whose authority had been revoked.

Most important, the foregoing practices, combined with equally unstable identities among ticket agencies, have made it difficult, and in many instances impossible, for members of the traveling public to know the identity with whom they are doing business. This has had serious consequences both with respect to the business relationships involved and with respect to liability for injury or death of a passenger or other members of the public, or the loss of or damage to property.

The possibility of such abuse exists for every type of air carrier, irrespective, of how its operations are authorized; and, even though the number of abuses has been relatively small, the Board believes that it should now take action to enable it to deal effectively with such abuses and to prevent their occurrence. For this reason it is adopting this regulation together with companion amendments to Parts 202, 203, 291, 292, 297, and 298 of the Economic Regulations. In so doing it is the intention of the Board to permit the greatest managerial discretion possible in the use of business names consistent with the objective of the regulation. Accordingly, the regulation permits use of abbreviations, initials, nicknames and other variations of the name on file with the Board without obtaining permission therefor and places no restrictions on the use of slogans. Moreover, in cases where the circumstances warrant such action, the Board may permit the use of two or more different names by one carrier upon a showing that such multiple use will not be contrary to the public interest. Permission granted under this part will not effect a formal change in name, but will merely constitute authority to use a different name.

It should also be noted that the restriction on the use of names does not become effective until 60 days after the effective date of the regulation. This 60-day period is designed to enable carriers which have developed goodwill in a name different from that in which their operating authority is held, to apply for and obtain permission to use such other name either exclusively or in conjunction with its official name. In cases where goodwill has been established in a name by use thereof, the Board will deny permission to continue such name only in cases where it believes that a violation of section 411 may be involved and such fact has been established after notice and opportunity for a hearing.

Interested persons have been afforded an opportunity to participate in the making of this rule and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 296 of the Economic Regulations (14 CFR Part 296) effective September 23, 1952, by renumbering §§ 296.16, 296.17 and 296.18 of Part 296 to be §§ 296.17, 296.18 and 296.19, respectively, and by adding to Part 296 a new section designated as § 296.16, reading as follows:

§ 296.16 *Business name of air carrier.* On and after November 15, 1952, it shall be an express condition upon exercise of the privileges granted by this part and the letters of registration issued hereunder, that the air freight forwarder concerned, in holding out to the public and in performing air transportation services shall do so only in a name the use of which is authorized under the provisions of this section.

(a) Except as otherwise provided under paragraph (b) of this section, an air freight forwarder may do business in the name in which its letter of registration is then issued and outstanding, including abbreviations, contractions, initial letters, or other minor variations of such name which are readily identifiable therewith.

(b) An air freight forwarder may do business in such other and different name or names as the Board may by order permit, upon a finding that the use of such other name or names it not contrary to the public interest. Any such permission may be made conditional upon the abandonment of the use of the name in which its letter of registration is issued and outstanding, in air transportation service by the air freight forwarder concerned, or otherwise be made subject to such reasonable terms and conditions as the Board may find necessary to protect the public interest.

(c) Slogans shall not be considered names for the purposes of this section, and their use is not restricted hereby.

(d) Neither the provisions of this section nor the grant of a permission hereunder shall be deemed to constitute a finding for purposes other than for this section, or to effect a waiver of, or exemption from, any provisions of the Civil Aeronautics Act, or any orders, rules, or regulations issued thereunder.

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply secs. 411, 416; 52 Stat. 1004, as amended; 49 U. S. C. 491, 496)

By the Civil Aeronautics Board.

[Regs., Serial No. ER-181]

PART 297—INTERNATIONAL AIR FREIGHT FORWARDERS

BUSINESS NAME OF AIR CARRIER

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 19th day of August 1952.

At the present time the Economic Regulations of the Board do not attempt to regulate the names under which air carriers do business. While a change in name by the holder of a certificate of public convenience and necessity has always been regarded by the Board as requiring an amendment to such certificate, there is no express requirement that the carrier do business under the exact name in which its economic operating authority is issued. The Board possesses the power, pursuant to section 411 of the Civil Aeronautics Act, to require a carrier, after notice and hearing, to cease and desist from the use of a given name in cases where it finds that such use by the carrier concerned amounts to an unfair or deceptive practice or an unfair method of competition.

Until the relatively recent past there has been no need to make specific provision relating to the use of business names by air carriers since most carriers were in fact doing business under their official name without any compulsion to do so. However, there has been an increasing tendency, particularly among some of the large irregular carriers, to use names different from those in which

[Regs., Serial No. ER-182]

The possibility of such abuse exists for

radio range station to the Martha's Vin-

any year to each State for expenditure

different from that in which their operating authority is held, to apply for and obtain permission to use such other name either exclusively or in conjunction with its official name. In cases where goodwill has been established in a name by use thereof, the Board will deny permission to continue such name only in cases where it believes that a violation of section 411 may be involved and such fact has been established after notice and opportunity for a hearing.

Interested persons have been afforded an opportunity to participate in the making of this rule and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 297 of the Economic Regulations (14 CFR Part 297) effective September 23, 1952, by adding thereto a new § 297.14 to read as follows:

§ 297.14 *Business name of air carrier.* On and after November 15, 1952, it shall be an express condition upon exercise of the privileges granted by this part and the letters of registration issued hereunder that the international air freight forwarder concerned, in holding out to the public and in performing air transportation services shall do so only in a name the use of which is authorized under the provisions of this section.

(a) Except as otherwise provided under paragraph (b) of this section, an international air freight forwarder may do business in the name in which its letter of registration is then issued and outstanding, including abbreviations, contractions, initial letters, or other minor variations of such name which are readily identifiable therewith.

(b) An international air freight forwarder may do business in such other and different name or names as the Board may by order permit, upon a finding that the use of such other name or names is not contrary to the public interest. Any such permission may be made conditional upon the abandonment of the use of the name in which its letter of registration is issued and outstanding, in air transportation service by the international air freight forwarder concerned, or otherwise be made subject to such reasonable terms and conditions as the Board may find necessary to protect the public interest.

(c) Slogans shall not be considered names for the purposes of this section, and their use is not restricted hereby.

(d) Neither the provisions of this section nor the grant of a permission hereunder shall be deemed to constitute a finding for purposes other than for this section, or to effect a waiver of, or exemption from, any provisions of the Civil Aeronautics Act, or any orders, rules, or regulations issued thereunder.

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply secs. 411, 416; 52 Stat. 1004, as amended; 49 U. S. C. 491, 496)

By the Civil Aeronautics Board.

[Regs., Serial No. ER-182]

PART 298—CLASSIFICATION AND EXEMPTION OF AIR TAXI OPERATORS

BUSINESS NAME OF AIR CARRIER

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 19th day of August 1952.

At the present time the Economic Regulations of the Board do not attempt to regulate the names under which air carriers do business. While a change in name by the holder of a certificate of public convenience and necessity has always been regarded by the Board as requiring an amendment to such certificate, there is no express requirement that the carrier do business under the exact name in which its economic operating authority is issued. The Board possesses the power, pursuant to section 411 of the Civil Aeronautics Act to require a carrier, after notice and hearing, to cease and desist from the use of a given name in cases where it finds that such use by the carrier concerned amounts to an unfair or deceptive practice or an unfair method of competition.

Until the relatively recent past there has been no need to make specific provision relating to the use of business names by air carriers since most carriers were in fact doing business under their official name without any compulsion to do so. However, there has been an increasing tendency, particularly among some of the large irregular carriers, to use names different from those in which operating authority is granted by the Board, in some cases the name being used having no identifiable relation to the name in which the authority is held. This has resulted in confusion in the minds of the public, an increase in the administrative burden of the Board, and greater difficulty in achieving adequate enforcement of the act and the regulations. The Board has received an increasingly large number of complaints from the public indicating that the complainant did not know the true identity of the carrier against which the complaint was being made. In several instances, it has been necessary to undertake considerable correspondence and even field investigations in order to identify the carrier responsible. Aircraft accidents have been reported in the press as having involved air carriers bearing names not registered with or even known to the Board. In at least one instance, a trade name of a carrier whose operating authority had been revoked for willful violation of the act was assumed by another carrier operated by the same management personnel as that of the carrier whose authority had been revoked.

Most important, the foregoing practices, combined with equally unstable identities among ticket agencies, have made it difficult, and in many instances impossible, for members of the traveling public to know the identity with whom they are doing business. This has had serious consequences both with respect to the business relationships involved and with respect to liability for injury or death of a passenger or other members of the public, or the loss of or damage to property.

The possibility of such abuse exists for every type of air carrier, irrespective of how its operations are authorized; and, even though the number of abuses has been relatively small, the Board believes that it should now take action to enable it to deal effectively with such abuses and to prevent their occurrence. For this reason it is adopting this regulation together with companion amendments to Parts 202, 203, 291, 292, 296, and 297 of the Economic Regulations. In so doing it is the intention of the Board to permit the greatest managerial discretion possible in the use of business names consistent with the objective of the regulation. Accordingly, the regulation permits use of abbreviations, initials, nicknames and other variations of the name on file with the Board without obtaining permission therefor and places no restrictions on the use of slogans. Moreover, in cases where the circumstances warrant such action, the Board may permit the use of two or more different names by one carrier upon a showing that such multiple use will not be contrary to the public interest. Permission granted under this part will not effect a formal change in name, but will merely constitute authority to use a different name.

It should also be noted that the restriction on the use of names does not become effective until 60 days after the effective date of the regulation. This 60-day period is designed to enable carriers which have developed goodwill in a name different from that in which their operating authority is held, to apply for and obtain permission to use such other name either exclusively or in conjunction with its official name. In cases where goodwill has been established in a name by use thereof, the Board will deny permission to continue such name only in cases where it believes that a violation of section 411 may be involved and such fact has been established after notice and opportunity for a hearing.

Interested persons have been afforded an opportunity to participate in the making of this rule and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 298 of the Economic Regulations (14 CFR Part 298) effective September 23, 1952, by adding thereto a new § 298.10 to read as follows:

§ 298.10 *Business name of air carrier.* On and after November 15, 1952, it shall be an express condition upon the operating authority granted by this part that the air carrier concerned, in holding out to the public and in performing air transportation services shall do so only in a name the use of which is authorized under the provisions of this section.

(a) Except as otherwise provided under paragraph (b) of this section, an air carrier may do business in the name in which its air carrier operating certificate is then issued and outstanding, including abbreviations, contractions, initial letters, or other minor variations of such name which are readily identifiable therewith.

(b) An air carrier may do business in such other and different name or names as the Board may by order permit, upon a finding that the use of such other name or names is not contrary to the public interest. Any such permission may be made conditional upon the abandonment of the use of the name in which its air carrier operating certificate is issued and outstanding in air transportation service by the air carrier concerned, or otherwise be made subject to such reasonable terms and conditions as the Board may find necessary to protect the public interest.

(c) Slogans shall not be considered names for the purposes of this section, and their use is not restricted hereby.

(d) Neither the provisions of this section nor the grant of a permission hereunder shall be deemed to constitute a finding for purposes other than for this section, or to effect a waiver of, or exemption from, any provisions of the Civil Aeronautics Act, or any orders, rules, or regulations issued thereunder.

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply secs. 411, 416; 52 Stat. 1004, as amended; 49 U. S. C. 491, 496)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 80]

PART 601—DESIGNATION OF CONTROL AREAS, CONTROL ZONES, AND REPORTING POINTS

ALTERATIONS

The control area alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to public interest and therefore is not required.

Part 601 is amended as follows:

1. Section 601.1295 is added to read:

§ 601.1295 *Control area extension (Falmouth, Mass.).* All that area within 5 miles either side of a direct line extending from the Otis Air Force Base, Falmouth, Mass., to the Martha's Vinyard Airport and the area within 5 miles either side of a line bearing 180° True from the Martha's Vinyard Airport extending from the airport to New York control area extension No. 1146, excluding the portion which overlaps danger areas.

2. Section 601.1296 is added to read:

§ 601.1296 *Control area extension (Nantucket, Mass.).* All that area within 5 miles either side of a direct line extending from the Nantucket VHF VAR radio range station to the Martha's Vinyard Airport.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective 0001 e. s. t. August 23, 1952.

TITLE 23—HIGHWAYS

Chapter I—Bureau of Public Roads, Department of Commerce

PART 1—REGULATIONS UNDER THE FEDERAL-AID ROAD ACT OF JULY 11, 1916, AS AMENDED AND SUPPLEMENTED

HIGHWAY PLANNING AND RESEARCH PROJECTS

Section 1.13 of the regulations under the Federal-Aid Road Act of July 11, 1916, as amended and supplemented, published and effective January 16, 1951, is hereby amended to read as follows, effective upon publication in the FEDERAL REGISTER:

§ 1.13 *Highway planning and research projects.* Each State highway department shall prepare and submit a detailed program of proposed engineering and economic investigations and highway research necessary in connection therewith, showing the amount of Federal and State funds proposed for expenditure on each item thereof. Subject to the approval and project agreement procedure provided for construction projects, not to exceed 1½ percent of the amount apportioned for any year to each State for expenditure on the Federal-aid primary highway system, the Federal-aid secondary highway system, and the Federal-aid primary highway system in urban areas, respectively, shall be used for highway planning and research projects, and the funds programed for such purposes may be pooled and administered as a single fund for the financing of the various items of work. Pending the submission and approval of the final detailed program, 1½ percent of the amount apportioned for any year to each State for expenditure on each of said Federal-aid systems shall be programed for highway planning and research projects.

(Sec. 18, 42 Stat. 216; 23 U. S. C. 19. Reorg. Plan 7 of 1949; 14 F. R. 5228, 63 Stat. 1070; 3 CFR, 1949 Supp., p. 140, 5 U. S. C. Sup., 133a-15 note. Interpret or apply sec. 8, 58 Stat. 842; 23 U. S. C. 61)

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter III—Office of Price Stabilization, Economic Stabilization Agency

[General Ceiling Price Regulation, Interpretation 56]

GENERAL CEILING PRICE REGULATION

INT. 56—PROPER CATEGORY FOR TIRES (SECTIONS 4 AND 5)

The question has arisen as to how tire manufacturers determine their ceiling prices under section 4 of the GCPR for new second line, low pressure passenger tires. Specifically, the question involves the determination of the category within which second line, low-pressure tires fall.

Section 4 defines "category" as a "group of commodities which are normally classed together in your industry for purposes of production, accounting or sales." The preponderance of available factual material, coupled with the recommendation of the Tire and Tube Manufacturers' Industry Advisory Committee, impels the conclusion that the proper category for such tires is "all replacement passenger car tires."

Consideration was given to the propriety of a category of broader scope, such as "all passenger tires and tubes", as well as to categories of narrower scope, based upon pressures, or price lines, or sizes. Industry practices, however, as shown by production records, accounting groupings, and sales policies, clearly do not justify breaking down the category of all replacement passenger car tires into several categories based on pressures or sizes alone.

Wholesalers and retailers establishing ceiling prices for these new, second line, low pressure tires under section 5 of the GCPR must use "all replacement passenger car tires" as the proper category in accordance with the above.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

HERBERT N. MALETZ, *Chief Counsel, Office of Price Stabilization.*

AUGUST 26, 1952.

[F. R. Doc. 52-9503; Filed, Aug. 26, 1952; 11:55 a. m.]

[General Ceiling Price Regulation, Interpretation 57]

GENERAL CEILING PRICE REGULATION

INT. 57—"MOST NEARLY LIKE" COMMODITY IN RELATION TO TIRES (SECTIONS 4 AND 5)

Interpretation 56 to the GCPR specifies that new, second-line, low pressure, passenger car tires fall within the category of "all replacement passenger car tires."

Having so determined the proper category, a manufacturer, in computing his ceiling prices for such new tire must eliminate from consideration as the proper comparison commodity all base period replacement passenger car tires which have the same or higher current unit direct costs than the particular new tire. Then from among the remaining base period replacement passenger car tires with lower current unit direct costs than the new tire, he must choose the one "most nearly like" the new tire.

To determine the "most nearly like" tire, a further process of elimination must be followed. Consideration should first be given to industry subgroupings, such as ply number, and price lines. Thus if the tire being priced is a 4 ply tire, the manufacturer should limit his consideration to 4 ply tires. Furthermore, if in addition to being 4 ply, the new tire is a second line tire, then to select the "most nearly like" tire, consideration should be confined to second line, 4 ply tires. Where there is more than one tire with lower current unit direct costs within the same subgroupings of plies and price lines as the new tire, but none is the same size tire as the new tire, then the "most nearly like" tire is that tire within both subgroupings which the new tire most nearly "replaces." For example, the second-line, 4 ply, low pressure 6.70–15 tire replaces the second line, 4 ply, standard pressure 6.00–16 tire in the sense that cars such as Ford, Chevrolet, and Plymouth which formerly used the 6.00–16 size now use the 6.70–15 size. Therefore where the second line, 4 ply, standard pressure 6.00–16 tire has a current unit direct cost which is lower than the current unit direct cost of the new 6.70–15 tire, it (the 6.00–16 tire) is the proper comparison commodity for the new, second line, 4 ply, low pressure 6.70–15 tire.

Wholesalers and retailers in establishing their ceiling prices for new second line low pressure tires must follow the same steps as outlined in the two paragraphs above for manufacturers.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

HERBERT N. MALETZ,
Chief Counsel,
Office of Price Stabilization.

Chapter IV—Salary and Wage Stabilization, Economic Stabilization Agency

Subchapter A—Salary Stabilization Board

[Interpretation 11, Revised]

INT. 11—NEW PLANTS (ARTICLE VIII OF GENERAL SALARY STABILIZATION REGULATION 1, AMENDED)

The purpose of this revision of Interpretation 11 is to provide for the substitution of appropriate section references in General Salary Stabilization Regulation 1, Amended, for the superseded provisions of previous general salary stabilization regulations and orders. The revision has been restricted to such substitutions and no changes in substance have been made in either the questions or answers of the interpretation.

1. Q. A corporation during 1951 was engaged in the manufacture of passenger cars and automotive parts. In the last part of 1951 it obtained contracts for the manufacture of automotive and aviation military equipment, and early in 1952 began using a substantial part of its plant and equipment for the manufacture of such military equipment. With very few exceptions, the same personnel was retained and very little new machinery was necessary in order to accomplish the partial shift to the manufacture of the new product. Has a new plant been established within the meaning of section 81 of General Salary Stabilization Regulation 1, Amended?

A. No. The shift in the product manufactured does not constitute the establishment of a new plant or the conversion of an existing plant into a new plant within the meaning of section 81 of General Salary Stabilization Regulation 1, Amended. There has been no substantial change in personnel or in the equipment or machinery of the plant. Any new positions which are necessary because of a partial shift in products would be established pursuant to section 63 of General Salary Stabilization Regulation 1, Amended.

2. Q. A corporation on February 15, 1951, began to manufacture a product not previously manufactured by it. For this purpose it converted one of its existing plants and installed a large quantity of new machinery. The manufacture of the new product required the hiring of new personnel for a considerable number of key positions. Does the converted plant constitute a new plant within the meaning of section 81 of General Salary Stabilization Regulation 1, Amended?

A. Yes. On January 25, 1951, the converted plant had not commenced the manufacture of the new product and there was a substantial shift to new kinds of machinery and production processes which had not been employed previously. Therefore, the operation of the converted plant required employment of a different type of personnel and the establishment of a different salary structure from that previously in effect in the plant.

For example, if a manufacturer of glass bottles were to convert some of his plant facilities to the manufacture of metal containers, the portion of the plant which is engaged in the manufacture of such metal containers would constitute a new plant.

3. Q. How are the salaries of persons employed in a plant converted to a new product, which constitutes a new plant, determined?

A. The salaries of such employees must be determined in accordance with the provisions of section 82 of General Salary Stabilization Regulation 1, Amended.

4. Q. X, the president of a corporation, forms a general partnership with Y, one of his employees, on April 1, 1951, as a separate business to distribute a line of merchandise not heretofore handled by the corporation. Certain of the employees of the corporation became employees of the partnership. How are their salaries to be determined?

A. In accordance with the provisions of section 82 of General Salary Stabilization Regulation 1, Amended. Since the new partnership was not on January 25, 1951, engaged in the business for which it was formed, it is a new plant.

5. Q. A, B, and C formed a partnership in December 1950 for the purpose of rendering services as engineering consultants. They did not have any clients until March 1951 and did not hire any employees until that time. Under which salary stabilization regulation must the salaries of their employees be determined?

A. Section 82 of General Salary Stabilization Regulation 1, Amended. Although the partnership was formed prior to January 25, 1951, it had not commenced to render services until after that date and, therefore, constitutes a new plant under section 81.

6. Q. Assume that, prior to January 25, 1951, the partnership referred to in question 5 had hired several employees subject to the jurisdiction of the Wage Stabilization Board and rendered services to clients before January 25, 1951. Subsequent to January 25, 1951, employees subject to the jurisdiction of the Salary Stabilization Board are hired. How are the salaries of these employees determined?

A. In accordance with section 63 of General Salary Stabilization Regulation 1, Amended. In this case the partnership had commenced operations before January 25, 1951, and is not a new plant under section 81 of General Salary Stabilization Regulation 1, Amended. To the extent that in this situation the setting of salaries for employees requires the establishment of a salary plan, an application may be required to be filed under section 71 (a) of General Salary Stabilization Regulation 1, Amended.

7. Q. A, B, and C form a corporation for the manufacture of a particular product. The corporation establishes salaries for A, B, and C as officers and for all other employees in accordance with the criteria for the determination of such salaries contained in section 82 of General Salary Stabilization Regulation 1, Amended. The corporation wishes to include a profit sharing bonus plan as part of the compensation to be paid to its employees. May this be done under section 82 of General Salary Stabilization Regulation 1, Amended?

A. Not without prior approval. Section 82 of General Salary Stabilization Regulation 1, Amended, permits the employer to establish schedules of salary rates for employees in a new plant which may be put into effect, in accordance with the provisions of section 83, 20 days after filing with the Office of Salary Stabilization unless disapproved within that period. Other compensation for employees in a new plant may be paid only upon actual prior approval of the Office of Salary Stabilization in accordance with the provisions of section 84 of General Salary Stabilization Regulation 1, Amended, and may not be put into effect under the provisions of section 83. However, for purposes of section 83, schedules of salary rates may include commission rates for sales employees covered by General Salary Stabilization Regulation 5.

8. Q. A new corporation was formed in October 1951 and the salaries of its employees were determined in accordance with the provisions of section 82 of General Salary Stabilization Regulation 1, Amended. May such employees receive any of the ten percent increase authorized under section 22 of General Salary Stabilization Regulation 1, Amended?

A. No. "New plants" are always plants which have come into existence since January 25, 1951. Therefore, it is presumed that the salary Schedule of a new plant, being based on current rates in the local labor market, always takes into account the ten percent increase authorized under section 22 of General Salary Stabilization Regulation 1, Amended.

9. Q. On June 1, 1951, an employer filed with the Office of Salary Stabilization a schedule of salary rates for a new plant, which he put into effect after three weeks in accordance with the provisions of section 83 (b) of General Salary Stabilization Regulation 1, Amended. May the employer thereafter disregard the schedule filed by him and file a substitute schedule of salary rates which he may put into effect, in accordance with the conditions of section 83 (b), three weeks after the date of filing with the Office of Salary Stabilization, if the Office has failed to act in the interim?

A. No. Since the employer filed a schedule of salary rates which has gone into effect under section 83, he is bound by such schedule and may not modify it except in accordance with applicable salary stabilization regulations or orders or with the prior approval of the Office of Salary Stabilization.

10. Q. A survey made by an employer who commenced operations in March 1951, indicates that the salaries currently paid by him in accordance with salary schedules originally established and approved under sections 82 and 83 of General Salary Stabilization Regulation 1, Amended, are below the salary levels of other employers in the same industry or area. What kind of relief is available to the employer?

A. The employer may apply for relief under section 42 of General Salary Stabilization Regulation 1, Amended, if he can show that an interplant inequity has been created since he established his salary schedules in March 1951.

11. Q. An employer opened a new plant on January 1, 1952, and three weeks after the date of filing his schedule of salary rates under section 83 of General Salary Stabilization Regulation 1, Amended, put the schedule into effect. Upon review by the Office of Salary Stabilization the schedule of salary rates was disapproved in part. Is the employer required to reduce his salary rates to the approved level?

A. Yes. Salary rates put into effect pursuant to sections 82 and 83 of General Salary Stabilization Regulation 1, Amended, are subject to disapproval and any employer putting into effect salary rates under sections 82 and 83 without the specific approval of the Office of Salary Stabilization must advise his employees that such salary rates are interim rates which are subject to approval and adjustment by the Office of Salary Stabilization for all payroll periods subsequent to the date of the employer's receipt of the ruling of partial disapproval.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Issued by the Office of Salary Stabilization August 21, 1952.

JOSEPH D. COOPER,
Executive Director.

[General Salary Stabilization Regulation 5, Amdt. 1]

GSSR 5—COMPENSATION OF SALES EMPLOYEES

ADJUSTMENTS IN COMMISSION EARNINGS AND COMMISSION RATES

STATEMENT OF CONSIDERATIONS

The experience of the Office of Salary Stabilization in administering General Salary Stabilization Regulation 5 has shown that adjustments authorized for sales employees compensated in whole or in part on a commission basis do not take adequately into account the special problems of such employees who have received no increase in their earnings since January 25, 1951. The Salary Stabilization Board has determined that such employees should be permitted to receive the benefit of general increases authorized for employees compensated on a straight salary basis, in a manner adapted to the commission form of compensation. This amendment permits appropriate adjustments for employees compensated through commissions on a basis paralleling that for adjustments authorized for employees compensated by salaries.

Under certain circumstances it may be necessary to adjust commission rates and this amendment also makes provision for applications to adjust commission rates.

In addition, the amendment provides that adjustments in the compensation paid driver salesmen shall be made pursuant to General Wage Regulation 20, thereby continuing in effect the regulatory provisions applicable prior to July 1, 1952. These employees who have been transferred to the jurisdiction of the Wage Stabilization Board (16 F. R. 12916), were again placed under the jurisdiction of the Salary Stabilization Board by section 403 (c) of the Defense Production Act of 1950, as amended by the Defense Production Act Amendments of 1952.

In the formulation of this regulation due consideration has been given to the standards and procedures set forth in Titles IV and VII of the Defense Production Act, as amended; there has been consultation with industry and sales representatives, and consideration has been given to their recommendations.

AMENDATORY PROVISIONS

1. Section 1 of General Salary Stabilization Regulation 5 is amended to read as follows:

SECTION 1. *Scope of this regulation.* This regulation applies to employees subject to the jurisdiction of the Salary Stabilization Board (a) who are employed in the capacity of "outside salesmen" as that term is defined in regulations under section 13 (a) of the Fair Labor Standards Act, as amended, or (b) who receive compensation in the form of commissions on sales or business transactions as distinguished from bonuses within the scope of General Salary Stabilization Regulation 2. All such employees are referred to in this regulation as "sales employees."

2. Section 5 (a) of General Salary Stabilization Regulation 5 is amended to read as follows:

SEC. 5. *Sales employees compensated on a straight commission basis.* (a) Variations in earnings of individual sales employees resulting from the normal operation of a plan or practice in effect on January 25, 1951, for the payment of commissions on sales or other business transactions are permissible, provided that such earnings shall not be increased as the result of a change, subsequent to January 25, 1951, in the commission rate or in the method or formula for the computation of such commissions not previously approved by the Office of Salary Stabilization.

3. General Salary Stabilization Regulation 5 is amended by deleting section 9 thereof and adding the following sections:

SEC. 9. *Adjustments of commission earnings.* (a) Notwithstanding any other provision of this regulation, an employer may, during the calendar year 1952, make adjustments in the compensation paid to employees compensated in whole or in part on a commission basis in an amount up to, but not exceeding, fifteen (15) percent of the aggregate commission payments made to all such employees during the calendar year 1950. Proportionate adjustments may be made for increases and shall be made for decreases in the number of employees compensated in whole or in part on a commission basis.

Adopted by the Salary Stabilization

are comprised, in whole or in part, of the

§ 96.12 *Evidence of performance to be submitted by air carriers.* Air car-

by law when no longer needed in conducting current business. (R. S. 3948,

At a session of the Federal Communications Commission held in its offices in

(b) The employer may distribute the adjustments in compensation authorized under paragraph (a) of this section in his discretion among such of his employees as are compensated in whole or in part on a commission basis. Such distribution may be based on sales or other measures of performance.

(c) Such adjustments shall be made as supplemental payments at such times as the employer may determine.

(d) In no event shall the adjustment authorized in this section be made through an increase in any commission rate.

SEC. 10. *Adjustments in the salaries and other compensation of driver salesmen.* (a) Notwithstanding any other provision of this regulation, adjustments in the salaries and other compensation of driver salesmen, as such term is used in section 541.505 of the Explanatory Bulletin, issued by the Wage and Hour and Public Contracts Divisions of the United States Department of Labor, to Regulations Part 541, shall be made in accordance with the provisions of General Wage Regulation 20 as presently in effect.

(b) Any application for approval of adjustments in salaries and other compensation of such driver salesmen required to be filed pursuant to General Wage Regulation 20 shall be filed with the Office of Salary Stabilization.

(c) Any employer granting adjustments in salaries or other compensation to such employees pursuant to this section shall comply with the applicable record keeping requirements of section 101 of General Salary Stabilization Regulation 1, Amended.

SEC. 11. *Applications for adjustments in certain commission rates and other compensation.* The Office of Salary Stabilization is authorized to approve applications for:

(a) Changes in commission rates of employees, compensated in whole or in part on a commission basis, *Provided*, That such changes conform to industry or area practice and are otherwise found by the Office of Salary Stabilization not to be unstabilizing;

(b) Adjustments in expense allowances or compensation to reflect an actual increase in the cost of the expense items required to be paid by sales employees;

(c) Adjustments to correct hardships or inequities in accordance with the purposes of this regulation.

SEC. 12. *Increases in commission rates not to justify price increases.* Adjustments in commission rates approved by the Office of Salary Stabilization shall not, except as otherwise provided by the Defense Production Act of 1950, as amended, furnish a basis either to increase, or to resist otherwise justifiable reductions in, price ceilings.

NOTE: The record keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

Adopted by the Salary Stabilization Board on July 22, 1952.

JUSTIN MILLER,
Chairman.

Approved: August 19, 1952.

ROGER L. PUTNAM,
Economic Stabilization Administrator.

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

MISCELLANEOUS AMENDMENTS

The following parts are amended as follows:

PART 4—ORDERS, CONTRACTS, AND BONDS

In § 4.5 *Employees interested in mail contracts* strike out paragraph (b), and add a Note to paragraph (a) to read as follows:

NOTE: See § 94.6 of this chapter as to authority of certain postmasters and employees to enter into contracts for mail messenger service.

(R. S. 131, 396; secs. 304, 309, 42 Stat. 24, 25; sec. 1, 39 Stat. 418; 43 Stat. 356; 66 Stat. 324, 325; 5 U. S. C. 22, 369, 39 U. S. C. 579)

PART 25—GENERAL PROVISIONS RELATING TO POST OFFICES

Amend § 25.7 *Holidays* to read as follows:

§ 25.7 *Holidays*—(a) *Days designated as.* See Executive Order No. 10358, dated June 9, 1952 (17 F. R. 5269) for holidays designated by the President, and see 5 U. S. C. 87, 87a, 87b, and 39 U. S. C. 119 for statutory provisions with respect to holidays.

(b) *Service on.* On the holidays specified in Executive Order No. 10358 dated June 9, 1952, post offices shall render window service such length of time as may be necessary to meet the reasonable postal requirements of the public. Mails shall be made up and dispatched on such holidays as on other week days.

(R. S. 131, 396, secs. 304, 309, 42 Stat. 24, 25; 5 U. S. C. 22, 369)

PART 35—PROVISIONS APPLICABLE TO THE SEVERAL CLASSES OF MAIL MATTER

In § 35.13 *Nonmailable articles and compositions* make the following changes:

Amend paragraph (a) by inserting before the undesignated paragraph reading "All spirituous, vinous, malted, fermented, or other intoxicating liquors of any kind are nonmailable and shall not be deposited in or carried through the mails.", a new undesignated paragraph to read:

The transmission in the mails of poisons for scientific use, and which are not outwardly dangerous or of their own force dangerous or injurious to life, health, or property, may be limited by the Postmaster General to shipments of such articles between the manufacturers thereof, dealers therein, bona fide research or experimental scientific laboratories, and such other persons who are employees of the Federal, a State, or local government, whose official duties are comprised, in whole or in part, of the use of such poisons, and who are designated by the head of the agency in which they are employed to receive or send such articles, under such rules and regulations as the Postmaster General shall prescribe.

PART 92—TRANSPORTATION OF MAILS BY RAILROADS

Amend § 92.13 *Proof of performance of service* to read as follows:

§ 92.13 *Proof of performance of service.* Railroad companies carrying the mails shall submit, under the signature of a duly authorized official, when and in such form as may be required by the Postmaster General, evidence as to the performance of service. (Sec. 5, 39 Stat. 428, as amended; 39 U. S. C. 556)

PART 94—MAIL-MESSENGER SERVICE

In § 94.6 *Contracting for mail messenger service at third- and fourth-class offices* make the following changes:

1. Amend the headnote to § 94.6 to read: *Authority of certain postmasters and employees to contract for mail messenger service.*

2. Amend paragraph (a) to read as follows:

(a) *Limitation of pay.* In the discretion of the Postmaster General, postmasters, assistant postmasters, clerks, and rural carriers at post offices of the third and fourth class may enter into contracts for the performance of mail-messenger service, and allowance may be made therefor from the appropriations for mail-messenger service: *Provided*, That the Postmaster General shall determine that the performance of such contracts will not interfere with the regular duties of such employees or with the operations of the postal service. The total amount payable under such contract to any postmaster, assistant postmaster, clerk, or rural carrier shall not exceed $900 in any one year. Special-delivery messengers at post offices of all classes may enter into contracts for mail-messenger service. (Sec. 1, 39 Stat. 418, as amended; 39 U. S. C. 579)

3. Amend that part of paragraph (b) preceding the Note to read as follows:

(b) *Members of immediate families may contract.* Members of the immediate families of postmasters, assistant postmasters, clerks, and rural carriers at third- and fourth-class post offices may, in the discretion of the Postmaster General, enter into contracts for the performance of mail-messenger service provided the total amount paid under such contract shall not exceed $900 in any one fiscal year.

(R. S. 161, 396; secs. 304, 309, 42 Stat. 24, 25; sec. 1, 39 Stat. 418; 43 Stat. 356; 66 Stat. 324, 325; 5 U. S. C. 22, 369, 39 U. S. C. 579)

PART 96—AIR MAIL SERVICE

Amend § 96.12 *Evidence of performance to be submitted by air carriers* to read as follows:

§ 96.12 *Evidence of performance to be submitted by air carriers.* Air carriers transporting or handling United States Mail shall submit, under signature of a duly authorized official, when and in such form as may be required by the Postmaster General, evidence of the performance of mail service; and air carriers transporting or handling mails of foreign countries shall submit, under signature of a duly authorized official, when and in such form as may be required by the Postmaster General, evidence of the amount of such mails transported or handled, and the compensation payable and received therefor. (Sec. 405, 52 Stat. 994, as amended; 49 U. S. C. 485)

PART 97—STAR, STEAMSHIP, AND STEAMBOAT ROUTES, AND VEHICLE SERVICE IN CITIES

a. Amend § 97.15 *Proposals to be accompanied with bond* by striking out in the last sentence the words "oath of the bidder, taken before an officer qualified to administer oaths," and by inserting in lieu thereof the words "signed statement of the bidder".

b. Amend § 97.16 *Sureties on bonds of bidders* to read as follows:

§97.16 *Sureties on bonds of bidders.* Before the bond of a bidder (for carrying the mail) is approved, there shall be indorsed thereon the signed statements of the sureties therein that they are owners of real estate worth in the aggregate a sum double the amount of said bond, over and above all debts due and owing by them, and all judgements, mortgages, and executions against them, after allowing all exemptions of every character whatever. Accompanying said bond and as a part thereof, there shall be a series of interrogatories, in print or writing, to be prescribed by the Postmaster General, and answered by the sureties showing the amount of real estate owned by them, a brief description thereof, and its probable value, where it is situated, and in what county and State the record evidence of their title exists. If any surety shall knowingly and willfully submit a false statement under the provisions of this section he shall on conviction thereof, be punished as is provided by section 1001 of title 18, United States Code. (R. S. 3946, as amended; 39 U. S. C. 427)

c. Amend § 97.21 *Record of proposals* to read as follows:

§ 97.21 *Record of proposals.* The Postmaster General shall have recorded in a book to be kept for that purpose, a true and faithful abstract of all proposals made to him for carrying the mail, giving the name of the party offering, the terms of the offer, the sum to be paid and the time the contract is to continue; and he shall put on file and preserve the originals of all such proposals until disposed of as provided by law. The reports of the arrivals and departures of the mails on mail routes made and sent by postmasters to the Post Office Department, on which no fines or deductions from the pay of contractors for carrying the mails have been based, and the certificates taken by carriers on mail routes may be disposed of as provided by law when no longer needed in conducting current business. (R. S. 3948, as amended; 39 U. S. C. 428)

PART 125—MISCELLANEOUS

Amend § 125.4 *Vessels to deliver letters at post offices before entry* to read as follows:

§ 125.4 *Vessels to deliver letters at post offices before entry.* No vessel arriving within a port or collection district of the United States shall be allowed to make entry or break bulk until all letters on board are delivered to the nearest post office, except where waybilled for discharge at other ports in the United States at which the vessel is scheduled to call and the Postmaster General does not determine that unreasonable delay in the mails will occur, and the master or other person having charge or control thereof has signed and sworn to the following declaration before the collector or other proper customs officer:

I, A. B., master ----------, of the ----------, arriving from ----------, and now lying in the port of ----------, do solemnly swear (or affirm) that I have to the best of my knowledge and belief delivered to the post office at ---------- every letter and every bag, packet, or parcel of letters which was on board the said vessel during her last voyage, or which were in my possession or under my power or control, except where waybilled for discharge at other ports in the United States at which the said vessel is scheduled to call and which the Postmaster General has not determined will be unreasonably delayed by remaining on board the said vessel for delivery at such ports.

And any master or other person having charge or control of such vessel who shall break bulk before he has arranged for such delivery or onward carriage shall be fined not more than $100. (62 Stat. 777, as amended; 18 U. S. C. 1699)

PART 137—FIELD SERVICE

In § 137.28 *Interest of employees in postal contracts prohibited*, strike out paragraph (b) and add a note to paragraph (a) to read as follows:

NOTE: See § 94.6 of this chapter as to authority of certain postmasters and employees to enter into contracts for mail messenger service.

(R. S. 161, 396; sec. 1, 39 Stat. 418, 43 Stat. 356, secs. 304, 309, 42 Stat. 24, 25, 66 Stat. 324, 325; 5 U. S. C. 22, 369, 39 U. S. C. 579)

[SEAL] V. C. BURKE,
Acting Postmaster General.

[F. R. Doc. 52-9386; Filed, Aug. 26, 1952; 8:46 a. m.]

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

PART 12—AMATEUR RADIO SERVICE

MISCELLANEOUS AMENDMENTS

In the matter of amendment of Part 12, Amateur Radio Service, by changing the wording of § 12.91 (b) and adding a new section to the Appendix.

At a session of the Federal Communications Commission held in its offices in Washington, D. C., on the 20th day of August 1952;

The Commission having under consideration the matter of amendment of Part 12, Amateur Radio Service, to conform with the terms of a treaty concluded between the United States and the Dominion of Canada, which became effective May 15, 1952, and which permits the operation by citizens of either country of certain radio equipment or stations (including amateur radio stations) in the other country;

It appearing, that existing provisions of § 12.91 (b) require all amateur radio stations, when operated outside the continental limits of the United States, its territories or possessions, to be operated only in the amateur frequency band 28.0 to 29.7 Mc; whereas, under the terms of the afore-mentioned treaty operation of United States amateurs, while in the Dominion of Canada, will not be restricted to that frequency band;

It further appearing, that it is desirable to set forth in the appendix of Part 12 so much of the text of the aforementioned treaty as relates to the operation of amateur radio stations;

It further appearing, that this amendment is necessary to conform with the provisions of a treaty to which the United States is a party and notice and public procedure thereon as prescribed by section 4 (a) of the Administrative Procedure Act is unnecessary, and that the amendment would relieve a restriction and, hence, under the provisions of section 4 (c) of the same act it may be made effective immediately;

It is ordered, Under authority contained in sections 4 (i) and 303 (c) and (r) of the Communications Act of 1934, as amended, that Part 12 be and it hereby is amended, effective immediately, as set forth below.

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082; 47 U. S. C. 303)

Released: August 21, 1952.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

1. Amend § 12.91 (b) to read as follows:

§ 12.91 *Requirements for portable and mobile operation.* • • •

(b) Outside the continental limits of the United States, its territories or possessions, an amateur station may be operated as portable or mobile only in the amateur band 28.0 to 29.7 Mc except that within areas under the jurisdiction of a foreign government, operation is controlled by the laws of that government and the terms of any applicable treaty. (See Appendix 4 for such treaties or agreements as are in force and the pertinent terms thereof.) Whenever such portable or mobile operation is, or is likely to be, for a period in excess of 48 hours away from the continental limits of the United States, its territories, or possessions, the licensee shall give prior written notice to the Engineer-in-Charge of the radio inspec-

tion district in which the fixed transmitter site designated in the station license is located. Only one such notice shall be required during any continued absence from the continental limits of the United States, its territories, or possessions.

2. Amend the Appendix to Part 12 by adding the following:

APPENDIX 4

Convention Between the United States of America and Canada, Relating to the Operation by Citizens of Either Country of Certain Radio Equipment or Stations in the Other Country (Effective May 15, 1952)

ARTICLE III

It is agreed that persons holding appropriate amateur licenses issued by either country may operate their amateur stations in the territory of the other country under the following conditions:

(a) Each visiting amateur may be required to register and receive a permit before operating any amateur station licensed by his government.

(b) The visiting amateur will identify his station by:

(1) *Radiotelegraph operation.* The amateur call sign issued to him by the licensing country followed by a slant (/) sign and the amateur call sign prefix and call area number of the country he is visiting.

(2) *Radiotelephone operation.* The amateur call sign in English issued to him by the licensing country followed by the words, "fixed," "portable" or "mobile", as appropriate, and the amateur call sign prefix and call area number of the country he is visiting.

(c) Each amateur station shall indicate at least once during each contact with another station its geographical location as nearly as possible by city and state or city and province.

(d) In other respects the amateur station shall be operated in accordance with the laws and regulations of the country in which the station is temporarily located.

[F. R. Doc. 52-9408; Filed, Aug. 26, 1952; 8:48 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Production and Marketing Administration

[7 CFR Part 906]

[Docket No. AO-210-A2]

HANDLING OF MILK IN TULSA, OKLA., MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Tulsa, Oklahoma, on July 29-31, 1952, pursuant to notice thereof which was issued on July 9, 1952 (17 F. R. 6275).

The material issues of record related to proposals with respect to:

1. The amounts of the differentials to be added to the basic formula price of the order in determining prices for Class I milk, and a "supply-demand" adjustment of Class I milk prices;
2. Enlargement of the marketing area;
3. The allocation of certain receipts of other source milk in periods of short supply;
4. Location adjustments to handlers;
5. Classification of aerated products containing milk or cream;
6. The period to be used in determining bases for producers; and
7. The existence of an emergency.

The notice of hearing contained proposals that milk be priced on the basis of 3.5 per cent butterfat rather than 4.0 per cent, and that the maximum rate of assessment for administrative purposes be reduced. No testimony was offered at the hearing in support of such proposals.

Following the hearing both the producers and handlers represented at the hearing requested that immediate consideration be given and a decision arrived at with respect that portion of issue No. 1 related to the amount of the Class I differential for the months of September through December 1952, and with respect to issue No. 6. In their requests they waived the right to file written exceptions to a decision on these issues. This decision is concerned with these issues only. The remaining issues, including those related to the pricing of Class I milk for months after December 1952, will be decided in a further decision.

Findings and conclusions. 1. For the months of September through December 1952, the differential to be added to the basic formula price of the order in determining the price for Class I milk should be increased by 40 cents.

There is in prospect an acute shortage of milk supply for the Tulsa market during the coming months of September through December 1952. Milk sales in this market are expanding at a rapid rate at a time when severe drought conditions during recent months have brought about a critical situation for milk producers.

Sales of Class I milk in the months of May and June 1952 were approximately 11 per cent more than for the corresponding months of 1951. For July Class I sales were more than 20 per cent greater than for the corresponding month a year earlier.

The area in which milk is produced for the Tulsa market has been seriously affected by the drought conditions prevailing this summer. The drought, accompanied by sustained periods of excessive temperatures, has brought about a failure of pastures and has seriously reduced hay and forage crops upon which milk producers rely for feeding their herds. The Tulsa production area normally produces more hay and silage crops than is needed for feed in the area. Many milk producers, however, do not produce enough of such feeds for their own use and depend upon purchases from neighboring farmers. While there was a fairly good yield of hay from the first cutting of alfalfa in the area, demands from other areas also affected by drought caused this supply of hay to disappear rapidly at high prices. Yields from latter cuttings of alfalfa will be very low. Lespedeza, which is used by many milk producers for both hay and pasture, is reported to be a complete failure. Milk producers are now paying $4 to $5 per ton for corn silage standing in the field for which they normally pay $1 to $2, and there is little available. Hay prices have risen to $40 to $50 per ton for alfalfa hay and $25.00 per ton for prairie hay, and supplies are not available at these prices.

The Tulsa market required considerable amounts of supplemental milk during the past fall and winter season. While total milk production for the market in May was slightly over 6 percent and that for June almost 3 percent higher than a year earlier, these increases were considerably less than the corresponding increases in sales. For July milk receipts were 3 percent less than a year earlier in contrast to the 20 percent increase in sales noted above. Under normal production conditions the seasonal decreases in production and increases in sales that occur in the coming fall months would result in a shortage of milk under present supply conditions. With present prospects for milk production this shortage will be critical unless some price incentive is provided for dairymen to incur the costs necessary to continue milk production and avoid dispersal of producing herds. An increase of 40 cents per hundredweight in the price for Class I milk is the minimum which would appear to provide incentive to this end. This increase should be accomplished by providing that the Class I differential added to the basic formula price of the order be increased from $1.85 to $2.25 for the months of September through December 1952.

The record contained evidence on proposals for permanent changes in the provisions for pricing Class I milk without respect to present emergency conditions. Time for adequate consideration of such proposals will be afforded by making this action effective through December 1952.

2. The month of January should be added to the period for which the average deliveries by each producer establishes his base upon which payments are computed for milk delivered in the following months of April, May, and June; the minimum number of days used for such computation should continue to be ninety.

Under the present provisions of the order the total pounds of milk received from each producer during the months of September through December are divided by the total number of days, not to be less than ninety, of such producer's delivery in these months. The resulting figures is the daily average base of the producer and is used in computing payments for milk he delivers in the following April, May, and June.

It was proposed that this period be extended from four to five months by the inclusion of the month of January. January is normally a month of relatively short production, so that its inclusion in the base-forming period would be appropriate. Proponents of the proposal claimed that there would be greater incentive for new producers to enter the market in the short production season if the deliveries of such producers in January could count toward the present 90 day minimum period required for a producer to receive a base equal to his average daily deliveries. Under the proposal a new producer could enter the market by approximately November 1 and get full credit for his average daily deliveries.

It is concluded that the proposal should be adopted as a means of additional encouragement for new producers to enter the market during the months of short production. There was no opposition to this proposal except the suggestion that its effective data be postponed for a year. Current supply conditions on the market lead to the conclusion that it should be made effective at once.

4. The due and timely execution of the function of the Secretary under the act imperatively and unavoidably requires the omission of a recommended decision by the Assistant Administrator, Production and Marketing Administration, and the opportunity for exception thereto, on the above issues.

The conditions complained of are such that it is urgent that remedial action be taken as soon as possible. Delay beyond the minimum time required to make the attached order effective would defeat the purpose of such amendment. Accordingly, the time necessarily involved in the preparation, filing, and publication of a recommended decision, and exceptions thereto, would make such relief ineffective. The propriety of omitting the recommended decision and opportunity for filing exceptions thereto with respect to the proposals here considered was indicated in statements filed by the interested parties.

Rulings on proposed findings and conclusions. Briefs were filed on behalf of producers and handlers who would be subject to the proposed marketing agreement and order, as amended, and as hereby proposed to be further amended. The briefs contained suggested findings of fact, conclusions, and arguments with respect to the proposals discussed at the hearing. Every point covered in the briefs was carefully considered along with evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the suggested findings and conclusions contained in the briefs are inconsistent with the findings and conclusions contained herein, the requests to make such findings or to reach such findings or to reach such conclusions are denied on the basis of the facts found and stated in connection with the findings and conclusions in this decision.

General findings. (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which effect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and in the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

Determination of representative period. The month of July 1952 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order amending the order, as amended, regulating the handling of milk in the Tulsa, Oklahoma, marketing area in the manner set forth in the attached amending order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such order, as amended.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled "Marketing Agreement Regulating the Handling of Milk in the Tulsa, Oklahoma, Marketing Area," and "Order Amending the Order, as Amended, Regulating the Handling of Milk in the Tulsa, Oklahoma, Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order, as amended, and as hereby proposed to be further amended by the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 22d day of August 1952.

[SEAL] CHARLES F. BRANNAN,
Secretary of Agriculture.

Order[1] Amending the Order, as Amended, Regulating the Handling of Milk in the Tulsa, Oklahoma, Marketing Area

§ 906.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Tulsa, Oklahoma, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the Tulsa, Oklahoma, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. In § 906.51 (a) change the period at the end of the sentence to a colon and add *"And provided further,* That for the

months of September through December, 1952, the amount to be added to the basic formula price shall be $2.25 in lieu of $1.85."

2. Delete § 906.65 (a) and substitute therefor the following:

(a) Divide the total pounds of milk received by a handler(s) from such producer during the months of September through January immediately preceding by the number of days, not to be less than ninety, of such producer's delivery in such period.

DEPARTMENT OF COMMERCE

Patent Office

[37 CFR Parts 1, 100]

PATENT AND TRADE-MARK CASES

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the United States Patent Office proposes to amend certain rules and regulations relating to patents and trade-marks. The amendments are proposed to be issued pursuant to the authority contained in title 35, U. S. C., sections 6, 116, 119, 121, 141, 145, 146, as enacted July 19, 1952, Public Law 593, chapter 950, 66 Stat. 792, and other authority.

All persons who desire to submit written data, views, arguments or suggestions, for consideration in connection with the proposed amendments, are invited to forward the same to the Commissioner of Patents, Washington 25, D. C., on or before October 15, 1952. An oral hearing is not scheduled.

The text of the proposed amendments follows:

1. Section 1.6 (Patent Rule 6) is proposed to be amended by cancelling paragraph (d) and by changing paragraph (c) to read as follows:

(c) In addition to being mailed or delivered by hand during office hours, letters and other papers may be deposited up to midnight in a box provided at the guard's desk at the 14th and E Street entrance of the Patent Office on weekdays except Saturdays and holidays, and all papers deposited therein are considered as received in the Patent Office on the day of deposit.

2. Section 1.7 (Patent Rule 7) is proposed to be amended by changing the second sentence to read: "When the day, or the last day, fixed by statute or by or under these rules for taking any action or paying any fee falls on Saturday, Sunday, or on a holiday within the District of Columbia, the action may be taken, or the fee paid, on the next succeeding day which is not a Saturday, Sunday, or a holiday."

3. Section 1.21 (Patent Rule 21) is proposed to be amended by:

a. Adding the following line to Item 4:

For each claim in excess of twenty and also in excess of the number of claims in the original patent------	1.00

b. Changing "15" to "25" in Item 7.

c. Changing ".50" to "1.00" in Item 9.

d. Changing ".50" to "1.00", both occurrances, in Item 14.

e. Adding new Item 31 reading as follows:

31. For certificate of correction of applicant's mistake----------	10.00

4. Section 1.41 (Patent Rule 41) is proposed to be amended to read as follows:

§ 1.41 *Applicant for patent.* (a) A patent must be applied for and the application papers must be signed and the necessary oath executed by the actual inventor in all cases, except as provided by §§ 1.42, 1.43, and 1.47. See § 1.147.

(b) Unless the contrary is indicated, the word "applicant" when used in this part refers to the inventor, joint inventors who have applied for a patent, or to the person mentioned in §§ 1.42, 1.43 or 1.47 who has applied for a patent in place of the inventor.

5. Section 1.43 (Patent Rule 43) is proposed to be amended to read as follows:

§ 1.43 *When the inventor is insane or legally incapacitated.* In case an inventor is insane or otherwise legally incapacitated, the legal representative of such inventor may sign the application papers and make the necessary oath, and apply for and obtain the patent.

6. Section 1.44 (Patent Rule 44) is proposed to be amended to read as follows:

§ 1.44 *Proof of authority.* In the cases mentioned in §§ 1.42 and 1.43, proof of the power or authority of the legal representative must be recorded in the Patent Office before the grant of a patent.

7. Section 1.45 (Patent Rule 45) is proposed to be amended by adding the following paragraph:

(c) If an application for patent has been made through error and without any deceptive intention by less than all the actual joint inventors, the application may be amended to include all the joint inventors upon filing a statement of the facts verified by, and an oath as required by § 1.65 executed by, all the actual joint inventors, provided the amendment is diligently made.

8. Section 1.46 (Patent Rule 46) is proposed to be amended to read as follows:

§ 1.46 *Assigned inventions and patents.* In case the whole or a part interest in the invention or in the patent to be issued is assigned, the application must still be made by the inventor or one of the persons mentioned in §§ 1.42, 1.43 or 1.47.

9. Section 1.47 (Patent Rule 47) is proposed to be amended to read as follows:

§ 1.47 *Filing by other than inventor.* (a) If a joint inventor refuses to join in an application for patent or cannot be found or reached after diligent effort, the application may be made by the other inventor on behalf of himself and the omitted inventor. Such application must be accompanied by proof of the pertinent facts and must state the last known address of the omitted inventor. The Patent Office shall forward notice of the filing of the application to the omitted inventor at said address. Should such notice be returned to the Office undelivered, or should the address of the omitted inventor be unknown, notice of the filing of the application shall be published in the Official Gazette. The omitted inventor may subsequently join in the application. If the omitted inventor is available but refuses to join in the application after notice has been given, the Office may refuse a patent on said application. A patent may be granted to the inventor making the application, subject to the same rights which the omitted inventor would have had if he had been joined.

(b) Whenever an inventor refuses to execute an application for patent, or cannot be found or reached after diligent effort, a person to whom the inventor has assigned or agreed in writing to assign the invention or who otherwise shows sufficient proprietary interest in the matter justifying such action may make application for patent on behalf of and as agent for the inventor. Such application must be accompanied by proof of the pertinent facts and a showing that such action is necessary to preserve the rights of the parties or to prevent irreparable damage, and must state the last known address of the inventor. The assignment, written agreement to assign or other evidence of proprietary interest must be recorded in the Patent Office at the time of filing the application. The Office shall forward notice of the filing of the application to the inventor at the address stated in the application. Should such notice be returned to the Office undelivered, or should the address of the inventor be unknown, notice of the filing of the application shall be published in the Official Gazette. The inventor may subsequently join in the application. If the inventor is available but refuses to join in the application after notice has been given, the Office may refuse a patent on said application; otherwise a patent may be granted to the inventor.

10. Section 1.55 (Patent Rule 55) is proposed to be amended by adding the following paragraph:

The benefit of the filing date of a prior application filed in a foreign country may be obtained under the conditions specified in 35 U. S. C. 119. The certified copy of the original foreign application specified in the second paragraph of 35 U. S. C. 119 must be filed within six months from the date of the first Office action or within the time specified in § 1.224. If there is no first Office action other than a notice of allowance the copy must be filed at the time or before the final fee is paid. If the papers filed are not in the English language they must be accompanied in all cases by a sworn translation or a translation certified as accurate by a sworn or official translator. In any case allowed prior to January 1, 1953, the required papers may be filed at any time prior to the issuance of the patent and the translation is not required.

11. Section 1.57 (Patent Rule 57) is proposed to be amended by substituting the following for the first sentence: "The application must be signed by the applicant in person. The signature to the oath will be accepted as the signature to the application provided the oath is attached to and refers to the petition, specification and claim to which it applies."

12. Section 1.58 (Patent Rule 58) is proposed to be cancelled.

13. Section 1.61 (Patent Rule 61) is proposed to be amended by cancelling paragraph (c) and amending paragraph (a) to read as follows:

(a) The petition must be addressed to the Commissioner of Patents and request the grant of a patent. The residence, and post office address of the petitioner must appear in the petition if not stated elsewhere in the application. The petition need not be separately signed when part of and attached to the complete application papers, otherwise it must be signed by the petitioner.

14. Section 1.65 (Patent Rule 65) is proposed to be amended by cancelling paragraph (d) and amending paragraphs (a) and (b) to read as follows:

(a) The applicant, if the inventor, must make oath or affirmation that he does verily believe himself to be the original and first inventor or discoverer of the process, machine, manufacture, composition of matter or improvement thereof, for which he solicits a patent; that he does not know and does not believe that the same was ever known or used before his invention or discovery thereof, and shall state of what country he is a citizen and where he resides, and whether he is a sole or joint inventor of the invention claimed in his application. In every original application the applicant must distinctly state under oath that to the best of his knowledge and belief the invention has not been in public use or on sale in the United States for more than one year prior to his application, or patented or described in any printed publication in any country before his invention or more than one year prior to his application, or patented in any foreign country prior to the date of his application on an application filed by himself or his legal representatives or assigns more than twelve months prior to his application in this country. If any application for patent has been filed in any foreign country by the applicant in this country, or by his legal representatives or assigns, prior to his application in this country, he shall state the country or countries in which such application has been filed, giving the date of such application, and shall also state that no application has been filed in any other country or countries than those mentioned. In the case of the first filed foreign application and each foreign application filed more than twelve months prior to the application in this country the day, month and year of filing must be given. If no application for patent has been filed in any foreign country, he shall so state. This oath must be subscribed to by the affiant.

(b) If the application is made as provided in §§ 1.42, 1.43 or 1.47, the oath shall state the relationship of the affiant to the inventor and, upon information and belief, the facts which the inventor is required by this rule to make oath to.

15. Section 1.66 (Patent Rule 66) is proposed to be amended by changing the first sentence to read as follows: "The oath or affirmation may be made before any person within the United States authorized by law to administer oaths, or, when made in a foreign country, before any diplomatic or consular officer of the United States authorized to administer oaths, or before any officer having an official seal and authorized to administer oaths in the foreign country in which the applicant may be, whose authority shall be proved by a certificate of a diplomatic or consular officer of the United States, the oath being attested in all cases in this and other countries, by the proper official seal of the officer before whom the oath or affirmation is made. Such oath or affirmation shall be valid as to execution if it complies with the laws of the state or country where made."

16. Section 1.76 (Patent Rule 76) is proposed to be amended to read as follows:

§ 1.76 *Signature to the specification.* The specification and claim need not be signed when part of and attached to the complete application papers, otherwise they must be signed by the inventor in person. See § 1.57.

17. Section 1.78 (Patent Rule 78) is proposed to be amended by substituting for the first sentence: "When an applicant files an application claiming an invention disclosed in a prior filed copending application of the same applicant, the second application must contain a reference to the prior application, identifying it by serial number and filing date and indicating the relationship of the applications if the benefit of the filing date of the prior application is claimed. Prior applications of the same applicant disclosing an invention claimed must be referred to in a separate paper if there is no reference in the application itself."

18. Section 1.82 (Patent Rule 82) is proposed to be amended to read as follows:

§ 1.82 *Signatures to drawing.* Signatures are not required on the drawing if it accompanies and is referred to in the other papers of the application, otherwise the drawing must be signed by the applicant in person.

19. Section 1.84 (Patent Rule 84) is proposed to be amended by cancelling the words "in pencil" in paragraph (l) and by changing paragraph (h) to read:

(h) The signature of the applicant, if the drawing is signed, must be placed completely below the lower marginal line on each sheet; in any event the name of the inventor must be legibly written or printed below the lower marginal line on each sheet.

20. Section 1.93 (Patent Rule 93) is proposed to be amended to read as follows:

§ 1.93 *Specimens.* When the invention relates to a composition of matter, the applicant may be required to furnish specimens of the composition, or of its ingredients or intermediates, for the purpose of inspection or experiment.

21. Section 1.141 (Patent Rule 141) is proposed to be amended by cancelling from the beginning of the section up to the word "more" and substituting: "Two or more independent and distinct inventions may not be claimed in one application, except that."

22. Section 1.142 (Patent Rule 142) is proposed to be amended by changing paragraph (a) to read as follows:

(a) If two or more independent and distinct inventions are claimed in a single application, the examiner in his action shall require the applicant in his response to that action to elect that invention to which his claims shall be restricted, this official action being called a requirement for division. If the divisibility of the inventions be clear, such requirement will be made before any action on the merits; however, it may be made at any time before final action in the case, at the discretion of the examiner.

23. Section 1.143 (Patent Rule 143) is proposed to be amended by cancelling paragraph (b) and adding the following sentence to the first paragraph: "The requirement for division will be reconsidered on such a request."

24. Section 1.144 (Patent Rule 144) is proposed to be amended to read as follows:

§ 1.144 *Petition from requirement for division.* After a final requirement for division the applicant, in addition to making any response due on the remainder of the action, pay petition to the Commissioner from the requirement. Petition may be deferred until after final action on or allowance of the claims to the invention elected. Petition may not be taken if reconsideration of the requirement was not requested. See § 1.181.

25. Section 1.145 (Patent Rule 145) is proposed to be amended by cancelling the last sentence.

26. Section 1.172 (Patent Rule 172) is proposed to be amended by changing the first paragraph to read as follows: "Reissue applications must be signed and sworn to by the inventors except as otherwise provided (see §§ 1.142, 1.143, and 1.147), and must be accompanied by the written assent of all assignees, if any, owning an undivided interest in the patent: *Provided, however,* That a reissue application may be made and sworn to by the assignee of the entire interest if the application does not seek to enlarge the scope of the claims of the original patent.

27. Section 1.175 (Patent Rule 175) is proposed to be amended by changing paragraphs (b), (c), (d) and (e) to read as follows:

(b) When it is claimed that such patent is so inoperative or invalid "by reason of a defective specification or drawing," particularly specifying such defects.

(c) When it is claimed that such patent is inoperative or invalid "by reason of the patentee claiming more or less than he had a right to claim in the patent," distinctly specifying the excess or insufficiency in the claims.

(d) Particularly specifying the errors relied upon, and how they arose or occurred.

(e) That said errors arose without any deceptive intention" on the part of the applicant.

28. Section 1.191 (Patent Rule 191) is proposed to be amended by cancelling "and every applicant who has been twice required to divide his application (§ 1.143)," in paragraph (a) and deleting "§§ 1.144 and" in paragraph (c).

29. Section 1.197 (Patent Rule 197) is proposed to be amended by cancelling paragraph (b) and adding the following two paragraphs as paragraphs (b) and (c).

(b) Any request or petition for rehearing or reconsideration must be filed within twenty days from the date of the decision.

(c) When an appeal is or stands dismissed, or when the time for appeal to the court or review by civil action (§ 1.303) has expired and no such appeal or civil action has been filed, proceedings in the application are considered terminated except in those applications in which claims stand allowed or in which the nature of the decision requires further action by the examiner. If an appeal to the court or a civil action has been filed, proceedings in the application are similarly considered terminated when the appeal or civil action is terminated.

30. Section 1.223 (Patent Rule 223) is proposed to be amended by changing the second sentence of paragraph (a) to read: "This includes joint applicants or patentees; a new preliminary statement will not be received in the event the application is amended or the patent is corrected to remove the names of those not inventors, nor will a preliminary statement alleging different dates be received if an application is amended or a patent is corrected to include a joint inventor, except by motion under § 1.222."

31. Section 1.224 (Patent Rule 224) is proposed to be amended by changing the second sentence to read: "If an earlier filed application in the United States is set forth in the preliminary statement, said earlier filed application cannot be relied upon unless the case in interference contains or is amended to contain a specific reference to the earlier filed application: *Provided*, That such a specific reference is not essential in patents granted prior to January 1, 1953. If a prior foreign application is set forth in the preliminary statement, said foreign application cannot be relied upon unless the necessary papers to prove a date of priority under 35 U. S. C. 119, as specified in § 1.55, are filed within three months, or within such extension of time as may be granted, from the filing of the preliminary statement, if they have not previously been filed."

32. Section 1.226 (Patent Rule 226) is proposed to be amended by changing the second undesignated paragraph to read:

The notices will ordinarily specify the motion period (§ 1.231) and may also include an order to show cause (§ 1.225).

33. Section 1.233 (Patent Rule 233) is proposed to be amended by changing paragraph (b) to read:

(b) Such motions must, if possible, be made within the time set, but if a motion to dissolve the interference has been brought by another party, such motions may be made within thirty days from the filing of the motion to dissolve. In case of action by the primary examiner under § 1.237 (a), such motions may be made within thirty days from the date of the primary examiner's decision on motion wherein an action under § 1.237 (a) was incorporated or the date of the communication giving notice to the parties of the proposed dissolution of the interference.

34. Section 1.251 (Patent Rule 251) is proposed to be amended by changing paragraph (b) to read:

(b) The time for taking testimony will ordinarily be assigned in notices sent to the parties after motions under §§ 1.232 to 1.235 have been determined or, if no such motions have been filed, after the close of the motion period (§ 1.231). The date for final hearing will ordinarily be set in the same notices.

35. Section 1.256 (Patent Rule 256) is proposed to be amended by changing paragraph (c) to read:

(c) Petitions for rehearings or modification of the decision must be filed within twenty days from the date of the decision.

36. Section 1.263 (Patent Rule 263) is proposed to be amended to read as follows:

§ 1.263 *Statutory disclaimer by patentee.* The disclaimer referred to in §1.262, when made by a patentee in interference is not a disclaimer under 35 U. S. C. 253. If a disclaimer under the statute, see § 1.321, cancelling claims involved in the interference from the patent, is made by the patentee, including all assignees as shown by the records of the Patent Office, the interference will be dissolved pro forma as to such claims.

37. Section 1.302 (Patent Rule 302) is proposed to be amended by changing paragraph (a) to read as follows:

§ 1.302 *Notice and reasons of appeal.* (a) When an appeal is taken to the U. S. Court of Customs and Patent Appeals, the appellant shall give notice thereof to the Commissioner, and file in the Patent Office, within the time specified in § 1.304, his reasons of appeal specifically set forth in writing.

38. A new § 1.304 (Patent Rule 304) is proposed, reading as follows:

§ 1.304 *Time for appeal or civil action.* (a) The time for filing the notice and reasons of appeal to the U. S. Court of Customs and Patent Appeals (§ 1.302) or for commencing a civil action (§ 1.303) is sixty days from the date of the decision of the Board of Appeals or the Board of Patent Interferences. If a petition for rehearing or reconsideration is filed within twenty days after the date of the decision of the Board of Appeals or Board of Patent Interferences, the time is extended to thirty days after action on the petition. No petition for rehearing or reconsideration filed more than twenty days after such decision, nor any proceedings on such petition shall operate to extend the period of sixty days provided in this section. If a defeated party to an interference has taken an appeal to the U. S. Court of Customs and Patent Appeals and an adverse party has filed notice that he elects to have all further proceedings conducted under 35 U. S. C. 146 (§ 1.303 (c)), the time for filing a civil action thereafter is specified in 35 U. S. C. 141.

(b) In the case of decisions of the Board of Appeals and Board of Patent Interferences, and decisions on appeal to the Commissioner in trade-mark cases, rendered prior to January 1, 1953, the time for appeal or for filing a civil action is the time specified in the statute and rules in effect immediately prior to January 1, 1953.

39. Section 1.305 (Patent Rule 305) is proposed to be amended by changing the section number to § 1.303 and the text to read:

§ 1.303 *Civil action under 35 U. S. C. 145, 146.* (a) Any applicant dissatisfied with the decision of the Board of Appeals, and any party dissatisfied with the decision of the Board of Patent Interferences, may, instead of appealing to the U. S. Court of Customs and Patent Appeals (§ 1.301), have remedy by civil action under 35 U. S. C. 145 and 146 respectively. Such civil action must be commenced within the time specified in § 1.304.

(b) If an applicant in an ex parte case has taken an appeal to the U. S. Court of Customs and Patent Appeals, he thereby waives his right to proceed under 35 U. S. C. 145.

(c) If a defeated party to an interference proceeding has taken an appeal to the U. S. Court of Customs and Patent Appeals, and any adverse party to the interference shall, within twenty days after the appellant shall have filed notice of the appeal to the court (§ 1.302), file notice with the Commissioner that he elects to have all further proceedings conducted as provided in 35 U. S. C. 146, certified copies of such notices will be transmitted to the U. S. Court of Customs and Patent Appeals for such action as may be necessary. The notice of election must be served as provided in § 1.248.

40. Section 1.314 (Patent Rule 314) is proposed to be amended by changing "one month" in the second sentence to "five weeks" and by changing "fourth" in the last sentence to "fifth".

41. Section 1.321 (Patent Rule 321) is proposed to be amended to read as follows:

§ 1.321 *Statutory disclaimer in patent.* (a) A disclaimer under 35 U. S. C. 253 must comply with the requirements of the statute and must also identify the patent and the claim or claims subject to the disclaimer, and be signed by the person making the disclaimer, who shall state therein the extent of his interest in the patent. Such disclaimers are not examined except as to formal matters, but a disclaimer observed not to be a disclaimer in fact may be refused, and the recording of a disclaimer does not indicate that it is considered by the Patent Office to be proper or valid or that the patent after disclaimer, or any claim thereof, is considered valid. A notice of the disclaimer is published in the Official Gazette and attached to the printed copies of the specification.

(b) In like manner any patentee or applicant may disclaim or dedicate to the public the entire term, or any terminal part of the term, of the patent granted or to be granted. (See § 1.21 for fee for disclaimer.)

42. Section 1.322 (Patent Rule 322) is proposed to be amended by cancelling ", with the consent of the patentee (or assignee of record, if any)", in paragraph (b).

43. Section 1.323 (Patent Rule 323) is proposed to be amended to read as follows:

§ 1.323 *Certificate of correction of applicant's mistake.* Whenever a mistake of a clerical or typographical nature or of minor character which was not the fault of the Office, appears in a patent and a showing is made that such mistakes occurred in good faith, the Commissioner may, upon payment of the required fee, issue a certificate of correction, which shall be endorsed on the patent itself, if the correction does not involve such changes in the patent as would constitute new matter or would require reexamination.

44. A new § 1.324 (Patent Rule 324) is proposed, reading as follows:

§ 1.324 *Correction of error in joining inventor.* Whenever a patent is issued and it appears that there was a misjoinder or non-joinder of inventors and that such joinder or omission occurred by error and without deceptive intention, the Commissioner may, on application of all the parties and the assignees and proof of the facts, or on order of a court before which such matter is called in question, issue a certificate deleting the misjoined inventor from the patent or adding the non-joined inventor to the patent.

45. A new § 1.325 (Patent Rule 325) is proposed, reading as follows:

§ 1.325 *Other mistakes not corrected.* Mistakes other than those provided for in §§ 1.322, 1.323, and 1.324, and not affording legal grounds for reissue will not be corrected after the date of the patent.

46. Section 100.16 (Trade-Mark Rule 1.6) is proposed to be amended to read as follows:

§ 100.16 *Times for taking action; expiration on Saturday, Sunday or holiday.* Whenever periods of time are specified in this part in days, calendar days are intended unless otherwise indicated. When the day, or the last day, fixed by statute or by or under this part for taking any action or paying any fee falls on Saturday, Sunday, or on a holiday within the District of Columbia, the action may be taken, or the fee paid, on the next succeeding day which is not a Saturday, Sunday, or a holiday.

47. Sections 100.262 and 100.263 (Trade-Mark Rules 26.2 and 26.3) are proposed to be amended by adding the following paragraph to each:

Petition for rehearing or reconsideration must be filed within twenty days from the date of the decision.

48. Sections 1.13, 1.21, 1.42, 1.45, 1.67, 1.71, 1.75, 1.77, 1.84, 1.147, 1.154, 1.162, 1.164, 1.206, 1.207, 1.209, 1.216, 1.217, 1.226, 1.232, 1.233, 1.236, 1.241, 1.243, 1.247, 1.253, 1.254, 1.255, 1.256, 1.258, 1.259, 1.277, 1.282, 1.301, 1.311, 1.322, 1.331, 100.46, 100.264 (Patent Rules 13, 21, 42, 45, 67, 71, 75, 77, 84, 147, 154, 162, 164, 206, 207, 209, 216, 217, 226, 232, 233, 236, 241, 243, 247, 253, 254, 255, 256, 258, 259, 277, 282, 301, 311, 322, 331, Trade-Mark Rules 4.6, 26.4) are also proposed to be amended by changing citations of statutes to agree with the new patent act (Public Law 593, approved July 19, 1952, chapter 950, 66 Stat. 792), by changing references to other rules to agree with revisions in the rules, by changing words or phrases to agree with corresponding words or phrases as used in the new patent act, or by clarifying language in some instances.

[SEAL] JOHN A. MARZALL,
Commissioner of Patents.

Approved:

CHARLES SAWYER,
Secretary of Commerce.

NOTICES

DEPARTMENT OF JUSTICE

Office of the Attorney General

[Order No. 3229, Amdt.]

DISCLOSURE OR USE OF CONFIDENTIAL RECORDS AND INFORMATION

By virtue of the authority vested in me by section 161 of the Revised Statutes of the United States (5 U. S. C. 22) Order No. 3229 of the Attorney General dated May 2, 1939 (11 F. R. 4920), is hereby amended by adding at the end thereof the following paragraph:

This order shall extend to prohibit testimony except in the discretion of the Attorney General, or the Deputy Attorney General or an Assistant Attorney General acting for the Attorney General, by any former officer or employee of the Federal Bureau of Investigation in any court of law, divulging information obtained or received by such person solely by reason of his office or official position in such Bureau.

JAMES P. MCGRANERY,
The Attorney General.

CIVIL AERONAUTICS BOARD

[Public Notice PN 5, Amdt. 1]

CENTRAL AND FIELD ORGANIZATION

BUREAU OF SAFETY REGULATION

The Civil Aeronautics Board amends Public Notice PN 5, dated April 15, 1952, in order to conform with the current organizational structure, as follows:

By amending the entire section 5, "Bureau of Safety Regulation," to read as follows:

BUREAU OF SAFETY REGULATION

SEC. 5.1 *Director.* The office of the Director is responsible for directing and co-ordinating the three divisions which are engaged in the following primary activities: developing and recommending to the Board the adoption of new or revised Civil Air Regulations; making appropriate recommendations to the Board regarding international activities as reflected by the operation of the International Civil Aviation Organization; and making appropriate recommendations to the Board in regard to those matters considered by the Air Co-ordinating Committee and requiring Board action. The Bureau of Safety Regulation is composed of the following organizational units:

(a) Air Carrier Division.
(b) Airworthiness Division.
(c) General Rules Division.

SEC. 5.2 *Air Carrier Division.* The Air Carrier Division analyzes the need for and develops technical findings and recommendations governing the preparation of new regulations and amendments to existing regulations prescribing the minimum safety standards with respect to air carrier operations involving the certification of air carrier airmen, aircraft operational procedures, inspection and overhaul of aircraft, engines, propellers, and appliances, and air traffic rules; conducts technical research of transport-type aircraft, equipment, and operations, and studies current technological developments and aviation practices as a basis for formulating safety standards; and advises and assists the Board and other organizational units of the Board on any matter involving safety regulation of air carrier operations.

SEC. 5.3 *Airworthiness Division.* The Airworthiness Division analyzes the need for and develops technical findings and recommendations governing the preparation of new regulations and amend-

FEDERAL POWER COMMISSION

construction program; that GPU's con-

The application is available for public

ments to existing regulations prescribing the minimum design and performance safety standards for airworthiness certification of aircraft, engines, propellers, and appliances; conducts technical research of the airworthiness aspects of aircraft, equipment, and operations, and studies current technological developments and aviation practices as a basis for formulating safety standards; and advises and assists the Board and its organizational components on problems of an engineering nature.

SEC. 5.4 *General Rules Division.* The General Rules Division analyzes the need for and develops technical findings and recommendations governing the preparation of new regulations or amendments to existing regulations prescribing minimum safety standards which have general application to all phases of civil aviation such as: the certification of pilots (students, private, and commercial) mechanics, control tower operators, and parachute riggers, aircraft operational procedures, inspection and overhaul of aircraft, engines, propellers, and appliances, air traffic rules, airmen schools and repair stations, and the transportation of explosives and other dangerous articles; conducts technical research of nontransport-type aircraft, equipment, and operations, and studies current technological developments and aviation practices as a basis for formulating safety standards; and advises and assists the Board and its organizational components on matters relating to the general safety problems of operations, utilization of equipment, certification of airmen and air agencies.

SEC. 5.5 *Activities common to all divisions.* Each division, within its own area of specialization, participates in the development of related international standards as prescribed by the International Civil Aviation Organization and modifies United States standards and practices as may be necessary to conform to the international standards; represents the United States at meetings of the Technical Division of the International Civil Aviation Organization, Air Navigation Commission and at other meetings concerned with matters falling within the field of interest of the Board and within the technical competence of the Bureau of Safety Regulation and analyzes the results of these meetings and co-ordinates standards and recommends practices adopted by the International Civil Aviation Organization within the Civil Air Regulations; prepares the United States position on matters with which the Air Coordinating Committee is concerned and in which the Board has a primary interest and assists other divisions of the Air Coordinating Committee in preparation of the United States position on matters in which the Board has a secondary or indirect interest; and continually examines manuals and other related materials implementing the Civil Air Regulations to ensure their proper interpretation and application.

Effective date: June 27, 1952.

[SEAL] M. C. MULLIGAN,
Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 10193]

HEART OF THE BLACK HILLS STATION

ORDER CONTINUING HEARING

In re application of John Daniels, Eli Daniels and Harry Daniels d/b as the Heart of the Black Hills Station, Rapid City, South Dakota; for modification of construction permit; Docket No. 10193, File No. BMP-5661.

The Commission having under consideration a motion filed August 15, 1952, by John Daniels, Eli Daniels and Harry Daniels, doing business as the Heart of the Black Hills Station, Rapid City, South Dakota, for an indefinite continuance of the hearing on the above-entitled application now scheduled for September 22, 1952, in Washington, D. C.; and

It appearing that one of the issues in this proceeding relates to the coverage of the City of Rapid City, South Dakota; that applicant has now received permission from the Commission to take measurements from its present site to determine whether or not the city may be covered therefrom in accordance with the Standards or, if not, what portion of the city may be covered from that location; that these tests will be run in the next 60 days; that, if said tests establish that the conductivity is such that the city would be covered if the applicant operates as proposed at that location, the applicant will then file an application for reconsideration and grant; that, if the measurements which establish conductivity indicate that the city cannot be covered as required by the Standards, applicant will then seek another site and present an appropriate amendment therefor; that, in either event, a hearing on the application as presently scheduled would not conduce to the dispatch of the Commission's business or to the ends of justice and that additional time will be necesary to afford the applicant the opportunity to take said measurements and other steps as aforesaid and the applicant is unable to state specifically how much time would be required and has, therefore, requested an indefinite continuance; and

It appearing further that there are no other parties to this proceeding and that the Chief of the Broadcast Bureau of the Commission has no objection to a 90-day continuance of the hearing in this proceeding but objects to an indefinite continuance thereof; that, in view of the objections of the Broadcast Bureau to an indefinite continuance, movant has advised the Examiner that a 90-day continuance would be acceptable to applicant; that such a continuance of the hearing in this proceeding would conduce to the dispatch of the Commission's business and to the ends of justice;

It is ordered, This 15th day of August, 1952, that the motion for continuance is granted in part; and the hearing on the above-entitled application now scheduled for September 22, 1952, is continued to Monday, December 22, 1952.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
Acting Secretary.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-2918]

GENERAL PUBLIC UTILITIES CORP.

NOTICE OF PROPOSED CAPITAL CONTRIBUTION BY HOLDING COMPANY TO SUBSIDIARY

AUGUST 21, 1952.

Notice is hereby given that General Public Utilities Corporation ("GPU"), a registered holding company, has filed a declaration pursuant to the Public Utility Holding Company Act of 1935 ("the act"), designating section 12 (b) of the act and Rules U-23 and U-45 thereunder as applicable to the proposed transaction, which is summarized as follows:

GPU proposes to make a $200,000 cash capital contribution to its subsidiary Northern Pennsylvania Power Company ("North Penn"), which contribution will be credited by North Penn to the stated capital applicable to its common stock.

It is stated that this contribution will assist North Penn with its construction program; that in 1951 GPU made a similar cash contribution of $300,000; that later in 1952 or early in 1953 North Penn expects to issue approximately $500,000 principal amount of additional First Mortgage Bonds in furtherance of said construction program; that GPU's contributions aforesaid will supply the common capital component of the projected senior security financing.

Declarant states that no Commission other than this Commission has jurisdiction over the proposed transaction.

It is requested that the Commission's order become effective upon issuance.

Notice is further given that any interested person may, not later than September 8, 1952, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reason for such request, and the issues of fact or law, if any, raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date said declaration, as filed or as amended, may be permitted to become effective as provided by Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transaction as provided in Rule U-20 (a) and Rule U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

UNITED STATES TARIFF COMMISSION

[Investigation No. 18]

COTTON CARDING MACHINERY AND PARTS

NOTICE OF INVESTIGATION

The United States Tariff Commission, on the 21st day of August 1952 under the authority of section 7 of the Trade Agreements Extension Act of 1951, approved June 16, 1951, and section 332 of the Tariff Act of 1930, instituted an investigation to determine whether the products described below are, as a result in whole or in part of the duty or other customs treatment reflecting the concession granted on such products under the General Agreement on Tariffs and Trade, being imported into the United States in such increased quantities, either actual or relative, as to cause or threaten serious injury to the domestic industry producing like or directly competitive products.

Tariff Act of 1930:	*Description of products*
Par. 372	Textile machinery, finished or unfinished, not specially provided for: Cotton carding machinery.
	Parts, not specially provided for, wholly or in chief value of metal or porcelain, of cotton carding machinery.

Inspection of application. An application for an investigation under section 7 with respect to cotton carding machinery classifiable under paragraph 372 of the Tariff Act of 1930, as modified, was filed August 12, 1952, in behalf of the American Textile Machinery Association, Whitinsville, Massachusetts.

The application is available for public inspection at the office of the Secretary, United States Tariff Commission, 8th and E Streets, NW., Washington, D. C. and in the New York office of the Tariff Commission, located in Room 437 of the Custom House, where it may be read and copied by persons interested.

I certify that the above investigation was instituted by the Tariff Commission on the 21st day of August 1952.

Issued: August 22, 1952.

[SEAL] DONN N. BENT,
Secretary.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 27331]

OCEAN-RAIL CLASS RATES BETWEEN THE EAST AND THE SOUTHWEST

APPLICATION FOR RELIEF

AUGUST 22, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: C. W. Boin, Agent, for carriers parties to schedules listed below.

Involving: Class rates over ocean-rail routes on basis prescribed or approved in fourth supplemental report in docket 28300, decided May 19, 1952.

Between: North Atlantic ports and interior points in eastern seaboard territory, on the one hand, and New Orleans and Baton Rouge, La., Texas Gulf ports, and interior points in the Southwest, on the other.

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Schedules filed containing proposed rates: C. W. Boin, Agent, I. C. C. No. A-963; W. S. Jermain, Agent, I. C. C. Nos. 16 and 23; F. C. Kratzmeir, Agent, I. C. C. No. 4023; Newtex S. S. Corp., I. C. C. No. 38.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission, Division 2.

RUBBER TIRES FROM EASTHAMPTON, MASS., TO SOUTHERN TERRITORY

APPLICATION FOR RELIEF

AUGUST 22, 1952.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: I. N. Doe, Agent, for carriers parties to his tariff I. C. C. No. 610.

Commodities involved: Tires, artificial, guayule, natural, neoprene, or synthetic rubber, pneumatic and parts, carloads.

From: Easthampton, Mass.

To: Points in southern territory.

Grounds for relief: Rail competition, circuity, and to apply over short tariff routes rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: I. N. Doe, Agent, I. C. C. No. 610, Supp. 17.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. TITLE 7—AGRICULTURE

Chapter VII—Production and Marketing Administration (Agricultural Adjustment), Department of Agriculture

PART 702—AGRICULTURAL CONSERVATION PROGRAM; PUERTO RICO

SUBPART—1953

The United States Department of Agriculture is engaged in various activities to improve the soil and water resources of the farm lands in Puerto Rico. These include research, educational efforts, and technical and financial assistance as effective means of bringing about increased use of soil and water resources.

Conservation farming is the only effective method of using the farm land for achieving crop improvement and, at the same time, maintaining the productive capacity of the soil so as to assure the needed increased production for the future. The purpose of the 1953 Agricultural Conservation Program is to assist farmers in planning and carrying out conservation activities which will bring about increased agricultural production and development and better use of Puerto Rico's water resources.

INTRODUCTION

Sec.
702.300 Introduction.

CONTROL OF FUNDS

702.301 Maximum farm payment.
702.302 Adjustments.

DEVELOPMENT OF THE AGRICULTURAL CONSERVATION PROGRAM AND SELECTION OF PRACTICES

702.306 Development of the Agricultural Conservation Program.
702.307 Selection of practices.

CONSERVATION PRACTICES AND RATES OF ASSISTANCE

702.310 Conservation practices and rates of assistance.
702.311 Practice 1: Applying ground limestone, or its equivalent, to farm land, except to coffee groves and any land within sugarcane farms.
702.312 Practice 2: Applying superphosphate as such, or contained in mixed fertilizer having an available phosphoric acid content of not less than 6 percent, to the kinds of permanent pastures specified in § 702.317 (Practice 7), except pastures within sugarcane farms.
702.313 Practice 3: Applying potash as such, or contained in mixed fertilizer, to the kinds of permanent pastures specified in § 702.317 (Practice 7), except to pastures within sugarcane farms.
702.314 Practice 4: Applying to coffee trees fertilizer of grades containing not less than 10 units of available N and not less than 10 units of available P_2O_5.
702.315 Practice 5: Applying to farm land refuse from sugar mill grinding operations known as filter cake.
702.316 Practice 6: Planting sweetpotatoes as a cover crop immediately after tobacco is harvested.
702.317 Practice 7: Establishing permanent pastures by seeding, sodding, or sprigging adapted legumes and grasses, or other adapted forage plants.
702.318 Practice 8: Establishing a cover of tropical kudzu for soil building or erosion control.
702.319 Practice 9: Brushing pasture.
702.320 Practice 10: Constructing farm ponds or reservoirs to provide water for livestock or for irrigation purposes.
702.321 Practice 11: Planting fruit trees for erosion control.
702.322 Practice 12: Planting adapted trees or shrubs for windbreaks, gully control, and/or forest purposes.
702.323 Practice 13: Establishing stripcropping.
702.324 Practice 14: Establishing water disposal areas by constructing protected outlet channels or establishing permanent grasses or legumes in either natural waterways or in other predetermined locations for carrying runoff water from ditches or terrace systems.
702.325 Practice 15: Constructing continuous terraces for protection against erosion.
702.326 Practice 16: Establishing field diversion ditches to carry surface runoff water on land of 10 percent or more slope in coffee groves or planted to intertilled crops, except sugarcane, or for the protection of cultivated fields against the inflow of runoff water from other areas.
702.327 Practice 17: Constructing permanent open farm drainage ditches.
702.328 Practice 18: Establishing an adequate system of hillside ditches to carry surface runoff water from land of 10 percent up to 45 percent slope planted in intertilled crops, except sugarcane, and in orchards.

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended June 19, 1937.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Code of Federal Regulations

REVISED BOOKS

Title 32, containing the regulations of the Department of Defense and other related agencies has been completely revised and reissued as two books as follows:

Parts 1–699 ($5.00)

Part 700 to end ($5.25)

Title 32A, containing NPA, OPS, and other regulations under the Defense Production Act together with the amended text of the act and related Executive orders:

Chapter I to end ($6.50)

These books contain the full text of regulations in effect on December 31, 1951

Order from Superintendent of Documents, Government Printing Office, Washington 25, D. C.

AUTHORITY, AVAILABILITY OF FUNDS, AND APPLICABILITY

702.381 Authority.
702.382 Availability of funds.
702.383 Applicability.

AUTHORITY: §§ 702.300 to 702.383 issued under sec. 4, 49 Stat. 164; 16 U. S. C. 590d. Interpret or apply secs. 7–17, 49 Stat. 1148, as amended; 16 U. S. C. 590g–590q.

INTRODUCTION

§ 702.300 *Introduction.* Assistance will be given to farmers carrying out conservation practices under the 1953 Agricultural Conservation Program (referred to in this subpart as the 1953 program) in accordance with the provisions contained in this subpart and such modifications thereof as may hereafter be made.

CONTROL OF FUNDS

§ 702.301 *Maximum farm payment.* The maximum payment for a farm shall be equal to the value of all practices carried out on the farm in accordance with the specifications for such practices.

§ 702.302 *Adjustments.* If the total estimated practice earnings for all farms under the program exceed the funds available for assistance, assistance will be reduced equitably, except that payment will be made in full for fertilizer furnished by the ACP Branch under a purchase order for carrying out the practice contained in § 702.314.

DEVELOPMENT OF THE AGRICULTURAL CONSERVATION PROGRAM AND SELECTION OF PRACTICES

§ 702.306 *Development of the Agricultural Conservation Program.* The 1953 program was developed by the PMA State Office, the State Director of the Soil Conservation Service, and the Forest Service official having jurisdiction of farm forestry in Puerto Rico. The State Director of the Farmers Home Administration, the Director of the Agricultural Extension Service, and representatives of the Insular Department of Agriculture participated in the deliberations on the program. The program was recommended by the PMA State Office, the State Director of the Soil Conservation Service, and the Forest Service official having jurisdiction of farm forestry in Puerto Rico, and was approved by the ACP Branch.

§ 702.307 *Selection of practices.* Practices included in the 1953 program are only those which, by maintaining or increasing soil fertility, controlling and preventing soil erosion caused by wind or water, encouraging conservation and better agricultural use of water, conserving and increasing range and pasture forage, or conserving and improving farm woodland, contribute to increased or sustained production of needed agricultural commodities. The practices included are those which will not be carried out in the desired volume on the basis of conservation needs unless assistance is given therefor.

CONSERVATION PRACTICES AND RATES OF ASSISTANCE

§ 702.310 *Conservation practices and rates of assistance.* (a) This subpart contains a general description of the conservation practices of the 1953 program and the rates of assistance for the practices. Prior approval of the PMA State Office is required for the practices contained in §§ 702.319 to 702.331, and the approval must be given before the practice is carried out. Such approval shall be conditioned upon carrying out the practices under the supervision of persons who have been designated to be responsible for the practices.

(b) Of the permanent-type conservation practices authorized under this subpart, the Soil Conservation Service is responsible for the technical phases of the permanent-type practices contained in §§ 702.320, 702.321, 702.323 to 702.330. This responsibility shall include (1) a finding that the practice is needed and practical on the farm, (2) necessary site selection, other preliminary work, and lay-out work of the practice, (3) necessary supervision of the installation, and (4) certification of performance (or application of the practice to the land). The practices listed in this paragraph are not considered to be the only permanent-type practices under the program. However, it is hereby determined that they are the only practices in the 1953 program for which the Soil Conservation Service has been delegated responsibility for technical phases under Secretary's Memorandum 1276.

(c) The Forest Service is responsible for the technical phases of the practice contained in § 702.322. This responsibility shall include (1) providing necessary specialized technical assistance, (2) development of specifications for the practice, and (3) working through the PMA State Office, determining compliance in meeting these specifications.

(d) Where the farmer expresses a need for, or the PMA State Office believes that the farmer will need, technical assistance in connection with the carrying out of any practice other than those for which the responsibility for technical phases is delegated to the Soil Conservation Service or the Forest Service, the PMA State Office shall encourage the farmer to avail himself of the technical assistance available from the Soil Conservation Service, the Forest Service, the Extension Service, or any other Federal agency or State agency in position to supply such assistance.

(e) Payment will be made at the rates specified and within the limitations set forth in this subpart for carrying out during the calendar year 1953 any of the conservation practices in this subpart.

§ 702.311 *Practice 1: Applying ground limestone, or its equivalent, to farm land, except to coffee groves and any land within sugarcane farms.* (a) Payment for the tonnage of ground limestone applied per acre is conditioned on a pH determination of the soil as follows:

(1) If the determination shows a pH of 5.2 or less, payment will be made for the application of up to 2 tons per acre.

(2) If the determination shows a pH of more than 5.2, but not more than 5.8, payment will be made for the application of up to 1 ton per acre.

(3) If the determination shows a pH of more than 5.8, no payment will be made.
